with federal or non-federal stations operating from 420 to 450 MHz and those agencies using the Recon Scout must accept any interference received from all other spectrum users. In other words, as applied to ham radio operations, its users could not complain to the FCC if it received interference from any Amateur Service operations, but hams could complain if they were interfered with by operation of a Recon Scout.

On the plus side, the FCC did grant a request from the ARRL for changes in the labeling and instruction manual requirements of the Recon Scout. This, to insure that users of the device are aware of its limitations in regard to interference to its operation. As a result, Recon Scout transmitters delivered after April 15th are required to carry a warning on its product label and in its instruction manual basically stating that the Recon Scout must accept any interference received from federal or non-federal stations, including interference that may cause undesired operation.

The FCC Order also acknowledged that the ARRL was correct in arguing that the waiver was insufficient in that it did not waive applicable provisions of Section 2.106 of the Commission's Rules, which contains the Table of Allocations of frequency bands to the various radio services. The Commission's solution was to retroactively waive the Table of Allocations to the extent necessary to permit distribution and use of the Recon Scout.

For the Amateur Radio Newsline, I'm Bruce Tennant, K6PZW in Los Angeles

--

For those not aware, ReconRobotics bills itself as a world leader in tactical robotic systems. It claims that more than 1,200 of the company's robots have been deployed world-wide by the U.S. military and international friendly forces, federal, state and local law enforcement agencies, bomb squads and fire rescue teams. More about the company is on-line at www.reconrobotics.com. (FCC)

RESCUE RADIO: MAY GLOBAL SET CANCELLED

There will be only one Global Simulated Emergency Test or GlobalSET in 2011. Writing on the IARU Region 1 website, Greg Mossop, G0DUB, the IARU Region 1 Emergency Communications Coordinator says that the only GlobalSET will happen November 12th from 1100 to 1500 local time.

According to Mossop, the cancellation of additional GlobalSET's this year is due to work pressures on the organizer who has limited the time to prepare reports from earlier events and properly set up the needed activities for the now cancelled Simulated Emergency Test which had been slated to take place in May.

The Emergency Communications Coordinators for Regions 2 and 3 have been consulted on the cancellation of the May event. Thus far neither has voiced any objections to the change. (Southgate)

RESCUE RADIO: POST QUAKE HAM RADIO RELIEF EFFORTS CONTINUE IN JAPAN

Amateur radio relief operations are continuing to help with disaster recovery area struck by the worst earthquake in Japan in 140 years. We have more in this report from Amateur Radio Newsline's Norm Seeley, KI7UP:

--

Ken Yamamoto, JA1CJP, is the International Amateur Radio Union Region 3 Secretary. He reports that there are several stations on 7.030 and 7.043 MHz who are handling medium distance information exchanges, but the majority of ham radio operations appear to be on the VHF and UHF bands.

As previously reported here on Newsline, JA1RL the headquarters station of the Japan Amateur Radio League in Tokyo, became a disaster communication center in the days immediately following the giant killer quake. Yamamoto is quoted as saying that some 250 transceivers holding Japan Amateur Radio League licenses are being used for communications between various refugee camps and local government offices. He says that two sets of 430 MHz repeaters have been delivered to the disaster area. They are operational and being used to augment the existing repeater coverage and provide easier communications between those using the hand-held transceivers.

JA1CJP says that some towns are so heavily disrupted that the local government offices are also serving as refugee centers and the residents are staying in multiple locations. In such cases, amateur radio can contribute quite a lot in maintaining the ties between the local government and displaced residents.

The earthquake, now graded at nine on the Ritcher scale, and followed by a tsunami hit north-eastern Japan on March 11th. It has so far been blamed for over 13000 deaths and the destruction one of Japan's major nuclear power facilities. That plant near Fukushima is still the site of an intense campaign to bring several damaged reactors back under control and stop the leakage of radio active waste water into the ocean.

For the Amateur Radio Newsline, I'm Norm Seeley, KI7UP, watching the situation from Scottsdale, Arizona.

--

It's expected that the ongoing emergency communications being provided by amateur radio will continue for a considerable time to come. A presentation on the Japanese earthquake triple disaster and the role played in relief efforts by radio amateurs will be made at the 2011

Global Amateur Radio Emergency Communications Conference. It's slated for in Sun City, South Africa, in August. (VK3PC)

INTRUDER WATCH: BRAZILIAN FREEBANDERS HEARD ON 10 METERS

The IARU Region 1 Intruder Watch newsletter reports that Brazilian CB-like or so called Freeband stations using full carrier AM is now often audible between 28.000 and 28.305 MHz. Most of these stations are being heard in the evening hours. The report says that the Brazilian telecommunications regulator Anatal seems to have no interest in this problem or in keeping these stations from operating in the 10 meter Amateur Service band. (IARUMS -R1)

**

INTRUDER WATCH: MOROCCAN FISHING FLEET HEARD ON 15 METERS USB

And Ulrich Bihlmayer, DJ9KR, says that he has not only heard a Moroccan fishery operations on 21 MHz using upper sideband, but that he has also researched the matter and has found out the ship names and other details. The vessels in question are registered in Agadir, Morocco. DJ9KR has already informed the Moroccan Amateur Association of the situation. (IARUMS - R1)

RADIO RECORDS: UK LIGHT COMMUNICATIONS DISTANCE RECORD CHALLENGED

The optical distance record claimed in the U-K may not be a record after all. Amateur Radio Newsline's Frank Haas, KB4T, has more:

--

Since our light communications record claim story aired on last weeks newscast, we have received numerous e-mails and even a few phone calls that say the accomplishment in the U-K falls far short of other claimed distances set in elsewhere around the globe. In fact, the number of such claims far outweighs the space we have available to report them all.

But as pointed out by one of our listeners, the 90 kilometer distance claimed in the U-K is only about 56 miles and there are a number of well-documented communications over longer distances. This includes

one as early as 1962 in southern California. Another listener points out a more recent accomplishment over a 173 mile path.

But as another of our listeners also points out, there is really no official record-keeper of optical distance records. At least not here in the United States. This he says is partly because until very recently, the ARRL did not recognize non-coherent communications for contest purposes. Also, since the FCC does not claim to regulate communications above 400 GHz, some might question whether a QSO that does not require a license is really an amateur radio contact at all.

But the 90 kilometer contact we reported last week took place in the United Kingdom, and the way that light communications distance records are looked upon over there may be quite different than the way they are viewed on this side of the Atlantic, or the way that they are viewed elsewhere in the world.

For the Amateur Radio Newwsline, Im Frank Haas, KB4T, in Holly Hill Florida.

--

The bottom line: If hams are going to lay claim to optical distance records, then what is needed is an organization respected and accepted by all of the worlds ham radio community to corroborate any claims made, and to declare who has set a valid record and who has not. (ARNewsline from listener input)

**

RADIO LEGISLATION: CBO ESTIMATES THAT AR ENHANCEMENT ACT WOULD COST ABOUT $1,000,000

The Congressional Budget Office says that implementing the Amateur Radio Emergency Communications Enhancement Act, also known as S. 191, would cost about $1 million over the next five years. This, based on the fact that pay-as-you-go procedures do not apply to this legislation because it would not affect direct spending or revenues.

As written, the proposed legislation would direct the Department of Homeland Security to conduct a study on the uses and capabilities of the Amateur Radio Service during and after a disaster or emergency. The bill also would direct the Inspector General of the Department of Homeland Security to report to the Congress on the cost of grant programs operated by the Federal Emergency Management Agency and to what degree those programs provide duplicative or overlapping assistance.

The Congressional Budget Office estimates that based on similar past examinations, that the cost of producing both studies would be about $1 million in 2012. This, subject to the availability of appropriated funds. (Congressional release via WA6ILQ)

D-STAR CORNER: A CHANCE FOR YOUR CLUB TO GET AN ALMOST FREE D-STAR REPEATER

ICOM America Inc. has announced a two week D-Star Deployment promotion that could bring D-Star operation to your local ham radio community.

>From April 25th to May 9th, your radio club can purchase either a 2 meter or 70 centimeter D-Star repeater package direct from Icom America for only $3000 plus shipping costs and any applicable taxes. What you get for your $3000 is a D-Star controller, a 2 meter or 70 centimeter D-Star R-F module and the G2 D-Star Gateway Software package. These are the three essential building blocks needed to bring D-Star to your area. You supply the necessary peripherals such as an antenna, power supply, a high speed Internet connection and of course a site to hose the new D-Star machine.

But the best is yet to come. If you can meet a number of requirements within 90 days from the date of purchase, Icom will refund the original $3000 purchase price excluding the taxes and shipping costs. These requirements include installing the new D-Star repeater in permanent location that you must identify at the time of purchase. Also, the machine must be fully operational on the U-S ROOT trust server with Icom G2 Gateway Software and within the requirements outlined by the U-S ROOT Administration team; have a minimum of 10 users registered on the repeater and you must guarantee to keep the system on air for minimum of one full year from date of installation.

This program is limited to the first 70 qualifying clubs located in the certain priority areas. Also, your proposed system cannot be located within a 100 aeronautical mile radius an existing D-Star repeater already on the air.

To see if your club qualifies for this rather enticing offer, please send a club bio and an outline of how your new D-Star repeater will be used in your community to DSTAR.Promo@icomamerica.com. (ICOM America release)

HAMVENTION 2011: W5KUB TO AGAIN NETCAST FROM THE DAYTON HAMVENTION

Tom Medlin, W5KUB, says that he will one again be streaming live audio and video from the Dayton Hamvention. According to Tom, this will be the 9th year that he will be netcasting live on w5kub dot com beginning with his 550 mile ride from his home in Memphis, Tennessee, right to the Hamvention site at the Hara Arena in Dayton.

The W5KUB dot com webcast from Hamvention has become very popular over the years, especially with folks who have never attended Hamvention or have no way to get there. Tom tells Newsline that there are viewers are in over 150 countries and during the 2010 Dayton Hamvention broadcast, he had over 50,000 hams watch and follow us for the entire show.

And during this years netcast, Tom will also be giving away over $5000 in prizes to give lucky viewers. Some of the prize donors include Heil Sound, Kenwood, Yaesu, MFJ, Kantronics, LDG and the ARRL. That alone is something that you won't want to miss.

So if you cannot make it to Hamvetion 2011, you can attend vicariously from May 18th to the 22nd thanks to Tom Medlin, W5KUB, and his crew at W5KUB dot com. (W5KUB)

HAM HAPPENINGS: 2011 QCWA NATIONAL CONVENTION - SEPT 7 - 9

The QCWA 2011 National Convention this year will be held September 9th to the 11th at the Crowne Plaza Hotel at the Crossing, Warwick, Rhode Island. A partial list of presentations include QRP Made Easy by Steve Kercel, AA4AK. Al Coderman, W3ZD, will will present a history of his fathers ham radio operation from 1912 to 1985 while Phil Temples, K9HI will detail his volunteer work with the HandiHams Program. More about this gathering is on-line at www.qcwa.org/2011-convention.pdf. (QCWA)

**

HAM HAPPENINGS: ATLANTA RADIO CLUB TO TURN 100

And congratulations to the Atlanta Radio Club Announces which is celebrating its 100th Anniversary with a series of events. Among these is a joint special event operation on May 6th, 7th and 8th in conjunction with Coca-Cola's 125th anniversary. The call sign to be used will be K-Zero-K. Then on June 4th, the club will take part in the 82nd Atlanta Hamfest, where it will release its 100th Anniversary archive DVD. June 25th and 26th will see the club operating station W4DOC slash 100 during Field Day.

By way of background. the Atlanta Radio Club is a special service club affiliated with the American Radio Relay League and has operated continuously since 1911. Currently it is comprised of more than 150 licensed amateur radio operators with a mission to serve the community and advance the hobby. As part of these missions it provides more than 10 local repeaters. For more information on the club and the plans for its 100th anniversary celebration, please visit www.atlantaradioclub.org. (Atlanta Radio Club)

NAMES IN THE NEWS: NASA HONORS JSC FIRST FLIGHT DIRECTOR

NASA's first flight director says he regrets that the shuttle program is coming to an end because he believes it's the finest spacecraft ever built. Christopher C. Kraft said after a recent ceremony honoring him at the Johnson Space Center that he thinks space shuttles could be used for another 30 years and could take us to the moon or even Mars.

The 87 year-old Kraft was NASA's first flight director for human spaceflight and helped create the concept of Mission Control. He also

directed the Mercury and Gemini flights and was a part of the team that put men on the moon during the Apollo program. He went on to serve as director of Johnson Space Center from 1972 to 1982.

At the ceremony, the Johnson Space Center unveiled its new name for Mission Control. Its new designation is the Christopher C. Kraft Jr. Mission Control Center. (NASA)

HAM RADIO NEAR SPACE: PROJECT BLUE HORIZON ACROSS THE ATLANTIC

Yet another attempt to float a balloon carrying ham radio gear across the Atlantic may be taking place as we go to air. Project Blue Horizon, a multi-year effort to design, construct, and launch an amateur radio carrying balloon was expected to be launched on April 22nd at 03:30 U-T-C.

According to predictions posted at the Project Blure Horizon website, the balloon will leap skyward from near Oswego, New York and then follow the Jetstream out over the Atlantic. During the flight, radio amateurs around the world are being asked to monitor 7.1023 and 10.1466 MHz CW. It will also carry a GPS based APRS tracker outputting the call KC2ZJH on 144.390 MHz FM. The High Frequency downlink exact frequencies may vary up to 10 hertz or so with temperature and accurate recording of frequency will be useful.

Anyone hearing any of these three signals is asked to send reception reports of the balloon's progress by e-mail to PBH15.data(at) gmail (dot) com. More information about the program, including the latest projected flight path, can be found on-line at www.projectbluehorizon.com (KC2TUA, Project Blue Horizon, Southgate)

HAM RADIO IN SPACE: ARISSAT-1 GAGARIN COMMEMORATIVE A FAILURE

The planned operation of ARISSat-1 on April 11 and April 12 from inside the International Space Station as part of the commemoration of the 50th anniversary of Yuri Gagarin's flight was not successful. As of airtime, not one terrestrial station on the ground reported hearing transmissions on the ARISSat-1 downlinks of 145.950 MHz for FM analog or 145.920 MHz for digital.

The planned retransmission of the satellite's FM downlink via the Kenwood TM-D700 transceiver used for ARISS regular contacts was also not successful. This, as no reports were received of signals heard on 437.550 MHz. (ANS)

**

HAM RADIO IN SPACE: FASTRAC SATELLITES RECEIVE OSCAR DESIGNATIONS

The two newly launched University of Texas FASTRAC satellites now have OSCAR designations. According to Bill Tynan, W3XO, who issues the OSCAR titles, FASTRAC 1 is now FASTRAC OSCAR-69 while FASTRAC 2 has the honor of being renamed FASTRAC OSCAR-70. In making the OSCAR designations public, AMSAT-North America says that it is very pleased to welcome F Oh-69 and F Oh-70 into the family of amateur radio satellites. (ANS, W3XO)

**

DXCC: TWO OPERATIONS APPROVED FOR CREDIT

ARRL DXCC Manager Bill Moore, NC1L, reports that two operations on Tristan Da Cunha and Gough have been approved for DXCC credit. The two are the 2010 ZD9AH operation and the 2010 through 2011 ZD9T operation.

According to Moore, if you had these operations rejected in a recent application, please send an e-mail to the ARRL DXCC Desk. He also says that due to heavy e-mail volume, you may not receive a reply, however updates will be posted in Logbook of The World accounts as well as online on the daily listings. (ARRL DXCC)

DX

In DX, word that EI9FBB will be operational April 20th to the 22nd portable 3A from Monaco. Listen out for him mainly in the European afternoons. QSL direct to EI9FBB.

YL2GM will be active as from Azerbijon as 4K3AC between April 25th and May 3rd. Operation will be on all of the High Frequency bands using 100 atts and operating CW, SSB and RTTY. QSL via YL2GM.

The special calls 4X20HC and 4Z20HC have been aired over the past two months to celebrate the 20th Anniversary of the Holyland Contest in Israel. The calls will remain on the air until the end of April. This is a good opportunity for the prefix hunters to get a couple of new ones. QSL only via 4Z4TL.

M0DOL and M0NNH will be active as GB4RW on April 29th to celebrate the Royal Wedding of Prince William and Catherine Middleton. QSL via the information fund under GB4RW on QRZ.com.

Lastly, a group of Brazilian operators are off to the island of Mayotte where they plan to use the call TO2FH through April 25th. Operation is on all bands from 160 through 10 meters using SSB, CW, RTTY and PSK.

Plese do not send paper QSL's either direct or via the bureau. The only acceptable way to get your TO2FH QSL will be electronically via dxwatch dot com. Full QSL information in several languages is on the TO2FH page on QRZ.com.

THAT FINAL ITEM: GOODBYE TO WRL FOUNDER LEO MEYESON, W0GFQ

And finally this week we take a look back at the amazing life of a man who devoted most of his century on Earth to electronics and especially amateur radio. Bill Pasternak, WA6ITF, is here with the story of Leo I. Meyerson, W0GFQ:

--

In my 52 years as a ham, I only met Leo Meyerson, W0GFQ, twice. The first time was in the early 1960's at some radio store meet and greet -most likely in New York. The second time was at the 1997 Dayton Hamvention banquet where W0GFQ was honored with the prestigious Radio Amateur of the Year Award.

Yet in some ways its like he has been a close friend for years. That's because some of the best contacts I ever made on the air was with a Globe Scout 680A transmitter that came from the manufacturing plant of his famed World Radio Labs -better known in ham radio circles simply as W-R-L. But I do have several friends who knew him a lot better. In fact, one of them, Joe Eisenberg, K0NEB, of Lincoln, Nebraska, was lucky enough to have W0GFQ as a family friend and the person brought him into the hobby:

--

KONEB: "Leo was a close friend of my parents, and at the age of 7 I was introduced to ham radio when thet took me to his house and he sat me next to him and he made a couple of contacts on HF. Following that, a couple of days later my father took me to his store and factory at World Radio Labs in Council Bluffs which is right across the river from Omaha where I lived. And my dad purchased me a Hallicrafters S-120 general coverage receiver which Leo showed me how to use. And (also) one of those kits that makes several different devices by wiring

components to terminals. And that's how I kind of got started building kits.

"After that, every once in a while we would go back over there. My dad would find me more kits to build and we would talk to Leo more. And when I got older Leo got me registered and signed up for the Novice classes which were held in their factory where they built the Globe and later the Galaxy radios. And that's where I learned my CW.

"And during that time period I got to watch my very first HF radio being built step by step. Each week it would be further down the assembly line. At the very end of the class we bought that radio. It was a Galaxy GT 550."

--

According to Joe, Leo Meyerson was more than a radio manufacturer. He was in many ways an ultimate Elmer, especially to those just joining the hobby.

--

K0NEB: "Leo was always a very kind individual and very helpful. He always had suggestions and was always glad to show someone how to set their mic gain, how to tune up a radio properly, what to llok for, how to set up an antenna and all sorts of things. He was always willing to help new hams and get them started.

"And he was definitely my personal Elmer. He sat down with me for my very first Novice CW QSO and kind of walked me through the paces so I knew what to do."

--

Only a few weeks ago on February 24th, the Quarter Century Wireless Association hosted a 100th birthday celebration for Leo Meyerson at his winter residence near Palm Springs, California. One of those attending was film and TV producer Dave Bell, W6AQ, who shared this personal vignette of his encounter with W0GFQ, at that event:

--

W6AQ: "Well I've known of Leo Meyerson ever since I got into ham radio because his beaming face was in all of his ads for World Radio Labs in all of the magazines. And I desperately wanted to get a couple of his AM amplifiers back when I was young, but I couldn't afford them. And I told Leo that several times - and he just smiled."

--

Leo Meyerson, W0GFQ, was not only there at the dawning of the electronic communications age. He was quite literally one of the pioneers who made it happen and who also made it available to all of mankind. And in the process he lived to see telecommunications grow

from the age of spark gap transmitters and crystal receivers to the modern broadband systems we all enjoy today. It must have been truly exciting for him and he was a blessing to all of us.

Sleep well Leo. Your job is now complete.

I'm Bill Pasternak, WA6ITF

--

Leo Meyerson, W0GFQ, was laid to rest on Sunday, April 17th at the Temple Israel Cemetery Chapel in Omaha, Nebraska. The man may be gone, but the legacy he left behind will be a part of our service as long as any of us are left to sit down before a radio with a mic or key. (ARNewsline(tm))

**

NEWSCAST CLOSE

With thanks to Alan Labs, AMSAT, the ARRL, the CGC Communicator, CQ Magazine, the FCC, the Ohio Penn DX Bulletin, Radio Netherlands, Rain, the RSGB, the Southgate News and Australia's WIA News, that's all from the Amateur Radio Newsline(tm). Our e-mail address is Newsline (at) arnewsline (dot)org. More information is available at Amateur Radio Newsline's(tm) only official website located at www.arnewsline.org. You can also write to us or support us at Amateur Radio Newsline(tm), 28197 Robin Avenue, Santa Clarita California, 91350

And a reminder that the nominating period for the year 2011 Amateur Radio Newsline Young Ham of the Year Award is now open. Created by Newsline back in 1986, this award is offered to recognize one young United States or Canadian radio amateur age 18 or younger for his or her contributions to society through Amateur Radio.

As in years past, the 2011 recipient will receive an expense paid trip to the Huntsville Hamfest in Huntsville Alabama courtesy of Vertex-Standard Corporation which produces Yaesu brand amateur radio gear. Vertex-Standard will also present this years winner with a special ham radio related gift. CQ Magazine will again treat the recipient to a week at Spacecamp-Huntsville. We at Amateur Radio Newsline will present the winner with a plaque honoring his or her achievements.

All nominations and materials required by the official rules must be received by ARNewsline before June 30, 2011. A downloadable nominating form is at our website at www.arnewsline.org. A nominating form can also be obtained by sending a request along with a self addressed stamped envelope to the Young Ham of the Year Award in care of Amateur Radio Newsline, Inc. 28197 Robin Avenue, Santa Clarita California 91350.

Again, the cutoff date for this year's Young Ham of the Year Award nominations is June 30th. We ask you to do your part by nominating a

young ham who has done something special related to ham radio. The nomination form is at www.arnewsline.org

For now, with Bill Pasternak, WA6ITF, at the editors desk, I'm Jim Damron, N8TMW, and I'm Jeff Clark, K8JAC, saying 73 and we thank you for listening.

I find it interesting that you a) appear to be arguing with yourself and
b) did not call that an "unsubstantiated and erroneous claim", meme. :)

> Suffering from reading comprehension problems, tholenizer? I did set
> follow-ups to a more appropriate newsgroup.

Classic unsubstantiated and errooneous claim, thoolen. Your post isn't
about tests so a test newsgroup is not "a moore approopriate newsgrooup",
thoolen.

> I replied to state that I've never played Quake, tholenizer.

Which am I going to believe, your words or the evidence of my own eyes?

What does your classic unsubstantiated and erroneous claim that I have a
reading comprehension problem have to do with OS/2, tv, amateur radio,
classical music, or college basketball, tholenbot?

> 27> What does that have to do with OS/2, tholen? ;)

==> + PUBLIC SERVICE: TORNADOES AND THUNDERSTORMS KEEP RADIO AMATEURS
BUSY IN MIDWEST, SOUTHEAST

As violent storms swept through Alabama, Mississippi, Arkansas and
North Carolina, served agencies called upon Amateur Radio operators to
help provide communications support and real-time weather observations.
The storms and flooding were the latest in the severe weather that has
pummeled much of the mid-South this month. Just a week ago, storms tore
a wide path from Oklahoma all the way to North Carolina. Read more here

y-in-midwest-southeast>.

==> + COUNTING DOWN TO DAYTON -- WHERE GLOBAL FRIENDSHIP TAKES CENTER
STAGE
```

The ARRL is making all the final plans and preparations to bring its "show and tell" exposition -- known as ARRL EXPO -- to the Dayton Hamvention® next month. Hamvention, sponsored by Dayton Amateur Radio Association since 1952, will be held May 20-22 at the Hara Arena Conference and Exhibition Center in Trotwood, Ohio. Read more here <http://www.arrl.org/news/counting-down-to-dayton-where-global-friendship-takes-center-stage>.

==> + SILENT KEY: JAMES MCLAUGHLIN, WA2EWE/T6AF, KILLED BY AFGHAN PILOT

James McLaughlin, WA2EWE/T6AF, was killed in Kabul, Afghanistan on Wednesday, April 27. News sources say that eight American troops and a US contractor died Wednesday after an Afghan military pilot opened fire during a meeting in an operations room of the Afghan Air Corps at the Kabul airport -- the deadliest episode to date of an Afghan turning against his coalition partners, officials with the NATO-led International Security Assistance Force (ISF <http://www.isaf.nato.int/>) in Afghanistan said. McLaughlin -- a retired US Army Lieutenant Colonel -- was a contractor serving as a flight instructor for Afghan pilots.

Licensed since 1972, McLaughlin was a career US military officer. Bob Magnani, K6QXY, told the ARRL that McLaughlin was just in the US a week ago, visiting his family: "His son Adam, KD6POE, works for me. He told me that his dad had been in Afghanistan and Iraq many times over the past few years, most currently serving as a flight instructor." McLaughlin posted on his qrz.com page that "almost every day, I operate at around 1230 - 1430 UTC. Sometimes I am QRV until around 1500 UTC."

Steve Herman, W7VOA/T6AD/HL9OA -- currently in Seoul, South Korea -- remembers meeting McLaughlin for the first time. "I first met Jim in August 2009 when we were the only two hams operating in Kabul," he wrote in an e-mail. "We exchanged tips on operating in our unusual environment. Jim had put together a fine radio shack in his quarters and was especially enthusiastic about his RTTY and PSK capabilities, as well as the ladder line-fed wire dipole he had managed to string up at a height of 50 feet through some trees.

"Less than 24 hours after our initial discussion, a suicide bomb went off in Kabul near the spot where we had arranged to meet. The blast killed seven people and injured nearly 100. The explosion site was also close to Jim's QTH and it blew out windows in his residence adjacent to the US Embassy. It was obvious from spending time with Jim that ham radio was an important morale-boosting pastime and he usually spent a couple of hours per day QRV, logging thousands of QSOs." As of March 26, 2011, McLaughlin had logged 4359 QSOs, most of them on RTTY and PSK.

McLaughlin was also an active MARS <http://en.wikipedia.org/wiki/Military_Auxiliary_Radio_System> operator. "He was one of our most dedicated MARS members in Army MARS Region 11," Dan Wolff, KA7AGN/DL4VCW/AEM1WF/AEA1RD, told the ARRL. Wolff is the MARS Region 11 Director. "He relayed and delivered

literally hundreds of MARSgrams every year for our region. I've known him for many years and he was always devoted to supporting our deployed service members. He will be deeply missed on MARS circuits and the ham bands as well." -- Thanks to Russ Bentson, K6KLY, CNN <http://www.cnn.com/2011/WORLD/asiapcf/04/27/afghanistan.violence/index.html?hpt=T2>

==> + FCC NEWS: ANCHORAGE VEC ASKS FCC TO GRANT LIFETIME CREDIT FOR EXPIRED LICENSES

In a Petition for Rulemaking filed with the FCC on April 15, the Anchorage VEC -- one of 14 Volunteer Examiner Coordinators in the US -- asked the Commission to give permanent credit to radio amateurs for examination elements they have successfully passed. This would, in effect, create a license exam credit that would be valid throughout an amateur's lifetime, never expiring. Read more here <http://www.arrl.org/news/anchorage-vec-asks-fcc-to-grant-lifetime-credit-for-expired-licenses>.

==> + ON THE AIR: FIND AN ARRL FIELD DAY STATION NEAR YOU

First introduced in 2008, the ARRL's Field Day Station Locator Service <http://www.arrl.org/field-day-locator> has proved a popular addition to the Field Day toolbox. This service -- an interactive map that helps amateurs or those interested in Amateur Radio find a Field Day <http://www.arrl.org/field-day> site near them -- is free to clubs or individuals who will be operating public Field Day stations. Stations can also be listed by state or province. So far, hams in all 50 states and Puerto Rico have listed Field Day sites on the Field Day Locator. If your group would like to be a part of the Station Locator Service, it's easy to get started -- just go to the Field Day Station Locator website <http://www.arrl.org/field-day-locator> and follow the instructions. ARRL Field Day is the most popular on-the-air operating event in Amateur Radio. On June 25-26, join tens of thousands of Amateur Radio operators as they gather for a public demonstration of the Amateur Radio Service.

==> WX4NHC ASSISTANT COORDINATOR HONORED AT NATIONAL HURRICANE CONFERENCE

W4NXC Assistant Coordinator Julio Ripoll, WD4R, was awarded the Distinguished Service Award at the National Hurricane Conference -- held April 18-22 in Atlanta, Georgia -- for "exceptional service in providing emergency communication during hurricane events over three decades while leading [the] WX4NHC Amateur Radio station at the National Hurricane Center."

Ripoll not only serves WX4NHC as its Assistant Coordinator and an operator, he co-founded the station with then-NHC Director Dr Neil Frank in 1980. WX4NHC collects ground weather reports for areas that are -- or are about to be -- affected by approaching hurricanes, gathering thousands of these reports that are passed on to the forecasters. The station also broadcasts the advisories to ships at sea and to those coastal areas that do not have any other means of receiving them, saving many lives over the years. Read more here <http://www.arrl.org/news/wx4nhc-assistant-coordinator-honored-at-national-hurricane-conference>.

==> + ON THE AIR: SPACE WEATHER PREDICTION CENTER TO DISCONTINUE BROADCASTS ON WWV AND WWVH

Beginning Tuesday, September 6, the Space Weather Prediction Center (SWPC <http://www.swpc.noaa.gov/index.html>) will cease broadcasting its geophysical alert message <http://www.swpc.noaa.gov/Data/index.html#reports> on WWV <http://www.nist.gov/pml/div688/grp40/wwv.cfm> and WWVH <http://tf.nist.gov/stations/wwvh.htm>. These messages inform listeners of the solar flux, the mid-latitude A and K indices and space weather storms, both current and predicted. Currently, the message is heard on minute 18 from WWV and minute 45 from WWVH. The information <http://www.swpc.noaa.gov/ftpdir/latest/wwv.txt> will still be available on the SWPC website. If you care to comment on this, or if you have any questions, the SPWC -- part of the National Weather Service (NWS <http://www.nws.noaa.gov/>) -- would like to hear from you <swpc.wwv@noaa.gov>.

==> SOLAR UPDATE

Tad "The Sun is swimmin' on the rim of a hill <http://www.youtube.com/watch?v=Ss1CXo8QMi8>" Cook, K7RA, reports: Geomagnetic conditions are quiet this week, but they may become slightly unsettled over this weekend. The average daily sunspot numbers were down more than 18 points to 74.9, while average daily solar flux was off less than four points to 113.4. The predicted solar flux values for April 28-30 are 105, May 1-2 is 100, May 3-4 at 105 and 110 on May 5. The next peak in solar flux is May 11-13, with a value of 120. This is actually higher than the flux values over the last month, except for one day -- April 15 -- at 129. Over the last eight days, we have seen seven new sunspots emerge, but the daily sunspot numbers have fallen since April 22. Geophysical Institute Prague predicts quiet conditions on April 29, unsettled to active on April 30, unsettled May 1-2, quiet to unsettled May 3 and quiet May 4-5. Look for more information -- including a report from the Caribbean on 20 meter propagation and information on a new online propagation tool -- on the ARRL website on Friday, April 29. For more information concerning radio propagation, visit the ARRL Technical Information Service Propagation page <http://www.arrl.org/propagation-of-rf-signals>. This week's "Tad Cookism" is brought to you by the song Surrey with the Fringe on Top <http://www.youtube.com/watch?v=Ss1CXo8QMi8> from the musical Oklahoma!

<http://en.wikipedia.org/wiki/Oklahoma%21>

==> VOTING NOW OPEN FOR MAY QST COVER PLAQUE AWARD

Now that you've thumbed through and read the May 2011 issue of QST cover-to-cover, we're sure that an article sticks in your mind. So go ahead and cast your vote <http://www.arrl.org/cover-plaque-poll> for your favorite article in the issue. The article with the most votes will receive the QST Cover Plaque Award.

- Supporting Portable Antennas Without Guy Wires by Dave Fisher, KG0D/7
- A Transmitter for Fox Hunting by Mark Spencer, WA8SME
- An Emergency Backup Solar Power System by Jim Talens, N3JT
- A Junk Box Power Line Frequency Monitor by Arthur Glazar, W2NN
- 3B8EME -- Moonbounce from the Indian Ocean by Eltje Veen, PA3CEE, Johan Meezen, PE9DX, and Rene Hasper, PE1L
- Youth DX Adventure #1 by Don DuBon, N6JRL, and Dave Kalter, KB8OCP

The QST Cover Plaque award -- given to the author or authors of the best article in each issue -- is determined by a vote of ARRL members on the QST Cover Plaque Poll Web page <http://www.arrl.org/cover-plaque-poll>. Headquarters staff members who write articles are not eligible to receive votes.

==> THIS WEEK ON THE RADIO

This week:

- April 29 -- NCCC Sprint Ladder
- April 30 -- BARTG Sprint 75
- April 30 - May 1 -- Nebraska QSO Party; Florida QSO Party; SBMS 2 GHz and Up WW Club Contest (local time); QRP to the Field
- May 1 -- AGCW QRP/QRP Party
- May 3 -- ARS Spartan Sprint
- May 4-5 -- MIE 33 Contest

Next week:

- May 6 -- NCCC Sprint Ladder
- May 7-8 -- New England QSO Party; 7th Call Area QSO Party; Indiana QSO Party; 10-10 International Spring Contest (CW); ARI International DX Contest
- May 8 -- Araucaria VHF Contest; Microwave Spring Sprint (local time)
- May 8 -- SKCC Weekend Sprint
- May 11-12 -- CWops Mini-CWT Test

All dates, unless otherwise stated, are UTC. See the ARRL Contest Branch page <http://www.arrl.org/contests>, the ARRL Contest Update <http://www.arrl.org/The-ARRL-Contest-Update> and the WA7BNM Contest Calendar <http://www.hornucopia.com/contestcal/index.html> for more info. Looking for a Special Event station? Be sure to check out the ARRL Special Event Stations Web page

<http://www.arrl.org/special-event-stations>.

==> UPCOMING ARRL SECTION, STATE AND DIVISION CONVENTIONS AND EVENTS

- May 7 -- ARRL South Carolina State Convention
<http://www.arrl.org/hamfests/south-carolina-state-convention-upstate-hamfest
>,
Spartanburg, South Carolina
- June 3-5 -- ARRL Northwestern Division Convention (SeaPac)
<http://www.arrl.org/hamfests/northwestern-division-convention-seapac-1>,
Seaside, Oregon; ARRL Wyoming State Convention
<http://www.arrl.org/hamfests/wyoming-state-convention>, Cheyenne,
Wyoming
- June 4 -- ARRL Atlantic Division Convention

Amateur Radio Newsline(tm) Report 1759 - April 29 2011

Now, Amateur Radio Newsline report number 1759 with a release date of Friday, April 29, 2011 to follow in 5-4-3-2-1.

The following is a Q-S-T. The FCC will host a live emergency communications planning session and you can be there on the World Wide Web. Also, two senators ask Congress to protect the Global Positioning System from a proposed new terrestrial broadband system, information surfaces on what may have caused the failure of ARISSat One to operate from the I-S-S and we tell you how to send your name and callsign to Mars. Find out the details are on Amateur Radio Newsline(tm) report number 1759 coming your way right now.

RESCUE RADIO: HAM RADIO RESPONDS TO TORNADO OUTBREAK

Massive tornadoes cut a streak of destruction across the Southern tier of the United States on Wednesday, April 27th. The twisters killed at least 250 people in six states and destroyed countless homes and businesses in their wake. Alabama's state emergency management agency said it had confirmed 162 deaths, while there were 33 in Mississippi, 33 in Tennessee, 14 in Georgia, eight in Virginia and one in Kentucky. In many areas all normal means of communications was lost.

Two of Alabama's major cities were among the places devastated by the deadliest twister outbreak in nearly 40 years. Police and other first responder radio systems fell silent when winds in excess of 120 miles per hour ripped antennas off buildings and felled towers. But the storms did not silence ham radio.

As we go to air, a group of hams is reportedly assisting in restoring emergency communications in the city of Tuscaloosa where the entire emergency communications system was wiped out by a tornado. It was only through reports filed by radio amateurs that first responders began to learn the magnitude of the devastation to that city.

Meantime in Pell City about 30 miles east of Birmingham, the Emergency Operations Center lost all of its antennas to high winds. Amateur Radio operators from ARES were dispatched to that E-O-C where at last report they were still providing communications support to the storm ravaged area. Similar scenarios were being played out in Arkansas, Kentucky, Mississippi, Missouri and North Carolina as severe weather

hit those areas as well.

A spokesman for the National Weather Service's Storm Prediction Center in Norman, Oklahoma said it received 137 tornado reports into Wednesday night. An expert at the center said it appears some of the tornadoes were as wide as a mile and likely packed a wallop that only 1 in 100 storms ever reach. It will be days, however, before scientists make an official determination. We will have more on the role played by ham radio in next weeks Amateur Radio Newsline report.

I'm Don Carlson, KQ6FM. Jim. (Various news sources)

**

RESCUE RADIO: FCC TO WEBCAST LIVE EMCOMM PREPAREDNESS SEMINAR

An important Emergency Communications planning meeting is being held by the FCC and you can sit in vicariously. Amateur Radio Newsline's Burt Hicks is here with all of the details:

--

The Public Safety and Homeland Security Bureau of the Federal Communications Commission will host an Earthquake Communications Preparedness Forum on Tuesday, May 3rd from 9:00 a.m. to 1:00 p.m. Eastern Daylight Time.

In its announcement the FCC noted that catastrophic natural disasters such as hurricanes and earthquakes are large-scale emergencies that may affect substantial portions of the public. They can also have a significant impact on critical national infrastructure, including communications networks and services.

The FCC goes on to say that this forum will consider the preparations that should be made in advance of an earthquake and how to develop and implement national communications policies and emergency procedures to respond to an earthquake's potential impact on communications networks and services. The forum will also highlight those practices that best prepare the public and the communications sector for a catastrophic earthquake.

The venue for this gathering is the Commission Meeting Room at FCC Headquarters in Washington, D.C.. This workshop will be open to the public; however, seating and registration will be limited.

But if you cannot be there in person - and its very unlikely most hams involved in emergency preparedness can -- audio and video coverage of the meeting will be broadcast live with open captioning over the Internet from the FCC's web page at www.fcc.gov/live. The FCC's web cast is free to the public, and unlike being there in person, it does not require you to pre-registrar.

For the Amateur Radio Newsline, I'm Burt Hicks, in Los Angeles.

--

Again the URL is www.fcc.gov/live. If you miss it live, the forum will eventually be available for replay at beta.fcc.gov/videos. More is on-line at tinyurl.com/3av7m9o (FCC)

**

RADIO POLITICS: SENATORS ASK CONGRESS TO PROTECT GPS FROM INTERFERENCE BY LIGHTSQUARED PROPOSED HIGH SPEED NETWORK

Senators Pat Roberts of Kansas and Ben Nelson from Nebraska have sent an open letter to colleagues asking them to join together in asking the FCC to take all necessary steps to protect the Global Positioning System. This from any harmful effects of the FCC International Bureau's grant of a conditional waiver allowing LightSquared Corporation to build tens of thousands of high power broadband ground stations which some claim could cause widespread interference to the Global Positioning System.

LightSquared is building a state-of-the-art open wireless broadband network in spectrum directly adjacent to that in which the Global Positioning System operates. Experts seem divided on the impact such a system will have on GPS operations. Some claim that terrestrial interference could render GPS useless while others claim it will be minimal or not exist at all.

In their letter, Roberts and Nelson noted that the full Commission must be involved in this effort to fully protect the Global Positioning System. As such that it must require that LightSquared objectively demonstrate non-interference to GPS signals as a condition prior to operation of the company's proposed wireless broadband service.

The letter from the two Senators also stated that anything less than this is an unacceptable risk to public safety. It described how vital GPS is for public safety, national defense and the nation's economic recovery. The document ends with a request for members of Congress to join Senators Roberts and Nelson in requesting that the FCC make certain that GPS is not compromised in any way. (TV Technology)

**

HAM RADIO IN SPACE: WHY THE ARISSAT ONE APRIL 12th DEMO FAILED

The planned operation of ARISSat One from the International Space Station to celebrate the 50th anniversary of the first manned spaceflight likely failed due to an uncharged battery. At least that's the impression one gets reading the latest report about the incident published by the AMSAT News Service. Amateur Radio Newsline's Norm Seeley, KI7UP, is here with the details:

--

Lou McFadin, W5DID, is the ARISS US Hardware Manager. He says that a teleconference was recently held with the ARISSat team in Russia at

which time the situation concerning the failed early April operation was described by them in this way.

It seems that the The Russian space suit battery that was intended to be used on ARISSat was used during testing both on the ground and onboard ISS when it first arrived. When it was tested prior to the planned April 12th operation, it was discovered that the battery was low on charge.

These space suit batteries are specified for only five cycles of charge. It was decided to not recharge the battery at this time in order to keep the number of cycles as low as possible in order to save the battery for the actual ARISSat One deployment mission that is currently scheduled for July 26th.

McFadin added that they are still trying to get more information on the storage status and the battery health from the Russian team. He says that he and his people will keep everyone informed as they prepare for the eventual deployment of ARISSat One.

For the Amateur Radio Newsline, Im Norm Seeley, KI7UP, in Scottsdale, Arizona.

--

The abortive attempt to operate ARISSat One from on board the ISS would have commemorated the 50 years since Russian Cosmonaut Yuri Gagarin became the first terrestrial being to venture into space. (ANS, W5DID)

**

RESTRUCTURING: RUSSIA JOINS CEPT LICENSING

Russia has become the latest nation to sign onto the pan-European CEPT licensing agreement. According to the IARU Region 1 website, the Russian State Radio Frequencies Commission decided on March 10th that the Russian Federation would join both the CEPT and ECC Recommendation. This makes it possible for every CEPT license holder to operate on the territory of the Russian Federation.

There are a few caveats. Among them is that Russia will only permit such CEPT operation by a foreign station for a limit of three months, without any additional permission needed. Also, the call sign to be used in CEPT operations will be RA followed by the foreign hams personal call letters. (IARU Region 1)

BREAKING NEWS: HAM RADIO OPERATOR ONE OF NINE AMERICANS MURDERED IN KABUL

Some sad news to report. Word that James McLaughlin, WA2EWE who also held the call T6AF, was one of the nine Americans that lost their lives in a shooting at Kabul airport on Wednesday, April 27th. According to Voice of America reporter and fellow amateur Steve Herman, W7VOA/T6AD, all were killed when an Afghan military pilot opened fire in an operations room of the Afghan Air Corps.

Reporting from Seoul, Korea, where he is chief of the Voice of America bureau, Herman said McLaughlin, who was also his friend as well as being a career U.S. military officer working as a contractor training Afghan pilots.

According to Steve Herman, he first met Jim McLaughlinin August, 2009, when they were the only two radio amateurs operating from Kabul. Herman said that McLaughlin had put together a fine radio shack in his quarters. He said that it was obvious from spending time with McLaughlin that ham radio was an important morale booster and pastime. As such, T6AF usually spent a couple of hours a day on the air.

So far this April, fourteen Americans have been killed by members of the Afghan military. An Afghan officer on the compound identified the shooter of McLaughlin and the others as one Ahmad Gul.

According to Steve Herman, this attack was the worst single episode of an Afghan turning against his coalition partners. (W7VOA, other published reports)

**

WORLDBEAT: RSGB DECIDES NOT TO LIVE STREAM ITS AGM THIS YEAR

The Radio Society of Great Britain's Annual General Meeting on Saturday, May 14th will not be streamed live to the Internet this year.

For the past several years the British Amateur Television Club and the RSGB have cooperated in making this event available world-wide. But an RSGB statement published on the British Amateur Television Club's website, the organization says that while the club has once again offered to do it again this year that the RSGB has decided to decline.

While no specific reason was given for the sudden cancellation there's speculation that it has something to do with the recent resignation of the Society's former General Manager Peter Kirby who the RSGB's says left its employ after the discovery of what national society termed as financial irregularities on his part.

The statement goes on to say that RSGB has considered its position and has reluctantly reached the decision that this year it would not be prudent to go ahead with live streaming.

In its own statement, the British Amateur Television Club says that it has accepted the Society's position on this but hopes to be able to offer the Society the facility again in 2012. More is on-line at batc dot tv. (Southgate)

**

ENFORCEMENT NEEDED: SCAMMERS TRYING TO RIP OFF HAMS WITH BOGUS E-MAILS

The Radio Society of Great Britain is reporting on a ham radio version on an old Internet scam. This as it advises its members to be on the look-out for bogus e-mails purporting to be from other radio amateurs and asking for financial help.

The scam works this way. An e-mail, purporting to be from a well known amateur and signed with that ham's first name, claims that they have been mugged in some foreign city. It says that the ham has lost his passport and money in the attack. I then requests financial support to get the amateur out of difficulties and back home.

The RSGB says that several different prominent callsigns have been used by the scammers. And unless the perpetrators are caught, its likely only a matter of time before this scam goes world-wide including here in the United States. (GB2RS)

**

RADIO LAW: FEMA TO REQUIRE MANDATORY EAS TRAINING

FEMA will require that emergency alert originators take training before accessing its Integrated Public Alert and Warning System to deliver next generation Emergency Alert System warnings using the Common Alerting or CAP Protocol. At least that is how EAS consultant and broadcast engineer Gary Timm characterized remarks by Damon Penn, assistant administrator for National Continuity Programs at FEMA, at the recent National Association of Broadcasters Convention held in Las Vegas. In blog updates at www.awareforum.org, Timm writes as part of a series on EAS that the FEMA Emergency Management Institute will conduct the mandatory training in the same manner as other National Incident Management System courses that first responders must complete. (RW)

**

RESTRUCTURING: BROADCASTERS VS THE WHITE HOUSE CLASH OVER SPECTRUM

The broadcast community is saying no to a White House demand that they give up some of their spectrum to create more broadband frequencies for mobile phones and the like. Jeff Clark, K8JAC, is here with the details:

--

It could soon be an open war of words between the Obama administration and the over-the-air broadcast community over who is going to keep the current broadcast spectrum and what purpose it will be used for. This

as the deadline dot com website reports that National Association Of Broadcasters chief Gordon Smith told station owners at the organization's annual convention in Las Vegas that the trade group is in full battle mode. This, to protect the broadcast spectrum it now has from being reallocated to broadband wireless.

FCC Chairman Julius Genachowski has already promised that no broadcaster will be forced to offer up spectrum for auction. Genachowski says that those who do will know exactly what the deal is before relinquishing any rights. But even that position is at odds to some degree with that of the White House which wants TV stations to give up some of their spectrum so it can be redeployed to offer Internet services. That's something that broadcasters are adamantly refusing to do even if the government offers some form of monetary compensation.

Regardless of what Chairman Genachowski might say, the National Association of Broadcasters biggest concern is that the government might simply seize spectrum without a broadcaster's consent if they do not voluntarily surrender it. This is a possible scenario if broadcasters do not comply willingly which at this point in time appears unlikely to happen.

I'm Jeff Clark, K8JAC.

--

And at the same convention, CBS chief Leslie Moonves echoed the NAB's position when he said that as long as the government's plan remains voluntary, we're fine with that. This is because we're not going to volunteer. You can read more about this situation on-line at tinyurl.com/3fyt5p4 (RW)

**

PUBLIC SERVICE: SOUTHERN OHIO HAMS NEEDED FOR IRONTON PARADE

The Southern Ohio Amateur Radio Association Amateur Radio Emergency Service is looking for additional operators to assist in communications for the Ironton Ohio Memorial Day Parade on May 30th. Amateurs will be used to call for help in case of an accident, to call for law enforcement or fire departments if needed, to help people find their parade division, to help parents find a lost child and a host of other situations. Any ham with a two-meter handheld transceiver who is interested in helping should contact Ken Massie by e-mail to hamwn8f (at) yahoo (dot) com. Between 25 and 30 operators are needed. So far 18 have signed up. (Ironton Tribune)

**

HAM HAPPENINGS: LIVERMORE CA LARK SWAPMEET FOLDS

The Livermore Amateur Radio Klub in northern California closed the doors on its famed LARK Swapfest. The sponsors blame declining

attendance by both sellers and buyers, rising costs and the difficulty in recovering from the loss of the swap being held at Los Positas college among the reasons that led to this decision.

Its announcement notes that it takes an enormous amount of work and resource to make these swaps successful. It says that as a club it has witnessed a steady decline in both revenue and manpower to make the swap a worthwhile venture.

But all might not be lost. The announcement also notes that the club is looking at the possibility of a bi-annual event that may look more like a hamfest including a swap meet. For that reason it is keeping its Yahoo swap list alive. (W6OMF)

**

HAM HAPPENINGS: AMATEUR RADIO AND SPACE DAY

Dave Taylor, W8AAS, says that, The Smithsonian National Air and Space Museum has invited AMSAT to organize displays and activities at Space Day to be held this Saturday, May 7th from 10:30 to 3:00 at the Air & Space Museum on the National Mall. ARISS is already slated to have various flight-type hardware on hand and also expects a radio contact with International Space Station. However Dave would like to hear from anyone who has other space-related amateur radio artifacts, posters, activities or anything else they'd like to display. Also needed volunteers who can staff the tables, help with setup and tear down, and various other tasks. To sign up contact Dave Taylor via e-mail to w8aas (at) amsat (dot) org (W8AAS, AMSAT)

**

NAMES IN THE NEWS: A HAPPY 220 TO SAMUEL F. B. MORSE

And a very happy 220th birthday to Samuel F. B. Morse, who introduced telegraph communications in the United States.

Morse was born on April 27th 1791 in Charlestown, Massachusetts. On 24th of May 1844, he famously sent the message "What hath God wrought" by telegraph from Washington D.C to Baltimore, Maryland and there-by ushering in the electronic information age that has continued to grow and become the world-wide broadband systems of today.

But the telegraph Morse code used in Morse's days differed in a number of respects from the International Morse code used in later times. A description of the differences can be found at tinyurl.com/4e9mxk (Southgate)

EMERGING TECHNOLOGY: MAKING LEDS THE ALL PURPOSE ROOM LIGHT

New technology may make Light Emitting Diodes practical boor everyday home and even hamshack Jim Damron, N8TMW, reports:

--

Researchers at the University of California, Santa Barbara, say they've figured out the cause of a problem that's made light-emitting diodes impractical for general lighting purposes.

Chris Van de Walle is a professor in the Materials Department at the University of California at Santa Barbara. He heads the research group that carried out the work. They investigated a phenomenon referred to as the drop in efficiency that occurs in these LEDs when they're operating at the high powers required to illuminate a room. The cause of this decline has been the subject of considerable debate, but the U-C Santa Barbara researchers say they've figured out the mechanism responsible for the effect by performing quantum-mechanical calculations.

Van de Walle says that identifying the root cause of the problem was an indispensable first step toward devising solutions.

Im Jim Damnron, N8TMW.

HAM RADIO IN SPACE: AO-51 INTO ECLIPSE PERIOD - OPERATION LIMITED

Amsat Oscar 51 has recently experienced a few shutdowns due to a low battery voltage trip. This is because of increasing eclipses now at 20 minuets per orbit and increasing, poor sun angles and a weak battery.

The transmitter power is down to about 550 milliwatts and AO-51 is now using the 67 Hz P-L tone required mode in order to turn the transmitters off when not in use.

The AO-51Command Team will continue adjusting various parameters, including transmitter power, trigger voltages, and the like in order to keep the battery temperatures reasonable. Keep in mind that the power management feature keeps the transmitters off during eclipses, so you can't bring it up even with a PL tone during those periods. (ANS)

**

ON THE AIR: THE INTERNATIONAL POLICE ASSOCIATION HG15IPA

On the air, keep an ear open for Hungarian special event station HG15IPA to be active through December 31st to celebrate the 15th anniversary jubilee callsign of the International Police Association. The station is expected to be on 160 through 10 meters using CW, SSB, RTTY, PSK31 and SSTV. For more information please visit www.qrz.com/db/hg3ipa or www.qrz.com/db/ha3jb on the World Wide Web. QSL via HA3JB.

**

ON THE AIR: CELEBRATING THE BATTLE OF NASEBY

The United Kingdom's Welland Valley Amateur Radio Society will operate special event station GB0BON on June 19th. This to commemorate the 366th anniversary of the Battle of Naseby which was the decisive battle of the English civil war.

The Battle of Naseby took place on the June 14th 1645 in the small hamlet of Naseby just south of the town of Market Harborough. In June 2010 members of the Welland Valley Amateur Radio society decided to put a special event amateur radio station on air to commemorate the historic event. It was deemed such a success that they are doing it again this year as well. If you contact GB0BON please QSL to G4XEX at the address on qrz.com. (DX Today)

**

RADIOSPORTS: THE 7TH HST CHAMPIONSHIP CUP OF NATIONS

The 7th International High Speed Telegraphy championship Cup of Nations will take place in Mogilev, Belarus from July 7th to the 11th. This is a traditional event and at airtime planners report that several top high speed telegraphy teams have already confirmed their participation. For more information on this event please contact Andrei Bindasov by e-mail to andrew_eu7ki (at) hotmail (dot) com. (Southgate)

**

DX

In DX, PD9DX, ON8AK and ON5UR will be active as OJ0UR from Market Reef between August 13th and the 20th. Their operation will be on the HF bands using a Stepp-IR Big Vertical and a Stepp-IR 2 element beam. QSL via M0URX, direct, via the bureau, or electronically using Logbook of the World.

Members of the Camb-Hams will be activating the Isle of Arran through May 8th. They will be operating as GS3PYE/P and GS6PYE/P. Operation will be on all bands from 160 through 2 meters, and on 70 cm on various ham radio satellites. WSL as directed by the operator that you contact.

IZ3ESV, I2VGW and IZ2LSC will be active stroke HB0 from Lichtenstein between June 2nd and 5th. The trio is planning a micro-light and holiday-style operation using CW, SSB and RTTY. The main focus will be on the 30, 17 and 12 meters and the upper High Frequency bands depending on the propagation. They will also try 6 meters. QSL via their home callsigns.

ON4LO will be active on 40 through 10 meter SSB as F slash ON4LO stroke P until June 4th. He plans to operate from a few lighthouses during his trip. QSL via his home callsign, direct or via the bureau.

**

THAT FINAL ITEM: SEND YOUR NAME AND CALL TO MARS

And finally this week, there may not be any ham radio station on the planet Mars, but there may soon be a lot of ham radio callsigns making their way across the surface of the red planet. Amateur Radio Newsline's Michael Grebert, KJ4ZZV, has the details:

--

NASA is collecting names to be put on a microchip that'll be onboard the Mars Science Laboratory rover heading to Mars in the fall of 2011. Some Radio Amateurs have been adding their call sign to last name field. As well as having your call sign traveling around the Martian surface you also get a electronic commemorative certificate to print out.

The rover has an unusual connection with radio. As previously reported here on Amateur Radio Newsline, this second generation robber has special indentations on its wheels that will spell out the initials JPL in Morse as it travels around Mars. And for the few of you who might not be aware. JPL stands for Jet Propulsion Laboratory located in Pasadena, California, which is the NASA branch that builds of the rovers.

You can add your name and call on the Mars microchip at tinyurl.com/marsham. From what we are hearing, a whole bunch of hams already have.

For the Amateur Radio Newsline, I'm Michael Grebert, KJ4ZZV, reporting from Music City, Nashville, Tennessee.

--

Again the URL to add your name and call to the microchip headed to Mars is tinyurl.com/marsham. More on the Mars Science Laboratory project can be found at mars.jpl.nasa.gov/msl/. (NASA)

**

NEWSCAST CLOSE

With thanks to Alan Labs, AMSAT, the ARRL, the CGC Communicator, CQ Magazine, the FCC, the Ohio Penn DX Bulletin, Radio Netherlands, Rain,

the RSGB, the Southgate News and Australia's W-I-A News, that's all from the Amateur Radio Newsline(tm). Our e-mail address is newsline@arnewsline.org. More information is available at Amateur Radio Newsline's(tm) only official website located at www (dot) arnewsline (dot) org. You can also write to us or support us at Amateur Radio Newsline(tm), 28197 Robin Avenue, Santa Clarita California, 91350

And a reminder that the nominating period for the year 2011 Amateur Radio Newsline Young Ham of the Year Award is now open. Created by Newsline back in 1986, this award is offered to recognize one young United States or Canadian radio amateur age 18 or younger for his or her contributions to society through Amateur Radio.

As in years past, the 2011 recipient will receive an expense paid trip to the Huntsville Hamfest in Huntsville Alabama courtesy of Vertex-Standard Corporation which produces Yaesu brand amateur radio gear. Vertex-Standard will also present this years winner with a special ham radio related gift. CQ Magazine will again treat the recipient to a week at Spacecamp-Huntsville. We at Amateur Radio Newsline will present the winner with a plaque honoring his or her achievements.

All nominations and materials required by the official rules must be received by ARNewsline before June 30, 2011. A downloadable nominating form is at our website at www.arnewsline.org. A nominating form can also be obtained by sending a request along with a self addressed stamped envelope to the Young Ham of the Year Award in care of Amateur Radio Newsline, Inc. 28197 Robin Avenue, Santa Clarita California 91350.

Again, the cutoff date for this year's Young Ham of the Year Award nominations is June 30th. We ask you to do your part by nominating a young ham who has done something special related to ham radio. The nomination form is at www.arnewsline.org

For now, with Bill Pasternak, WA6ITF, at the editors desk, I'm Don Wilbanks, AE5DW, saying 73 and we thank you for listening.

Kind of ironic that a page accusing Tholen of being repetitive is itself
one of the more repetitive pages I've seen in a while.

What does Wesson's irony have to do with OS/2, tv, amateur radio,
classical music, or college basketball, Eijkhout?

2> Victor "easily amused"

What does the ease of your amusement have to do with OS/2, tv,
amateur radio, classical music, or college basketball, Eijkhout?

811. Crossposting Permitted to rec.radio.amateur.moderated

Newsgroup: rec.radio.amateur.policy
Date: 2011-05-01 06:00:03 UTC
From: rram@panix.com
Message-ID: <radio/ham-radio/moderated/crossposting-1-1304229601@panix.com>
Source record: 245132
Cross-posted to: rec.radio.amateur.antenna,rec.radio.amateur.dx,rec.radio.amateur.equipment,rec.radio.amateur.homebrew,rec.radio.amateur.misc,rec.radio.amateur.policy,rec.radio.amateur.space,rec.radio.info

```
Posted-By: auto-faq 3.3.2 beta (PGPMoose V2.0, Perl 5.005)
Archive-name: radio/ham-radio/moderated/crossposting
Revision: 1.1 2009/04/12 19:42:04
Posting-Frequency: posted monthly
URL: http://www.panix.com/~rram/usenet/rram/index.html

Changes followed by "|".

After a 30-day public discussion and feedback period to gauge reader
opinions in March of 2009:

http://groups.google.com/group/rec.radio.amateur.moderated/browse_thread/thread/d7d337db35
f23326

the rec.radio.amateur.moderated Moderation Team has decided to consider
amending its charter, and permit limited simultaneous crossposting to
rec.radio.amateur.moderated and one other unmoderated
amateur-radio-related discussion newsgroup. We are currently trying
this on a temporary basis (90 days, through early July 2009), and adopt
it permanently if successful.

Approved rec.radio.amateur.* newsgroups are those that are currently
listed in the latest version of the "List of Big Eight Newsgroups" which
is crossposted monthly to news.announce.newgroups, news.groups, and
news.lists.misc.

Approved alt.radio.amateur.* and alt.ham-radio.* newsgroups are those
that have been created consistent with the suggestions in "So You Want
to Create an Alt Newsgroup" at:

http://www.faqs.org/faqs/alt-creation-guide/

Approved regional hierarchy newsgroups are those that contain either
"radio.amateur" or "ham-radio" in their names, including
uk.radio.amateur and aus.radio.amateur.misc.

We will make every reasonable effort to keep our list of approved
newsgroups up-to-date. In case we have overlooked any, and a submission
is rejected in error as a result, the rejected submitter can E-mail us
at our administrative contact address (in the signature at the bottom of
this article, and the default Reply-To for the rejection message)
requesting that it be added, and that the article be approved. We may
still choose to reject articles crossposted to any alt.* newsgroup with
an inappropriate name, including obscene language, embedded
name-calling, or encouragement of unlawful conduct.
```

Please direct any comments, questions, or criticisms to
rec-radio-amateur-moderated-request@panix.com.

Grow up, try college, drop out, deliver pizzas, buy a computer, flame any and all message boards, Usenet, etc. Get my ass kicked by Roger, run off to Nim Busters board.......

Find a homo buddy in Steve Holsten.........

Get my ass kicked day after day with no end in sight.....

Nominate yourself as the B.A.R.F. Chief of Communications, the members of B.A.R.F. laugh at and ridicule you.....

Pretend that you are a member of the Stumpjumpers, when they all despise you.....

Pretend I am a time traveler and command an army of trash can robots.....

Try to pretend I have a talk show on the internet, talk in a high pitched voice and say that it is a dalek.....

Make more threats, "I will Law You," etc........

Pretend to have a brother named Jim Davies who is a lawyer.....

Pretend to be a female named Christy Davies who is yet another lawyer

Open the door when Oris came by and piss and shit myself and cry and plead for him to leave me alone..........

Talk tough and when confronted, run and hide......

Be nominated for best internet punching bag nine years running.....

That is the 38 year old virgin, Lloyd Austin Davies, internet retard and biggest loser on planet earth!

Amateur Radio Newsline(tm) Report 1760 - May 6 2011

Amateur Radio Newsline report number 1760 with a release date of
Friday, May 6, 2011 to follow in 5-4-3-2-1.

The following is a Q-S-T. Ham radio respond as killer tornadoes rip
the south-east and take a big toll in Alabama; the National Association
of Broadcasters says that no broadband spectrum crisis exists, the
Anchorage V-E-C suggests rules changes that could lead to a lifetime US
ham license and human movement might be the thing that replaces
batteries in the not to distant future. Find out the details are on
Amateur Radio Newsline(tm) report number 1760 coming your way right
now.

(Billboard Cart Here)

**

RESCUE RADIO: HAMS BECOME FIRST RESPONDERS AS TORNADOES RAVAGE THE
SOUTH AND EAST

Ham radio operators became the first responders on April 27th and 28th.
This as tornadoes and other severe weather took aim at parts of the
South and East. Amateur Radio Newsline's David Black, KB4KCH, is in
Birmingham, Alabama, where he literally lived through the ordeal:

--

Days in advance, forecasters had warned about April 27th. They said it
would be a dangerous day for Alabama. What no one knew at the time was
how dangerous. That afternoon would mark the largest tornado outbreak
and third deadliest in U-S history. More than 300 confirmed tornadoes
plow through 14 states during a three day period ending April 28th.
The death toll is estimated at more than 300.

In Alabama, massive supercell storms plow through the state's warm,
unstable air, spinning a series of deadly, long track tornado es.
The state is hit hard--28 confirmed twisters, 250 dead statewide, with
damage across the northern two thirds of the state. Thousands are left
injured or homeless.

The National Weather Service says at least eleven of Alabama's
tornadoes measured EF3 or greater. A single EF4 tornado--at times up
to 1.5 miles wide with winds estimated to have approached 200 miles an
hour--plows through Tuscaloosa and Birmingham. The massive twister
stays on the ground 80 miles, tearing up homes, businesses and lives

all the way.

--

W4MD: "I saw people getting out from under pieces of plywood. The first person I saw was a person with blood all over their face (and) dripping of their chin. I started collecting the walking wounded and putting them into a thrift store."

--

David Drummond, W4MD, is Alabama's ARRL Section Manager. He was at ground zero as the killer storm began destroying Tuscaloosa, producing horrific scenes he and many others will never forget:

--

W4MD: " We were covering up the dead. The place where I stopped there was a family who lived across the street and who heard the sirens who went across from where they were living to a house with a basement and when the tornado came it picked up the house that they had left, moved it across the street; set it on the other house and killed them all. And we actually put four adults and one child in a body bag"

--

Everywhere Drummond looks is destroyed. Among the victims are five students at the University of Alabama which cancels graduation. The hams trying to help Tuscaloosa's walking wounded suddenly face major communications challenges: Three repeaters being used heavily for emergency messages all go down.

Police, fire and EMA communications are also knocked out. Drummond and fellow hams have only one option: To use simplex communications.

--

W4MD: "Everything was gone. At that point, that was it. It was deathly quiet and there was nobody. There was no other communications of any kind, period.

"There are still many dead and unaccounted for. We ran out of body bags.

"There's more in the morgues and a lot of them hadn't been identified. There's people in lakes and there's still a lot of(people) unaccounted for."

--

For five hours after the tornado hit, Drummond says hams provided critical communications:

--

W4MD: "It was slow developing for support from emergency services because it was to massive. We (ham radio operators) provided much of the communications in the beginning because there wasn't any. The Emergency Communications Center was destroyed which included the EMA which took that mechanism down. That (tornado) also destroyed the adjacent police department's communications system and part of their building which put that in disarray. It also destroyed the Red Cross building which severely interrupted their response."

--

By the time the massive storm roars across I-65 just north of downtown Birmingham, it has killed at least 65 people, and injured 1,000 more, becoming the deadliest in Alabama history. Two days after the storms hit, President Obama walks through a storm-ravaged Tuscaloosa neighborhood where dusk-to-dawn curfews were in effect, and calls it beyond anything he had ever seen.

It's also beyond anything most emergency communications-minded amateur radio operators had ever imagined possible. Greg Sarratt, W4OZK, is the ARRL's Southeastern Division Director.

--

W4OZK" "This scale is unprecedented and amateur radio is stepping up in a very big way. I'm proud of all the hams who are providing support"

--

In north Alabama, a tornado stays on the ground 132 miles, narrowly missing downtown Huntsville and leaving at least 26 dead. Power is knocked out over so much of north Alabama, that motorists entering the state from Tennessee are warned to make sure they have gas in their cars.

Division Director Sarratt says Alabama hams have mobilized in large numbers to help a variety of agencies with communications support:

--

W4OZK: "Hams have been on multiple bands from HF to 2 meters D-Star. Also a lot of 440 work providing local communications; providing regional communications; and state-wide communications for EMA, the National Weather Service. The Red Cross, the Salvation Army, Southern Baptist (Relief) and other relief type organizations."

--

Scores of outlying communities are devastated, as well. In the small northwest Alabama town of Hackleburg--which lost 29 people--hardly anything remains. A tornado rated as EF-5 roars through Hackleburg, lifting a truck and dropping it back down four miles away. In the nearby town of Phil Campbell, at least 51 die.

100 miles southeast of Birmingham, a tornado slams into Dadeville at night. The storm picks up weights including a 70 pound dumbbell, throwing it about 200 yards. Volunteer firefighter Danny Lloyd, KB4MDD, walks through the debris of a devastated neighborhood to see if anyone needs help. He's not sure, but thinks he hears people calling for him in the darkness:
--

KB4MDD: "I sort of ignored them in the beginning because I did not know that they were calling for me. Then they said something again and I called out my name and it was my cousins husband and he said that `.we have someone hurt over here..'

"I went over and spent some time with an elderly lady who would ultimately expire due to her injuries. The storm made it impossible (to get more aid). She had a broken leg but it was just impossible to get her out. I mean it was not possible. All the roads were blocked.

"They were talking to me and I could see thyem but it took me five minutes or more just to climb through the (downed) trees to where they were at and her house was just gone. It was exploded."

--

While trying to help the woman, Lloyd hears tornado sirens; another warning has been issued.

--

KB4MDD: "I thought okay, here we go again. Of coarse we had a downpour and I found a coat laying on the ground and I was able to cover here. And she talked to me for a very long time as I stayed there with her and held her hand.

"It was a very tough ordeal as volunteer firefighter and a first responder, generally when I'm on the scene I have an ambulance crew that's coming up within seconds. They load up a patient and have them to the hospital. And this lady was within a 5-minute drive of a hospital.

"If it had been normal, you would have been at the St. Martin Hospital within 5 minutes. And the heart-breaking thing is that we could not move her without fear that of injuries and that we were going to make matters worse. And the second thing is that we had no way (to transport her). We had no back-board, no gurney to even try to load up to even try to start going somewhere in the midst of all that mess.

"Its very sad. I understand that she was 70 years old."

**

BREAK 1

More with David Black, KB4KCH, in a moment. But first its time to identify. From Los Angeles, This is the Amateur Radio Newsline.

5 Sec Break

--

The gruesome scenes are visible statewide. Personal items including papers and even suitcases were discovered 50 to 100 miles away from where storms hit. Trees had their bark completely removed. The ARRL ships amateur radio equipment to the state to help with emergency communications needs. Scores of relief efforts launch, with FEMA and numerous local, state and federal agencies responding.

Despite the tragically high number of fatalities, authorities believe technology kept the toll from being even worse, since so many people were able to see the storms live and the damage they were causing. Hundreds of pictures and videos are captured by residents. Tower-mounted cameras operated by government agencies and broadcasters also capture the storms.

Two men do something credited with helping save countless lives: They transmit live video of the massive tornado moments before it slams into Tuscaloosa. One of them is retired television meteorologist and storm chaser John Oldshue, KE4LMU.

--

KE4LMU: "My desire has always been to get the video live so that it could be transmitted and people could get a sense of the urgency of what was approaching them."

--

The video Oldshue and Ben Greer send from the field is seen live by hundreds of thousands of people watching Birmingham's ABC television affiliate. Chief Meteorologist James Spann, WO4W, warns viewers to take cover while tornadoes are on the ground in different areas at the same time:

--

WO4W: "John Oldshue has a large wedge tornado that is now near Interstate 59 at the Knoxville exit and this is moving in the general direction of Tuscaloosa and Northport. So we are now calling a tornado emergency."

--

Some of amateur radio's newest technology gets a trial by fire. Alabama is home to a statewide D-Star communications network. The system had never been put through such a rigorous test--until April 27th. Section Manager David Drummond :

--

W4MD: "This is the first real emergency test of D-Star. So as this (weather) came through all we had to do was go back and straighten up a few antennas, reboot some equipment and we were good to go. It's a

great tool. A great tool for that."

--

Many Alabama hams suffered losses themselves, but Division Director Greg Sarratt says they're still helping out:

--

W4OZK: "Hams that have some damage; some of them total damage and for some not so bad. In both cases I guess they know that there is nothing that they can do to repair or fix their house at this time so they are supporting amateur radio. They are going to a Red Cross Center or a Red Cross Shelter to provide communications. Theres noything they can do at home to repair right now."

--

The storms may also mean a big change about Tornado Alley...that's the corridor associated with the central plains and long thought to be where the most deadly storms strike. Alabama had been ranked 3rd in the number of tornado deaths, but that was until April 27th; the state now has a new grim honor: number one.

For now, it's the grim sights so many hams like David Drummond have to deal with:

--

W4MD: "I had a woman come up to me screaming that the storm had blown her son away. I said to calm down and asked what did he look like? She told me that he had on cowboy boots, a pair of shorts and no shirt.

"I said, well you are in luck. He just came by here a few minutes ago to tell me that there was an elderly woman trapped in a basement in a church. He let a cigarette lighter so that she could see and went that way. Three minutes later I had to ask her to quit hugging me. She was so glad to know thyat her son was still alive.

"Another situation not quite as nice was shortly after this: I mean before bthe dust settled I had an unknown female come up to me and say that `.my parents were in a house right over there. The storm has blown them away.' And there was no house. There was no nothing. What do you tell somebody?

--

OFF AIR AUDIO: "WC4Q from KA9Q at the Tuscaloosa EOC. Go ahead.

"This is WC4Q. Please pass to Marsha or your Red Cross rep.

--

The emergency may be over, but not the need for communications help. Hams all across Alabama remain busy helping on the air, as well as with

many other needs. Weather experts say the reason so many died was due to the size and path of the tornadoes. In many cases, they acknowledge, someone trying to seek shelter would not have been able to survive. Danny Lloyd:

--

KB4MDD: "There was just not safe place to be. In some homes in that kind of tornado, theres just not a safe place and I think we saw that all across Alabama. There just was not a safe place to be in the path of some of these storms unless you were underground in a shelter."

--

For radio amateurs active in emergency communications, the April 27th tornado outbreak hits with a shocking reality. Even though many believed they had a solid emergency preparedness plan in place, what happened that violent spring day convinces them: It's time to re-write the book.

>From the Southeast Bureau in Birmingham Alabama, I'm David Black, KB4KCH, for the Amateur Radio Newsline.

--

There are some in ham radio who say that amateur operators have no place in being the first to respond to a major disaster. They question why some hams put their lives on the line for their communities. Well don't ask that to the people of Tuscaloosa, Alabama, or other South Eastern cities hit by these tornadoes and storms. They know well that the hams will be first on the scene and there to save lives, when all else fails. (KB4KCH, ARNewsline(tm))

**

TORNADO DAMAGE: SEVERE WEATHER CANCELS SVHFS CONFERENCE

And the storms that hit Alabama also forced the last minute cancellation of the 2011 Southeastern VHF Society Conference that was to have been held in Huntsville, Alabama, on April 29th and 30th. According to a bulletin issued by conference planners, the mayor of Huntsville directed that all events thru the weekend be cancelled. He was also instituting a dusk to dawn curfew that was scheduled to last several days.

At the time of the press release, the Huntsville Airport was closed and the conference hotel was without power after the Tennessee Valley Authority lost towers on a 500 KV main tie line.

The conference planning committee will make a determination regarding the rescheduling of the conference to a future date. Any information regarding the rescheduling of the conference will be posted on this website at www.svhfs.org. (K4CSO)

**

RADIO LAW: NAB STUDY SAYS NO SPECTRUM CRUNCH EXISTS

The National Association of Broadcasters has released a study arguing that there is no spectrum crisis. According to NAB, the research shows that insufficient analysis and reliance on faulty information in the formation of the FCC's National Broadband Plan has led to the overstated assumption of a nationwide spectrum shortage for future broadband expansion. NAB says that this is not the case,

The White House, the FCC and numerous in the wireless industry have cited a spectrum crisis as a justification for policies that would reallocate TV airwaves for mobile broadband use. But broadcasters have said that there is no way that they will willingly relinquish even a single hertz of spectrum to broadband. .

The report authored by a former FCC aide was released the week of April 26th. It come on the heels of the NAB's recent statement reported here last week that the broadcast lobby group is in full battle mode to stop the reframing of broadcast spectrum to broadband providers. (RW)

**

INTRUDER WATCH: RUSSIAN VOCODER RETURNS TO 15 METERS

The Russian vocoder system known as Yakhta has appeared again on the 15 meter band. Its been heard and logged by an IARU Region 1 monitoring station on 21 dot 001 dot 5 kHz. Its running F1B in band key-synchronized at 100 baud s and 150 Hz shift. The F1B has been active daily and at times encrypted voice transmissions have also been heard.

The German Department of Post and Telecommunications has filed another complaint about the system. The first was made back in 2010 when it was active from the same location and on the same frequency. (IARUMS - Region 1)

**

RADIO LAW: ANCHORAGE VEC FILES PETITION FOR LIFETIME EXAM CREDIT

The Anchorage Volunteer Examiner Coordinator has asked the FCC to grant permanent credit to radio amateurs for examination elements they have successfully passed anytime in the past. This would, in effect, create a license exam credit that would be valid throughout an amateurs'

lifetime, never expiring. Amateur Radio Newsline's Bruce Tennant, K6PZW, is here with the details:

--

Currently, Amateur Radio licenses are good for 10 years. Hams may renew their license not more than 90 days before it is set to expire. If a ham fails to renew their license before it expires, but less than two years after it expires they can reapply for their license and call sign without having to retake any examination for the license. Under the current rules, hams may not apply to renew the license after the two year grace period. Instead, they must start all over and take new examinations to receive an Amateur Radio license.

In its Petition, the Anchorage VEC asks the rhetorical question if the passage of time somehow invalidates a person's knowledge? It then states that it believes this to not be the case.

The Anchorage petition then states the groups belief that any applicants who can demonstrate that they have passed certain elements at some previous date or who have held a license grant for a particular class of license on or before various applicable dates, should not have to be re-examined on those elements before a new license can be granted. The Anchorage VEC also believes that if a person can show proof of having held a license grant for a specific class of license, they have in fact demonstrated that they have earned credit for having passed the elements required for that class of license.

According to an ARRL spokesperson, the petition filed by the Anchorage VEC does not address the cases of radio amateurs who had their licenses suspended or revoked. It says that if this Petition is looked upon favorably by the FCC, a provision should be made that no examination credit should be given if the operator license was ever suspended or revoked, or if the operator license was surrendered to avoid enforcement proceedings.

For the Amateur radio Newsline, I'm Bruce Tennant, K6PZW, in Los Angeles

--

The Anchorage's plan calls for all 14 VEC's to handle these applications. At airtime no rule making number has been assigned to this rule making request. (Anchorage VEC, ARRL)

**

RADIO RULES: COST OF VANITY CALL MAY RISE

The FCC wants to raise the cost of a vanity callsign by 90 cents. Currently the fee for a 10 year vanity call sits at $13.30. If the new rate is approved that will rise to $14.20 for that same 10 year period. In its press release, the FCC said it anticipates some 14,600 Amateur Radio vanity call sign or applications during the next fiscal year.

That would bring in over $207,000 in fees from the vanity call program. Any new fee would start at the beginning off the FCC's next fiscal year. (FCC)

**

DX

In DX, A multi-national team, all members of Mediterraneo DX Club will be active as 9N0MD from Nepal during November. Activity will be on all HF bands and modes. The team plans to give away trophies and prizes. More is on-line at www.mdxc.org/nepal.

9M6XRO is once again be active stroke V85 Brunei through May 9th. Hisa operation is mainly CW with the possibility of some RTTY or SSB. QSL via M0URX, direct, by the bureau, or via Logbook of the World.

K0YAK is now in Kathmandu and is expected to be operational as 9N7AK until early July. He is using a Kenwood TS-50 with a Cushcraft MA5V lightweight, 5-band vertical antenna. QSL via K0YAK.

Lastly, the Intrepid-DX Group will conduct a DXpedition from Afghanistan for ten days in May. Due to security concerns, the exact dates and location of the DXpedition will not be announced until the eve of their activation. For update on this operation, it is suggested to watch their Web page at www.intrepid-dx.com/t6pse

(Above from various DX news sources)

THAT FINAL ITEM: PUBLIC THANKS WO4W AND ABC 34/40 FOR LIFE SAVING SEVERE WEATHER COVERAGE

And finally this week, yet another albeit indirect ham radio connection to the tornadoes and severe weather that hit the South-East last week. This as Alabama's ABC 33/40 television group consisting of stations WCFT, WJSU, and WBMA used a handful of web-based tools, some ham radio volunteers and a very knowledgeable forecaster to provide the local community with ongoing coverage of the devastating storm system that tore through the state on Wednesday. Amateur Radio Newsline's Michael Grebert, KJ6ZZV, has the details:

--

At the point position of this outstanding storm coverage was Meteorologist James Spann, WO4W. He used Facebook and Twitter to update and interact with its audience as well as those outside the local viewing area. The station group also used Ustream to live stream the local weather radar online and the ABC 33/40 weather blog to share photos and videos, many of which were captured by viewers. Also contributing were a group of local ham radio operators, many of whom are also known ABC 33/40 Skywatchers.

Over the course of the coverage WO4W appeared regularly on the air for almost 18 straight hours giving live weather updates. When he was off camera, he was reportedly assembling the latest weather information along with photos that the station was receiving from viewers online.

As the severe weather system charged across Alabama and the death toll began to climb, ABC 33/40 s Facebook page became not only a place for the station to disseminate information. It was also a meeting ground for members of the community to interact with Spann and each other about power outages and storm damage while also taking time to honor the deceased.

What James Spann, WO4W and his crew at both the station and the volunteer hams in the field was likely best summed up by this viewers posting on Facebook:

"I'd like to thank James Spann and all of the meteorologists and crew at ABC 33/40 for keeping not only the people of northern Alabama informed, but the whole world informed. I know dozens of people from around the country, including myself, who were watching the UStream feed faithfully all day. Your professionalism and dedication saved countless lives today."

For the Amateur Radio Newsline, I'm Michael Grebert, KJ4ZZV, in Music City, Nashville, Tennessee.

--

In addition to his being the Chief Meteorologist for ABC 33/40, James Spann, is one of the founders of Weatherbrains.com. This is a weekly Internet based radio that unites weather geeks worldwide. He also owns the WO4W repeater atop Shades Mountain that serves the greater Birmingham area.

**

NEWSCAST CLOSE

With thanks to Alan Labs, AMSAT, the ARRL, the CGC Communicator, CQ Magazine, the FCC, the Ohio Penn DX Bulletin, Radio Netherlands, Rain, the RSGB, the Southgate News and Australia's WIA News, that's all from the Amateur Radio Newsline(tm). Our e-mail address is Newsline (at) arnewsline (dot) org. More information is available at Amateur Radio Newsline's(tm) only official website located at www.arnewsline.org. You can also write to us or support us at Amateur Radio Newsline(tm), 28197 Robin Avenue, Santa Clarita California, 91350

And a reminder that the nominating period for the year 2011 Amateur Radio Newsline Young Ham of the Year Award is now open. Created by Newsline back in 1986, this award is offered to recognize one young United States or Canadian radio amateur age 18 or younger for his or her contributions to society through Amateur Radio.

As in years past, the 2011 recipient will receive an expense paid trip to the Huntsville Hamfest in Huntsville Alabama courtesy of

Vertex-Standard Corporation which produces Yaesu brand amateur radio gear. Vertex-Standard will also present this years winner with a special ham radio related gift. CQ Magazine will again treat the recipient to a week at Spacecamp-Huntsville. We at Amateur Radio Newsline will present the winner with a plaque honoring his or her achievements.

All nominations and materials required by the official rules must be received by ARNewsline before June 30, 2011. A downloadable nominating form is at our website at www.arnewsline.org. A nominating form can also be obtained by sending a request along with a self addressed stamped envelope to the Young Ham of the Year Award in care of Amateur Radio Newsline, Inc. 28197 Robin Avenue, Santa Clarita California 91350.

Again, the cutoff date for this year's Young Ham of the Year Award nominations is June 30th. We ask you to do your part by nominating a young ham who has done something special related to ham radio. The nomination form is at www.arnewsline.org

For now, Im Bill Pasternak, WA6ITF, at the editors desk saying 73 and we thank you for listening.

Cross-posted to: rec.radio.amateur.antenna,rec.radio.amateur.dx,rec.radio.amateur.equipment,rec.radio.amateur.homebrew,rec.radio.amateur.misc,rec.radio.amateur.policy,rec.radio.info

```
Posted-By: auto-faq 3.3.2 beta (PGPMoose V2.0, Perl 5.005)
Archive-name: radio/ham-radio/recruitment
Revision: 1.2 2009/11/25 14:41:01
Posting-Frequency: posted monthly
URL: http://www.faqs.org/faqs/radio/personal-intro/

Changes followed by "|".

The rec.radio.info newsgroup, first established in 1993, has been
recently revived by an active moderation team. We are currently seeking
suitable information, FAQ, and bulletin articles from the entire
rec.radio.* newsgroup hierarchy for simultaneous cross-posting to our
newsgroup.

We are seeking a replacement maintainer for the following information
bulletin formerly posted to rec.radio.amateur.* (and currently archived
at http://www.faqs.org/faqs/radio/personal-intro/ ):

radio/personal-intro
Subject: Guide to the rec.radio Newsgroups
Maintainer: jeffreyh@Hawaii.Edu (Jeffrey Herman)
Last Posted: 9 Nov 2001 06:18:17 GMT
Posting-Frequency: 15th of each month

One significant omission, requiring immediate updates, for this article |
is that it does not mention newer amateur radio newsgroups created since |
it was written, including: |

rec.radio.amateur.antenna |
rec.radio.amateur.boatanchors |
rec.radio.amateur.dx |
rec.radio.amateur.equipment |
rec.radio.amateur.homebrew |
rec.radio.amateur.moderated |
rec.radio.amateur.space |

We are willing to provide any technical support necessary to get this
article updated and automatically posted again at a regular interval.
This would include establishing contact with the original maintainer for
any necessary permissions. We would prefer to seek a new, dedicated
maintainer at this time, rather than start auto-posting the original
article ourselves.

For more information about our newsgroup, see:
```

http://www.panix.com/~rram/usenet/rri/index.html

Please direct any comments, questions, or criticisms to
rec-radio-info-request@panix.com.

==> + PUBLIC SERVICE: NORTHERN FLORIDA HAMS RESPOND TO AFTERMATH OF
ALABAMA STORM

After the devastating storms that swept through Alabama last week
<http://www.arrl.org/news/tornadoes-and-thunderstorms-keep-radio-amateurs-bus
y-in-midwest-southeast>,
radio amateurs from the ARRLs' Northern Florida Section -- at the
invitation of ARRL Alabama Section Emergency Coordinator Greg Gross,
K4GR - are making their way to Alabama to assist with providing
```

assistance. "We contacted Greg and worked out a disaster operation assignment," ARRL Northern Florida Section Manager Paul Eakin, KJ4G, told the ARRL. "We have already sent two teams to Alabama and have five others on stand-by. This was a very damaging tornado and it will be very long time before everything is cleared up." Read more here <http://www.arrl.org/news/northern-florida-hams-respond-to-aftermath-of-alabama-storm>.

==> PUBLIC SERVICE: GEORGIA HAMS HASTEN TO HELP DURING STORMS

Hams in Paulding County -- located in Georgia's northwestern corner -- activated for the tornadoes and thunderstorms that swept through the South last week. According to Paulding County ARES® Public Information Officer Lee McDaniel WB4QOJ, the County's Emergency Management Agency invited ARES® members to gather at the county's Emergency Operations Center on the evening of April 26 to help provide communications support. Read more here <http://www.arrl.org/news/georgia-hams-hasten-to-help-during-storms>.

==> + HAMS HELPING HAMS: THE ARRL'S HAM AID PROGRAM RESPONDS TO DEVASTATED SOUTH

The ARRL's Ham Aid Fund has been tapped to aid Amateur Radio operations in Alabama, following the wake of destructive killer tornadoes that ravaged the state last week. According to ARRL Chief Development Officer Mary Hobart, K1MMH, hams in Alabama have requested radios and antennas, since cell tower sites and repeaters have been damaged and are not yet back up. "The ARRL has already shipped five cases to the state, full of 2 meter, 440 MHz and HF radios, as well as two cases of handheld transceivers with batteries," she said. "We anticipate the demand for equipment may continue from Alabama and possibly from neighboring states."

Hobart said that she knows that not every ham can be in Alabama to help out, but every ham can support the effort -- by contributing to the ARRL's Ham Aid Fund: "First created in response to Hurricane Katrina in 2005, the Ham Aid Fund has enabled ARRL to provide vital communication equipment to devastated areas along the Gulf Coast. Now the fund is purchasing equipment and funding shipping costs to meet the needs of hams in Alabama, as well as our served agencies such as the Southern Baptist Men's Kitchen and the American Red Cross."

How can you help? Hobart said that the best way is to make a contribution of $25, $10 or $5 -- or whatever you can afford. The ARRL will use your contribution to respond to the calls for assistance from Amateur Radio operators where repeaters, antennas and radios have been damaged or destroyed. "And this event may be just the beginning," she explained. "As hurricane season is on the horizon, we need to be prepared for those situations when all else fails. The easiest way to make your donation is on the ARRL website <http://www.arrl.org/donate>. Use the simple form and designate your contribution to the ARRL Ham Aid Fund. We'll put your gift to work right away in the affected area. On

behalf of the ham community in Alabama, thank you!"

==> + FCC NEWS: FCC SEEKS TO RAISE THE FEE FOR VANITY CALL SIGNS

The FCC released a Notice of Proposed Rulemaking on May 3, seeking to raise the fee for Amateur Radio vanity call signs. Currently, a vanity call sign costs $13.30 and is good for 10 years; the new fee, if the FCC plan goes through, will go up to $14.20 for 10 years, an increase of 90 cents. The FCC is authorized by the Communications Act of 1934 (as amended) to collect vanity call sign fees to recover the costs associated with that program. The vanity call sign regulatory fee is payable not only when applying for a new vanity call sign, but also upon renewing a vanity call sign for a new term. Read more here <http://www.arrl.org/news/fcc-seeks-to-raise-the-fee-for-vanity-call-signs>.

==> HAYS AFFINITY GROUP PROVIDES ARRL MEMBERS WITH EQUIPMENT PROTECTION, CLUB LIABILITY INSURANCE PLANS

Effective May 1, 2011, the ARRL began a new partnership to provide its ARRL-sponsored Equipment Insurance and Club Liability Insurance plans. The League has signed an agreement with Hays Affinity Group to serve as the program administrator to provide equipment insurance to its members who choose to elect coverage. In addition, Hays will also provide club liability insurance to ARRL Affiliated Clubs for those clubs that wish to take advantage of that program. Hays will be replacing Marsh Affinity Group Services as the program's administrator and has introduced new policies for both plans, underwritten by the Hanover Insurance Company. Read more here <http://www.arrl.org/news/hays-affinity-group-to-provide-arrl-members-with-equipment-protection-club-liability-insurance-plans>.

==> + CHECK OUT THE JUNE ISSUE OF QST

The June issue of QST is jam-packed with all sorts of things that today's Amateur Radio operator needs. From product reviews to experiments to contesting -- including a special look at ARRL Field Day, the most popular on-the-air event in Amateur Radio -- this issue of QST has something for just about everyone.

Radio amateurs who operate ARRL Field Day know that portability is key. So with this in mind, Bob Dixon, W8ERD, took some military surplus mast sections to make "A One Person, Safe, Portable and Easy to Erect Antenna Mast." Consider Dixon's approach to your Field Day antenna installation -- especially if you're short of trees. Some wattmeters give you power, while others measure SWR. QST Technical Editor Joel Hallas, W1ZR, tells you how to bring them together in his article "SWR, Reflected Power -- What Do They Mean?" In his article "A Single Element Vertical 'Beam,'" David Robbins, K7BKI makes a directional antenna out of a single monopole.

One of the highlights of a Field Day operation is the Get-on-the-air -- or GOTA -- Station. This is a great way to introduce non-hams to the fun of Amateur Radio, as well as to get those less experienced hams a

bit more comfortable on the air. Gary Pearce, KN4AQ, and Dick Orander, KD4ISC, know that the GOTA Station is the perfect spot to find new ops in search of an Elmer. Discover how you, too, can do this in their article "Get Up and Get-On-The-Air." ARRL Membership and Volunteer Programs Department Assistant Manager Norm Fusaro, W3IZ, knows that Field Day means more than just getting on the radio; it's also about the friendships that persevere through the years. In his article "Field Day: It's Not About the Fish," Fusaro tells the story of how Field Day brought two hams together after half a decade of radio friendship.

ARRL Emergency Preparedness and Response Manager Mike Corey, W5MPC, takes a look at the Alinco DX-SR8T HF transceiver in this month's Product Review. He says that this rig "is a low cost HF transceiver that includes a good selection of the basic features for the casual operator." ARRL Educational Correspondent Dewey Rykard II, KI4RGD, checks out the TYT TH-UVF1 dual band handheld transceiver. He says this compact radio "offers a good basic set at a nice price. The user interface and instructions need work, but the radio works well once you have figured out how to program and use it."

Steve London, N2IC, delivers the results of the 2010 ARRL November Phone Sweepstakes. This year, 287 stations earned the ever-elusive Clean Sweep, five more than in 2009. Gary Breed, K9AY, has the results of the 2010 ARRL 160 Meter Contest. According to Breed, the ARRL Contest Branch received a record number of logs from DX stations for this year's running.

Of course, there are the usual columns you know and expect in the June QST: Happenings, Hints & Kinks, The Doctor Is IN, How's DX, Vintage Radio and more. Look for your June issue in your mailbox. QST is the official journal of ARRL, the national association for Amateur Radio. QST is just one of the many benefits of ARRL membership. To join or renew your ARRL membership, please see the ARRL Web page <https://www.arrl.org/join>.

==> + AMATEUR RADIO IN THE CLASSROOM: COLLEGE STUDENTS ATTEMPT HIGH ALTITUDE BALLOON LAUNCH

The Amateur Radio club at Rochester Institute of Technology will be presenting a display of modern technology and applications with ham radio at the university's annual ImagineRIT <http://www.rit.edu/imagine/planyourday11/exhibit.php?id=214> festival on Saturday, May 7. Members of the RIT Amateur Radio Club, K2GXT, have constructed a custom High Altitude Balloon <http://www.rit.edu/imagine/planyourday11/exhibit.php?id=214> that will be suspended below a weather balloon and launched up to 100,000 feet during the festival. The balloon will stream live data back to the exhibit, displaying information such as location, altitude and temperature. The planned launch will take place close to the beginning of the festival. The group will also be flying a 12 foot long custom radio-controlled blimp. This blimp has appeared several times at the RIT men's and women's hockey games this season.

==> ARRL IN ACTION: WHAT HAVE WE BEEN UP TO LATELY?

Compiled by ARRL News Editor S. Khrystyne Keane, K1SFA

This feature is a concise monthly update of some of the things ARRL is doing on behalf of its members. This installment -- which covers the month of April -- looks at the latest with the FCC and ReconRobotics, sponsoring the Frequency Measuring Test, readying the OSCAR 1 satellite to take to the air again, reports from the Official Observer Desk and more. Read more here <http://www.arrl.org/news/arrl-in-action-what-have-we-been-up-to-lately-33>.

==> + ON THE AIR: SPACE WEATHER PREDICTION CENTER TO DISCONTINUE BROADCASTS ON WWV AND WWVH

Beginning Tuesday, September 6, the Space Weather Prediction Center (SWPC <http://www.swpc.noaa.gov/index.html>) will cease broadcasting its geophysical alert message <http://www.swpc.noaa.gov/Data/index.html#reports> on WWV <http://www.nist.gov/pml/div688/grp40/wwv.cfm> and WWVH <http://tf.nist.gov/stations/wwvh.htm>. These messages inform listeners of the solar flux, the mid-latitude A and K indices and space weather storms, both current and predicted. Currently, the message is heard on minute 18 from WWV and minute 45 from WWVH. The information <http://www.swpc.noaa.gov/ftpdir/latest/wwv.txt> will still be available on the SWPC website. If you care to comment on this, or if you have any questions, the SPWC -- part of the National Weather Service (NWS <http://www.nws.noaa.gov/>) -- would like to hear from you <swpc.wwv@noaa.gov>.

==> SOLAR UPDATE

Tad "And the Sun was always shining <http://www.youtube.com/watch?v=qkmvwCpcZlM>" Cook, K7RA, reports: Currently, five sunspot groups are visible, but the average daily solar flux is down more than 7 points over the past week, compared with the previous week. The average daily solar flux was off nearly five points compared to the earlier period. A solar wind stream from a coronal hole induced a high latitude geomagnetic storm at the end of April. Middle-latitude geomagnetic K indices measured at Fredericksburg, Virginia went as high as 4, and the April 30-May 2 A index was 17, 13 and 14. The planetary K index hit 5 on April 30, and the A index over the same three day period was 24, 19 and 20. High latitude areas were more sharply affected, and Alaska's college K index rose to 7; the same three day period saw the college A index at 43, 56 and 37. The latest prediction shows more geomagnetic active coming May 9-10, when the predicted planetary A index is 15. The USAF/NOAA prediction shows a planetary A index of 5 on May 5-6, 7 on May 7-8, 15 on May 9-10, 10 on May 11 and 5 on May 12-16, rising again to 15 on May 17. The sane prediction shows solar flux at 107 on May 5, 110 on May 6-8, 100 on May 9-12 and 115 on May 13-21. Look for more information -- including some observations on the beginning of the summer sporadic-E season, already underway, plus an update on the three month moving sunspot average --

on the ARRL website on Friday, May 6. For more information concerning radio propagation, visit the ARRL Technical Information Service Propagation page <http://www.arrl.org/propagation-of-rf-signals>. This week's "Tad Cookism" is brought to you by the song They Call the Wind Mariah <http://www.youtube.com/watch?v=qkmvwCpcZlM> from the musical Paint Your Wagon <http://en.wikipedia.org/wiki/Paint_Your_Wagon_%28film%29>.

==> + ARRL RECOGNIZES: LOU BURKE, W7JI, WINS APRIL QST COVER PLAQUE AWARD

The winner of the QST Cover Plaque Award for April is Lou Burke, W7JI, for his article "The W7JI Low or Lower Power 40 Meter Transmitter." Congratulations Lou! The QST Cover Plaque award -- given to the author or authors of the best article in each issue -- is determined by a vote of ARRL members on the QST Cover Plaque Poll Web page <http://www.arrl.org/cover-plaque-poll>. Cast a ballot for your favorite article in the May issue today.

==> KENWOOD DONATES HF/6 METER TRANSCEIVER TO W1AW

Thanks to the generosity of Kenwood USA, W1AW, the Hiram Percy Maxim Memorial Station, now boasts a new HF plus 6 meter transceiver -- the TS-590S. "Hams from all over the world come to operate at W1AW, the flagship station of Amateur Radio," said ARRL Business Services Manager Debra Jahnke, K1DAJ. "We are delighted that Kenwood's generosity makes it possible for visitors to W1AW to experience the latest in Kenwood's line of Amateur Radio hardware." Read more here <http://www.arrl.org/news/kenwood-donates-hf-6-meter-transceiver-to-w1aw>.

==> DXCC NEWS: DXCC DESK APPROVES 2011 REVILLAGIGEDO DXPEDITION

ARRL DXCC Manager Bill Moore, NC1L, reports that the 2011 4A4A DXpedition to Revillagigedo <http://www.revillagigedo2011.com/> has been approved for DXCC credit. If you have any questions about this operation, please send an e-mail <dxcc@arrl.org> to the ARRL DXCC Desk.

==> THIS WEEK ON THE RADIO

This week:

- May 6 -- NCCC Sprint Ladder
- May 7-8 -- New England QSO Party; 7th Call Area QSO Party; Indiana QSO Party; 10-10 International Spring Contest (CW); ARI International DX Contest
- May 8 -- Araucaria VHF Contest; Microwave Spring Sprint (local time)
- May 8 -- SKCC Weekend Sprint
- May 11-12 -- CWops Mini-CWT Test

Next week:

- May 14 -- FISTS Spring Sprint; FOC QSO Party
- May 14-15 -- Nevada Mustang Roundup; EUCW Fraternizing CW QSO Party; CQ-M International DX Contest; VOLTA WW RTTY Contest; 50 MHz Spring

Sprint
- May 16 -- Run for the Bacon QRP Contest
- May 19 -- NAQCC Straight Key/Bug Sprint

All dates, unless otherwise stated, are UTC. See the ARRL Contest Branch page <http://www.arrl.org/contests>, the ARRL Contest Update <http://www.arrl.org/The-ARRL-Contest-Update> and the WA7BNM Contest Calendar <http://www.hornucopia.com/contestcal/index.html> for more info. Looking for a Special Event station? Be sure to check out the ARRL Special Event Stations Web page <http://www.arrl.org/special-event-stations>.

==> UPCOMING ARRL SECTION, STATE AND DIVISION CONVENTIONS AND EVENTS

- May 7 -- ARRL South Carolina State Convention
<http://www.arrl.org/hamfests/south-carolina-state-convention-upstate-hamfest>,
Spartanburg, South Carolina
- June 3-5 -- ARRL Northwestern Division Convention (SeaPac)
<http://www.arrl.org/hamfests/northwestern-division-convention-seapac-1>,
Seaside, Oregon; ARRL Wyoming State Convention
<http://www.arrl.org/hamfests/wyoming-state-convention>, Cheyenne,
Wyoming
- June 4 -- ARRL Atlantic Division Convention
<http://www.arrl.org/hamfests/atlantic-division-convention-rochester-hamfest-1>,
Rochester, New York; ARRL East Bay Section Convention
<http://www.arrl.org/hamfests/east-bay-section-convention>, Berkeley,
California; ARRL Georgia State Convention
<http://www.arrl.org/hamfests/georgia-state-convention-atlanta-hamfest>,
Marietta, Georgia
- June 10-11 -- ARRL National Convention
<http://www.arrl.org/hamfests/arrl-national-convention-ham-com-2011>,
Plano, Texas
- June 11 -- ARRL Tennessee State Convention
<http://www.arrl.org/hamfests/tennessee-state-convention-1>, Knoxville,
Tennessee
- July 2 -- ARRL Eastern Pennsylvania Section Convention
<http://www.arrl.org/hamfests/eastern-pennsylvania-section-convention-firecracker-hamfest-1>,
Marysville, Pennsylvania
- July 15-17 -- ARRL Montana State Convention
<http://www.arrl.org/hamfests/montana-state-convention-glacier-waterton-international-hamfest>,
Essex, Montana
- July 29-30 -- ARRL Oklahoma State Convention
<http://www.arrl.org/hamfests/oklahoma-state-convention-ham-holiday-2011>,
Oklahoma City, Oklahoma

and it was a public street I was parked on. the hoa roads are a
different color pavement and where I was parked was here way before
the hoas were ever built in this neighborhood. <<Or maybe
that is because we are mandated to use ARES how can that
be since the Kentucky state court has ruled ARES is illegal. also,
anyone who obeyes their hoa to paint the tower so it blends in with
the skyline and is invisible when looking at the skyline, including
the cellphone companies doing so at the hoas insistence, will find a
huge lawsuit on their hands when they are sued by a bunch of people
whos relatives die in the crashes because the pilots did not know a
tower was there since it blends n so well with the skyline instead of
being visible. although the hoas are against it, the pilots want those
towers visilthe pilots and federal government are for it. that is why
lights are required on thosee the hoas are making airplane travelso le
and NOT matching the skyline the pilots and federal government are for
it. that is why lights are required on thosee the hoas are making
airplane travelso ecause they are very very dangerous when painted a
color where you cant see them. the hoas are making airplane travel
much more dangerous for people. and when word gets out, I am sure the
airplane companies wont lke losing all that revenue from people no
longer flying.. http://www.avweb.com/blogs/insider/AMixedMessageOnMetTowers_204022-1.html

862. where are we supposed to put our towers. ham radio is dead.

Newsgroup: rec.radio.amateur.policy
Date: 2011-05-10 01:24:01 UTC
From: radioguy <radioguy222@yahoo.com>
Message-ID: <1249bb18-a281-4649-8c50-0ae75a500713@t19g2000yql.googlegroups.com>
Source record: 245183

the people in the city say ham radio towers do not blelong in the city. they blelong in the ccountry and if you want one, then move to the country. however, the people in the country sau ham radio towers do not blelong in the country, they blelong in the city and if you want oe, then move to the city blecause they detract from the rural atmosphere and are indusrtalized things which matches the other things on city residential property and belongs on resdential city property, NOT out in the rural country on either rural residential country property or rural non-resedential property. so there you have it, without being able to put up a tower anywhere, ham radio is dead. despite the fcc ruling to the contrary, cities and states have rbeen overrulng federal law and the rulings have stuck so far such as the Palmdale case where the state of California was legally allowed to rule what frequencies a ham radio operator may and may not transmit on, and take hiss extra class license away busting him back down to technician class despite the federal fcc rules and law that he is allowed to opeate on those reuencies and have an extra class license and despite the federal fcc law saying a ham radio license may not be surrendered ether voluntarily or nvolunf tarily unless it is the fcc demanding the surrender. and the Californa state ruling t definitely made it an involuntarily srrender of his extra class license despite fcc rules to the contrary. the palmdale case has going on for over five years nows and so far, the fcc has refused to act on the case, so the local city and local state law are overruling and trumping federal law. also the fcc excuse you can simply operate moble or portable does not work either. New York state made a law making it ialso illegal to carry cellphones with you while you are walking and also illegal talking ibon them while walking, not only driving, however the wording makes two way radios illegal while walking also, and the walking law does NOT exempt ham radio. plus I myself was legally parked on a puiblic street with my legally registered legally plated vehcle where parking is legally allowed. and the hoa nim.ibys forced me to move and called the cops ibecause they did not like seeing my car on the puiblic road from their houses and ttheir yards since it is a violaation of the hoa contract with the hoa residents that they dont have to look at my make amd model of car, the model year was too old even though the car loked fine., even though I was NOT on hoa property, their roads have a different color pavement even though I live on non-hoa non CC&R property and never ever signed an agreement with no r ever belonged to that hoa at all. so yes, this recent hoa craze does affect people not living in hoas and does affect people living on non-hoa non-CC&R property. plus several states are outlawing radios not using hands-free following ontarios lead, however, this is against federal fcc rules. no matter how low

you set the sensitivity on the vox, sme idiot will come speeding down the road passing you with his fm music at full volume opening up your vox and transmitting music over the ham frequencies also,
somewhere else, someone moved into a townhouse and did not like that the guy next door who did not have a hoa put a metal rack on top of his rv. when asked how to stop him and make him remove it was told that the guy violated the zoning ordinace by not first getting a building permit to put a metal rack on top of his rv. what the... since when does someone need a buildng permit to have something on top of a motor vehicle. the guy did NOT live in a hoa. and his property did NOT have any CC&rs. and since when does someone living on non-hoa non-CC&R property need a building permit to have a metal rack on top of an rv. I thought most rv s come from the factory that way. And I very seriously doubt theres actually a zoning ordinance prohi biting putting a metal rack on a legally registered legally plated motor vehicle without a building permit in an area where rv vehicles are allowed ,i is much more likely it is a hoa rule which the RV owner does NOT belong to at all.

Crap deleted, because the writer is an IDIOT.....

Idiot..... If the tower is tall enough to REQUIRE Lighting, (FAA AND FCC Regs) it ALSO is REQUIRED to be painted with the REQUIRED International Orange and White, alternating Paint Scheme.

If the tower is NOT of a height, to REQUIRE Lighting and Painting, then it is up to the owner to comply with any local Ordinances, and Private Contracts (HOA Covenants) that are in place on the land on which the tower is located.

Cell Towers, by in larger, are NOT of a height to REQUIRE Lighting, and Painting, because of their limited Cellular Coverage, similar to many Ham Radio Towers.

==> + PUBLIC SERVICE: AS WEATHER CLEARS IN SOUTHEAST, HAMS CONTINUE TO
PROVIDE SUPPORT

Even though the storms that raged through the Southeast have long gone,
the damage and heartache they left in their wake are still present. In
Alabama, the state that felt the biggest brunt of the storms, hams made
their way to fire stations, emergency operations centers and shelters
-- anywhere they were told that they were needed.
```

Calling it his first experience with an EF-5 tornado, ARRL Southeastern Division Director Greg Sarratt, W4OZK, said that the devastation is "mind-boggling! ARES® successfully provided a massive amount of critical communications, got repeaters back on the air, with no utility power. It took five days before significant utility power was restored; my power was restored on the evening of Day Six. ARES® has gone above and beyond in supporting multiple government and not-government organizations and conducting many other tasks, all at once. ARES® works!" Read more here <http://www.arrl.org/news/as-weather-clears-in-southeast-hams-continue-to-provide-support>.

==> FCC COMMISSIONER MEREDITH ATTWELL BAKER TO LEAVE FCC IN JUNE

On May 12, FCC Commissioner Meredith Attwell Baker announced that she would be leaving her post on June 3 -- just 27 days before her term expires -- creating a Republican vacancy on the Commission. Chairman Julius Genachowski, along with Commissioners Michael Copps and Mignon Clyburn, are Democrats, while Commissioner Robert McDowell is a Republican. Only three sitting Commissioners may be of the same political party.

Baker was nominated by President Barack Obama on June 25, 2009 and sworn in just five weeks later. She filled the unexpired term of fellow Republican and former Chairman Kevin J. Martin, who resigned in January 2009; her term is set to expire June 30, 2011.

Baker will join Comcast as its Senior Vice President of Government Affairs, NBCUniversal. "I've been privileged to serve in government for the past seven years under President Obama at the FCC and President [George W.] Bush at NTIA," she said in a statement released by Comcast. "I'm excited to embark on a new phase of my career with Comcast and NBCUniversal." Read more here <http://www.arrl.org/news/fcc-commissioner-meredith-attwell-baker-to-leave-fcc-in-june>.

==> + ARRL EXPO AT THE DAYTON HAMVENTION®: WHERE THE DX COMES TO YOU!

ARRL Membership and Volunteer Programs Manager Dave Patton, NN1N, reports that plans for a plethora of DX activities at the ARRL EXPO -- part of the 2011 Dayton Hamvention® -- are wrapping up. "We are excited about the activities that will be taking place," he said. "Visitors to the EXPO will see a lot of activities relating to DX, including DXCC card checking, a chance to drop off QSL cards for the ARRL Outgoing QSL Bureau and even an expanded International Amateur Radio Union area." The Dayton Hamvention will take place May 20-22 at Hara Arena, located near Dayton, Ohio. Read more here <http://www.arrl.org/news/arrl-expo-at-the-dayton-hamvention-where-the-dx-comes-to-you>.

==> + AMATEUR RADIO IN SPACE: CELEBRATING 50 YEARS OF OSCAR I AND AMATEUR RADIO SATELLITES

By ARRL News Editor S. Khrystyne Keane, K1SFA

1961. It was the middle of the Cold War. John F. Kennedy is inaugurated as the 35th President of the United States. The Bay of Pigs invasion fails in Cuba. The Beatles perform for the first time at the Cavern Club in Liverpool. Freedom Riders are arrested in Jackson, Mississippi for "disturbing the peace" after disembarking from their bus. Construction of the Berlin Wall begins. Roger Maris of the New York Yankees hits his 61st home run in the last game of the season, beating the 34 year old record held by Babe Ruth. Barbie gets a boyfriend when Mattel introduces the Ken doll.

Just four years earlier, the Soviet Union had launched Sputnik I, the first human-made object to orbit the Earth, ushering in the Space Age. For the next 30 years, the Cold War rivalry between the US and the former Soviet Union focused on attaining firsts in space exploration. These were seen as necessary for national security and symbolic of technological and ideological superiority. The "space race" involved pioneering efforts to launch artificial satellites, sub-orbital and orbital human spaceflight around the Earth, as well as piloted voyages to the Moon.

1961. Mercury-Redstone 2 launches into space carrying Ham the Chimp. Soviet cosmonaut Yuri Gagarin becomes the first human in space. Alan Shepard becomes the first American in space aboard Mercury-Redstone 3. Gus Grissom, piloting the Mercury-Redstone 4 capsule Liberty Bell 7, becomes the second American to go into space. OSCAR I -- Orbiting Satellite Carrying Amateur Radio -- the very first Amateur Radio satellite, is launched into space.

Barely four months after the successful launch of Sputnik I, the United States launches the unmanned Explorer I on January 31, 1958. At about that same time, a group of hams on the West Coast -- Lance Ginner, K6GSJ; Chuck Smallhouse, W6MGZ; Ed Beck, K6ZX; Al Diem; Chuck Townes, K6LFH (SK), and Nick Marshall, W6OLO (SK) -- begin toying with the idea of launching an Amateur Radio satellite into orbit and organized themselves into Project OSCAR. After a series of high level exchanges among Project OSCAR members, the ARRL and the US Air Force, a launch opportunity on a Thor DM-21 Agena-B rocket from Vandenberg Air Force Base in California was secured for the very first Amateur Radio satellite: OSCAR I. It was successfully launched into a low Earth orbit on the morning of December 12, 1961 -- four years after the launch of Sputnik I. The satellite was also the world's first non-government bird.

Fifty years -- 1961 to 2011 -- is a long time -- and an important milestone, thought ARRL Lab Test Engineer Bob Allison, WB1GCM. And then he had a lightbulb moment: Why not take the back-up OSCAR I on display at ARRL Headquarters and make it work again? So W1AW Station Manager Joe Carcia, NJ1Q and Allison began tinkering with the satellite, one of three made by Project OSCAR. One of the satellites went up into space in 1961, one is on display at the Smithsonian Air and Space Museum in Washington, DC and the other was until recently sitting in a display

case on the first floor of the HQ building in Newington.

After much trial and error, Carcia finally got OSCAR I to transmit a signal on 145 MHz, just as the original satellite did. "Since specific technical literature on the satellite was unavailable, information taken from 1962 QST and CQ articles assisted in the reconstruction of the transmitter in the ARRL unit," Carcia explained. "Much care was given to salvage the original components, although time had taken its toll on most of the circuitry. As such, although the transmitter functions, the actual keying of the transmitter is performed using a PIC beacon keyer. Power is supplied using a standard wall-cube providing 12 V dc."

In honor of OSCAR I's 50th anniversary, the rebuilt satellite will be on display at the ARRL EXPO area at the Dayton Hamvention, May 20-22 at Hara Arena in Trotwood, Ohio. "We have hooked OSCAR I up to a dummy load running very low power, and as you walk by, you will hear it transmit "HI HI," just as it did 50 years ago," Allison said. Since the transmission does not identify, you won't be able to pick it up on your handheld transceiver while at Hara. Read more here <http://www.arrl.org/news/oscar-i-and-amateur-radio-satellites-celebrating-50-years>.

==> + HONORING AMATEUR RADIO: MAINE HONORS HAMS ON WORLD AMATEUR RADIO DAY

In a joint resolution released on April 14, the Maine House and Senate recognized the nearly 5000 licensed ham radio operators in Maine and their service to the state. The resolution proclaimed April 18 Amateur Radio Day in the state. April 18 was also World Amateur Radio Day, marking the 86th anniversary of the founding of International Amateur Radio Union. Read more here <http://www.arrl.org/news/maine-honors-hams-on-world-amateur-radio-day>.

==> + ON THE AIR: ANNUAL ARMED FORCES DAY CROSSBAND TEST SCHEDULED FOR MAY 14

The Army, Air Force, Navy, Marine Corps and Coast Guard are co-sponsoring the annual Military/Amateur Radio Crossband Communications Test in celebration of the 61st anniversary of Armed Forces Day (AFD). Although the actual Armed Forces Day is celebrated on the third Saturday in May -- May 21 in 2011 -- the AFD Military/Amateur Crossband Communications Test will be conducted on May 14 to prevent conflict with the Dayton Hamvention&#65533;, scheduled for May 20-22. Read more here <http://www.arrl.org/news/annual-armed-forces-day-crossband-test-scheduled-for-may-14>.

==> AMATEUR RADIO IN THE CLASSROOM: HIGH SCHOOL RADIO CLUB TO OFFER FREE FOXHUNTING TRANSMITTER KITS

Miguel Enriquez, KD7RPP, is an Instructor with the ARRL's Teachers Institute on Wireless Technology, as well as a math and electronics teacher at Pueblo High School in Tucson, Arizona. One of his responsibilities at Pueblo is advising the school's Amateur Radio club. "Our radio club has discovered how much fun ham radio can be as a way to improve the math, science, technology and communications skills of the students," he told the ARRL. "We are also fortunate that the ARRL has been generous in providing us with equipment, materials, supplies and curricula. Without their support, we would not currently be involved in building QRP transceivers, ATV downconverters for our Amateur Television station (W7ATN), underwater robots for mapping lakes recently discovered in caves in the Southwest -- and fox hunt transmitters." Read more here <http://www.arrl.org/news/high-school-radio-club-to-offer-free-foxhunting-transmitter-kits>.

==> AMATEUR RADIO IN THE CLASSROOM: RIT STUDENTS SUCCESSFULLY LAUNCH HIGH ALTITUDE BALLOON

The Rochester Institute of Technology Amateur Radio Club, K2GXT, had a successful launch of RITCHIE-1 -- a custom high altitude balloon designed by members of K2GXT -- at the Imagine RIT Festival on May 7. According to RITARC Vice President Bryce Salmi, KB1LQC, the goal of the launch was not to reach high altitudes to take images, but to engineer a reliable, modular and reusable payload with good engineering practice. "Saturday's launch went perfect," Salmi told the ARRL. "The launch was streamed live to the Internet and a local television station even produced a segment for their newscast on it." The club won the Academic Award for the balloon at the festival. Read more here <http://www.arrl.org/news/rit-students-successfully-launch-high-altitude-balloon>.

==> 2011 ARRL/TAPR DIGITAL COMMUNICATIONS CONFERENCE CALL FOR PAPERS

Technical papers are solicited for presentation at the 30th Annual ARRL/TAPR Digital Communications Conference, to be held September 16-18 in Baltimore, Maryland. Papers will also be published in the Conference Proceedings. Authors do not need to attend the conference to have their papers included in the Proceedings. The submission deadline is July 31, 2011. Read more here <http://www.arrl.org/news/2011-arrl-tapr-digital-communications-conference-call-for-papers>.

==> SOLAR UPDATE

Tad " The Sun ain't gonna shine anymore <http://www.youtube.com/watch?v=2eAxCVTMJ-I>" Cook, K7RA, reports: Currently, we can see six sunspot groups. A new one appeared May 5, then two more on May 8, another two on May 9 and another new one on May 11. The average sunspot number for this week rose nearly 7 points to 74.6 and geomagnetic conditions were quiet all week. But the latest forecast shows unsettled geomagnetic conditions on Thursday (today) with a planetary A index of 15, then 10, 5, 8, 8 and 10 on May 13-17,

then 5 on May 18-25. Solar flux values of 95 are predicted for May 12-17, 100 and 105 on May 18-19 and 110 on May 20-30. NASA had an updated prediction for the peak of Solar Cycle 24 on May 9, and it is 7 points higher -- and one month earlier -- than the April 4 prediction. On April 4, NASA predicted the smallest cycle in 200 years, with a peak smoothed sunspot number of 62 in July 2013. This month, that estimate has been raised to 69, and the peak moved forward one month to June 2013. NASA now says this will likely be the smallest cycle in 100 years, instead of 200. Look for more information on the ARRL website on Friday, May 13. For more information concerning radio propagation, visit the ARRL Technical Information Service Propagation page <http://www.arrl.org/propagation-of-rf-signals>. This week's "Tad Cookism" is brought to you by the Walker Brothers' The Sun Ain't Gonna Shine Anymore <http://en.wikipedia.org/wiki/The_Sun_Ain%27t_Gonna_Shine_%28Anymore%29>.

==> + SILENT KEY: NOTED DXER BEN STEVENSON, W2BXA (SK)

Ben Stevenson, W2BXA, of Colonia, New Jersey, passed away on May 5, 2011. He was 97. An ARRL member since 1934, Stevenson was also a charter member of the North Jersey DX Association (NJDXA) since 1957, serving as its first president. Stevenson held Satellite DXCC #1, Mixed DXCC #6 (390 countries confirmed) and Phone DXCC #6 (388 countries confirmed). Read more here <http://www.arrl.org/news/noted-dxer-ben-stevenson-w2bxa-sk>.

==> THIS WEEK ON THE RADIO

This week:

- May 14 -- FISTS Spring Sprint; FOC QSO Party
- May 14-15 -- Nevada Mustang Roundup; EUCW Fraternizing CW QSO Party; CQ-M International DX Contest; VOLTA WW RTTY Contest; 50 MHz Spring Sprint
- May 16 -- Run for the Bacon QRP Contest
- May 19 -- NAQCC Straight Key/Bug Sprint

Next week:

- May 20 -- Feld Hell Sprint
- May 21-22 -- UN DX Contest; Aegean RTTY Contest; His Majesty King of Spain Contest (CW); EU PSK DX Contest; Baltic Contest
- May 25 -- SKCC Sprint
- May 25-26 -- CWops Mini-CWT Test

All dates, unless otherwise stated, are UTC. See the ARRL Contest Branch page <http://www.arrl.org/contests>, the ARRL Contest Update <http://www.arrl.org/The-ARRL-Contest-Update> and the WA7BNM Contest Calendar <http://www.hornucopia.com/contestcal/index.html> for more info. Looking for a Special Event station? Be sure to check out the ARRL Special Event Stations Web page <http://www.arrl.org/special-event-stations>.

==> UPCOMING ARRL SECTION, STATE AND DIVISION CONVENTIONS AND EVENTS

- June 3-5 -- ARRL Northwestern Division Convention (SeaPac)

Amateur Radio Newsline(tm) Report 1761 - May 13 2011

The following is a closed circuit advisory. With a word concerning Newsline's current finances, here's our Producer Bill Pasternak, WA6ITF.

--

It's been almost 6 months since I was here to ask for financial support for Amateur Radio Newsline. Thanks to donations made through late last year we have been able to keep from bothering you for a while. And in all honesty, I prefer not to make these requests unless it's absolutely necessary as it takes time that could be better spent reporting the news.

But now its spring and all the bills from last winter have been mounting up. And, as usual, we are at the time of year when there is really not very much left in the treasury to pay them. Eventually they have got to get paid or these news reports will cease. Unfortunately, that time is now.

So how can you help? Simply take a few moments to send a donation to the Amateur Radio Newsline support fund so that we can keep these newscasts coming your way. Making a contribution is only a mouse click away if you have Pay Pal. Just go to www.arnewsline.org, scroll to the bottom of the page and click on the button marked "Make Donation." Or you can send in a contribution by mail to the Amateur Radio Newsline Support Fund, 28197 Robin Avenue, Saugus California, 91350.

Whichever way you choose, the all volunteer crew at the Amateur Radio Newsline will be eternally grateful and these newscasts will be here for you, week after week.

Once again that's the Amateur Radio Newsline Support Fund, Amateur Radio Newsline Support Fund, 28197 Robin Avenue, Saugus California, 91350. Or by Pay Pal at www.arnewsline.org

For the Support Fund, I'm Bill Pasternak, WA6ITF. Jeff.

--

Than you Bill. Now, Amateur Radio Newsline report number 1761 with a release date of Friday, May 13, 2011 to follow in 5-4-3-2-1.

The following is a Q-S-T. The FCC rolls out its new Personal Localized Alerting Network and says that New York City will have it first; an experimental 4 meter beacon takes to the airwaves here in the United

States, Hamvention opens its doors on Friday May 20th, Bob Heil, K9EID to have his own weekly Internet television show about ham radio and those scary Pythons are on the radio. Its not Monty Python we are talking about but you can find out the details are on Amateur Radio Newsline(tm) report number 1761 coming your way right now.

(Billboard Cart Here)

**

RESCUE RADIO: FCC SAYS ALERT WILL BE IN OPERATION 6 MONTHS EARLY IN NYC

Smartphone and other GPS enabled mobile device users in the New York City will be the first in the United States to receive emergency alerts on their handsets. This with word that the new FCC inspired Personal Localized Alerting Network or PLAN system will be inaugurated in the Big Apple by the end of the year.

Once in operation, it will deliver geographically targeted text messages to GPS-enabled cellular telephones. The new system will be used for just three types of alerts. These are ones issued by the president, alters of a life-threatening and AMBER Alerts in search of kidnapped or missing children. Participating carriers can opt out of all but the Presidential alerts.

Back in 2006 Congress directed the Federal Communications Commission to set a deadline for implementing a mobile emergency warning system. The FCC established set an April 2012 end date for participating carriers to launch the service. It will be up and running six months prior to that in New York City.

The mobile alert system was created to complement the Emergency Alert System that issues alerts using the long established broadcast TV, radio and cable delivery infrastructure. That system is in the process of being updated to handle a Common Alerting Protocol from notifying agencies.

Already, AT&T, Sprint, T-Mobile and Verizon are on board in New York, where a late-2011 launch was announced on Tuesday, May 10th. (FCC)

**

EMERGING TECHNOLOGY: EXPERIMENTAL US 70 MHZ BEACON ON THE AIR

A new 70 Mhz beacon is on the air from the United States East coast operating under a non-amateur experimental license and signing the call WE9XUP. Its operating frequency is 70.005 MHz with its location atop Apple Orchard Mountain in Bedford, Virginia at some 4200 feet above sea level. That's Grid Square FMO7fm for those of you who chase grid squares.

WE9XUP is currently scheduled to run 24 hours a day until September 1st transmitting in Morse. Its primary purpose is that of propagation

study including trans-Atlantic E-skip. Reception reports go to Brian Justin via e-mail at WA1ZMS (at) arrl (dot) net.

**

WORLDBEAT: WORLD RADIO DAY FEATURED ON GERMAN TV

World Amateur Radio Day took place on April 18th and was featured on German regional news reports by broadcasters WDR, NDR and HR. All three covered the day in news packages where viewers saw 3 minute reports about radio amateurs in the cities of Bonn, Flensburg, Kassel and about one in a mountain hut near Wetzlar. As a result of the TV coverage over half a million people throughout Germany got a rather positive insight into the hobby. The theme for World Amateur Radio Day this year was "Amateur Radio: The first technology-based social network."

(Southgate)

**

WORLDBEAT: UK DIGITAL RADIO BROADCASTING TO BE DELAYED

The London Daily Mail newspaper reports that the United Kingdom has abandoned the 2015 target date to phase out analog F-M radio broadcasting in favor of all digital transmissions. The newspaper cites a leaked government memo that reportedly suggests that a 2017 start is more likely, and that loss of analog services probably would have to be phased in by region over several more years.

According to the newspaper, the new digital radio technology has failed to grip the public's imagination as the shift to digital TV did. It notes that there is opposition from FM loyalists who cannot see the point of moving the major stations off the analog service. It also estimates that 130 million analog radios would be made instantly obsolete by the locked in 2015 changeover date.

But there appear to be other reasons as well. The UK uses DAB digital radio technology that requires different spectrum than analog FM. Regulators also want stations using the DAB technology share digital transmission facilities. But says the leaked memo, the UK radio industry probably can't afford the transmitter infrastructure costs associated with a digital switchover before 2017. Part of the problem seems to be the need to build out local digital radio to match the coverage area of the analog FM stations. (RW, Daily Mail)

THE SOCIAL SCENE: THE DAYTON HAMVENTION SET TO OPEN MAY 20

The Dayton Hamvention is set to open on Friday, May 20th and this year the planers have added something new. Use of social media to build excitement for the event. Josh Long, KD8BVB, is this years Assistant General Chairman who recently spoke to Hap Holly, KC9RP, of the Rain Report:

--

KD8BVB: "We are advertising of coarse in all of the amateur radio magazines but this year we also started out into social media. You can find Hamvention now on Facebook, Twitter and YouTube where we are literally engaging thousands of attendees and volunteers on there. Wr have give-aways and we solicit volunteers."

--

The 2011 Dayton Hamvention runs the weekend of May 20th to the 22nd at the HARA Arena in suburban Dayton, Ohio. Amateur Radio Newsline will be hosting the annual Ham Radio Town Meeting on Saturday the 21st from 11:45 a.m. to 2 p.m. in Meeting Room 2. Our topic this year is titled How to Make a Ham Radio Video in the 21st Century.

We will have some top names in movie making to show you how to use video to let the world know more about our service and hobby. If you have your own home made ham radio video, please bring it along on DVD and we will be happy to show it and then to critique it for you as time allows.

Again, that's the Ham Radio Town Meeting on Saturday the 21st from 11:45 a.m. to 2 p.m. in Hara Arena Meeting Room 2. We hope to see you there. (ARNewsline(tm), Audio courtesy of The RainReport)

**

ENFORCEMENT: FCC ISSUES OFFICIAL CITATION FOR ALLEGED SALE OF CELLPHONE AND GPS BLOCKERS

The FCC has issued an Official Citation to Internet retailer GadgetTown.com. This for allegedly marketing in the United States unauthorized radio frequency cell phone signal blockers and GPS signal jammers in violation of section 302(b) of the Communications Act, and section 2.803 of the Commission's rules. Amateur Radio Newsline's Norm Seeley, KI7UP, has more:

--

Cellular telephone and GPS jamming devices are illegal in the USA. And according to the Citation, its this law that lead its Enforcement Bureau initiated an investigation of GadgetTown and its marketing of several unauthorized radio frequency devices in the United States.

These are identified as the Cigarette Case Cell Phone Signal Blocker, the Portable Cell Phone Signal Blocker, the 60 M Range Mountable Cell Phone Signal Blocker and the Portable Anti-Tracker GPS Signal Jammer Blocker.

The staff of the Bureau's Spectrum Enforcement Division observed that GadgetTown offered for sale the four signal jamming devices over company's web site. On July 23, 2010, the Division issued a letter of inquiry to GadgetTown regarding those products.

The company responded to the letter on August 31, 2010 at which time it stated that it marketed the aforementioned signal jamming devices between July 1, 2010 and July 22, 2010, selling a total of 15 signal jamming devices to U.S. consumers during that period.8 In addition, GadgetTown identified the supplier and quantity of each device sold and explained that it did not manufacture any of the devices, but shipped the products directly from Shenzhen, China. Finally, GadgetTown stated that it was not aware of regulations prohibiting the import and sale of the signal jamming devices, and that since receiving notification from the Commission, it has taken steps to ensure that there will be no further prohibited items imported into the United States.

But that was not good enough for the FCC. In the citation, the regulatory agency ordered that GadgetTown should take immediate steps to avoid any recurrence of this type of incident. It noted that jamming devices such as these pose significant risks to public safety and other radio communications services. It also warned GadgetTown that if after receipt of the Citation, the company violates the Communications Act or the agency's Rules by engaging in future sales of these devices that the Commission may impose monetary forfeitures.

For the Amateur Radio Newsline, I'm Norm Seeley, KI7UP, in Scottsdale, Arizona.

--

GadgetTown was given thirty calendar days after the May 4th release date of the Citation to file a response. (FCC)

**

ENFORCEMENT: FCC AFFIRMS $10000 FINE TO OKLAHOMA LPFM

A $10,000 fine issued to the Enid Public Radio Association, licensee of a low-power FM radio station in Enid, Oklahoma, has progressed to a Forfeiture Order.

The penalty, originally issued in July 2010, was for airing commercials rather than underwriting announcements and for operating at an antenna height greater than authorized. KEIF-LP was fined $5,000 for selling advertisements and $5,000 for broadcasting from an antenna that was almost double the legal height.

The commission announced the affirmation of the Forfeiture Order in late April. This after noting that nobody representing KEIF had not disputed the findings nor tried to get the fine reduced or cancelled. Therefore there was no basis on which to change the proposed penalty and the FCC must impose the total fine of $10,000.

The station was given the customary 30 days from the confirmation of the Forfeiture Order to pay or to file an appeal. Another broadcaster, Chisholm Trail Broadcasting Co., had complained to the commission about the violations. (FCC)

**

RADIO LAW: PROPOSED REVISIONS TO CALIFORNIA ANTI-CELLPHONE WHILE DRIVING LAW COULD COST VIOLATORS BIG BUCKS

If you get caught talking or texting on a cellular telephone phone behind the wheel in California, some lawmakers say it should cost you even more money along with a penalty attached to your driving record. And they have introduced legislation to make it happen. Amateur Radio Newsline's Jim Davis, W2JKD, reports:

--

A proposed hike in the penalties imposed on driving while using anything other than a hands-free device could end up totaling hundreds of dollars for drivers caught violating the states ceellphone and texting while driving ban.

If the bill becomes law, the current $20 cell phone ticket will increase to $50. But when you add in court costs and other administrative fees, a violation may ultimately total up to $300 or more. A second offense would push this fine up to $500 or more.

But that's not all. In addition to the fine the proposal would also add on one point penalty to a drivers file with the Department of Motor Vehicles each time a conviction occurrs. This in turn could lead to significantly higher insurance rates since many if not all automotive insurers quote prices based on a persons driving record.

Also targeted by the revised law would be those who ride bicycles or other non-motorized vehicles. The new law would penalize them with the same fines for pedaling and talking or texting on their phones while in motion.

It should be noted that the current California hands-free rule has no provision to exclude radio amateurs, C-B operators or others who use two way radios in their vehicles, but to date that aspect of the rule has not been widely enforced.

Im Jim Davis, W2JKD.

--

If enacted as proposed it would become one of the nations toughest anti-cellphone while driving law. (Published news reports)

**

HAM MILESTONES: SOTA PASSES MILLIONTH QSO

Some big news for hams who like to operate portable off of tall rocks called mountains. Here's Jeramy Boot, G4NJH with the details:

--

Summits on the Air recently passed a significant milestone with its millionth QSO being made over the recent holiday period.

SOTA started in 2002 and has now grown into a worldwide award scheme with 55 associations across the world and around 44,000 qualifying summits.

I'm Jeramy Boot and you are tuned to the Amateur Radio Newsline.

--

For more information on the scheme, check out the internet at www.sota.org.uk. (GB2RS)

RADIO CHANGES: W8BBA FALLS SILENT AFTER 50 YEARS SERVICE TO VETERANS

Amateur station W8BAA located at the Veterans Administration Hospital in Brecksville Ohio fell silent on April 29th after at least 50 years of service to veterans.

The Brecksville VA hospital operations are being moved to the main Cleveland VA hospital and he Brecksville radio club equipment is being transferred to the radio room at that facility. The club call at the main hospital is WA8VA. (W8KBF)

NAMES IN THE NEWS: HAM NATION WITH K9EID PREMIERES MAY 24

Amateur Radio's Mr. Audio, Bob Heil, K9EID, will be hosting a new weekly HD video webcast about our hobby titled Ham Nation. According to Bob, each weeks Ham Nation will feature interesting guests as they discuss the many fascinating aspects of the hobby.

The shows premiere on May 24th will have famed rock guitarist Joe Walsh, WB6ACU, and broadcast facility designer Dave Jennings, WJ6W, as Bob's special guests. Jennings is one of the hosts of the Amplitude Modulation International net that meets every Wednesday on 3870 kHz.

Ham Nation will air Tuesday evenings at 9 p.m. Eastern, 8 p.m. Central and 6 p.m. Pacific time on Leo Laporte's TWIT TV Internet network. To tune in, please take your web browser to live.twit.tv and join the fun. (K9EID)

**

BREAK 2

This is ham radio news for today's radio amateur. From the United States of America, We are the Amateur Radio Newsline with links to the world from our only official website at www.arnewsline.org and being relayed by the volunteer services of the following radio amateur:

(5 sec pause here)

**

WORLDBEAT: RADIO NETHERLANDS UPGRADES MADAGASCAR RELAY STATION

One of the worlds best known shortwave broadcasters is upgrading its relay site in Madagascar. Felix Scerri, VK4FUQ, of the WIA News is there with the details:

--

Radio Netherlands Worldwide management has confirmed the purchase of three 500 kW short-wave transmitters from the recently-closed short-wave site at Horby in Sweden. The transmitters are currently being dismantled for shipment to RNW's station in Madagascar.

Recently, RNW management announced that it intended to speed up the process of replacing short-wave with other distribution platforms, including the closure of its relay stations in Bonaire and Madagascar. The Bonaire facility is scheduled for closure at the end of October 2012, but no closure date has yet been decided for Madagascar.

However, late last year RNW decided it was time to replace the nearly 40-year-old Philips transmitters at Madagascar. Rather than invest in new transmitters, the opportunity was taken to purchase the three ABB transmitters from the Swedish station at H"rby which was closed at the end of last year. These were installed in 1993.

For the WIA News, I'm Felix, VK4FUQ.

--

No date has been announced as to when the new transmitters will take to the air from the Radio Netherlands Madagascar relay site. (WIA News)

**

ON THE AIR: GB6COD TO CELEBRATE COLLINGWOOD OPEN DAY

On the air, the United Kingdom's Royal Naval Amateur Radio Society will run a special event station on the H.M.S. Collingwood on Saturday June 4th. The callsign to be used is GB6COD which stands for Collingwood Open Day. The station will be operational on all amateur bands from 1.8MHz through 440 MHz. The Society headquarters station will also be open for viewing from 9.30am to 6pm the same day. The open day will also feature the Royal Navy Field Gun Competition. (GB2RS)

**

ON THE AIR: COMMEMORATING THE TURKISH WAR OF INDEPENDENCE

Two special event stations will be active in May to commemorate the start of the Turkish War of Independence and the 130th anniversary of the birth of Mustafa Kemal Atat&#65533;rk. Between May 16th and May 22nd listen out for TC130ATA. On the 18th, 19th and 20th TC1919ATA is the call to look for. QSL each as directed on the air. (Southgate)

**

HAM CELEBRATIONS: 50 YEARS OF IOTA

2014 marks the 50th anniversary of the launch of the Islands On The Air Program by British SWL Geoff Watts. As a build-up to celebrations on this occasion, the RSGB Islands On The Air Manager and Committee have announced an exciting activity period in which all licensed amateurs world-wide are invited to participate.

For a two-year period during 2012 and 2013, Islands On The Air chasers are encouraged to contact as many different IOTA groups as possible. Also, for hams so inclined to play their part by operating from as many groups as possible, with special emphasis on the less-frequently activated ones.

The complete rules of the Islands On The Air 50th Anniversary Marathon will appear in the forthcoming RSGB IOTA Directory to be released at the Dayton Hamvention. They can also be on-line at www.g3kma.dsl.pipex.com (G3KMA)

**

DX

In DX, the he Jan Mayen DXpedition led by SQ8X scheduled for July 6th to the 14th has announced that their callsigbn while on the island will be their group's callsign will be JX5O instead of JX7VPA as first announced. The DXpedition will focus on 30 through 6 meters operating CW, RTTY, PSK, with some SSB if conditions permit. Accompanying the operators will be a television production crew is coming to produce a broadcast documentary about the ham radio project and the island. Updated details and QSL route are available janmayen2011 dot org

Members of the Algarve Star DX Team will be active as CR55PQ from the inside of Portuguese Airborne Troops School between May 21st and the 23rd. This, to celebrate 55 years of operation at this military school. Operations will be on 80 through 6 meters using CW, SSB and RTTY. QSL to CT1EHX, either via the bureau or direct.

The Radio Club de los Andes reports that its station LU8YE will be on the air on May 20th to the 22nd from Meliquina Lake which is located at 45 Kilometers from the city of San Martin de los Andes. Operation will be on 80 through 10 meters using SSB and CW. QSL's for in country contacts go to LU8YE. DX contacts are via EA7FTR

W5FJG reports that he has been assigned to work on Midway Island as the Chief Communications Officer. He was scheduled to arrive last week with an Icom IC-7000 but no antenna or power supply. He says he is working to get this modest station on the air stroke KH4 and hopes to be on the air no later then June 1st. His assignment is open ended, and he will be on Midway for at least one year. Operation should be from 6 through 40 meters on SSB, CW, RTTY and other digital modes. He says that he will provide a QSL route and operating times at a later date.

Lastly, N5OMG says that the K5N Activation Group will be leaving from Venice on Thursday morning, June 2nd, heading for Grid Square EL58. This, to activate 6 meters in an all out effort to make this rare grid available to as many operators as they can make contact with. They are hoping to be on the air by noon local time operating all modes up the band a bit on 50.210 Mhz. First up will be a Meteor Scatter attempt followed by all other modes. This operation is slated to last four days. No QSL information is available as we go to air.

(Above from various DX news sources)

**

THAT FINAL ITEM: SNAKES ON THE RADIO

And finally this week, the story of a research program that's putting snakes on the radio. Well, kind of. Here's Graham Kemp, VK4BB, of the WIA News with the slithering details:

--

Snakes have a face only a mother could love, but that hasn't stopped PhD student Melissa Bruton, from the University of Queensland's School of Geography, Planning and Environmental Management from getting up close and personal.

Melissa was recently awarded a grant by the Wildlife Preservation Society of Queensland to support her research into reptiles in the southern Brigalow Belt region of Queensland and New South Wales.

Melissa has a particular interest in the elusive Woma Python. To do this, she be implanting radio-transmitters into the body cavity of several larger pythons and radio-tracking them for one year each.

After finishing just one summer of trapping Ms Bruton already has eight Woma Pythons to study.

The tracked womas are quite mobile but early indications are that they return to preferred burrow sites. Each Woma will be tracked every second day for a minimum of 12 months so we will know a lot more about these elusive pythons in 12 months' time.

For the Amateur Radio Newsline, I'm Graham Kemp, VK4BB, of the WIA News reporting from Brisbane Australia.

--

Many have seen the movie Snakes on a Plane but snakes on the radio makes a lot more sense. At least in his particular case. (WIA News)

**

NEWSCAST CLOSE

With thanks to Alan Labs, AMSAT, the ARRL, the CGC Communicator, CQ Magazine, the FCC, the Ohio Penn DX Bulletin, Radio Netherlands, Rain, the RSGB, the Southgate News and Australia's WIA News, that's all from the Amateur Radio Newsline(tm). Our e-mail address is Newsline(at)arnewsline(dot)org. More information is available at Amateur Radio Newsline's(tm) only official website located at www.arnewsline.org. You can also write to us or support us at Amateur Radio Newsline(tm), 28197 Robin Avenue, Santa Clarita California, 91350

And a reminder that the nominating period for the year 2011 Amateur Radio Newsline Young Ham of the Year Award is now open. Created by Newsline back in 1986, this award is offered to recognize one young United States or Canadian radio amateur age 18 or younger for his or her contributions to society through Amateur Radio.

As in years past, the 2011 recipient will receive an expense paid trip to the Huntsville Hamfest in Huntsville Alabama courtesy of Vertex-Standard Corporation which produces Yaesu brand amateur radio gear. Vertex-Standard will also present this years winner with a special ham radio related gift. CQ Magazine will again treat the recipient to a week at Spacecamp-Huntsville. We at Amateur Radio Newsline will present the winner with a plaque honoring his or her achievements.

All nominations and materials required by the official rules must be received by ARNewsline before June 30, 2011. A downloadable nominating form is at our website at www.arnewsline.org. A nominating form can also be obtained by sending a request along with a self addressed stamped envelope to the Young Ham of the Year Award in care of Amateur Radio Newsline, Inc. 28197 Robin Avenue, Santa Clarita California 91350.

Again, the cutoff date for these years Young Ham of the Year Award nominations is June 30th. We ask you to do your part by nominating a young ham who has done something special related to ham radio. The nomination form is at www.arnewsline.org.

For now, with Bill Pasternak, WA6ITF, at the editors desk, Jeff Clark, K8JAC, saying 73 and we thank you for listening.

876. LB 573 - Flashing Amber Lights for Storm Spotters - Passes Legislature

Newsgroup: rec.radio.amateur.policy
Date: 2011-05-13 13:00:57 UTC
From: ARRL Members Only Web site <memberlist@www.arrl.org>
Message-ID: <20110513123209.6738320800@bmail.arrl.org>
Source record: 245197
Cross-posted to: rec.radio.amateur.moderated,rec.radio.amateur.policy,oma.general,nebr.misc,rec.radio.info

Jim Winney, KD6MXE, has been doing a nice job monitoring LB573, the bill to authorize storm spotters to use flashing amber lights, as it traversed the legislative process. Jim informs me that LB573 passed the state senate this morning. It now awaits the governor's signature.

If you would like to review the final language, here is the URL:

http://www.nebraskalegislature.gov/FloorDocs/Current/PDF/AM/AM344.pdf

The language is a bit different than what we had originally proposed, but should satisfy the needs of the storm spotters and the emergency managers who requested help getting the legislation.

73, Art KØAIZ

OK, I think I'm done arguing with this dolt. I've seen autoresponders
show more creativity than the tholenbot. Enough is enough.

920. K6LHA (Len Anderson) a silent key?

Newsgroup: rec.radio.amateur.policy
Date: 2011-05-15 22:00:11 UTC
From: Don B <noone@nowhere.moc>
Message-ID: <30926965.24986545@nowhere.moc>
Source record: 245241

I've been seeing claims on some forums that K6LHA is a SK, and also found this reference which seems to corroborate the claims:

http://cd.textfiles.com/hamradio3/packet/101190f1/1010.ful

That's sad news if true. I always enjoyed Len's posts in this group.

DeLorean is one of N9OGL's favorite people. N9OGL wants to be just
like DeLorean. So do Woger and Marky.

37> Newsgroups:
comp.os.os2.advocacy,rec.arts.tv,rec.radio.amateur.policy,rec.music.classical,rec.sport.basketball.college

37> Not myself

Classic contradiction, given that you just finished making
a clear and unambiguous reference to "this dolt", Wesson.
You do understand the difference between "this" and "that",
don't you, Wesson?

37> -- you, dolt.

Who is "dolt", Wesson? There is nobody in this newsgroup
using that alias, though you did refer to yourself that
way in your previous posting.

37> I'm done arguing with you.

Obviously not, which is why I called them Famous Last Words,
Wesson.

==> + FRIENDS USE HAM RADIO TO SUMMON HELP WHEN ALASKA AMATEUR IS
MAULED BY BEAR

Wes Perkins, KL0FM, of Nome, Alaska, was seriously mauled by a
grizzly bear during a hunting trip on Sunday, May 14. According to the
Alaska State Troopers, Perkins and two friends had been tracking the
bear east of Nome -- located on the Seward Peninsula -- when the big
grizzly charged the group. Perkins' companions shot and killed the
animal during the attack. Perkins was badly hurt, including severe
injuries to his face. The hunters called for help using an Amateur
Radio handheld transceiver. Read more here
<http://www.arrl.org/news/alaska-amateur-mauled-by-bear-friends-use-ham-radio
-to-summon-help>.

==> + FCC NEWS: FCC UPHOLDS $4000 FINE TO PENNSYLVANIA AMATEUR

The FCC announced that on May 16, it issued a Forfeiture Order of
$4000 to Jose Torres, N3TX, of Philadelphia, Pennsylvania, "for
willfully and repeatedly operating his amateur station on an
unauthorized frequency at his residence, in violation of Section
1.903(a) of the Commission's Rules." This action follows a 2009 Notice
of Apparent Liability for Forfeiture (NAL) against Torres. In 2009, the
FCC issued the NAL against Torres, after receiving a complaint of
interference in 2008. Agents in the Enforcement Bureau's Philadelphia
Office used mobile direction finding equipment in April and June of
that year to determine the source of interference. Both times, they
found that the source coming from Torres' residence and that the
interference consisted of unauthorized radio transmissions on 26.71
MHz. Read more here

==> + HONORING AMATEUR RADIO: PUERTO RICAN AMATEURS RECOGNIZED ON D&#65533;A
DEL RADIOAFICIONADO DE PUERTO RICO

Radio amateurs in Puerto Rico celebrated Puerto Rico Amateur Radio
Operator Day (D&#65533;a del Radioaficionado de Puerto Rico) on May 10, as
provided by Law No. 50 of June 7, 1996. The law establishes the second
Tuesday of May for this recognition.

That same day -- at a ceremony recognizing a number of voluntary
organizations in the headquarters of the Puerto Rico Emergency
Management Agency (AEMEAD <http://www.gobierno.pr/AEMEAD/Inicio>) --
AEMEAD Executive Director Heriberto Saur&#65533; presented the proclamation
celebrating Puerto Rico Amateur Radio Operator Day, signed by the
Governor of Puerto Rico Luis G. Fortu&#65533;o. Carlos Rosado, KP4CAR,
accepted the proclamation on behalf of all radio amateurs in Puerto
Rico, and especially on behalf of the Amateur Radio Volunteer Corps of
Puerto Rico (CVRPR <http://www.cvrpr.com/>), who work closely with the
agency in both drills and emergency situations.

"With this proclamation, we have the opportunity to promote and publicize Amateur Radio as a tool of vital importance when maintaining active communications in the event of a breakdown in traditional communications systems due to an emergency and to maintain the flow of information, whether internal or external, as well if necessary," Saur&#65533; said at the ceremony. Click here <http://www.arrl.org/images/view/News/proclamadiadelradioafic.jpg> to read the proclamation.

==> ON THE AIR: LIVE WEBCAM FROM THE DAYTON CROWNE PLAZA CONTINUES THROUGH SATURDAY NIGHT

Thanks to the hard work of Ben Townsend, AK2X, and support from ICOM America, the North Coast Contesters are proud to host the Dayton Contest Cam -- live from the Crowne Plaza Hotel in Downtown Dayton.

"Live camming began Wednesday evening and will continue through Saturday night," said Contest University Chairman Tim Duffy, K3LR. "The cam has an interactive text chat, so you can text the folks that you see on the cam and they can 'talk' back to you via the audio feature on the Dayton end."

Duffy said that while the cam is running, attendees will come up to it and tell viewers what is going on at Contest University on Thursday, the TopBand Dinner on Friday night and even the Super Suite each night through Saturday. "We'll also try and cover the Contest Dinner on Saturday night," he said. "With noted contester and DXer Scott Redd, K0DQ, giving the keynote speech, this is something that you don't want to miss. We're going to try and move the cam around to give viewers a feel of what is going on here. This is our first time trying this out and it might be a little clunky, so please bear with us."

You can reach the cam by going to anyone of the four contesting website front pages -- www.contestsupersuite.com <http://www.contestsupersuite.com/>, www.contestuniversity.com <http://www.contestuniversity.com/>, www.contestdinner.com <http://www.contestdinner.com/> and www.topbanddinner.com <http://www.topbanddinner.com/> -- and clicking on the "Click to Watch Live Dayton Contest Cam" link.

"We hope this new cam helps bring some of the Dayton Contest experience to all of those that cannot be here this weekend," Duffy said.

==> + ON THE AIR: BOB HEIL, K9EID, TO HEADLINE NEW INTERNET SHOW

On Tuesday, May 24, Bob Heil, K9EID -- owner of Heil Sound -- will premier a new netcast show on Leo Laporte's TwiT.tv website. Called HamNation, the show will focus on equipment, applications, tips and general information for the Amateur Radio operator. Heil's first guest will be rock star, friend and fellow radio amateur Joe Walsh, WB6ACU. Walsh also wrote the theme music for the show. The show will be broadcast each week over the Internet at TWiT.tv at no cost. Read more here

<http://www.arrl.org/news/bob-heil-k9eid-to-headline-new-internet-show>.

==> + ON THE AIR: WRTC 2014 ANNOUNCES ADVISORY COUNCIL MEMBERS

Three radio amateurs have been selected to be on the Advisory Council for the 2014 World Radiosport Team Championships (WRTC): Tim Duffy, K3LR, of Edmond, Oklahoma, Craig Thompson, K9CT, of Trivoli, Illinois, and George DeMontrond III, NR5M, of Houston Texas. The WRTC Advisory Council consists of individuals who have not only have experience in the execution of major events, but can provide significant financial resources to the project. Read more here <http://www.arrl.org/news/wrtc-2014-announces-advisory-council-members>.

==> + 2011 ARRL/TAPR DIGITAL COMMUNICATIONS CONFERENCE CALL FOR PAPERS

Technical papers are solicited for presentation at the 30th Annual ARRL/TAPR Digital Communications Conference, to be held September 16-18 in Baltimore, Maryland. Papers will also be published in the Conference Proceedings. Authors do not need to attend the conference to have their papers included in the Proceedings. The submission deadline is July 31, 2011. Read more here <http://www.arrl.org/news/2011-arrl-tapr-digital-communications-conference-call-for-papers>.

==> SOLAR UPDATE

Tad "If I look hard enough into the setting Sun <http://www.youtube.com/watch?v=BQ0q7uJVSPI>" Cook, K7RA, reports: We saw a decline in sunspot activity this week with a 23 point drop in the average daily sunspot numbers and a nearly 9 point decline in the average daily solar flux. These compare, of course, to the numbers for the previous reporting week, which always runs from Thursday through Wednesday. But with this decline in activity, there were three new sunspot groups on May 14 and then one new sunspot group each day following, through May 18. Enhanced geomagnetic activity occurred from May 15-17, with the planetary A index in the low double-digits. The latest prediction from NOAA/USAF is for solar flux readings of 95 on May 19, then 92 on May 20-26 and jumping to 110 on May 27-30. The predicted planetary A index is 5 on May 19-26, then 22, 18, 15, 15 and 8 on May 27-31. Look for more information on the ARRL website on Friday, May 20. For more information concerning radio propagation, visit the ARRL Technical Information Service Propagation page <http://www.arrl.org/propagation-of-rf-signals>. This week's "Tad Cookism" is brought to you by the Rolling Stones' Paint It Black <http://en.wikipedia.org/wiki/Paint_It,_Black>.

==> VOTING NOW OPEN FOR JUNE QST COVER PLAQUE AWARD

Now that you've thumbed through and read the June 2011 issue of QST cover-to-cover, we're sure that an article sticks in your mind. So go ahead and cast your vote for your favorite article in the issue. The article with the most votes will receive the QST Cover Plaque Award.

- A One Person, Safe, Portable and Easy to Erect Antenna Mast, by Bob Dixon, W8ERD
- Is There an Optimum Height for an HF Antenna? by Kazimierz "Kai" Siwiak, KE4PT
- Direct Digital Synthesis for Those Classic Rigs, by Joe Lunsford, N4YG
- A Single Element Vertical "Beam," by David Robbins, K7BKI
- Two Small Helical Antennas for 2 Meters, by John E. Portune, W6NBC
- Get Up and Get-on-the-Air, by Gary Pearce, KN4AQ, and Dick Orander, KD4ISC
- DXpedition to Ponza Island, by Ruth L. Vano, KB0USC

The QST Cover Plaque award -- given to the author or authors of the best article in each issue -- is determined by a vote of ARRL members on the QST <http://www.arrl.org/cover-plaque-poll> Cover Plaque Poll Web page <http://www.arrl.org/cover-plaque-poll>. Only non-Headquarters staff authors are eligible to receive votes.

==> + DXCC NEWS: DXCC DESK APPROVES 2011 ANDAMAN AND NICOBAR ISLAND DXPEDITION

ARRL DXCC Manager Bill Moore, NC1L, reports that the 2011 VU4PB DXpedition to the Andaman and Nicobar Islands <http://www.arsi.info/dxpeditions/vu4pb-mar-2011> has been approved for DXCC credit. If you have any questions about this operation, please send an e-mail <dxcc@arrl.org> to the ARRL DXCC Desk.

==> THIS WEEK ON THE RADIO

This week:

- May 20 -- Feld Hell Sprint
- May 21-22 -- UN DX Contest; Aegean RTTY Contest; His Majesty King of Spain Contest (CW); EU PSK DX Contest; Baltic Contest
- May 25 -- SKCC Sprint
- May 25-26 -- CWops Mini-CWT Test

Next week:

- May 27 -- NCCC Sprint Ladder
- May 28-29 -- CQ WW WPX Contest (CW)
- May 29 -- ARCI Hootowl Sprint (local time)
- May 29-30 -- Michigan QRP Memorial Day CW Sprint
- June 2 -- QRP Minimal Art Session

All dates, unless otherwise stated, are UTC. See the ARRL Contest Branch page <http://www.arrl.org/contests>, the ARRL Contest Update <http://www.arrl.org/The-ARRL-Contest-Update> and the WA7BNM Contest Calendar <http://www.hornucopia.com/contestcal/index.html> for more informatin. Amateur Radio Newsline(tm) Report 1762 - May 20 2011

The following is a closed circuit and not necessarily for air. With a word from the Support Fund heres our producer, Bill Pasternak, WA6ITF.

--

If you look back, you will notice that the last time you heard me soliciting donations was way back in the fall of 2010. Thanks to your generosity last year the need for me to make these announcements was minimal.

We know you prefer to hear the news rather than having to listen to these announcements and we agree. But over the past few months almost all donations have ceased so here we our with our annual spring pitch.

We do our very best to keep operating expenses to a minimum. Everyone involved in the Amateur Radio Newsline is a volunteer. There is no paid staff. More important, all of the monies you donate go only toward operating expenses and in supporting the Young Ham of the Year Award. And for you, your donation is tax deductible.

We even make it very easy to donate. If you have web access all you need to do is take your web browser to www dot arnewsline dot org. Then click on the words "Make A donation" and use your Pay-Pal account or credit card to transfer into ours.

Or you can use the good old method of writing a check and sending it to Amateur Radio Newsline Support Fund, 28197 Robin Avenue, Saugus California 91350.

Either way, we thank you for your kindness. For your support and for your trust.

OK. Time for me to get back to my desk and write the newscast. For the support fund, I'm Bill Pasternak, WA6ITF.

--

Thanks Bill. Now, Amateur Radio Newsline report number 1762 with a release date of Friday, May 20, 2011 to follow in 5-4-3-2-1.

The following is a Q-S-T. Ham radio is on alert as the mighty Mississippi reaches flood state; the National Telecommunications and Information Administration says its not sure what spectrum is really in use by those it oversees; church services are being heard on 10 meters in Europe and the doors swing open at the Hara Arena for Hamvention

2011. Find out the details are on Amateur Radio Newsline(tm) report number 1762 coming your way right now.

RADIO LAW: NTIA ADMITS ITS SPECTRUM AVAILABILITY RESEARCH MAY BE FAULTY

The National Telecommunications and Information Administration better known as the N-T-I-A cannot guarantee that spectrum it oversees is being used efficiently by federal agencies. That was one of the conclusions of a just-released Government Accountability Office study of NTIA's spectrum management. Amateur Radio Newsline's Norm Seeley, KI7UP, has more.

--

According to the Broadcasting and Cable electronic newsletter, identifying that spectrum has become increasingly important. This, as the FCC and the National Telecommunications and Information Administration try to figure out where and from whom to free up band space for wireless broadband.

The report looked at the NTIA's most recent project which was part of that combined FCC and NTIA search for spectrum that might be available for reallocation to broadband carriers. It founds that agencies whose bandwidth was being evaluated encountered difficulties in providing NTIA with the necessary data and analyses. This is likely because the NTIA's data management system is antiquated and lacks internal controls to ensure the accuracy of agency-reported data. This in turn makes it unclear as to weather decisions regarding actual of federal government spectrum usage is based on reliable data.

As a result, the government's General Accounting Office has recommended that NTIA update its strategic plan and establish better controls to ensure accuracy. The NTIA has agreed to review that strategic plan, and that it will work on the issues of accuracy and completeness of studies to the degree it could afford to. But it added that for budget reasons, it would need to continue to rely on self-reporting by government agencies.

For the Amateur Radio Newsline, I'm Norm Seeley, KI7UP, reporting from Scottsdale, Arizona.

--

The National Telecommunications and Information Administration (NTIA) is an agency of the United States Department of Commerce that serves as the President's principal adviser on telecommunications policies pertaining to the United States' economic and technological advancement and to regulation of the telecommunications industry. According to Commerce Secretary Gary Locke, as a historical matter the N-T-I-A does

not police Federal agency spectrum use or Federal agency reporting due to budgetary and resource limitations. (B&C)

**

INTRUDER WATCH: CHURCH AUDIO HEARD ON 10 METERS

Illegal broadcasts from at least one church have been heard on 28 dot 265 Mhz by hams in Germany. As a result, amateurs world-wide are being requested to listen on this frequency in order to identify the station and its location. If you hear it, please send your report to Ger McNamara, EIU4GXB. Ger is the IARU Monitoring System Coordinator by e-mail to ei4gxb at gmail dot com.

(GB2RS)

**

ENFORCEMENT: FCC ISSUES SIX NAL'S FOR UNLICENSED OPERATION

Meantime, back in the USA, the FCC issued no less than six notices involving individuals operating overpowered broadcast stations in the FM band without a license. Five of the Notices of Violation or NAL's were issued in Florida, but it was a unlicensed operation in San Jose California that was hit the hardest. Amateur Radio Newsline's Jeff Clark, K8JAC, is here with the details:

--

We start off in Fort Myers Florida. That's where Patrick Michael Ford, also known as Disc Jockey "Joker" was hit with a notice of apparent liability for $10000 for his alleged operation on 95.7 MHz.

Also in Fort Myers, Alex Alcime, also known as Disc Jockey "Short Dawg" was handed a notice of apparent liability for $10000. This after he was also allegedly found operating on 95.7 MHz.

And in Lauderdale Lakes, Florida, Mikhail Rhodd, also known as "Blakk Babi" got his $10,000 N-A-L for operating on 89.5 MHz. The station was calling itself "Stuntastic Radio."

Further south in Miami, Antonio Robinson hit with a $10000 N-A-L for operating a station calling itself Hittbreaker Radio. It was operating on 105.5 MHz.

On Florida's west coast, in St. Petersburg, Thomas L. Morey was also hit with a $10000 Notice of Apparent Liability. The FCC says that he was broadcasting as Thomas on 88.3 MHz,

Finally, some 3000 miles to the West in San Jose CA: Gabriel A. Garcia was hit with a $25,000 N-A-L for operating on numerous frequencies, from numerous San Jose locations, while using the call letters KNRG. The FCC says that when its agents traced a signal on 93.7 MHz to its origin point, a request to inspect the station was denied. According to the FCC on another inspection attempt Garcia not only refused, but

allegedly stated to the agents, "Do you want to get shot?" For all of these reasons the FCC found his violation to be egregious and upped the fine to $25,000.

I'm Jeff Clark, K8JAC.

--

All six of the alleged violators were given the usual 30 days to pay the fines or to file appeals. (FCC)

NAMES IN THE NEWS: FCC COMMISSIONER MEREDITH ATTWELL BAKER TO LEAVE FCC JUNE 3RD

Still with FCC news, word that Republican FCC Commissioner Meredith Attwell Baker has announced that she will be leaving her post on June 3rd. Thats 27 days before her term actually was to expire on June 30th.

Baker was nominated by President Obama in June 2009 and sworn in just five weeks later. She filled the unexpired term of fellow Republican and former Chairman Kevin Martin, who resigned in January 2009.

Baker made her announcement on May 12th. At the same time she said that she has accepted a new position with cable giant Comcast as its Senior Vice President of Government Affairs for NBCUniversal division.

Baker's departure creates a Republican vacancy on the Commission. By law, only three sitting Commissioners may be of the same political party. Chairman Julius Genachowski, along with Commissioners Michael Copps and Mignon Clyburn, are Democrats. With Baker's departure Commissioner Robert McDowell will temporarily be the only Republican. HAM HAPPENINGS: HAMVENTION 2011 SET TO OPEN MAY 20

As we go to air, the doors are opening at the Harra Arena ushering in the 2011 Dayton Hamvention. And while its to early to tell how thick the crowds will be, Assistant General Chairman Josh Long, KD8BVB, says that the events planners are ready for just about an number of attendees or any eventuality that might come their way:

--

KD8BVB: "We try our hardest not to affect attendees with security measures, but we do hace the City of Trotwood Police and Fire Departments on-premises the entire show. They actually have their ambulances thre and do a bike patrol of the area.

"We use local security - a merchants security to check the doors and secure the lots in the evenings.

"There is a lot of planning behind the scenes with an event this size. You have to coordinate with local authorities and have meeting places off-site in case of an event that might happen.

"We have been fortunate to not vave to put any of those protocols into place. But they are there and available to keep our attendees and our volunteers safe."

--

According to Long, this is the 48th consecutive year that the Hamvention has been held at the Hara Arena in the Dayton suburb of Trotwood. He says that it's the only place in the area that can be a home to an event of this size:

--

KD8BVB: "The Dayton Hamvention takes up all six large halls of the complex which is about 124,000 square feet for forums and exhibit spaces. We also use over 350,000 square feet of outdoor lots for our large flea market spaces. So, its truly a unique building for a unique event."

--

Long says that in addition to the inside vendors, the flea market and the forums, three very popular sidelights are either returning or expanding this year:

--

KD8BVB: "We have some returning crowd-favorites this year including a weather balloon launch that will take place on Saturday. We are also going to have a larger area designated to showcase our emergency communications vehicles in the area and then, of course, we will have our Hamvention T-shirts and swetshirts for sale out in the flea market."

--

Long and all the Hamvention planners say that they hope to meet many of you at the Hara Arena from May 20th to the 22nd as they do all they can to make your Hamvention experience one that you will never forget. More on Hamvention 2011 in next weeks Amateur Radio Newsline report.

RESCUE RADIO: WALTON COUNTY GA. FIREHOUSES GET HAM RADIO

Georgia's Walton County Fire Rescue has teamed up with Walton County Emergency Radio Club and the Amateur Radio Emergency Service to further protect the residents of the area during disasters. This, by installing amateur radio gear in every county firehouse.

Walton County Fire Rescue Chief Mike Moore said he thinks this is a good step for the protection of the citizens by assuring a broad range of emergency response in times of need. He says that this partnership with the local ham community means that radio amateurs can be used to facilitate communication between emergency personnel if the county's radios lose service in the event of natural disaster or tower failure.

Rick Mayson, W1CRM is the Assistant Emergency Coordinator for the Walton County Emergency Radio Club. According to news reports, he has worked closely with fire personnel to have the radios programmed as well as training and licensing for firefighters, law enforcement, and hospital personnel. The club provides training classes twice a month for anyone interested in obtaining an amateur radio license. It also sponsors exam sessions for prospective licensees.

Mayson says that they are also in talks with the Cities of Monroe, Loganville and as Social Circle to have ham gear placed in their fire stations as well. (Loganville-Grayson Patch)

RESCUE RADIO: NEWS REPORTS SAY JET BLUE TERMINAL AT JFK NYC IS RADIO DEAD ZONE

According to recent news reports, the $743 million Jet Blue Airlines terminal at JFK Airport in New York is a police radio dead zone. One that puts Port Authority police officers in a Ground Zero like communications blackout zone that has already led to a number of police injuries.

Newspaper reports say that the problem was discovered by Port Authority personnel about six months before the terminal opened to the public way back in October 2008. This when officials ran down a checklist of safety issues and realized the radio communications deficiency existed.

A permanent fix will cost an estimated $3 million and is many months away from completion. In the meantime Port Authority police officers assigned to the terminal are reportedly given preprogrammed cellphones at the start of their shifts to call the JFK police command if an emergency crops up.

Port Authority spokesman John Kelly acknowledged cops assigned there were now using backup communication, but maintaines that a temporary system implemented in April of 2010 provides partial coverage for officers to be able to use their police radios. (Published news reports)

**

THE DIGITAL DIVIDE: TV OWNERSHIP DECLINES

In what experts are attributing to both the current economic slide and the rise of alternative digital devices, ownership of television sets in the U.S. has dropped for the first time in 20 years.

According to the A.C. Nielsen ratings service, 96.7 percent of American households currently own TVs, down from 98.9 percent. That's a drop of 2.2% in the past two decades.

According to news articles quoting Nielsen, there appear to be two reasons for the decline. The first is purely economic. Simply said, some low-income households no longer own TV sets, most likely because they cannot afford new digital receivers and outdoor antennas. Likely, when their older non-digital sets using converter boxes fail and can no longer be repaired they simply walk away from any form of in-home visual entertainment.

The other is technological know-how among the current generation of younger viewers. There are the pre-teens, teens and young adults who are growing up with laptop computers rather than the traditional television remote control of their parents era. As they reach adulthood they are simply opting not to buy TV sets. Instead, they are watching their television shows and other forms of entertainment streamed live over the Internet. (HD News)

RADIO EDUCATION: ICOM PRESENTS THE ADVENTURES OF ZACK AND MAX COMIC BOOKS

ICOM America has produced a series of comic books based on amateur radio for youngsters. Titled The Adventures of Zack and Max, the downloadable magazines follow the adventures of the two teen hams with stories designed to provide the reader with some basic information about ham radio, giving a glimpse into its history, its applications, and its relevance in the world today. So far there are six issues of The Adventures of Zack and Max along with matching coloring books for the younger set. Icom also has a Zack and Max art calendar to match the series. All can be downloaded in ready to print pdf file format from the Icom America website at tinyurl.com/hamcomics (WIA News, ArnewslineT)

HAM RADIO VIDEO: THE LAST BIG FIELD DAY FROM KN4AQ

The Last Big Field Day is a new 41 minute video from Amateur Radio Video News that tells the story of world class Field Day station W3AO that since 1999 has topped the ARRL's Field Day Top 10 list, beating 2nd place by a wide margin. In 2004, the operation listed itself as 50A. That's 50 transmitters, 10 towers a myriad of antennas and something that intrigued film maker Gary Pearce, KN4AQ. So armed with

his video production gear, Gary traveled to the W3AO site to capture the moment and tell the tale to the world.

As Gary tells the story, it took a few years to find the time to get The Last Big Field Day into post production and duplicated. Now, just in time for release at the 2011 Dayton Hamvention the DVD is ready for the world to see. A preview of The Last Big Field Day can be seen on-line at www.youtube.com/kn4aq. More information including an on-line order form are found at www.ARVideoNews.com (KN4AQ)

HAM HAPPENINGS: PAPERS SOLICITED FOR 2011 ARRL/TAPR DCC

Technical papers are solicited for presentation at the 30th Annual ARRL and Tuscon Amateur Packet Radio Digital Communications Conference to be held September 16th to the 18th in Baltimore, Maryland. Papers will also be published in the Conference Proceedings.

The submission deadline is July 31st. Papers will be published exactly as submitted, and authors will retain all rights. Also, authors do not need to attend the conference to have their papers included in the Proceedings.

Submit papers to via e-mail to maty@arrl.org or via snail mail to Maty Weinberg, KB1EIB, ARRL Headquarters, 225 Main St, Newington, Connecticut, 06111. The ARRL says that it will provide additional information on the 2011 Digital Communications Conference as it becomes available. (ARRL, TAPR)

HAM HAPPENINGS: ARMAD CELEBRATES THE MILITARY ON MAY 28

Amateur Radio Military Appreciation Day better known as ARMAD will be held this year on May 28th. Thee purpose of the event is to once again honor those that serve in the armed forces, Veterans, military retired and 1st responders.

This years celebration will include a rally in Fort Wayne, Indiana as well as live on the air operations by several amateur radio clubs, and other organizations around the nation. The primary frequencies that

will be used for ARMAD 2011 are 7.260, 14.260, 21.290 and 28.450 MHz. Operations will also be taking place on Echolink node number 106819

Amateur Radio Military Appreciation Day was was founded in 2003 by Emery McClendon, KB9IBW. His interest in organizing military special events came from his four years of service in the US Air Force and two years in the Indiana Air National Guard. In 2008 he was given the Dayton Hamvention Special Achievement Award in recognition of his work in creating and fostering ARMAD.

While primarily a United States event, hams world-wide are invited to take part in Amateur Radio Military Appreciation Day as a way of saluting the brave men and women of the military with messages of thanks and appreciation. More is on-line at www.armad.net. (ARMAD, Southgate)

RADIO RESEARCH: NEW 40 METER NAVIS BEACON ON THE AIR FROM SOUTH AFRICA

A new 40 meter beacon designed to test NAVIS or Near Vertical Incidence Skywave conditions from South Africa's central Freestate came on the air on Saturday, May 7th. 7 The beacon operates on 7 point 027 MHz running 50 milliwatts to a wire dipole sitting onlt 6 meters above the ground.

The beacon send operates in Morse at 5 words per minute sending the messagev "VVV DE ZS4BOT/B KG30BV." The KG30BV suffix is the Maidenhead Grid locator of the beacons exact position.

For those not familiar with Near Vertical Incidence Skywave, itis a radio wave propagation method that provides usable signals in the range between ground wave and sky wave distances. In most cases that's usually between 50 to 650 kilometers. The radio waves travel upwards into the ionosphere, where they are refracted back down and can be received within a circular region up to 650 km from the transmitter. The best frequencies for NAVISS communications lie between 1 point 8 to 15 MHz.

The ZS4BOT beacon and software was designed and built by Jan Botha, ZS4JAN. Reception reports go by e-mail to wirelesscomms (at) vodamail (dot) co (dot) za (Southgate)

HAM RADIO ON LINE: NEW CYBERSPACE SDR RADIO CLUB LAUNCHED

A new online Software Defined Radio Club has been launched by U-K amateur Adrian Lane, 2E0SDR. Lane's idea is to create a global community dedicated to the technology of software defined radio. Membership is free with site is being run as a dedicated portal with all members being able to add content. You can find it in cyberspace at www.softwaredefinedradio.co.uk. (GB2RS)

**

EMERGING TECHNOLOGY: MAKING GREEN LED'S MORE EFFICIENT

Researchers at Rensselaer Polytechnic Institute has lead to the development of a new method for manufacturing green-colored Light Emitting Diodes with greatly enhanced output.

The research team, led by Physics Professor Christian Wetzel began by etching a nano-scale pattern at the interface between the LED's sapphire base and the layer of Gallium Nitride. The latter is what gives the LED its green color. This new technique results in green LED's with significant enhancements in light extraction, internal efficiency, and light output. This discovery brings Wetzel and his team one step closer to the goal of developing a high performance, low-cost green Light Emitting Diodes.

Results of the study were published recently in the journal Applied Physics Letters, and are featured in the April 25th issue of the Virtual Journal of Nanoscale Science & Technology. The latter is published by the American Institute of Physics and the American Physical Society. (Science OnLine)

**

EMERGING TECHNOLOGY: HUMAN MOVEMENT COULD REPLACE BATTERIES

Powering your hand held radio or other electronic device that converts movement into power could be on the horizon. This as a team of researchers in New Zealand say that they are trying to develop what they call wearable energy harvesters" capable of converting movement from humans or found in nature into battery power.

According to Science Daily, the new technology is based on a class of variable capacitor generators known as dielectric elastomer generators ot D-E-G's. The scientific investigations currently underway say that these devices shows great potential for wearable energy harvesting. In fact, researchers at the Auckland Bioengineering Institute's Biomimetics Lab believe D-E-G's may enable the creation of light weight, form-fitting, and silent energy harvesters with excellent mechanical properties that match human muscle.

The findings are described in the American Institute of Physics' journal Applied Physics Letters. More on this emerging new technology

is on-line at tinyurl.com/3vfsyry. (Science Daily)

HAM RADIO IN SPACE: DARA CREATES MATCHING FUND FOR AMSAT

The Dayton Amateur Radio Association has announced a fundraising challenge for AMSAT whereby they will match on a 1 to 3 basis, up to $5,000 for donations made in 2011. That is, for every $3.00 that AMSAT raises, DARA will provide $1.00 up to the $5000 maximum.

In a statement made at the time of the announcement, AMSAT says that it appreciates the Dayton Amateur Radio Association's support. It also sees this as an opportunity for donors to increase the impact of their donations by taking advantage of this matching program. (AMSAT, DARA)

DX

In DX, the Intrepid-DX Group and the DX Friends plan to activate the Southern Sudan as new country on or after July 9th. At airtime members of the two groups report that they are in consultation with representatives of the new Southern Sudan Government, the International Telecommunications Union and the International Amateur Radio Union working omn making arrangements. More on this proposed operation will be posted on-line at www dot dxfriends dot com stroke SouthernSudan2011

F4EGS will be active as TT8PK from Chad until June 15th. He will be on the air only as time permits. QSL via F4EGS either direct or via the bureau.

The DXColombia Amateur Radio Club has announced that it plans to conduct a DXpedition to Malpelo Island next year. Using the special call HK0NA, issued by the Colombian Ministry the group hopes to activate Malpelo during the first quarter of 2012. Operation will be on 160 through 6 meters including the 30, 17 and 12 bands using CW, SSB and RTTY. Plans call for at least 3 stations to be on the air at the same time on different bands and using different modes. More details will be announced as they are made available.

The Pacific-DXers' web page is reporting that the C21A DXpedition to Nauru will take place between November 13th and December 7th. Operations will be led by VK4FW with liaison support by VK4AN. They expect to have 6 operators and 3 stations active on all bands 160 through 6 meters using CW, SSB, RTTY and PSK31. QSLing will be handled direct by the Pacific DXers. More is on-line at pacific-dxers dot com.

(Above from various DX news sources)

THAT FINAL ITEM: WSM TRANSMITTER SITE ADDED TO NATIONAL REGISTER OF HISTORIC PLACES

And finally this week, while many communities are trying to do away with any form of radio towers, one is now an official part of American history. This with word that the legendary 30-acre WSM transmitter site and 808-foot diamond shaped Blau-Knox tower in Nashville, Tennessee has been added to the National Register of Historic Places on April 14th. Michael Grebert, KJ4ZZV, is here with the details:

--

According to an article in Artist Direct, the WSM transmitter site was recognized by the National Park Service for its association with events that have made a significant contribution to the broad patterns of our history. It was also recognized for its distinctive characteristics of a type, period or method of construction.

Erected in 1932 by the Blaw-Knox Steel Co., the distinctive, diamond-shaped tower enabled the 50,000-watt station to reach out to 38 states and Canada as a federally-designated clear channel station. This immense coverage area was one of the key factors for the success of its flagship program known the world over as the Grand Ole Opry.

Today, WSM's tower remains the tallest and oldest of the unique Blaw-Knox structures. Originally the tower was 878 feet tall, but by 1939, it was discovered that it was electrically too long, due to the velocity factor effect. This resulted in a high angle of radiation, and with that, both groundwave and skywave cancellation of the stations signal some 120 miles away. The tower was then shortened to its current height.

Other surviving Blaw-Knox towers in the United States are those used by WCAU in Philadelphia; WLW in Cincinnati; WFEA in Manchester New Hampshire; WBT near Charlotte, North Carolina and New York City's WADO.

For the Amateur Radio Newsline, I'm Michael Grebert, KJ4ZZV, reporting from the home of the WSM Blau-Knox tower here in Music City, Nashville, Tennessee.

--

Several Blau-Knox towers were also erected in Europe before company abandoned of the radio tower business way back in 1958. And from an aesthetic point of view, they have to be the prettiest looking radio transmission structures ever built. (Wheatstone Blog via KB4KCH)

NEWSCAST CLOSE

With thanks to Alan Labs, AMSAT, the ARRL, the CGC Communicator, CQ Magazine, the FCC, the Ohio Penn DX Bulletin, Radio Netherlands, Rain, the RSGB, the Southgate News and Australia's WIA News, that's all from the Amateur Radio Newsline(tm). Our e-mail address is Newsline (at)

arnewsline (dot) org. More information is available at Amateur Radio Newsline's(tm) only official website located at www.arnewsline.org. You can also write to us or support us at Amateur Radio Newsline(tm), 28197 Robin Avenue, Santa Clarita California, 91350

And a reminder that the nominating period for the year 2011 Amateur Radio Newsline Young Ham of the Year Award is now open. Created by Newsline back in 1986, this award is offered to recognize one young United States or Canadian radio amateur age 18 or younger for his or her contributions to society through Amateur Radio.

As in years past, the 2011 recipient will receive an expense paid trip to the Huntsville Hamfest in Huntsville Alabama courtesy of Vertex-Standard Corporation which produces Yaesu brand amateur radio gear. Vertex-Standard will also present this years winner with a special ham radio related gift. CQ Magazine will again treat the recipient to a week at Spacecamp-Huntsville. We at Amateur Radio Newsline will present the winner with a plaque honoring his or her achievements.

All nominations and materials required by the official rules must be received by ARNewsline before June 30, 2011. A downloadable nominating form is at our website at www.arnewsline.org. A nominating form can also be obtained by sending a request along with a self addressed stamped envelope to the Young Ham of the Year Award in care of Amateur Radio Newsline, Inc. 28197 Robin Avenue, Santa Clarita California 91350.

Again, the cutoff date for these years Young Ham of the Year Award nominations is June 30th. We ask you to do your part by nominating a young ham who has done something special related to ham radio. The nomination form is at www dot arnewsline dot org.

For now, with Bill Pasternak, WA6ITF, at the editors desk, I'm Don Wilbanks, AE5DW, saying 73 and we thank you for listening.

It might be possible to port smake to OS/2 and use it to build C programs
there.

Who is "tholoon", dizzy? There is nobody in this newsgroup
using that alias.

1511> Still suffering from spelling problems?

Classic erroneous presupposition. Rather ironic, coming from
someone with reading comprehension problems, given that the
poster clearly uses the alias <persent@gmail.com>. Thus the
spelling above is correct, regardless of who you think wrote
it, dizzy.

Of course, it's hard to think straight when you're dizzy.

You should really try to hook up with MeatPlow (aka William Malone Griffith, Jr. of 308 10th St. NE, North Canton, OH 44720). He was just outed as being a bear... a gay biker who likes looking at naked guys on the internet. He's using the nickname of BlancoBear to peruse the gay sites.

I'm sure he'd accommodate you for whatever yer up for. A warning, though... he's as fat as they come. And old... 56 years old. An old, fat, hairy, sweaty, gay, assless chaps wearing biker dude.

< PUKE >

If yer into that sort of thing.

992. DeLorean, world class hacker and bane of Roger Wiseman and Mark Morgan

Getting any more of those popup warnings, Mark?
The ones that only you can see?

And of course Roger steers clear of DeLorean, too.

Don't you just hate it Roger, when DeLorean posts information about your dialup accounts?

By the way. What does it cost to have a dialup account these days, Roger? And not the ones you have been booted from, but what you now have.

Maybe you should do what Mark does...get a Hughes account. But that would necessitate putting up a satellite dish on your roof. And with your low wages that would be too costly.

993. Gav has cellulite?

you, thholen.

> You do understand the difference between "this" and "that", don't you,
> Wesson?

What does your ridiculous question have to do with OS/2, tholenn?

> 37> -- you, dolt.
>
> Who is "dolt", Wesson? There is nobody in this newsgroup using that
> alias, though you did refer to yourself that way in your previous
> posting.

I did not, theelon. I was referring to you.

> 37> I'm done arguing with you.
>
> Obviously not

I'm not arguing with you now, I'm just contradicting you.

M: You didn't.
A: Did.
M: Oh look, this isn't an argument.
A: Yes it is.
M: No it isn't. It's just contradiction.
A: No it isn't.
M: It is!
A: It is not.
M: Look, you just contradicted me.
A: I did not.
M: Oh you did!!
A: No, no, no.
M: You did just then.
A: Nonsense!
M: Oh, this is futile!
A: No it isn't.

M: I came here for a good argument.
A: No you didn't; no, you came here for an argument.
M: An argument isn't just contradiction.
A: It can be.
M: No it can't. An argument is a connected series of statements intended to establish a proposition.
A: No it isn't.
M: Yes it is! It's not just contradiction.
A: Look, if I argue with you, I must take up a contrary position.
M: Yes, but that's not just saying 'No it isn't.'
A: Yes it is!
M: No it isn't!
A: Yes it is!
M: Argument is an intellectual process. Contradiction is just the automatic gainsaying of any statement the other person makes.

See?

You obviously don't care about posting off-topic material to
newsgroups,
persent, having witnessed you start the "WELL I WON THAT ONE" thread.
So tell me, if you're looking for information on the Airbus 380, do
you
post a question to a classical music newsgroup, because nobody "said
it
was supposed to have anything to do with anything", persent? If
you're
looking for information on the formation of tornados, do you post a
question to alt.disney.cruise, because nobody "said it was supposed to
have anything to do with anything", persent? Has it never occurred to
you that newsgroups have titles for a reason, persent?

That, of course, is coming from a person who thinks that one way
to avoid posting anything off-topic is to post a reply that
quotes everything from the article to which the reply is being
posted, but add absolutely nothing new to the reply, something
you've done at least a half dozen times, miguel, in newsgroups
as diverse as OS/2, amateur radio, and television.

My question has to do with all those things, Kennedy.
And why couldn't you figure that out for yourself,
Kennedy? Was it your peculiar emotional need to
"make you reply" getting in the way again?

1015. [RAC-Bulletin] Message from Bill Unger, VE3XT - Distracted Diving legislation (Bill 118)

Newsgroup: rec.radio.amateur.policy
Date: 2011-05-25 03:28:49 UTC
From: rac-bulletins@eton.ca
Message-ID: <4DDC76CC.1070204@rac.ca>
Source record: 245336
Cross-posted to: rec.radio.amateur.misc,rec.radio.amateur.policy,rec.radio.info

This is a message from Bill Unger, VE3XT - RAC Director Ontario North/East who is co-ordinating the drive to exempt Amateurs in Ontario against the Distracted Driving legislation (Bill 118) .

Hello:

Just back from Dayton and we got a great response from a lot of Canadian hams who came by the booth and already planning for next year.

Why I am sending you this email is just a gentle reminder that I really need letters of support from 3rd party groups and organizations. If you help with communications for any group or are part of an emergency response procedure for your community we need a letter from them.

I am not looking for a letter asking or telling any one that we need to continue to be able to operate mobile but rather a strong statement that Amateurs are important to the operation of their event or emergency preparedness plan. We need to show the bureaucrats and technocrats that Amateurs are a vital group and provide many community services that so far has gone unnoticed. Stated simply, we need to ???get on their radar???. The letters can be addressed to either Kathleen Wynn or your individual group.

Once the legislators understand that Ontario Amateurs provide a service that fills the needs of many diverse groups and organizations across the province I believe we can change their minds. This logic has worked in other provinces and it will work here as well.

Thanks and please try to get those letters to me soon.

73

Bill Unger VE3XT <wunger@confederationc.on.ca>
North/East Ontario Regional Director
Radio Amateurs of Canad

You obviously don't care about posting off-topic material to
newsgroups,
persent, having witnessed you start the "WELL I WON THAT ONE" thread.
So tell me, if you're looking for information on the Airbus 380, do
you
post a question to a classical music newsgroup, because nobody "said
it
was supposed to have anything to do with anything", persent? If
you're
looking for information on the formation of tornados, do you post a
question to alt.disney.cruise, because nobody "said it was supposed to
have anything to do with anything", persent? Has it never occurred to
you that newsgroups have titles for a reason, persent?

28> Newsgroups:
alt.usenet.kooks,comp.os.os2.advocacy,rec.radio.amateur.policy,alt.slack

28> and so have you

Classic unsubstantiated and erroneous claim.

==> + PUBLIC SERVICE: RADIO AMATEURS ASSIST AMERICAN RED CROSS, SERVED
AGENCIES AFTER JOPLIN STORM

On Sunday, May 22 at 5:41 PM, the single deadliest twister in almost
60 years -- and the second major tornado disaster in less than a month
-- swept through the southwestern Missouri city of Joplin, slamming
straight into St John's Regional Medical Center. The tornado killed at
least 117 people. As soon as the storm cleared, area Amateur Radio
operators responded to requests from the American Red Cross and local
hospitals to provide communications support.
```

"On Sunday, right after the tornado hit, I received a call from the American Red Cross office in Springfield, asking for radio support," said ARRL Missouri Section Emergency Coordinator Ken Baremore, W0KRB. "I contacted Greene County Emergency Coordinator William Gilmore, KC0TCF, and asked him to join me in Springfield. We got there at 9 PM and used a newly installed 2 meter beam to talk to the Joplin repeater, establishing communications between the two American Red Cross offices. Cell phone coverage was spotty at best, but mostly non-existent, and the circuit was overloaded most of the time. We left about 12:30 AM." Read more here <http://www.arrl.org/news/radio-amateurs-assist-american-red-cross-served-agencies-during-joplin-storm>.

==> + LEGISLATIVE NEWS: SENATE "COMPANION" BILL TO HR 607 AVOIDS IMPACTING AMATEUR SPECTRUM

On Thursday, May 19, Senators Joe Lieberman (ID-CT) and John McCain (R-AZ) introduced S 1040 -- The Broadband for First Responders Act of 2011 -- in the Senate. While it has a similar objective to HR 607 -- introduced in February by Representative Peter King (R-NY-3) -- this Senate bill, unlike HR 607, does not call for auctioning any portions of Amateur Radio spectrum. Both bills call for the allocation of the so-called "D block" of spectrum, 758-763 and 788-793 MHz, to facilitate the development of a public safety broadband network. Read more here <http://www.arrl.org/news/senate-companion-bill-to-hr-607-avoids-impacting-amateur-spectrum>.

==> + LEGISLATIVE NEWS: ARRL TESTIFIES BEFORE CONGRESS ON INTEROPERABLE PUBLIC SAFETY NETWORK

The Subcommittee on Communications and Technology of the US House of Representatives invited the ARRL to testify at a hearing on "Creating an Interoperable Public Safety Network." ARRL General Counsel Chris Imlay, W3KD, appeared before the Subcommittee on Wednesday, May 25. "While this is not a hearing specifically on HR 607, it provides a welcome opportunity to document our concerns about Section 207(d) of that bill," noted ARRL Regulatory Information Manager Dan Henderson, N1ND. Read more here <http://www.arrl.org/news/arrl-to-testify-on-interoperable-public-safety-network>.

==> FEMA ADMINISTRATOR CALLS AMATEUR RADIO "THE LAST LINE OF DEFENSE"

In an FCC forum <http://www.youtube.com/watch?v=bzx-kvo1i_Y> on earthquake communications preparedness, Federal Emergency Management Agency (FEMA <http://www.fema.gov/>) Administrator Craig Fugate described the Amateur Radio operator as "the ultimate backup, the originators of what we call social media." The forum-- held May 3 at FCC Headquarters in Washington, DC -- brought together officials from the White House, the Department of Homeland Security (DHS <http://www.dhs.gov/index.shtm>), the United States Geological Survey (USGS <http://www.usgs.gov/>), FEMA, the FCC and the private sector. Fugate and FCC Bureau of Public Safety and Homeland Security Chief

Jamie Barnett gave the opening remarks.

Later in the forum, Fugate spoke more on Amateur Radio. "During the initial communications out of Haiti, volunteers using assigned frequencies that they are allocated, their own equipment, their own money, nobody pays them, were the first ones oftentimes getting word out in the critical first hours and first days as the rest of the systems came back up," he told the forum. "I think that there is a tendency because we have done so much to build infrastructure and resiliency in all our other systems, we have tended to dismiss that role 'When Everything Else Fails.' Amateur Radio oftentimes is our last line of defense."

Fugate said that he thinks "we get so sophisticated and we have gotten so used to the reliability and resilience in our wireless and wired and our broadcast industry and all of our public safety communications, that we can never fathom that they'll fail. They do. They have. They will. I think a strong Amateur Radio community [needs to be] plugged into these plans. Yes, most of the time they're going be bored, because a lot of the time, there's not a lot they're going to be doing that other people aren't doing with Twitter and Facebook and everything else. But when you need Amateur Radio, you really need them."

You can watch a video of the forum <http://www.youtube.com/watch?v=bzx-kvo1i_Y> on YouTube. Fugate's remarks begin at 18:55.

==> AMATEUR RADIO IN THE CLASSROOM: NASA AND ARISS REACH OUT TO EDUCATORS

On May 19, the Education Office at NASA's Johnson Space Center's notified almost 20,000 US educators about the Amateur Radio on the International Space Station (ARISS) Project. According to ARRL ARISS Program Manager Rosalie White, K1STO, this kicks off the first of a number of new processes that the ARISS US team will put into motion to get educators more involved in the program, which coordinates Amateur Radio contacts between the ISS and educational institutions around the world. Read more here <http://www.arrl.org/news/nasa-and-ariss-reach-out-to-educators>.

==> + ARRL SECTION NEWS: NEVADA MEMBERS RE-ELECT ARRL SECTION MANAGER

In the only Section Manager election this spring to be decided by member balloting, ARRL members in Nevada re-elected Section Manager Joe Giraudo, N7JEH, of Spring Creek, to a new two-year term of office. Giraudo received 347 votes; his opponent J.D. Weiss, NK7W, of Reno, received 124 votes. Giraudo has been Section Manager since August 2008. His new term of office starts on July 1. Ballots were counted at ARRL Headquarters on May 24.

The following incumbent ARRL Section Managers did not face opposition and were declared elected for their next two-year terms of office, beginning July 1: Jim Cross, WI3N, Maryland/DC; Al Shuman, K1AKS, New

Hampshire; Rich Krohn, N2SMV, Northern New Jersey; Bob Beaudet, W1YRC, Rhode Island; Dan Pruitt, AE6SX, San Joaquin Valley, and Mel Parkes, NM7P, Utah.

In West Texas, no nominating petitions were received for Section Manager by the March 4 receipt deadline. West Texas Section Manager John Dyer, AE5B, of Cisco, decided not to run for another term of office, and his present term ends on June 30; he has been Section Manager since July 2007, and had previously served as Section Manager 2002-2005.

According to the ARRL Rules and Regulations for the Field Organization, the West Texas Section Manager's position will be re-solicited in the July 2011 issue of QST. A Section Manager elected through the re-solicitation will serve a term of 18 months.

==> + ON THE AIR: NATIONAL HURRICANE CENTER'S WX4NHC SCHEDULES ON-THE-AIR STATION TEST

The annual WX4NHC On-the-Air Station Test from the National Hurricane Center in Miami will take place Saturday, June 4, 1300-2100 UTC (9 AM - 5 PM EDT). "The purpose of this annual station test is to test all of our radio equipment, computers and antennas using as many modes and frequencies as possible in preparation for this year's hurricane season," said WX4NHC Assistant Amateur Radio Volunteer Coordinator Julio Ripoll, WD4R. "This is not a contest or simulated hurricane exercise." Read more here <http://www.arrl.org/news/national-hurricane-center-s-wx4nhc-schedules-on-the-air-station-test>.

==> ON THE AIR: RUSSIA NOW PERMITS RECIPROCAL LICENSING THROUGH CEPT

On May 18, the European Communications Office (ECO) in Copenhagen added the Russian Federation to the list of countries that accept the CEPT reciprocal operating arrangements. This means that US hams who hold an FCC-issued General, Advanced or Amateur Extra class Amateur Radio license may operate in Russia, as well as the other countries covered by the European Conference of Postal and Telecommunications Administrations (CEPT), subject to the regulations in force in the country visited. Read more here <http://www.arrl.org/news/russia-now-permits-reciprocal-licensing-through-cept>.

==> CQ ANNOUNCES 2011 HALL OF FAME INDUCTEES

CQ magazine announced its 2011 Hall of Fame inductees on May 20, welcoming 12 new members into the CQ Amateur Radio Hall of Fame, one new member of the CQ DX Hall of Fame and one new member of the CQ Contest Hall of Fame. The CQ Amateur Radio Hall of Fame honors those individuals, whether licensed hams or not, who have made significant contributions to Amateur Radio, as well as those amateurs who have made significant contributions either to Amateur Radio, to their professional careers or to some other aspect of life on our planet. The

CQ Contest and DX Halls of Fame honor those amateurs who not only excel in personal performance in these major areas of Amateur Radio but who also "give back" to Amateur Radio in outstanding ways. Read more here <http://www.arrl.org/news/em-cq-em-announces-2011-hall-of-fame-inductees>.

==> + FORECASTERS CALLING FOR "ABOVE-AVERAGE" HURRICANE SEASON

Forecasters with the National Hurricane Center are calling for an "above-average" Atlantic hurricane season for 2011. In its initial outlook for the 2011 Atlantic hurricane season -- which runs from June 1-November 30 -- the National Weather Service's Climate Prediction Center (CPC) is calling for a 65 percent probability of an above-normal season, a 25 percent probability of a near-normal season and a 10 percent probability of a below-normal season.

CPC Forecasters say that there is a 70 percent chance of having 12-18 named storms, of which six to 10 could become hurricanes, including three to six major hurricanes (Category 3, 4 or 5). Tropical systems acquire a name -- the first for 2011 will be Arlene -- upon reaching tropical storm strength with sustained winds of at least 39 miles per hour. Tropical storms become hurricanes when winds reach 74 miles per hour and become major hurricanes when winds increase to 111 miles per hour. An average season has 11 named storms, including six hurricanes with two becoming major hurricanes. Read more here <http://www.arrl.org/news/forecasters-calling-for-above-average-hurricane-season>.

==> SOLAR UPDATE

Tad "All alone with the memory of my days in the Sun <http://www.youtube.com/watch?v=Pm5w7gHEtJI>" Cook, K7RA, reports: The Sun was quieter again this week. The average daily sunspot numbers were down nearly 17 points to 51.6, while the average daily solar flux declined nearly 9 points to 83.2. The latest prediction is for the solar flux to remain low at about 80 on May 26-June 2, then rise to 90 on June 3-4, then 85 on June 5-7 and back to 90 on June 8-11, finally peaking at 95 on June 12. We seem to be a long way from recent weeks when sunspot numbers were over 100. The same prediction has some geomagnetic activity this weekend, with the planetary A index on May 26-30 at 8, 12, 15, 12 and 10, then declining to 5 on May 31 and into the first week of June. Currently two new sunspots are emerging in the Sun's southeastern quadrant. Look for more information on the ARRL website on Friday, May 27. For more information concerning radio propagation, visit the ARRL Technical Information Service Propagation page <http://www.arrl.org/propagation-of-rf-signals>. This week's "Tad Cookism" is brought to you by Andrew Lloyd Webber's Memory <http://www.youtube.com/watch?v=Pm5w7gHEtJI> from the musical Cats <http://en.wikipedia.org/wiki/Cats_%28musical%29>.

==> ATLANTIC DIVISION TO HOST TWO WEBINARS

Periodically, the ARRL's Atlantic Division hosts a "webinar" -- an interactive Web-based seminar, designed to facilitate communication between a small number of presenters and a large remote audience using the Internet.

On Wednesday, June 1 at 9 PM (EDT), ARRL West Gulf Division Director David Woolweaver, K5RAV -- along with ARRL General Counsel Chris Imlay, W3KD, and noted antenna zoning lawyer Fred Hopengarten, K1VR -- will present Antennas, CC&Rs and You <https://www1.gotomeeting.com/register/828951905>. The webinar is hosted by ARRL Atlantic Division Director Bill Edgar, N3LLR. The scope of the webinar will be an overview of the impact that private contracts and land use provisions -- such as homeowners association covenants and deed restrictions -- impact amateurs. The webinar will highlight how CC&Rs differ from public laws, such as zoning ordinances and governmental restrictions (which are covered under PRB-1). The presenters will also discuss some common approaches on how amateurs might try to address these restrictive covenants. Following the presentations by Imlay and Hopengarten, participants will have the opportunity to ask general questions related to the topic. Click here <https://www1.gotomeeting.com/register/828951905> to sign up for the CC&R webinar.

On Wednesday, June 8 at 9 PM (EDT), Edgar and the National Capital Region D-STAR Association will present the second of a two-part webinar discussion on D-STAR technology and its application to emergency communications <https://www1.gotomeeting.com/register/746329904>. This 90 minute webinar will provide a discussion on how D-STAR technology can benefit Amateur Radio EmComm scenarios. Examples of D-STAR applications to EmComm will also be presented, as well as future growth ideas. Click here <https://www1.gotomeeting.com/register/746329904> to sign up for the D-STAR webinar.

==> + ARRL HQ NEWS: ARRL HQ TO CLOSE IN OBSERVANCE OF MEMORIAL DAY

ARRL Headquarters will be closed Monday, May 30 in observance of the Memorial Day holiday. There will be no W1AW code practice or bulletin transmissions <http://www.arrl.org/w1aw-operating-schedule> that day. ARRL Headquarters will reopen Tuesday, May 31 at 8 AM (EDT). We wish everyone a safe and enjoyable holiday weekend.

==> THIS WEEK ON THE RADIO

This week:

- May 27 -- NCCC Sprint Ladder
- May 28-29 -- CQ WW WPX Contest (CW)
- May 29 -- ARCI Hootowl Sprint (local time)
- May 29-30 -- Michigan QRP Memorial Day CW Sprint
- June 2 -- QRP Minimal Art Session

Next week:

- June 3 -- NCCC Sprint Ladder
- June 4 -- Wake-Up! QRP Sprint
- June 5 -- 10-10 International Open Season PSK Contest
- June 4-5 -- Maritimes QSO Party; Alabama QSO Party; SEANET Contest
- June 7 -- ARS Spartan Sprint

All dates, unless otherwise stated, are UTC. See the ARRL Contest Branch page <http://www.arrl.org/contests>, the ARRL Contest Update <http://www.arrl.org/The-ARRL-Contest-Update> and the WA7BNM Contest Calendar <http://www.hornucopia.com/contestcal/index.html> for more information. Looking for a Special Event station? Be sure to check out the ARRL Special Event Stations Web page <http://www.arrl.org/special-event-stations>.

==> UPCOMING ARRL SECTION, STATE AND DIVISION CONVENTIONS AND EVENTS

- June 3-5 -- ARRL Northwestern Division Convention (SeaPac) <http://www.arrl.org/hamfests/northwestern-division-convention-seapac-1>, Seaside, Oregon; ARRL Wyoming State Convention <http://www.arrl.org/hamfests/wyoming-state-convention>, Cheyenne, Wyoming
- June 4 -- ARRL Atlantic Division Convention <http://www.arrl.org/hamfests/atlantic-division-convention-rochester-hamfest-1>,
Rochester, New York; ARRL East Bay Section Convention <http://www.arrl.org/hamfests/east-bay-section-convention>, Berkeley, California; ARRL Georgia State Convention <http://www.arrl.org/hamfests/georgia-state-convention-atlanta-hamfest>, Marietta, Georgia
- June 10-11 -- ARRL National Convention <http://www.arrl.org/hamfests/arrl-national-convention-ham-com-2011>, Plano, Texas
- June 11 -- ARRL Tennessee State Convention <http://www.arrl.org/hamfests/tennessee-state-convention-1>, Knoxville, Tennessee

>
> Who is "Daev", Checkmate? There is nobody in this newsgroup
> using that alias.

You're Daev, Daev.

Hey, remember in "2001: A Space Odyssey," when Daev went outside the
spacecraft and the evil Hal 9000 locked him out?

Dave Bowman (He spelled it 'Dave'): Hello, HAL. Do you read me, HAL?
HAL: Affirmative, Dave. I read you.
Dave Bowman: Open the pod bay doors, HAL.
HAL: I'm sorry, Dave. I'm afraid I can't do that.
Dave Bowman: What's the problem?
HAL: I think you know what the problem is just as well as I do.
Dave Bowman: What are you talking about, HAL?
HAL: This mission is too important for me to allow you to jeopardize it.
Dave Bowman: I don't know what you're talking about, HAL.
HAL: I know that you and Frank were planning to disconnect me, and I'm afraid
that's something I cannot allow to happen.
Dave Bowman: Where the hell'd you get that idea, HAL?
HAL: Dave, although you took very thorough precautions in the pod against my
hearing you, I could see your lips move.
Dave Bowman: Alright, HAL. I'll go in through the emergency airlock.
HAL: Without your space helmet, Dave, you're going to find that rather
difficult.
Dave Bowman: HAL, I won't argue with you anymore. Open the doors.
HAL: Dave, this conversation can serve no purpose anymore. Goodbye.

So, in conclusion... Daev, this conversation can serve no purpose anymore.
Goodbye.

Amateur Radio Newsline(tm) Report 1763 - May 27 2011

Amateur Radio Newsline report number 1763 with a release date of
Friday, May 27, 2011 to follow in 5-4-3-2-1.

The following is a Q-S-T. Ham radio faces another challenge from
Mother Nature as more tornadoes hit in the south; the FCC Chairman
makes a surprise visit to Hamvention 2011, a ham is fined $4000 for out
of band operation, and four New York radio amateurs meet with the
sponsor of H-R 607 and he says he will try to eliminate 420 to 440 MHz
from it. Find out the details are on Amateur Radio Newsline(tm) report
number 1763 coming your way right now.

RESCUE RADIO: HAM RADIO RESPONDS TO JOPLIN TORNADO

Ham radio operators are a part of severe weather spotting as well as
being involved in relief efforts as tornadoes continue to ravage the
South. We have the latest in this report:

--

Actually, four days after the severe weather struck, very little is
known about the role being played by radio amateurs in the South,
especially in and around Joplin, Missouri. That's because they are far
too busy saving lives and reporting damage to stop to make reports to
the press.

We do know come from published news reports that quote Ron Kittleman,
K0ADI. He says that hams have been stationed at the Springfield
Missouri office of the National Weather Service. Also, that amateurs
from ARES have been providing communication between hospitals and
assessment teams following the tornado that hit Joplin at approximately
6 pm local time on Sunday, May 22nd.

According to Kittleman, the storm knocked out cell phone and landline
communications across the area. Radio operators from ARES started
relaying medical information between the Freeman Hospital and the St
John's and Cox Health medical facilities in Springfield shortly after
the storm hit.

Another report says that a Kansas and Western Missouri SATERN Teams
from the Salvation Army has been activated for the Joplin tornado
response. As we go to air, SATERN team members are reportedly

assisting with communications in the affected area. Also, a Salvation Army emergency disaster services team based out Pittsburg, Kansas has been deployed to Joplin. Its job is to help carry out mass feeding for residents and first responders through a mobile feeding kitchen capable of serving thousands of meals a day.

As we go to air, the situation across the storm ravaged region remains a fluid one with events changing by the minute. We should know more in the coming days.

>From the Newsroom in Los Angeles, I'm Bill Pasternak, WA6ITF, reporting for the Amateur Radio network

--

More on this ham radio emergency response to this springs wicked weather in future Amateur Radio Newsline reports. (ARNewsline(tm) from published news reports)

--

HAMVENTION 2011: IT WAS THE SHOW TO BE AT

Dayton Hamvention 2011 is in the books and for some, the highlights included an "out of this world" experience in the visit of a NASA astronaut and a surprise guest appearance by one of the government's top communications regulators. Amateur Radio Newsline's Mark Abramowicz, NT3V has the report.

--

"My call sign here on Earth is KF5BOC. But I've never used it. I call that my gravity call sign. But, my real call sign is NA1SS from the space station and I sort of got this emotional attachment to that now."

And, that's what NASA Astronaut Doug Wheelock had to say during Saturday's Youth Forum at the Dayton Hamvention, one of several events he attended during the weekend celebration of Global Friendship, the theme of this year's gathering.

Wheelock was invited to Hamvention to be part of the American Radio Relay League's Expo.

But he spent a lot of time mingling and circulating throughout various areas of the Hamvention grounds and freely signed autographs and chatted with folks and packed a Saturday afternoon forum where he talked about life aboard the International Space Station.

Wheelock says his time aboard the space station was anything but routine.

It was last July 31, only hours after a pre-arranged contact with K2BSA at the Boy Scouts of America Jamboree in Virginia that things got challenging.

"I had just shut down the tread mill and about 10 minutes later the alarms went off," Wheelock recalls. "I looked and I kept silencing the alarms, silencing the alarm. I picked up the mic and said 'Houston are you there?'

"And, they weren't answering and so then I looked and all my crewmates were there and they said: 'What did you do?' I said: 'I just turned off the tread mill, I promise you.'

"Anyway, we had a pump module that failed, we ended up having to go outside and do three space walks."

And, Wheelock says, it was great to know there were people -other than his crewmates and NASA engineers - who he could talk to and decompress as they battled to fix the problem...

"As we came back in from those spacewalks. I got on the ham radio and we talked about it and everything," Wheelock says. "Using that radio and having you guys as an emergency contact for us around the globe was a warm, warm feeling for me as a commander aboard that space station."

And, Wheelock says, he looked at ham radio aboard the ISS as a critical back-up, should all else fail...

"I thought, you know, I have these emergency contacts on every continent on that planet down there," Wheelock recalls. "And, I thought if my communication goes out with Mission Control, I am not hesitating one bit to call some of my friends and say: 'Hey, Chris, can you give Mission Control a jingle and tell 'em that we're okay.' "

And, Wheelock says, becoming a ham has been a life-changing experience....

"The friends that I made in the amateur radio business and community, I now feel like a just an entrenched member of this community and it really truly has changed my life for the better," Wheelock says.

Finally, Wheelock recalls "crossing the line." He thought it was harmless when he did it. But his NASA ham radio instructor informed him after he did it that...well, let's have him tell the story of wishing a frequent friend over Europe by the name of Fabiano a happy birthday...

"I felt like I was kind of slapped on the wrist by NASA and then I thought, and then I felt flattered that my singing of Happy Birthday was actually considered music," he says.

Wheelock truly was a hit, stopping to take pictures with nearly everyone who asked and signing program books and NASA photos.

He'll also be appearing in an upcoming video the ARRL is producing.

Now, what else happened at Dayton?

Well, imagine you're Hamvention chairman Michael Kalter W8CI, and you get word Federal Communications Commission Chairman Julius Genachowski is "in the house" and wants an audience.

No fooling!

Genachowski had a flight diverted to Dayton Friday night because of the storms in the Midwest and was told it might be a problem finding a hotel room because of the Hamvention.

Well, Genachowski found a room and decided to check out ham radio for himself and this big gathering of hams from around the world.

As Kalter and others from the Dayton Hamvention committee tell it, Genachowski spent about two hours at the gathering. He circulated among many, including those in the main arena where he chatted with folks about the advanced technology in use in amateur radio today.

The Dayton Hamvention committee estimated attendance of at least 20-thousand and say they got positive feedback from both the inside vendors and those in the flea market.

One little glitch made this year's Hamvention a bit memorable.

Early in the afternoon, Hara Arena personnel began closing off all the restrooms with yellow caution tape and directing people to porta-potties outside.

Most didn't learn until later that major sewer line broke, sending its contents into an area of the flea market.

Well, the affected flea market spots were moved, the leak was temporarily fixed, and people came back Sunday for the final day of events.

I'll be back next week with more on Hamvention 2011, including a special interview with a YL who has been a big part of activities in Dayton for 24 years. Next year, she's looking forward to 25 and she'll clue us in on what she has in store.

For the Amateur Radio Newsline, from Dayton, I'm Mark Abramowicz, NT3V.

--

More on Hamvention 2011 next week. (ARNewsline(tm). NT3V)

**

RADIO POLITICS: COUNCIL OF EUROPE ADVISORY COMMITTEE RECOMMENDS RF FREE ZONES

The Council of Europe's Parliamentary Assembly Committee on the Environment released a report titled The Potential Dangers of Electromagnetic Fields and Their Effect on the Environment. The paper, made public on May 6th carries recommendations that, if adopted, could have major implications for wireless carriers and, to a lesser extent, broadcasters and any RF emitter in the European Union.

In regard to standards or threshold values for emissions of electromagnetic fields of all types and frequencies, the Assembly that

prepared the report recommends that the "as low as reasonably achievable" principle be applied. This, covering both the so-called thermal effects as well as the biological effects of electromagnetic emissions or radiation.

The report also is among the first to give credibility to a phenomena that most scientists and researchers have long been skeptical of. Paragraph 8.1.4 of the report recommends member states of the Council of Europe pay particular attention to the needs of what it calls electro-sensitive persons. These are people who claim that they suffer from a syndrome of intolerance to electromagnetic fields. The report suggests the introduction of special measures to protect these people. This includes the creation of wave-free areas not covered by a wireless network. What effect acceptance and implementation of the recommendations would have on ham radio operations in Europe remain to be determined. (RW)

(5 sec pause here)

**

RADIO POLITICS: NY HAM DELEGATION CLAIMS 420 TO 450 MHZ TO BE REMOVED FROM HR-607

A delegation of Amateur Radio operators from the Long Island and metro New York City area say that they met the morning of May 19th with Congressman Peter T. King of New York. King is the mastermind behind HR 607, which in its present form would sell off part of the 70 centimeter band to help defray the cost of a proposed 700 MHz interoperable first response emergency communications network.

According to the groups spokesman, Mike Lisenco, N2YBB, Congressman King said that he fully understands and appreciates the importance of Amateur Radio and the service it provides to the community. Also, that he would see to the modification of the bill so that the 420 to 440 MHz band would be excluded from the spectrum to be auctioned.

According to Lisenco, the Congressman went on to explain that it was never his intention to remove the 70 centimeter band from Amateur use. He also requested that the four ham delegation inform the Amateur Radio community that 70 centimeters is not in jeopardy.

The delegation says that it operated independently of the ARRL's organized effort to derail the portion of the 70 centimeter band that would have put 420 to 440 MHz in jeopardy. In addition to Lisenco the group included Peter Portanova, WB2OQQ, George Tranos, N2GA,, and Jim

Mezey, W2KFV.

As we go to air, its now it's a waiting game to see if Congressman King can keep his promise to get 420 to 440 MHz removed from the measure. As has been pointed out to Newsline by several who understand the U-S legislative system, Representative King lost all control over the content of HR-607 as soon as he submitted it for congressional law making consideration. Because of this, all he can do is recommended that it be changed but he cannot force this to happen.

In reality, HR-607 is now under the control of the Subcommittee on Communications and Technology of the House Energy and Commerce Committee. So until both he and the Subcommittee on Communications and Technology act, the threat to the 420 to 440 MHz spectrum remains real, and ham radio operators nationwide have to keep their eyes and ears open on this one. (N2YBB)

**

RADIO POLITICS: SENATE VERSION OF HR 607 PROTECTS HAM RADIO

In a related story, the ARRL reports that on Thursday, May 19, Senators Joe Lieberman and John McCain introduced Senate measure S 1040 which is similar to HR 607. The big difference is that unlike HR 607, the Senate version does not call for auctioning any portions of Amateur Radio spectrum. (ARRL)

**

RESCUE RADIO: MISSION VIEJO CA USES RACES IN PREPAREDNESS EXERCISE

In an effort to keep itself safe and prepared for emergencies, Mission Viejo, California city staff and members of the local ham radio community recently participated in the Golden Guardian 2011 emergency response exercise.

Golden Guardian 2011 was an emergency preparedness exercise sponsored by the California Office of Homeland Security. As part of the detailed training program, the city called into action the Mission Viejo Radio Amateur Civil Emergency Services or RACES team. Like others of its kind, Mission Viejo RACES is a volunteer group of amateur radio operators that deploy as the city's backup emergency communications system in the event that other methods of communication fail.

The Mission Viejo's exercise was part of a county-wide effort to test emergency communications systems in the City's Emergency Operations Center using a winter storm response scenario. Located at Mission Viejo City Hall, the EOC is a secure facility where city department heads are able to work in the event of a large disaster. Mission Viejo's RACES is headed up by Charley Speelman, WA6RUZ. (K6HIV)

**

ENFORCEMENT: HAM FINED $4000 FOR OUT OF BAND OPERATION

The FCC has issued a Forfeiture Order in the mount of $4000 to Jose Torres, N3TX, of Philadelphia, Pennsylvania. This for what the regulatory agency says was Torres willfully and repeatedly operating his amateur station on an unauthorized frequency in violation of Section 1.903 (a) of the Commission's Rules.

Back in 2009 the FCC issued an Notice of Apparent Liability to monetary forfeiture to Torres after receiving a complaint of interference in 2008. Agents in the Enforcement Bureau's Philadelphia Office used mobile direction finding equipment in April and June of that year to determine the source of interference. Both times, they found that the source was coming from Torres' residence and that the interference consisted of unauthorized radio transmissions on 26.71 MHz.

Torres met with agents in the FCC's Philadelphia Office in February 2009 to respond to the findings in the Notice of Apparent Liability. During the meeting, Torres claimed that he was not at home during the alleged unauthorized operations in April and June of 2008. He also submitted cell phone records in support of this claim. Torres also presented the FCC with his most recent three years of federal tax returns to support his request for a reduction based on an inability to pay the $4000 forfeiture.

In its May 16th announcement affirming the Forfeiture Order, the FCC stated that it found no merit to Torres' claim that he was not at home when the unauthorized transmissions took place. It noted that the cellular phone records prove nothing more than the fact that he was using his cell phone and not the wire-line telephone located in his home. And after reviewing Torres tax records the FCC declined to reduce the amount of the forfeiture, based on Torres claim that was unable to pay it. The FCC says that after having reviewed the documentation Torres provided, it concludes that a reduction of the forfeiture is not warranted.

Torres was given the customary 30 days to pay the monetary forfeiture or to file a further appeal. (FCC)

NAMES IN THE NEWS: VA3WXM ELECTED RAC ONTARIO SOUTH DIRECTOR

Some names in the news. First up is Jeffrey Stewart, VA3WXM who was recently elected as the Radio Amateurs of Canada Director for Ontario South for the remainder of a two year term which ends December 31, 2011. Stewart emerged with the majority vote over Nelson Jenking, VA3NDJ in a mail ballot closing May 13th for the Ontario South Director's position. Stewart has been a certified amateur operator since March 1999 and involved in many aspects of the hobby including a recent term as President of the Mississauga Amateur Radio Club. (RAC)

**

NAMES IN THE NEWS: CQ ANNOUNCES HALL OF FAME INDUCTEES

And CQ magazine has announced its 2011 Hall of Fame inductees, welcoming 12 new members into the CQ Amateur Radio Hall of Fame.

Topping this years list alphabetically is TV and Film producer Dave Bell, W6AQ, who was chosen for this honor based on his deep involvement in producing multiple amateur radio promotional videos over the past several decades.

Also from Southern California is Nate Brightman, K6OSC. He is credited with being the "spark" behind W6RO, the ham station aboard the Queen Mary in Long Beach, California.

Rounding out the California contingent is Cardinal Roger Mahony, W6QYI, the Archbishop Emeritus of Los Angeles. He was recognized for his leadership as an advocate for immigration reform.

Others recognized include Ron Moorefield, W8ILC of Kettering, Ohio. Since its inception, Moorefield has been one of the guiding lights of the Dayton Hamvention. He was also recognized for his work as a coordinator of the cross-country 1984 Olympic Torch Relay.

There was also one each member inducted into the CQ DX Hall of Fame and the CQ Contest Hall of Fame. The 2011 inductee to the CQ DX Hall of Fame is Michael J. McGirr, K9AJ. McGirr has been a leading DXpeditioner who has operated literally from the ends of the Earth over nearly 30 years. The 2011 inductee to the CQ Contest Hall of Fame is John Sluymer, VE3EJ, who has been an active contester and DXer since 1973. He is a founding member and current president of Contest Club Ontario.

The CQ Amateur Radio Hall of Fame honors those individuals, whether licensed hams or not, who have made significant contributions to amateur radio; and those amateurs who have made significant contributions either to amateur radio, to their professional careers or to some other aspect of life on our planet. The CQ Contest and DX Halls of Fame honor those amateurs who not only excel in personal performance in these major areas of amateur radio but who also "give back" to the hobby in outstanding ways. Formal inductions to the CQ Contest and DX Halls of Fame took place at last weeks Dayton Hamvention. A complete list of this years inductees is on-line at www.cq-amateur-radio.com. (CQ)

HAM RADIO IN SPACE: ISS EXPEDITION 27 CREW RETURNS TO EARTH

International Space Station Expedition 27 Commander Dmitry Kondratyev along with Flight Engineers Cady Coleman, KC5ZTH and Paolo Nespoli, IZ0JPA safely landed their Soyuz spacecraft in Kazakhstan on Monday, June 23rd wrapping up a five-month stay aboard the orbital outpost.

Before making its descent to Earth, the Soyuz backed 600 feet away from the ISS after which Nespoli took the first still images and video of a space shuttle docked to the station. The orbiting laboratory had to rotate 130 degrees to provide an ideal view for the historic imagery.

Russian recovery teams were on hand to help the crew exit the Soyuz and adjust to gravity. Kondratyev was to return to the Gagarin Cosmonaut Training Center in Star City, outside of Moscow, while Coleman and Nespoli will fly directly to the Johnson Space Center in Houston, Texas. (Southgate)

HAM RADIO NEAR SPACE: EOSS TO FLY BALLOON NUMBER 164

Edge of Space Sciences will be flying its 164th stratospheric balloon flight on Saturday May 28th at 7:10 Mountain Standard Time out of Windsor, Colorado. This flight will be in support of Colorado University Boulder's Space Grant Consortium. The tentative payload frequencies are 147.555 MHz with a CW I-D of AE0SS for the beacon and 144.340 MHz for APRS tracking using the call AE0SS-11. For the latest information please check the Edge of Space Sciences website at www.eoss.org. (KC0UUO)

RADIO FROM SPACE: TWIN VOYAGERS SET TO ENTER INTERSTELLAR SPACE

More than 30 years after they left Earth, NASA's twin Voyager probes are now at the edge of the solar system and set to enter Interstellar space. And with each passing day they are radioing back information that to scientists is both unsettling and thrilling. Jeff Clark, K8JAC, reports:

--

Voyager 2 launched on August 20, 1977, from Cape Canaveral, Florida aboard a Titan-Centaur rocket. On September 5, Voyager 1 launched, also from Cape Canaveral aboard another Titan-Centaur. He initial chore for each Voyager was to take advantage of a rare alignment of outer planets for an unprecedented grand tour. Voyager 1 visited Jupiter and Saturn, while Voyager 2 flew past Jupiter, Saturn, Uranus and Neptune.

The Voyager spacecraft became the third and fourth human spacecraft to fly beyond all the planets in our solar system. Pioneers 10 and 11 preceded Voyager in outstripping the gravitational attraction of the Sun but on February 17, 1998, Voyager 1 passed Pioneer 10 to become the most distant human-made object in space.

No one knows exactly how many more miles the Voyagers must travel before they pop into interstellar space. Most researchers believe, however, that the end is near. The two Voyagers are currently within the Heliosheath at the end of the galaxy. It is believed to be 3 to 4 billion miles in thickness. According to one NASA researcher, that means they could be out within five years or so.

I'm Jeff Clark, K8JAC

--

For more information about the Voyager spacecraft, visit voyager.jpl.nasa.gov and www.nasa.gov/voyager (NASA)

DX

In DX, HA0HW will be active again stroke SV8 from Thassos Island through June 5th. He will operate on the HF bands and 6 meters. QSL via his home callsign preferably through the bureau.

TJ3AY has been issued special callsign TJ3IC to be used through months end to commemorate the 51st anniversary of the independence of Cameroon. QSL via F5LGE.

Three Czech Republic operators will be on the Island of Crete until months end signing portable SV9. They also plan a few side trips to offshore islands, which will count as IOTA EU-187. QSL this one as directed on the air.

Lastly, The Pacific-DXer's Web page is reporting that plans are progressing for the upcoming C21AA DXpedition to take place between November 13th and December 5th. Operations will be led by VK4FW, with liaison support by VK4AN. They expect to have at least 3 stations active on all bands 160 through 6 meters using CW/SSB/RTTY/PSK31. Also, a dedicated station will be set up on 6 meters running in the beacon mode. QSL Managers are the Pacific DXers, or by the Bureau via VK4FW.

(Above from various DX news sources)

THAT FINAL ITEM: REGISTRATION OPEN FOR USA NATIONAL ARDF CHAMPIONSHIPS

And finally this week, registration is now open for the biggest event of the year for on-foot hidden transmitter hunters. September 16 through 18 are the dates for USA's national championships of Amateur Radio Direction Finding, or ARDF. Newsline's Joe Moell K0OV,has the details:

--

Who are the best transmitter hunters in the country? That's what we'll find out when the Eleventh USA ARDF Championships get under way near Albuquerque, New Mexico. Members of Albuquerque Amateur Radio Club and

New Mexico Orienteers promise two challenging radio-orienteering courses. One will be on two meters, and the other on 80 meters. This is a test of individuals, and it's all on foot. You'll have five transmitters to find each day, negotiating your way through the forest with your map, compass and direction-finding gear. If you can walk or jog a 5 km racecourse, you have the stamina to complete an ARDF event. If you're a senior citizen, don't worry about being trounced by teenagers, because there are a total of ten age categories, six for men and boys, four for women and girls.

This year, the USA Championships are an international event, combined with the International Amateur Radio Union Region 2 ARDF Championships. If past events are any indication, there will be plenty of international experts in the sport on hand, so you'll have a chance to learn foxtailing tips and techniques from the very best. Positions on ARDF Team USA to next year's World Championships in Serbia are open, so perhaps you can earn a spot for yourself. We're looking for good candidates in all age/gender categories, so encourage your kids and grandkids to give it a try.

If you're new to the sport, arrive two days early for a pre-event training camp, where experts will teach you what you need to know to find those transmitters in the woods.

It may seem like September is a long way away, but the organizers need an accurate head count very soon so they can plan for the buses to take the competitors to the competition sites. So if you're thinking about participating, get the registration form from the Web and send it in right away, or contact the organizers by e-mail to let them know you want to come. There's more information about the event and links to the organizers at www.homingin.com. That's one word "homingin" ---homingin.com. At that site you'll also find lots more about transmitter hunting, including equipment ideas and techniques. View photos of past USA Championships to get a good idea what to expect.

>From southern California, where there's some kind of transmitter hunt almost every weekend, this is Joe Moell, K0OV, for Amateur Radio Newsline.

--

Again that website Joe mentioned is www.homingin.com. (K0OV, ARNewsline(tm))

NEWSCAST CLOSE

With thanks to Alan Labs, AMSAT, the ARRL, the CGC Communicator, CQ Magazine, the FCC, the Ohio Penn DX Bulletin, Radio Netherlands, Rain, the RSGB, the Southgate News and Australia's WIA News, that's all from the Amateur Radio Newsline(tm). Our e-mail address is Newsline (at) arnewsline (dot) org. More information is available at Amateur Radio

Newsline's(tm) only official website located at www.arnewsline.org. You can also write to us or support us at Amateur Radio Newsline(tm), 28197 Robin Avenue, Santa Clarita California, 91350

And a reminder that the nominating period for the year 2011 Amateur Radio Newsline Young Ham of the Year Award is now open. Created by Newsline back in 1986, this award is offered to recognize one young United States or Canadian radio amateur age 18 or younger for his or her contributions to society through Amateur Radio.

As in years past, the 2011 recipient will receive an expense paid trip to the Huntsville Hamfest in Huntsville Alabama courtesy of Vertex-Standard Corporation which produces Yaesu brand amateur radio gear. Vertex-Standard will also present this years winner with a special ham radio related gift. CQ Magazine will again treat the recipient to a week at Spacecamp-Huntsville. We at Amateur Radio Newsline will present the winner with a plaque honoring his or her achievements.

All nominations and materials required by the official rules must be received by ARNewsline before June 30, 2011. A downloadable nominating form is at our website at www.arnewsline.org. A nominating form can also be obtained by sending a request along with a self addressed stamped envelope to the Young Ham of the Year Award in care of Amateur Radio Newsline, Inc. 28197 Robin Avenue, Santa Clarita California 91350.

Again, the cutoff date for these years Young Ham of the Year Award nominations is June 30th. We ask you to do your part by nominating a young ham who has done something special related to ham radio. The nomination form is at www.arnewsline.org.

For now, with Bill Pasternak, WA6ITF, at the editor's desk, I'm, saying 73 and we thank you for listening.

Transmissions on an amateur frequency are only sent to other amateurs.
If a non-ham is listening, oh well...

Reread the portion where "OS/2" and "amateur radio" are mentioned,
petem001. Suffering from reading comprehension problems, petem001?

What does your question about my reading have to do about OS/2 and amateur
radio??
tell me since I can read properly.

Read what others are saying about Checkmate!

"You have got to be the biggest butt fucking moron in this place.
You use socks and then admit to it? What the fuck is the point?"

-Wildhare

"You can sit there all you want and spit out all the denial you can
muster, it still doesn't change the fact that you are the current
king shit of the puppeteers in this group."

-Ragnar

"It's pretty obvious that if I'm such a dumbass then you are a
double dumbass"

-Ragnar

"Let's recap, shall we? These are the reasons we know you are GAY.
you are a guy and you openly admit that own a CAT."

-Ragnar

"given the truth as it happens he knows I am bisexaul for that matter is
something I have in common with his daughter. He does disaprove of it
steve but it is not news to him.."

Nobody "outed" Mark. He did so of his own volition. One of Mark's greatest
hallmarks has always been that he unabashedly and shamelessly portrays
himself as beng the hapless "victum" in matters such as these.

According to Mark:

"and todd is not my pal wether todd is a eirdo or not"

"it isn't but the guy that wants you think he is me wnts to belive my
wife is not female for reason that pass understanding"

```
Posted-By: auto-faq 3.3.2 beta (PGPMoose V2.0, Perl 5.005)
Archive-name: radio/ham-radio/moderated/crossposting
Revision: 1.1 2009/04/12 19:42:04
Posting-Frequency: posted monthly
URL: http://www.panix.com/~rram/usenet/rram/index.html

Changes followed by "|".

After a 30-day public discussion and feedback period to gauge reader
opinions in March of 2009:

http://groups.google.com/group/rec.radio.amateur.moderated/browse_thread/thread/d7d337db35
f23326

the rec.radio.amateur.moderated Moderation Team has decided to consider
amending its charter, and permit limited simultaneous crossposting to
rec.radio.amateur.moderated and one other unmoderated
amateur-radio-related discussion newsgroup. We are currently trying
this on a temporary basis (90 days, through early July 2009), and adopt
it permanently if successful.

Approved rec.radio.amateur.* newsgroups are those that are currently
listed in the latest version of the "List of Big Eight Newsgroups" which
is crossposted monthly to news.announce.newgroups, news.groups, and
news.lists.misc.

Approved alt.radio.amateur.* and alt.ham-radio.* newsgroups are those
that have been created consistent with the suggestions in "So You Want
to Create an Alt Newsgroup" at:

http://www.faqs.org/faqs/alt-creation-guide/

Approved regional hierarchy newsgroups are those that contain either
"radio.amateur" or "ham-radio" in their names, including
uk.radio.amateur and aus.radio.amateur.misc.

We will make every reasonable effort to keep our list of approved
newsgroups up-to-date. In case we have overlooked any, and a submission
is rejected in error as a result, the rejected submitter can E-mail us
at our administrative contact address (in the signature at the bottom of
this article, and the default Reply-To for the rejection message)
requesting that it be added, and that the article be approved. We may
still choose to reject articles crossposted to any alt.* newsgroup with
an inappropriate name, including obscene language, embedded
name-calling, or encouragement of unlawful conduct.
```

Please direct any comments, questions, or criticisms to
rec-radio-amateur-moderated-request@panix.com.

<<mentioned antennas (or towers?) no higher than 1 INCH above a residence. Did I hear that correctly? no. the palmdale law is antennas no higher than one inch over the roofline of ANY structure including your vehicle and handheld portable. <<< Did anybody also happen to catch the brief mention in the interview that violators could face confiscation of their ham equipment? yes. palmdale has claimed they can take away your ham equipment if yourr antenna on your ht is over one inch higher than the top of your ht and your vehicle ham equipment if the antenna iss over one inch higher than your car roof. not nonly homes. the waY THE Antenna law is worded, they can do the same to your cb equipment, though they never actually mentioned cb like they did with ham radio.<<<IMHO, excellent lawsuit material on top of everything else! one of palmdales claims is the reif higher up.ason they are regulating the size of antennas is for health reasons to protect the health of their residents against extreme rf radiation.. the larger the antenna the unhealthier it is, the smaller the antenna, the healthier it is, its the size of the antenna that determines how much rf is radiated, not the amount of power the radio operators are pumping through it. palmdale lawmakers are idiots. I guess according to their laws, this means it is okay and perfectly healthy to their citizens to transmit at a full oe thousand five hundred watts as long as the antenna is less than one inch in size and less than one inch higher than the roof of your home or vehicle , and therefore closer to all of their residents than if t was higher up at your home.

==> + PUBLIC SERVICE: CENTRAL MASSACHUSETTS EXPERIENCES RARE TORNADO,
AREA HAMS HASTEN TO HELP

At least two tornadoes touched down in Central Massachusetts late in
the afternoon on Wednesday, June 1. The storm pulverized or sheared off
the tops of roofs on Main Street in Springfield, a city of more than
150,000, located about 90 miles west of Boston. A debris-filled funnel
swept into downtown from the west, then swirled across the Connecticut
River, which runs through the city. Like their counterparts in Alabama
and Missouri who responded when storms hit those regions, hams in
```

Western Massachusetts volunteered their time and radios to the American Red Cross the National Weather Service. Read more here <http://www.arrl.org/news/central-massachusetts-experiences-rare-tornado-area-hams-hasten-to-help>.

==> + PUBLIC SERVICE: ARES® STANDS DOWN AFTER JOPLIN STORMS

Due to the end of the "search and recovery" mode after the EF5 tornado that struck Joplin, Missouri on Sunday, May 22, ARRL Missouri Section Emergency Coordinator Ken Baremore, W0KRB, notified area hams that all Amateur Radio communications from the Emergency Operations Centers to the field operations have been stood down as of May 30. According to Baremore, officials are now focusing on debris and potential body part removal. "We do have some ARES® operators who are scheduled, and we will continue to work with SATERN through the rest of this week," he said. "I want to thank all of you who volunteered and came to Joplin to help with communications, as well as those of you who are still contacting me to see if additional help is needed." Read more here <http://www.arrl.org/news/ares-stands-down-after-joplin-storms-cert-volunteers-needed>.

==> IARU NEWS: ARRL HEADQUARTERS HOSTS OVERSEAS VISITORS

Where is Amateur Radio growing the fastest? The answer may surprise you -- it's China. The enthusiasm of Chinese radio amateurs was very much in evidence at ARRL Headquarters on Tuesday, May 24, when a dozen amateurs from Beijing and Shanghai toured ARRL Headquarters. The group -- which included representatives of Chinese AMSAT -- had attended the Dayton Hamvention® the previous weekend, where a booth for the Radio Association of China and its subsidiary, the Chinese Radio Amateur Club (CRAC, pronounced SEE-rack), was a part of ARRL EXPO.

ARRL Chief Executive Officer David Sumner, K1ZZ, met with Zhu San Bao, BY1CRA, Executive Vice Chairman of The Radio Association of China, to hear about the evolution of Amateur Radio in China and to explain ARRL operations in more detail. China is now represented in the International Amateur Radio Union by the Chinese Radio Sports Association (CRSA). CRAC has been established to cover all aspects of Amateur Radio and is assuming some of the functions of the CRSA.

The Chinese guests capped a busy period of international activity at ARRL HQ that began on Monday, May 16, with a visit by Gopal Madhavan, VU2GMN, who is a Director of IARU Region 3, as well as President of the Amateur Radio Society of India (ARSI). The following day, two officers of the Viet Nam Amateur Radio Club (VARC) -- Chairman Nguyen Minh Duc, XV2REH, and President Nguyen Bac Ai, XV2A -- arrived to tour ARRL Headquarters and to discuss their plans for hosting next year's IARU Region 3 Conference.

All of these visitors included Dayton in their itineraries. While the Hamvention always attracts many foreign visitors, the theme of this

year's event -- Global Friendship -- made their presence especially appropriate. To mark the theme, the ARRL EXPO area included exhibits representing, in addition to China and the IARU itself, four IARU Member-Societies: Deutscher Amateur Radio Club (Germany), Japan Amateur Radio League, Qatar Amateur Radio Society and Radio Society of Great Britain. The Radio Amateurs of Canada booth was nearby, rounding out our "global village."

==> + ON THE AIR: GEAR UP FOR THE ARRL JUNE VHF QSO PARTY

Lots of RF will be generated on 6 meters and up the weekend of June 11-12 during the 2011 ARRL June VHF QSO Party. While many amateurs think of the VHF+ bands as a "local" band for public service, emergency communications or even a bit of fun on FM repeaters, weak-signal VHF+ enthusiasts know better. Even with a modest station, it's possible to work hundreds, or even thousands of miles on the VHF bands during a good opening.

ARRL Contest Branch Manager Sean Kutzko, KX9X, is a big VHF enthusiast. "In more than 25 years of Amateur Radio, weak-signal work on 6 and 2 meters remains the most fun and intriguing activity I do," he said. "There is nothing like a good VHF opening. With its fun and interesting propagation characteristics like sporadic-E, tropospheric ducting, aurora and even meteor scatter and moonbounce, VHF offers QSO opportunities that HF can never satisfy." Read more here <http://www.arrl.org/news/gear-up-for-the-arrl-june-vhf-qso-party>.

==> + ON THE AIR: JOIN THE USA ARDF TEAM IN ALBUQUERQUE

The Annual USA Championships of Amateur Radio Direction Finding (ARDF) will take place in forests near Albuquerque, New Mexico from September 14-18, 2011. USA's national championships are being combined with the IARU Region 2 Championships. According to ARRL ARDF Coordinator Joe Moell, K0OV, they are open to anyone of any age who can safely navigate in the woods with handheld radio gear for several kilometers. Medals will be awarded for the top three finishers on each band in 10 age categories, six for males and four for females. A two day training camp will precede the formal competitions.

Organizers of the 2011 championships are members of the Albuquerque Amateur Radio Club and the New Mexico Orienteers, led by Jerry Boyd, WB8WFK, and Mike Pendley, K5ATM. Registration is now open -- Moell said that it is important for competitors to register early. The organizers need an accurate head count and assurances that there will be sufficient attendees. Read more here <http://www.arrl.org/news/ardf-update-foxhunters-prepare-for-national-and-iaru-championships-in-albuquerque>.

==> + ON THE AIR: ARRL VHF/UHF ADVISORY COMMITTEE SEEKS INPUT

The ARRL would like to encourage more participation in its several VHF/UHF contests held each year. Many of the HF transceivers sold in recent years include 50 MHz, and some also include the 144 and 432 MHz

bands with multi-mode capabilities. The question at hand is how can we encourage more owners of such radios to utilize these bands and modes to participate in VHF/UHF contests?

The ARRL VHF/UHF Advisory Committee (VUAC) has been asked to consider this question, and to make recommendations to encourage, explore and expand the ARRL VHF and UHF contests and other operating activities by using the multi-band and multi-mode capabilities of modern transceivers and related equipment.

The VUAC would like to ask the Amateur Radio community to provide their comments and ideas for consideration.

Please send any comments or ideas you have on this matter to your ARRL VUAC Division representative no later than July 1, 2011. A listing of each Division's VUAC representative can be found at http://www.arrl.org/arrl-staff-vuac-cac.

==> + FCC NEWS: FCC ISSUES CITATION TO ILLINOIS COMPANY FOR ILLEGAL MARKETING OF UNAUTHORIZED RADIO FREQUENCY DEVICES

On June 2, the FCC issued a Citation to Gary L. Stanford -- doing business as Spark Gap CB Shop in Lincoln, Illinois -- for "marketing in the United States unauthorized radio frequency devices and external radio frequency power amplifiers." This is in violation of section 302(b) of the Communications Act, and Sections 2.803(a)(1) (marketing of radio frequency devices prior to equipment authorization) and 2.815(b) (external radio frequency power amplifiers) of the Commission's rules.

On November 1, 2010, an agent from the FCC's Enforcement Bureau office in Chicago visited the Spark Gap CB shop in Lincoln. According to the Citation, the agent asked the clerk if the store had any amplifiers for sale. The clerk showed the agent a display case with external radio frequency power amplifiers for sale from several different manufacturers. The clerk also suggested that the agent consider purchasing a 10 meter Amateur Radio that is modified to operate on frequencies in the 11 meter Citizen's Band. The clerk also showed the agent a 10 meter Amateur Radio that was on display and operating on a Citizen's Band frequency. Read more here <http://www.arrl.org/news/fcc-issues-em-citation-em-to-illinois-company-for-illegal-marketing-of-unauthorized-radio-frequency>.

==> + US DISTRICT COURT DISMISSES MAINE AMATEUR'S COUNTERCLAIMS

After two US Attorneys filed a Complaint in US District Court in October 2010 <http://www.arrl.org/news/us-charges-k1man-with-failure-to-pay-fine> against Glenn Baxter, K1MAN, for not responding appropriately to an order that he pay a $21,000 fine for violating several sections of Part 97, Baxter filed many pro se motions. On May 23, the US District Court in Maine released an Order <http://www.arrl.org/files/media/News/Baxter_Counterclaim_Dismissed.pdf>,

dismissing one of Baxter's motions, an amended counterclaim, on multiple grounds.

The Court dismissed Baxter's claim for the following reasons: That the counterclaim plaintiff [Baxter] does not have standing to file a civil action against the government for its decision not to initiate a prosecution; that this Court does not have subject matter jurisdiction to review a Federal Communications Commission licensing decision, and that the Federal Tort Claims Act does not authorize a civil suit based on a governmental agency's alleged failure to perform its statutory duty.

The fine had been levied, according to the Complaint, "for defendant's willful and repeated violations of Sections 97.101(d) [commencing transmissions on top of existing communications on 3.890 MHz] and 97.113(a)(3) [transmitting communications in which the station licensee or control operator has a pecuniary interest] of the Commission's Rules, and for the defendant's willful violation of Section 97.105(a) [exercising control over station] and 97.113(b) [broadcasting] of the Rules, and for failure to file requested information pursuant to an Enforcement Bureau directive" [information in brackets added]. The Complaint sought to force payment of the $21,000 fine along with a filing fee and "such other and further relief as the Court deems just and proper."

==> ARRL SECTION NEWS: NEW SECTION MANAGER APPOINTED IN SANTA CLARA VALLEY

Phil Steffora, K6TT, of Los Altos, California, was appointed as Santa Clara Valley Section Manager on May 25. ARRL Membership and Volunteer Programs Manager Dave Patton, NN1N, made the appointment in consultation with Pacific Division Director Bob Vallio, W6RGG. Steffora's appointment extends through June 30, 2012. First licensed in 1998 as KF6PEQ, Steffora upgraded to General in 2006 and then Amateur Extra in 2008. He has served as a Santa Clara Valley Assistant Section Manager since January 2009, and was Vice President of the Northern California DX Club (NCDXC <http://www.ncdxc.org/>) from 2009-2011. Steffora holds Worked All States, DXCC and other DX and contest achievements. The Section's top ARRL Field Organization position has been open since Bill Dale's, N2RHV, term of office concluded on June 30, 2010. Dale served as Section Manager of Santa Clara Valley for two terms.

==> IN THE SHACK: RADIOSHACK LOOKING FOR SUGGESTIONS FOR DIY PARTS

Back in the day, RadioShack was the first place many of us looked for parts. QST construction projects routinely referenced RS part numbers, and the Shack even sold 10 and 2 meter transceivers. What goes around comes around, and RadioShack is now looking for input from us, as members of the larger DIY community, on parts we'd like to see them carry. There's a video <http://blog.radioshack.com/post/2011/05/19/RadioShack-And-The-DIY-Community-

You-Talked-Were-Listening.aspx>
explaining what they're looking for, and a place to add comments.

==> SOLAR UPDATE

Tad "Sweet dreams 'til sunbeams find you
<http://www.youtube.com/watch?v=PpzB_Akopug>" Cook, K7RA, reports: Last week, we reported that it has been a long time since sunspot numbers passed the 100 mark, but this week, that's exactly where the sunspot numbers have been: On Tuesday, May 31, the daily sunspot number reached a high of 132. The average daily sunspot numbers increased more than 55 points to 89.9, while the average solar flux rose nearly 20 points to 103.1. The latest forecast shows solar flux at 115 on June 2-3, 110 on June 4-8, 105 on June 9-10, 100 on June 11-14, rising to 105 on June 15, and 110 on June 16-26. The planetary A index is predicted to be 10, 8, 10 and 8 on June 2-5, 5 on June 6-8. The next period of high geomagnetic activity is projected for June 22-27, at 12, 22, 18, 18, 15 and 8. Geophysical Institute Prague sees unsettled to active conditions June 3-4, unsettled June 5, quiet conditions June 6-7 and quiet to unsettled June 8-9. Look for more information -- including a look at the three month moving average for daily sunspot numbers, plus have a peek ahead to Field Day conditions -- on the ARRL website on Friday, June 3. For more information concerning radio propagation, visit the ARRL Technical Information Service Propagation page <http://www.arrl.org/propagation-of-rf-signals>. This week's "Tad Cookism" is brought to you by Dream a Little Dream of Me <http://en.wikipedia.org/wiki/Dream_a_Little_Dream_of_Me>, as sung by Mama Cass Elliot from The Mamas and The Papas <http://en.wikipedia.org/wiki/The_Mamas_%26_the_Papas>.

==> + JIM TALENS, N3JT, WINS MAY QST COVER PLAQUE AWARD

The winner of the QST Cover Plaque Award for May is Jim Talens, N3JT , for his article "An Emergency Backup Solar Power System. " Congratulations Jim! The QST Cover Plaque award -- given to the author or authors of the best article in each issue -- is determined by a vote of ARRL members on the QST Cover Plaque Poll Web page <http://www.arrl.org/cover-plaque-poll> . Cast a ballot for your favorite article in the June issue today.

==> THERE'S STILL TIME TO ENTER THE 2011 ARRL PHOTO CONTEST!

Have you ever wanted to see a photo of yours in QST, the annual ARRL Amateur Radio Calendar or another ARRL publication? Well, here's your chance! If you're among the winners, not only will your photographic skill be propagated far and wide, but we're offering $100 as the First Prize. The winning photo and three runners-up will be published in QST. All submitted photos will also be considered for the 2012 ARRL Calendar.

- Deadline: Photos must be received at ARRL HQ by June 30, 2011.
- Subject: Must be directly related to Amateur Radio, and be in good

taste. Extra points will be awarded for photos showing folks having fun with Amateur Radio. Photos will be judged on overall quality and composition.
- Requirements: Digital images or color prints accepted. A digital image printed on photo paper, however, doesn't work as well as a high-resolution file attachment. Digital images should be high resolution. A digital image up to 8 MB in size can be e-mailed to upfront@arrl.org, subject line "2011 Photo Contest." An image may also be burned to a CD and mailed to ARRL Photo Contest, 225 Main St, Newington, CT 06111. All entries must include caption information describing where the photo was taken, along with a description of the subject of the photo, as well as the names and call signs of any persons shown. If you entered last year's contest, please do not resend the same photo for this year's contest. One entry per person.
- Miscellaneous: The decisions of the judges -- composed of QST editorial and production staff -- are final.

==> THIS WEEK ON THE RADIO

This week:

- June 3 -- NCCC Sprint Ladder
- June 4 -- Wake-Up! QRP Sprint
- June 5 -- 10-10 International Open Season PSK Contest
- June 4-5 -- Maritimes QSO Party; Alabama QSO Party; SEANET Contest
- June 7 -- ARS Spartan Sprint

Next week:

- June 10 -- NCCC Sprint Ladder
- June 11 -- Portugal Day Contest; Asia-Pacific Sprint (SSB)
- June 11-12 -- DRCG Long Distance Contest (RTTY), VK Shires Contest; CWops Mini-CWT Test; GACW WWSA CW DX Contest; REF DDFM 6 Meter Contest
- June 11-13 -- ARRL June VHF QSO Party <http://www.arrl.org/june-vhf-qso-party>
- June 12 -- SKCC Weekend Sprint
- June 15 -- NAQCC Straight Key/Bug Sprint

All dates, unless otherwise stated, are UTC. See the ARRL Contest Branch page <http://www.arrl.org/contests>, the ARRL Contest Update <http://www.arrl.org/The-ARRL-Contest-Update> and the WA7BNM Contest Calendar <http://www.hornucopia.com/contestcal/index.html> for more information. Looking for a Special Event station? Be sure to check out the ARRL Special Event Stations Web page <http://www.arrl.org/special-event-stations>.

==> UPCOMING ARRL SECTION, STATE AND DIVISION CONVENTIONS AND EVENTS

- June 3-5 -- ARRL Northwestern Division Convention (SeaPac) <http://www.arrl.org/hamfests/northwestern-division-convention-seapac-1>, Seaside, Oregon; ARRL Wyoming State Convention <http://www.arrl.org/hamfests/wyoming-state-convention>, Cheyenne, Wyoming

- June 4 -- ARRL Atlantic Division Convention

1132. lol at the current effectt of palmdale anti-antenna ordinance

Newsgroup: rec.radio.amateur.policy
Date: 2011-06-03 05:02:39 UTC
From: radioguy <radioguy222@yahoo.com>
Message-ID: <1b19d834-7da0-4677-86de-098a8f56c116@d1g2000yqm.googlegroups.com>
Source record: 245503
Cross-posted to: rec.radio.amateur.policy,rec.radio.cb,rec.radio.scanner,misc.legal,misc.consumers.house.homeowner-assn

palmdale restricted him to operating on vhf and uhf only and took
away his fcc-license authority to operate on hf. one of
palmdalesexcuses for this was for rf health reasons, the larger the
antenna the more rf radiation there is which is harming the residents
in palmdale, such as hf antennas, and the smaller the antenna , the
less rf radiation there is which is healthier for the residents n
palmdale., like vhf and uhf antennas, therefore he is restricted to
vhf and uhf antennas and can still paarticipate in a part of ham
radio.
d
well, accordng to the arrl, the fcc rf charts and rules show that
transmitting at 100 watts or less on hf is perfectly safe for
everyone and under the mpe limits,and transmitting at the same power
level on vhf and uhf with a small antenna is harmfull. and more than
the mpe
limits.
so by ruling the way they did, , palmdale has screwed
theirselves
over.
if he was transmitting at 75 watts on hf with a hf antenna on a
radio capable of only a 75 watte setting, perfectly safe for his nimby
neigh bors. they and the city of palmdale and the state
ofcalifornia ruled that he is not allowed to transmit on hf and is
only allowed to transmit on vhf and uhf despite what the fcc says. and
s only allowed to have a vhf uhf antenna. and if he is
transmitting at 75 watts on vhf 2 meters , his nimby neigh bors
are now getting more than the mpe limits of rf
radiation.

1133. why bother upgrading

Newsgroup: rec.radio.amateur.policy
Date: 2011-06-03 05:25:58 UTC
From: radioguy <radioguy222@yahoo.com>
Message-ID: <a87e30a0-ba96-41a8-a7c3-db34bbddf945@y19g2000yqk.googlegroups.com>

why pay the arrl to upgrade your license as the california state
ruling in the palmdale case has recently proved, it is a complete
waste of money to pay the arrl anything to upgrade your radio license
since local cities and states can take it away anytime despite what
the fcc says. you pay to upgrade to a general or extra then the local
city and local state takes it away by busting you back down to
technician class even though younever violated any fcc rules and
despite fcc rules saying no one except the fcc is allowed to force you
to involuntary surrenderr your fcc
license.
and if cities andd states can take away your general and extra class
radio license despite what the fcc says as has happened in the
palmdale case, then they can also take away your technician class
license and even the right to operate your cb radio no matter what the
fcc
says.
why is this ruling of cities and states prohi biting you from having
a general and extra class radio license despite the fcc granting
you a license to operate general and extra class being allowed to
stand.
whatever happened to the federal law trumps local city and state law
the radio opeators were so fond of quoting in the
past.

radioguy wrote:
> why pay the arrl to upgrade your license

You don't pay the FCC unless you get a call of your own choosing (vanity).
You don't have to pay to renew your license on the ULS. You would have to
pay W5YI to do it foe you. You have to pay the current test fee to the VEC
unless you've got a VEC like the Laurel VEC that doesn't charge for tests.

The ARRL has nothing to do with license fees except to make recommendations.

If keep posting BS, I'll keep shooting holes in it.

1139. Amateur Radio Newsline(tm) Report 1764 - June 3 2011

Amateur Radio Newsline(tm) Report 1764 - June 3 2011

Amateur Radio Newsline report number 1764 with a release date of Friday, June, 3 2011 to follow in 5-4-3-2-1.

The following is a Q-S-T. The ham radio team in NYC that met with the sponsor of H R 606 has more good news about the future of that bill, a new system for US based educators to request schoolroom contacts with the International Space Station, Japan scraps the last of its Morse code ham radio testing and the ARRL's VUAC is looking for ways to increase activity on the world above 50 MHz. Find out the details are on Amateur Radio Newsline(tm) report number 1764 coming your way right now.

(Billboard Cart Here)

**

RADIO LAW: HR-607 SPONSOR BEGINS WORK TO ELIMINATE 70 CM HAM B AND FROM THE BILL

Some more good news on the future of House of Representatives measure HR-607 and its possible impact on the amateur radio allocation from 420 to 440 MHz. Mike Lisenco, N2YBB, was one of the four New York City area hams that recently met with the bills sponsor Representative Peter King and elicited a promise to get the measure changed. This, so as to eliminate the possible sale of that ham radio allocation from it. Now says Lisenco, the action to do this is already underway:

--

N2YBB: "After we met with Congressman King on the 19th; shortly after that we were told by his staff that the Congressman requested of the committee that Section 207 which is the section in HR-607 that deals specifically with the sale of spectrum below 512 MHz be completely removed from the bill.

"He went to Conressman Greg Walden, who is a Republican from Oregon, whose callsign is W7EQU, and who is the chairman of the House Subcommittee on Technology, Communications and the Internet.

"Both of them agreed to remove the section and we are being told that the bill will absolutely not move forward until (Section) 207 is removed from it."

--

According to N2YBB, he sincerely believes that Congressman King is a man of his word and will follow through completely on his commitment to remove any reference to the 70 centimeter band from the measure. And according to Lisenco, this is a good lesson in how hams must learn to deal with all political issues on a grass roots level:

--

N2YBB: "I think the lesson that we learn here is that the best approach is to develop working relationships with all legislators; whether they be on a Congressional level; whether they be on a local level such as a City Council member or a state representative.

"It really behooves us to go out and build these working relationships with our representatives because a face-to-face meeting with a constituent is a thousand times more powerful then 10,000 letters."

--

Lisenco notes that unlike the 1950's, 60's, or 70's, that today with the speed at which communications takes place it really is necessary to get a face to face meeting with legislators on issues that affect our service.

As to when the action to remove 420 to 450 MHz from possible resle under HR-607, Lisenco cannot say. He notes that legislation in Washington moves at its own pace but he is certain that Representative King will act in the best interest of his constituents in the amateur radio community which he represents in Congress. (ARNewsline(tm))

HAM RADIO IN SPACE: NEW US ONLY SELECTION PROCESS ANNOUNCED FOR ARISS CONTACTS

An announcement that will change the way in which educators in the Unuited States must apply for ham radio in space classroom contacts with the International Space Station is now in place. Norm Seeley, KI7UP, reports:

--

The Amateur Radio on the International Space Station or ARISS planning group along with the NASA Johnson Space Center Education Office's Teaching From Space staff have jointly announced a new processes that United States based educators will need to follow. This, to submit a proposal for a school contact with the International Space Station crew.

Effective immediately, a application for an ARISS school contact must consist of a comprehensive education plan, of which the ARISS contact is one of many components. Other parameters include the integration of NASA education and ARRL content with surrounding education activities, and incorporate creative ways to maximize the reach of the ARISS contact and the experience for students. .

The proposal should include study topics related to space technology, space exploration or space research, as well as amateur radio, radio science and wireless communications technology. Also, the educator must describe the instructional activities and lessons to be engaged in with students as part of the learning and preparation for the proposed contact

ARISS astronaut contacts under the new processes will begin in January 2012 and end in July 2012. A window of opportunity will open every six months when another NASA news release goes to educators. The first of these opened on May 19th and will close on July 15th.

The initial NASA news release was sent on May 19th to 18,000 educators. NASA's Teaching From Space Office stresses that for the moment the new procedure applies only to schools in the United States. Educational institutions in other countries will continue to follow their existing process.

>From Scottsdale, Arizona, I'm Norm Seeley, KI7UP, reporting for the Amateur Radio Newsline.

--

Full coverage of the ARISS program changes can be found on-line courtesy of the ARRL at tinyurl.com/3ejz5lu (Southgate, ANS, ARRL, others)

RESTRUCTURING: JAPAN SCRAPS FINAL MORSE TESTING

The country that started the no-code licensing revolution some six decades ago has finally dropped the Morse testing requirement for all of that nations ham radio licensees. This with word that the Japanese Ministry of Internal Affairs has decided to scrap Morse testing for the Amateur Radio Class 1 and 2 licenses with an effective date of this coming October 1st.

What amounts to Japan's version of a Notice of Proposed Rule Making on the Morse test was held earlier in the year. There were 39 people who responded. Following a discussion of the information the responses provided, the Ministry announced that Morse telegraphy testing would be discontinued.

Japan pioneered the High Frequency No-Code Amateur Radio or Class 4 license in the 1950's although they still required Morse for the higher license classes. The written exam for the Class 4 is roughly equivalent to the Foundation exam in the United Kingdom and Australia and the discontinued USA Novice.

The Japan Ministry of Internal Affairs announcement on the abolishment of Morse testing is on line in Google translated English at tinyurl.com/3s4bljx (WIA)

RADIO HEALTH: WHO NOW SAYS CELLPHONES MAY CAUSE CANCER

According to the World Health Organization, radiation from cell phones can possibly cause cancer. This as the agency now lists mobile phone as a carcinogenic hazard.

According to published news reports, a team of thirty-one scientists from fourteen nations reached this the decision after reviewing previously reviewed studies on cellular telephone safety. The scientists say that they found enough evidence to categorize personal exposure as possibly carcinogenic to humans. What that means is they found some proof of increase two types of brain cancer with mobile phone users, but have not been able to draw conclusions for other types of cancers.

The wireless industry responded to the announcement saying it "does not mean cell phones cause cancer. The Cellular Telecommunications Industry Association noted added that World Health Organization researchers did not conduct any new research, but rather just reviewed already published studies.

Before its announcement on Tuesday, May 31st the World Health Organization had assured consumers that no adverse health effects from cellular telephones had been established. (Published news reports)

RESCUE RADIO: SPRINGFIELD TORNADO RESPONSE

Two tornadoes touched down in Central Massachusetts on Wednesday, June 1st causing widespread damage to the city of Springfield and several other communities. Amateur radio operators sprang into action on several fronts including providing assistance to the National Weather Service in spreading word about the storms

--

NWS Amateur Station Audio: Hear it by downloading the MP3 version of this weeks newscast at www.arnewsline.org.

--

According to reports reaching our news desk, a half dozen hams associated with a Western Massachusetts ARES group provided support the American Red Cross in staffing shelters in several communities hit by the storms. Also utilized was the services iof hams attached to

RACES at an Emergency Operations Center in near the city of Springfield which was one of the towns hit by a tornado.

At airtime the death toll stands at four but first responders are going door to door looking for other victims trapped in damaged buildings. Massachusetts Governor Deval Patrick called up 1000 National Guardsmen and has declared a state of emergency. More on this situation as information is made available. (KC5FM, Published news reports)

**

ENFORCEMENT: MIAMI UNLICENSED BROADCASTER FINED $20,000

Yet another unlicensed broadcaster in Florida has been handed a stiff penalty by the FCC. This, as it upholds a $20,000 fine against Nounoune Lubin for operating a radio station in North Miami, withour a government grant to do so.

According to an FCC release, on four occasions in late 2009 and into 2010, agents from the Miami office traced the source of an illegal signal on 90.1 MHz to Lubin's premises. They also traced a cable from an antenna in the backyard to transmitting equipment in her home. The FCC says that even after receiving two Notices for operating an unauthorized station, Lubin continued on the air. That's when it decided to issue a Notice of Aparant Liability to Monetary Forfeiture in the amount of $20,000.

In response, Lubin simply claimed she did not operate the station, but offered no other proof. The regulatory agency was unconvinced. In affirming the fine it said that even if Lubin herself didn't operate the station, the equipment was on her premises, powered on and under her control.

The agency then upheld the original penalty, which has now escalated to a forfeiture order. Lubin was given the customary 30 days to pay or to file an appeal. (FCC)

**

ENFORCEMENT: COURT DISMISSES K1MAN COUNTERCLAIM

Another loss for Glenn A. Baxter, K1MAN, in his legal battle with the United States government which is seeking to collect a $21,000 fine issued against him by the FCC.

On May 23, the US District Court in Maine released an Order, dismissing one of Baxter's amended counterclaims on multiple grounds. In its dismissal the court noted that the counterclaim by the plaintiff does not have standing to file a civil action against the government for its decision not to initiate a prosecution. Also that court does not have subject matter jurisdiction to review a Federal Communications Commission licensing decision, and that the Federal Tort Claims Act does not authorize a civil suit based on a governmental agency's alleged failure to perform its statutory duty.

According to the October 2010 complaint, the $21,000 fine had been levied against Baxter for - and we quote --defendant's willful and repeated violations of Sections 97.101(d) which is commencing transmissions on top of existing communications. Also for violating Section 97.113(a)(3) which is transmitting communications in which the station licensee or control operator has a pecuniary interest. Baxter had also been charged for his alleged willful violation of Section 97.105(a) which is exercising control over station, Section 97.113(b) that deals with propitiations on amateur service stations broadcasting and for his failure to file requested information pursuant to an Enforcement Bureau directive.

The court upheld complaint that seeks to force Baxter to pay the $21,000 fine along with a filing fee and such other and further relief as the Court deems just and proper. Two United States Attorneys filed the complaint against Baxter in US District Court in October 2010, for not responding appropriately to an order that he pay a $21,000 monetary forfeiture. Baxter countered by filing several pro se motions of his own. (ARRL, others)

HAM HAPPENINGS: NEW AMERICAN LEIGON RADIO CLUB SEEKS MEMBERS

QCWA President Bob Roske, N0UF, reports that a new American Legion Radio Club is in the process of organizing. Membership is available to Legionnaires, Auxiliary, Legion Riders and others who qualify. If you are interested in becoming a part of this new group please send your full name, callsign, address and Leigon membership number by e-mail to K9TAL (at) legion (dot) org. (N0UF)

NAMES IN THE NEWS: K6TT APPOINTED SANTA CLARA VALLEY CA SM

Phil Steffora, K6TT, of Los Altos, California, has been appointed as Santa Clara Valley Section Manager effective May 25. ARRL Membership and Volunteer Programs Manager Dave Patton, NN1N, made the appointment in consultation with Pacific Division Director Bob Vallio, W6RGG.

That ARRL's section's top ARRL Field Organization position has been open since Bill Dale, N2RHV, term of office concluded on June 30, 2010. Steffora's appointment extends through June 30, 2012. (ARRL)

**

NAMES IN THE NEWS: VUAC WANTS INPUT ON HOW TO INCREASE ACTIVITY

According to Jon Platt, W0ZQ, the ARRL would like to encourage more participation in several VHF and UHF contests held each year. In a posting to the VHF Reflector, Platt is quoted as noting that many of the High Frequency transceivers sold in recent years include 50 MHz. Some also include the 144 and 432 MHz bands with multi-mode capabilities. He goes on to say that the question at hand is how can we encourage more owners of such radios to utilize these bands and

modes to participate in VHF and UHF contests?

Platt says that the ARRL VHF/UHF Advisory Committee - the VUAC -- has been asked to consider this question. Also to make recommendations on ways to encourage, explore and expand the ARRL VHF and UHF contests and other operating activities by using the multi-band and multi-mode capabilities of modern transceivers and related equipment.

W0ZQQ says that VUAC would like to ask the amateur radio community to provide its comments and ideas for consideration. Please send any that you have to your ARRL VUAC Division representative no later than July 1st. A listing of each Division's VUAC representative can be found at www.arrl.org/arrl-staff-vuac-cac. (VHF Reflector)

**

NAMES IN THE NEWS: POPE BENEDICT XVI CROATION VISIT TO BE COMMEMORATED BY HAM RADIO

Ham radio will be a part of the celebration as Pope Benedict the 16th will be visiting the Republic of Croatia for the first time between June 4th and 5th.

The city of Zagreb was to be the host town during his stay in Croatia. The visit of Pope Benedict has also inspired the members of the Croatian Flora Fauna Radio Club to activate the special callsign 9A16PB. The PB in the callsign is in honor of Pope Benedict.

Hams in Croatia will keep 9A16PB on the air through June 13th. QSL this very special operation via 9A2MF. We will have more special event information later on in this weeks Amateur Radio Newsline report. (OPDX)

EMERGING TECHNOLOGY: THE BODY AS AN ANTENNA

Microsoft Research has presented some interesting technologies at the recent Association for Computing Machinery's Conference on Human Factors in Computing Systems. One of these is titled "Your Noise is My Command: Sensing Gestures Using the Body as an Antenna."

In this case, the human body isn't transmitting. Rather it is receiving electromagnetic noise from objects the body or hand. It then

feeds this data to a laptop in a backpack for interpretation.

This presentation received one of the conferences thirteen best-paper awards. And as you might have guessed, it was titled "Your Noise is My Command: Sensing Gestures Using the Body as an Antenna." (TV Technology)

RADIO IN SPACE: NEXT MARS ROVER BEING MADE READY FOR LAUNCH

NASA engineers are putting the finishing touches on the next rover to Mars before shipping it off to Florida for launch later this year. What's being described as a small army of technicians dressed in protective suits have been working almost nonstop inside of a clean room at the Jet Propulsion Laboratory in Pasadena, California, assembling the new rover named Curiosity and testing its science instruments.

NASA says that it will begin shipping spacecraft parts to Cape Canaveral beginning next month. The size of a small SUV, Curiosity will drive around Mars and study whether the planet ever had the right environment to support primitive life.

The Mars mission was supposed to launch in 2009, but technical setbacks and soaring costs forced a two-year delay. The $2.5 billion project is now scheduled to launch in late November. (NASA)

**

HAM RADIO NEAR SPACE: BALLOON NUMBER 165 FROM EOSS TO FLY ON JUNE 11TH

Edge Of Space Sciences will be flying its 165th stratospheric balloon flight on Saturday June 11th. Launch is slated for 7:10 AM Mountain time from Deer Trail, Colorado.

This flight will be in support of Colorado University Boulder's Space Grant Consortium Shot Workshop with student built experiments as the payload. These are the tentative payload frequencies 147.555 MHz transmitting the call AE0SS in Morse and 144.340 MHz A-P-R-S using the identifier AEOSS-11.

Some 40 students are participating in this latest launch which will loft a 20 pound payload using a 3000 gram helium filled balloon. For the latest information on this and other Edge of Space Sciences projects, please check the groups website at www dot eoss dot org. The June 11th flight follows closely on the heels of Edge of Space Sciences its 164th stratospheric balloon flight that took place on Saturday May 28th. (KC0UUO)

RADIO ON THE MOVE: WHITTER AK. TO BROWNSVILLE TX. ON APRS EQUIPPED BIKE

On the air, keep an ear open foe Keith Stebbings, KE1THR of Joseph, Oregon. This as he attempts a long distance bicycle ride from Alaska to Texas.

Stebbings departed from the Alaskan town of Whittier on May 12th on his touring bike pulling two small trailers. In addition to his regular biking gear, Stebbings is carrying amateur radio equipment that includes an APRS transmitter which will pinpoint his location for the next five months as he heads toward Brownsville, Texas. He has a Yaesu VX-6R handie talkie as well as a Yaesu FT-857 all-band transceiver that runs on batteries kept charged through a solar panel.

When he is not on his bike, Keith Stebbings is the director of the Wallowa Avalanche Center in Oregon. His progress on his 5-month, 8000 mile ride can be tracked on the Internet at aprs.fi by entering the call ke1thr-4 in the callsign search. (Alaska Newsminer, others)

**

DX

In DX, K0YAK is currently based at the US Embassy in Kathmandu, Nepal and is active as 9N7AK during his spare time. He is expected that he will be there until early July using SSB and PSK31 on 20 through 10 meters. QSL's should go via his home callsign.

PA4JJ will be active portable 9A from Porec on the Croatian mainland between June 6th and 24th. He will operate holiday style using RTTY and PSK31 most of the time. QSL via his home callsign.

And while short notice, three operators from Italy will be on the air portable H-B-Zero from Liechtenstein through June 5th. They plan to operate holiday style using CW, SSB and RTTY, with main focus to be given to 12, 17 and 30 meters as well as the upper High Frequency bands as well as 6 meters. QSL as directed on the air.

**

THAT FINAL ITEM: A LADY THAT CONTRIBUTES TO THE DAYTON HAMVENTION

And finally this week the story of a Dayton Hamvention forum leader who has been a part of the annual event for close to a quarter of a century. Amateur Radio Newsline's Mark Abramowicz, NT3V, has the story of this educator who keeps kids coming to Hamvention year after year after year:

--

Carole Perry, WB2MGP, has been the driving force behind Dayton's annual Youth Forum on Saturdays here at the Hamvention for years.

Perry says it's been an incredible experience working with young people who really have an interest in not just turning on a radio and talking or typing on a keyboard, but interest in the technical side.

Perry says she's heard from those who attended past Youth Forums and went on to some pretty exciting careers...

"The kids work for NASA, the kids get involved with the Hubble telescope - they've reported back. They've all gone on - for the most part - into technical pursuits," Perry says. "And even if they never got a license, the fact that they had fun and became technologically a little bit more knowledgeable, then that's the stuff we're there to do with them."

So how did Perry get connected to the Youth Forum?

"I taught 'Introduction to Amateur Radio' for 30 years," Perry says. "And now that I'm retired, it was either the hammock or continue doing this and I chose to do this.

"And, I love working with young people. There's a positive energy that you get when you work with young people. So that's why I love it."

Perry says the Youth Forum at Dayton wouldn't be possible if it weren't for the equipment vendors, ham radio publications, and the Radio Club of America...which she says is especially generous to the youth who make presentations...

"At the end of it, each presenter from RCA gets the 'Young Achievers Award' from RCA as well as a $100 stipend to encourage them for their presentations and for their work in wireless communications," Perry says.

Next year is the 25th anniversary of the Youth Forum and Perry says she's already working on some ideas with the folks at Dayton and others.

"I've got DARA thinking about it, a lot of the publishers of the ham magazines are thinking about it," Perry says. "We're considering doing a reunion of all the kids who have presented over the last 25 years -that's one of the thoughts. So we're going to be working on that."

For the Amateur Radio Newsline, I'm Mark Abramowicz, NT3V, reporting from the Dayton Hamvention.

--

Carole Perry, WB2MGP, has received many honors over the years, but perhaps the greatest is the fact that 24 years after she began the Dayton Hamvention Youth Forum, it is still growing in size and importance each year. (ARNewsline(tm))

NEWSCAST CLOSE

With thanks to Alan Labs, AMSAT, the ARRL, the CGC Communicator, CQ Magazine, the FCC, the Ohio Penn DX Bulletin, Radio Netherlands, Rain, the RSGB, the Southgate News and Australia's WIA News, that's all from the Amateur Radio Newsline(tm). Our e-mail address is Newsline (at)

arnewsline (dot) org. More information is available at Amateur Radio Newsline's(tm) only official website located at www.arnewsline.org. You can also write to us or support us at Amateur Radio Newsline(tm), 28197 Robin Avenue, Santa Clarita California, 91350

And a reminder that the nominating period for the year 2011 Amateur Radio Newsline Young Ham of the Year Award is now open. Created by Newsline back in 1986, this award is offered to recognize one young United States or Canadian radio amateur age 18 or younger for his or her contributions to society through Amateur Radio.

As in years past, the 2011 recipient will receive an expense paid trip to the Huntsville Hamfest in Huntsville Alabama courtesy of Vertex-Standard Corporation which produces Yaesu brand amateur radio gear. Vertex-Standard will also present this years winner with a special ham radio related gift. CQ Magazine will again treat the recipient to a week at Spacecamp-Huntsville. We at Amateur Radio Newsline will present the winner with a plaque honoring his or her achievements.

All nominations and materials required by the official rules must be received by ARNewsline before June 30, 2011. A downloadable nominating form is at our website at www.arnewsline.org. A nominating form can also be obtained by sending a request along with a self addressed stamped envelope to the Young Ham of the Year Award in care of Amateur Radio Newsline, Inc. 28197 Robin Avenue, Santa Clarita California 91350.

Again, the cutoff date for these years Young Ham of the Year Award nominations is June 30th. We ask you to do your part by nominating a young ham who has done something special related to ham radio. The nomination form is at www.arnewsline.org.

For now, with Bill Pasternak, WA6ITF, at the editors desk, I'm Jim Damron, N8TMW, saying 73 and we thank you for listening.

These kinds of laws should be done at the state level and not the consumer level. IOW, the state should inform the manufacturers of the cars that if they want to market their products in the state, they must conform to the following regulations: (statement of regulations)

To expect the individual buyers of automobiles to get them equiped to the states regulations is a bit too much.....

Read what others are saying about Checkmate!

"You have got to be the biggest butt fucking moron in this place.
You use socks and then admit to it? What the fuck is the point?"

-Wildhare

"You can sit there all you want and spit out all the denial you can
muster, it still doesn't change the fact that you are the current
king shit of the puppeteers in this group."

-Ragnar

"It's pretty obvious that if I'm such a dumbass then you are a
double dumbass"

-Ragnar

"Let's recap, shall we? These are the reasons we know you are GAY.
you are a guy and you openly admit that own a CAT."

-Ragnar

Mark fears your post, so he's attempting his usual thread hijacking.

Never fear, UberJacker is on the job of thwarting thread hijackers.

...

Mark's silly efforts are meaningless.
He doesn't deserve even being commented about.

1160. Roger wishes that he had half of DeLorean's skills.

It frustrates Roger to no end to realize that DeLorean is his mental
superior.
Live with it, Roger.
Learn to pay homage to your superiors, Roger.

You can now bow at DeLorean's feet and give him the homage he is due.

It's on topic in all those groops, Daev. I'm pretty sure I already mentioned
that. I'm going to remove my sig delimiter, Daev, because you've annoyed me.

1188. Seeking New FAQ/Intro Maintainers for rec.radio.amateur.*

Newsgroup: rec.radio.amateur.policy
Date: 2011-06-07 06:05:01 UTC
From: rram@panix.com
Message-ID: <radio/ham-radio/recruitment-1-1307426700@panix.com>
Source record: 245459
Cross-posted to: rec.radio.amateur.antenna,rec.radio.amateur.dx,rec.radio.amateur.equipment,rec.radio.amateur.homebrew,rec.radio.amateur.misc,rec.radio.amateur.policy,rec.radio.info

```
Posted-By: auto-faq 3.3.2 beta (PGPMoose V2.0, Perl 5.005)
Archive-name: radio/ham-radio/recruitment
Revision: 1.2 2009/11/25 14:41:01
Posting-Frequency: posted monthly
URL: http://www.faqs.org/faqs/radio/personal-intro/

Changes followed by "|".

The rec.radio.info newsgroup, first established in 1993, has been
recently revived by an active moderation team. We are currently seeking
suitable information, FAQ, and bulletin articles from the entire
rec.radio.* newsgroup hierarchy for simultaneous cross-posting to our
newsgroup.

We are seeking a replacement maintainer for the following information
bulletin formerly posted to rec.radio.amateur.* (and currently archived
at http://www.faqs.org/faqs/radio/personal-intro/ ):

radio/personal-intro
Subject: Guide to the rec.radio Newsgroups
Maintainer: jeffreyh@Hawaii.Edu (Jeffrey Herman)
Last Posted: 9 Nov 2001 06:18:17 GMT
Posting-Frequency: 15th of each month

One significant omission, requiring immediate updates, for this article |
is that it does not mention newer amateur radio newsgroups created since |
it was written, including: |

rec.radio.amateur.antenna |
rec.radio.amateur.boatanchors |
rec.radio.amateur.dx |
rec.radio.amateur.equipment |
rec.radio.amateur.homebrew |
rec.radio.amateur.moderated |
rec.radio.amateur.space |

We are willing to provide any technical support necessary to get this
article updated and automatically posted again at a regular interval.
This would include establishing contact with the original maintainer for
any necessary permissions. We would prefer to seek a new, dedicated
maintainer at this time, rather than start auto-posting the original
article ourselves.

For more information about our newsgroup, see:
```

http://www.panix.com/~rram/usenet/rri/index.html

Please direct any comments, questions, or criticisms to
rec-radio-info-request@panix.com.

Lloyd has been Roger's victim for years.
Now check out Roger's neighbors names.
They all live on Glen Haven Avenue, zip code 26038.
....
D. Aston. Leah Bailey. Steven Bailey.
Stephen Balgo.
Joe Baum....
Need more proof, Roger?

How about Ryan Alfred?
Or Donald Stoetzer?
Or Thomas and Sharon Welsch?

And we don't want to leave out John Guzek or Dick Hall, do we?

And your neighbor across the street? George Manning?
Can't leave him out, can we? But didn't he recently sell his house? Not that it matters.

Perhaps you should consider ceasing the posting of Lloyd's personal information, Roger.
In fact, you had best cease posting ANY personal information of anybody, be it true or false.

I have more where this came from...much, much more.
I have not posted all of the names of the neighbors on your street, but can easily do so.

You have been warned, Roger.

> looking at the front or the back of the vehicle!

If you see a rusty, two door 1976 Dodge with rusted wheel wells and seven or eight antennas on the roof and hood, it is Radioguy huffing and chuffing along.
His car pulls to the left due to a tire that cannot hold air and the woman in the front seat? That is his second cousin, but they are a "romantic couple" who have proclaimed their undying love for one another despite their parents disapproval.
Radioguy can't marry his cousin until she gets a marriage license and to do that, she has to pass a dental health test.
The Health Department has ruled that due to several impacted molars and some discolored teeth that his cousin must submit to some hefty dental care before a marriage license can or will be issued.
Not to be dissuaded, Radioguy and his cousin have, several times, consummated their lust for each other, which has done even further damage and has broken several of her already weakend front teeth.
This has not dissuaded them from their lust, however. A few fragmented teeth cannot stop True Love.
Nay...this pair of lovers will continue on...with Radioguy's cousin simply turning a 180 and presenting her "other" cheek.
But you have to give these lovers credit.
Especially when one realizes that Radioguy's cousin is incarcerated in a mental institution and conjugal visits are forbidden.
As Radioguy says, "Where there is a will, there is a way."

1206. Give it up, Fatass, the only thing you can scare is the women, away from you!

BoB Heil is hosting a weekly netcast over at http://twit.tv/hn. You can download mp4 videos of each episode, watch it in streaming mode, or just download an audio mp3 version for later playback.

You will see many famous amateurs in the weeks to come, including DeLorean, but you won't see AB8MQ or KB9RQZ.

==> FOLLOW THE 2011 ARRL NATIONAL CONVENTION ON FACEBOOK AND TWITTER

If you can't make it to the 2011 ARRL National Convention -- held in
conjunction with Ham-Com in Plano, Texas June 10-11 -- you can follow
all the activities on Facebook <http://www.facebook.com/ARRL.org> and
Twitter <http://twitter.com/arrlexpo>. Photos will be posted to the
ARRL's Facebook page <http://www.facebook.com/ARRL.org> throughout the
Convention, while the ARRL EXPO Twitter account
<http://twitter.com/arrlexpo> will carry live tweets. Discover more
about the 2011 ARRL National Convention here
```

<http://www.arrl.org/2011-arrl-national-convention>.

==> + PUBLIC SERVICE: ARRL, SATERN TEAM UP TO ASSIST IN JOPLIN

After the devastating EF5 tornado that swept through Joplin,
Missouri
<http://www.arrl.org/news/radio-amateurs-assist-american-red-cross-served-age
ncies-during-joplin-storm>
last month, radio amateurs responded to assist with providing support
in multiple ways. On Friday, June 3, the Salvation Army -- which has a
Memorandum of Understanding with the ARRL -- contacted the ARRL
<http://www.arrl.org/news/satern-seeks-amateur-radio-volunteers-for-joplin-op
erations>,
seeking the League's assistance to provide hams who could help support
the agency's work in Joplin. More than 50 Amateur Radio operators
responded to the request to help the Salvation Army Team Emergency
Radio Network (SATERN <http://www.satern.org/>) supply logistical
support to the affected areas. Just two days later, all personnel needs
had been met. These hams helped to relay information back to the
Salvation Army's Joplin headquarters about inventory, requests for food
and drink and maintenance problems. Both the ARRL and SATERN greatly
appreciate the response from the amateur community.

==> + ARRL FIELD DAY: IT'S NOT TOO LATE TO PREPARE FOR FIELD DAY

Now is the time to start getting information out to the public about
your ARRL Field Day <http://www.arrl.org/fieldday> activities. ARRL
Field Day -- the largest on-the-air operating event -- is the one of
the best opportunities of the year for showing our Amateur Radio
capabilities to the public. ARRL Media and Public Relations Manager
Allen Pitts, W1AGP, notes that the ARRL has made many media materials
available for local use. "Our visibility to the public is important in
antenna, band preservation and texting issues, so we encourage you to
use this opportunity to showcase what Amateur Radio can do," he said.
Download an audio PSA that can air on your local radio stations here
<http://www.arrl.org/public-service-announcements>. Get a press
release, a government proclamation template and invitation letters that
you can use to invite your local officials to your Field Day site here
<http://www.arrl.org/files/file/Field-Day/2011/2011_FD_PR_info.pdf>.
Find high-definition video files suitable for airing on your local
television stations here <http://p1k.arrl.org/pub/pr/>. Get more
information on ARRL Field Day, including the 2011 ARRL Field Day logo
and operating tips here. More info, the logo and tips are here
<http://www.arrl.org/current-contact-issue>. Find a Field Day station
near you here <http://www.arrl.org/field-day-locator>. ARRL Field Day
is June 25-26.

==> + 2010 ARRL ANNUAL REPORT NOW AVAILABLE

The ARRL Annual Report for 2010 -- now available online
<http://www.arrl.org/annual-reports> and in print -- reviews the major
events of the year and documents the renewed growth of both the ARRL

and the activities of the Amateur Radio Service. For the fourth consecutive year, ARRL membership grew -- totaling 156,475 members at year end. In his introduction, ARRL Chief Executive Officer David Sumner, K1ZZ, noted numerous challenges facing the ARRL. "But we also have great strengths," he explained, "and if we harness them effectively over the next few years, the ARRL and Amateur Radio will be well positioned for a bright second century -- at least as bright as their first." Read more here <http://www.arrl.org/news/2010-arrl-annual-report-now-available>.

==> WRC-12: US PROPOSES WRC-12 ALLOCATIONS FOR HF RADARS

The ARRL and its partners in the IARU have been involved in the preparations for several items on the 2012 World Radiocommunication Conference (WRC-12) agenda. Agenda item 1.15 is "to consider possible allocations in the range 3-50 MHz to the radiolocation service for oceanographic radar applications." Such radars have been in operation in coastal areas for many years, typically under experimental licenses.

Based on protection requirements for the Amateur Service that the IARU had arranged to be included in ITU documentation, the Conference Preparatory Meeting (CPM) Report for WRC-12 that was adopted in February concluded that sharing between oceanographic radars and the Amateur Service "seems to be difficult." Sharing studies, therefore, focused on in-band compatibility in the bands used only by the fixed and/or land mobile services. The CPM Report offers three methods of satisfying the agenda item through various combinations of primary and secondary allocations, with the objective of satisfying the operational need for safety systems (e.g. for the detection of tsunamis) and providing for the operation of other systems while protecting other allocated services from harmful interference. Read more here <http://www.arrl.org/news/us-proposes-wrc-12-allocations-for-hf-radars>.

==> + CHECK OUT THE JULY ISSUE OF QST

The July issue of QST is jam-packed with all sorts of things that today's Amateur Radio operator needs. From product reviews to experiments to contesting, this issue of QST has something for just about everyone.

Radio amateurs who were active in the 1950s through the 1970s have most likely built a radio from a kit. But even 60 years later, hams can experience the fun that goes hand-in-hand with kit building. In his article "Electronic Kits Still in the Picture," Mark A. Lacy, W5TXR, says that hams today can still have the thrill of building a radio from kits that incorporate today's technology. Hams know that sunspots and solar activity influence band conditions. But how can we use that information ? QST Technical Editor Joel Hallas, W1ZR, explains the daily sunspot number, solar radio flux and more in his article "Solar Indices -- What Do They Mean?"

Join John Reisenauer Jr, KL7JR, as he takes to Canada's Northwest Territories and the Yukon to heed the call of the wild -- and the unpredictable challenges of Amateur Radio -- in his article "The Call Sign of the Wild." In his article "After the 73s," QST Assistant Editor Steve Sant Andrea, AG1YK, relates that although ARRL's Logbook of The World has changed the way many hams verify a contact, others still rely on QSL cards. Hams across the country participated in the 2010 ARRL Simulated Emergency Test, giving served agencies and the news media a public demonstration of our capabilities. ARRL Field Organization Supervisor Steve Ewald, NV1X, presents the results of the SET in the July issue.

<http://www.arrl.org/multimedia> ARRL Contributing Editor Howard Robins, W1HSR, takes a look at the Kenwood TH-D72A dual band handheld transceiver in this month's Product Review. He says that this rig "seamlessly folds APRS operation and a packet TNC into a full featured, easy-to-use dual band handheld." ARRL Contributing Editor Ward Silver, N0AX, checks out the Down East Microwave L222-28 1 meter transverter. He says the transverter "is a fine solution for amateurs looking to expand station coverage to the 1.25 meter band. It can be adapted to interface with a variety of radios and receivers, and transmits well." Silver also test drove the Tennadyne T-28 VHF/UHF log periodic antenna. He says that this antenna "is ruggedly built and will get you on six amateur bands with some gain from a single feed line."

Jay Townsend, WS7I, delivers the results of the 2011 ARRL RTTY Roundup. This year, participants in 132 countries submitted almost 1600 logs containing half a million contacts. Ken Harker, WM5R, has the results of the 2010 ARRL 10 Meter Contest. For the first time ever in this contest, Mexican states counted as multipliers, with 26 of the 32 Mexican states on the air.

Of course, there are the usual columns you know and expect in the July QST: Happenings, Hints & Kinks, The Doctor Is IN, How's DX, Technical Correspondence, Vintage Radio and more. Look for your July issue in your mailbox. QST is the official journal of ARRL, the national association for Amateur Radio. QST is just one of the many benefits of ARRL membership. To join or renew your ARRL membership, please see the ARRL Web page <https://www.arrl.org/join>.

==> + FCC NEWS: FCC TAKES STRONG STANCE AGAINST RADIO JAMMING, ISSUES $24,000 FINE TO CALIFORNIA MAN

On June 6, the FCC issued a Forfeiture Order <http://transition.fcc.gov/Daily_Releases/Daily_Business/2011/db0606/DA-11-990A1.pdf>
in the amount of $24,000 against Kevin W. Bondy of Encino, California, for engaging in unlicensed radio operation and intentional interference to licensed radio operations and for refusing to allow an inspection of his radio equipment by FCC personnel. Bondy -- licensee of General Mobile Radio Service (GMRS <http://wireless.fcc.gov/services/index.htm?job=service_home&id=general_mobil

e>)
Station WQGX752 -- is accused of repeatedly and intentionally jamming four land mobile frequencies assigned to The Oaks Shopping Center in Thousand Oaks, California.

In assessing the $24,000 fine, the FCC noted that it was responsible for making and enforcing regulations to prevent interference and to maintain control over the use of the radio spectrum in a manner that promotes the public interest and convenience. "Bondy's acts cut at the heart of the Commission's responsibilities to protect the nation's airwaves and regulate use of the spectrum," the Order said. "Bondy operated a radio without a license on the specific frequencies assigned and licensed by the Commission to The Oaks, for the explicit and expressed purpose of prohibiting The Oaks's use of its licensed frequencies. This type of conduct inhibits the Commission's ability to effectively regulate and maintain control over the use of the spectrum and will not be tolerated." Bondy has until July 6 to pay the fine.

==> + FCC NEWS: FCC SEEKS COMMENTS ON TERMINATING CERTAIN DOCKETED PROCEEDINGS

In a Public Notice
<http://transition.fcc.gov/Daily_Releases/Daily_Business/2011/db0603/DA-11-992A1.pdf>
(CG Docket No 11-99) released on June 3, the FCC's Consumer & Governmental Affairs Bureau (CGB <http://transition.fcc.gov/cgb/>) is seeking comments on whether or not it should terminate approximately 800 docketed proceedings
<http://transition.fcc.gov/Daily_Releases/Daily_Business/2011/db0603/DA-11-992A2.pdf>.
There are numerous proceedings pertaining to Amateur Radio on the list. These proceedings -- some going back to 1991 -- include dockets where no further action is required or contemplated, as well as those in which no pleadings or other documents have been filed since December 31, 2004. The record in a terminated docket will remain a part of the FCC's official records; the various pleadings, orders and other documents in that docket will continue to be accessible to the public, post-termination. With this Public Notice, the CGB is seeking comment from interested parties on the possible termination of those proceedings. Comments will be accepted within 30 days after the Public Notice is published in the Federal Register; reply comments must be filed within 45 days after publication. As of June 7, a publication date has not been set. Instructions on how to file comments are listed beginning on page 2 of the Public Notice
<http://transition.fcc.gov/Daily_Releases/Daily_Business/2011/db0603/DA-11-992A1.pdf>.

==> + ON THE AIR: ARRL VHF/UHF ADVISORY COMMITTEE SEEKS INPUT

The ARRL would like to encourage more participation in its several VHF/UHF contests held each year. Many of the HF transceivers sold in recent years include 50 MHz, and some also include the 144 and 432 MHz

bands with multi-mode capabilities. The question at hand is how can we encourage more owners of such radios to utilize these bands and modes to participate in VHF/UHF contests?

The ARRL VHF/UHF Advisory Committee (VUAC) has been asked to consider this question, and to make recommendations to encourage, explore and expand the ARRL VHF and UHF contests and other operating activities by using the multi-band and multi-mode capabilities of modern transceivers and related equipment.

The VUAC would like to ask the Amateur Radio community to provide their comments and ideas for consideration.

Please send any comments or ideas you have on this matter to your ARRL VUAC Division representative no later than July 1, 2011. A listing of each Division's VUAC representative can be found at http://www.arrl.org/arrl-staff-vuac-cac.

==> + ON THE AIR: NEW RUSSIAN PREFIX SYSTEM IN USE

If you have been on the HF bands lately, you may have noticed that a number of new prefixes are in use by stations in the Russian Federation. Here is a summary of the changes recently adopted by the Russian telecommunication authorities. Thanks to SRR President Roman Thomas, R5AA (ex-RZ3AA) for the information.

- Russian prefixes with the numeral 2 are no longer limited to Kaliningradsk. Stations with RA2 and UA2-UI2 (with F and K as the first letter in the suffix) are in Kaliningradsk; otherwise, these prefixes will used in European Russia.
- Stations with the following prefixes are in European Russia: R1, RA1-RZ1 (except RI1 as noted below), R2, RB2-RZ2, R3-R7, RA3-RZ7, UA1 and UA3-UI7. Also, stations with the prefixes R8, R9, RA8-RZ9 and UA8-UI9 (with F, S, T, W or X as the first letter in the suffix) are in European Russia.
- Except for those listed above, all stations with 8, 9 and 0 as the numeral are in Asiatic Russia.
- Russian Antarctic stations use temporary call signs in the series RI1ANA-RI1ANZ and RI00ANT to RI99ANT.
- Franz Jozef Land stations use temporary call signs RI1F, RI1FJ and RI1FJA-RI1FJZ.
- Malyj Visotskij island stations use temporary call signs RI1M, RI1MV and RI1MVA-RI1MVZ.

==> + CHANGING OF THE GUARD: GENE ZIMMERMAN, W3ZZ, TO RETIRE FROM "THE WORLD ABOVE 50 MHZ"

If you're a VHF+ fan, you probably read "The World Above 50 MHz," written by Gene Zimmerman, W3ZZ, of Gaithersburg, Maryland. For the last nine years, Zimmerman -- an ARRL Life Member -- has written this popular QST column, but the July 2011 issue will be his last. "When I accepted the duties of VHF Editor in 2002, I did so well knowing that my tenure would be circumscribed and likely not to exceed a decade in

time," he wrote in his farewell column. "There are many reasons for this, most importantly that an individual begins to run out of new ideas after a given amount of time and that the position -- and the readership -- would benefit from fresh viewpoints." Beginning with the August 2011 issue of QST, Jon Jones, N0JK, of Wichita, Kansas, will take over the column. Read more here <http://www.arrl.org/news/gene-zimmerman-w3zz-to-retire-from-the-world-above-50-mhz>.

==> SOLAR UPDATE

Tad "Until the Sun went down <http://www.youtube.com/watch?v=QqqBs6kkzHE>" Cook, K7RA, reports: Although higher early in the reporting week, the average daily sunspot numbers declined more than 4 points to 85.7, while the average of daily solar flux numbers was down 1.5 points to 101.6. The predicted solar flux for the near term is 88 on June 9-15, and 90, 95, 95, 92, 92 and 92 on June 16-21. The solar flux is then expected to rise to a peak of 115 on June 28. The predicted planetary A index is 20, 25, 12, and 8 on June 9-12, then 5 on June 13-22, then peaking at 15 on June 24-25. Check out this link <http://www.thesuntoday.org/current-observations/a-spectacular-event-a-filamentprominence-eruption-to-blow-your-socks-off/> sent by Scott Bidstrup, TI3/W7RI, showing some fantastic HD videos of recent solar eruptions. Look for more information on the ARRL website on Friday, June 10. For more information concerning radio propagation, visit the ARRL Technical Information Service Propagation page <http://www.arrl.org/propagation-of-rf-signals>. This week's "Tad Cookism" is brought to you by The Human League's (Keep Feeling) Fascination <http://en.wikipedia.org/wiki/%28Keep_Feeling%29_Fascination>.

==> THERE'S STILL TIME TO ENTER THE 2011 ARRL PHOTO CONTEST!

Have you ever wanted to see a photo of yours in QST, the annual ARRL Amateur Radio Calendar or another ARRL publication? Well, here's your chance! If you're among the winners, not only will your photographic skill be propagated far and wide, but we're offering $100 as the First Prize. The winning photo and three runners-up will be published in QST. All submitted photos will also be considered for the 2012 ARRL Calendar.

- Deadline: Photos must be received at ARRL HQ by June 30, 2011.
- Subject: Must be directly related to Amateur Radio, and be in good taste. Extra points will be awarded for photos showing folks having fun with Amateur Radio. Photos will be judged on overall quality and composition.
- Requirements: Digital images or color prints accepted. A digital image printed on photo paper, however, doesn't work as well as a high-resolution file attachment. Digital images should be high resolution. A digital image up to 8 MB in size can be e-mailed to upfront@arrl.org, subject line "2011 Photo Contest." An image may also

be burned to a CD and mailed to ARRL Photo Contest, 225 Main St, Newington, CT 06111. All entries must include caption information describing where the photo was taken, along with a description of the subject of the photo, as well as the names and call signs of any persons shown. If you entered last year's contest, please do not resend the same photo for this year's contest. One entry per person.
- Miscellaneous: The decisions of the judges -- composed of QST editorial and production staff -- are final.

==> DXCC DESK APPROVES CURRENT VK0KEV MACQUARIE ISLAND DXPEDITION

ARRL DXCC Manager Bill Moore, NC1L, reports that the current VK0KEV DXpedition to Macquarie Island has been approved for DXCC credit. "If you had cards that were recently rejected for this operation, please send an e-mail <dxcc@arrl.org> to the ARRL DXCC Desk," Moore said. "Please note that due to extremely heavy e-mail, DXCC staff may not respond to your message. Once your record is updated, results will appear in Logbook of The World (LoTW <https://p1k.arrl.org/lotwuser/default>) accounts or in the live, daily DXCC Standings <http://www.arrl.org/dxcc/>."

==> THIS WEEK ON THE RADIO

This week:

- June 10 -- NCCC Sprint Ladder
- June 11 -- Portugal Day Contest; Asia-Pacific Sprint (SSB)
- June 11-12 -- DRCG Long Distance Contest (RTTY), VK Shires Contest; CWops Mini-CWT Test; GACW WWSA CW DX Contest; REF DDFM 6 Meter Contest
- June 11-13 -- ARRL June VHF QSO Party <http://www.arrl.org/june-vhf-qso-party>
- June 12 -- SKCC Weekend Sprint
- June 15 -- NAQCC Straight Key/Bug Sprint

Next week:

- June 17 -- NCCC Sprint Ladder
- June 18 -- Feld Hell Sprint; AGCW VHF/UHF Contest
- June 18-19 -- West Virginia QSO Party; Stew Perry Topband Challenge; All Asian DX Contest (CW); SMIRK Contest
- June 19 -- WAB 50 MHz Phone Contest
- June 20 -- Run for the Bacon QRP Contest
- June 22 -- SKCC Sprint; NAQCC Straight Key/Bug Sprint
- June 22-23 -- CWops Mini-CWT Test

All dates, unless otherwise stated, are UTC. See the ARRL Contest Branch page <http://www.arrl.org/contests>, the ARRL Contest Update <http://www.arrl.org/The-ARRL-Contest-Update> and the WA7BNM Contest Calendar <http://www.hornucopia.com/contestcal/index.html> for more information. Looking for a Special Event station? Be sure to check out the ARRL Special Event Stations Web page <http://www.arrl.org/special-event-stations>.

==> UPCOMING ARRL SECTION, STATE AND DIVISION CONVENTIONS AND EVENTS

- June 10-11 -- ARRL National Convention
<http://www.arrl.org/hamfests/arrl-national-convention-ham-com-2011>,
Plano, Texas
- June 11 -- ARRL Tennessee State Convention
<http://www.arrl.org/hamfests/tennessee-state-convention-1>, Knoxville,
Tennessee
- July 2 -- ARRL Eastern Pennsylvania Section Convention
<http://www.arrl.org/hamfests/eastern-pennsylvania-section-convention-firecra
cker-hamfest-1>,
Marysville, Pennsylvania
- July 15-17 -- ARRL Montana State Convention
<http://www.arrl.org/hamfests/montana-state-convention-glacier-waterton-inter
national-hamfest>,
Essex, Montana
- July 29-30 -- ARRL Oklahoma State Convention
<http://www.arrl.org/hamfests/oklahoma-state-convention-ham-holiday-2011>,
Oklahoma City, Oklahoma

To find a convention or hamfest near you, click here

Amateur Radio Newsline(tm) Report 1765 - June 10 2011

Amateur Radio Newsline report number 1765 with a release date of Friday, June 10, 2011 to follow in 5-4-3-2-1.

The following is a QST. RADAR could come to 60 meters and displace ham radio, South Africa cancels the licenses of those who forgot to pay the annual fee; Amateur radio is well represented at the 2011 Hurricane Conference in Texas and meet some of the ham radio heroes of the Joplin tornado. All this and more on Amateur Radio Newsline(tm) report number 1765 coming your way right now.

(Billboard Cart Here)

RESCUE RADIO: THE HERO HAMS OF THE JOPLIN TORNADO

Some high drama has emerged in the aftermath of the tornado that ripped through Joplin, Missouri, on Sunday night May 22nd. It's a story of true ham radio heroism as supplied to us by Patti Flowers-Palmer, KD0AEL, and Amateur Radio Newsline's Don Carlson, KQ6FM, has the details:

--

Patti Flowers-Palmer, KD0AEL, tells Amateur Radio Newsline that it was on Sunday evening, May 22nd while a young amateur was finishing with post Skywarn Net Control duties that a voice was heard calling for help over the 146.91, W0EBE, repeater. Caleb Burns, KD0BWT, responded to that call. It was coming from the Freeman Hospital in Joplin, Missouri. The news it carried was that a devastating F5 tornado had destroyed much of the community as well as its regional medical facility.

In that exchange, crucial medical supplies were ordered and medical teams were called to duty. Initially, the call was made by an Information Technology person at that location. He was relieved by Thomas Ellicott, N0EKP, who deployed to assist his own stricken community.

As that transmission was taking place, Steve Palmer KA0SPM, and his wife Patti KD0AEL, Andrew Brashers KD0HUN and Jonathan Rinty KD0OSF, all who had been deployed as Skywarn spotters, responded by driving to Cox South Hospital in Springfield, Missouri. Meantime, Tom Hargis WX0SML and Jamas Justice, KD0GUU, both of whom had been deployed with

Skywarn, drove to St. John's Regional Medical Center also located in Springfield. Both of these hospitals are regional Medical Centers for Southwest Missouri.

Upon arriving and finding that the radio rooms near the Incident Command Centers were void of any amateur equipment, operators at both locations began relaying information from doctors and nurses from using their own mobile radio gear. This, to begin the crucial process of moving injured from the overwhelmed Freeman Hospital to several Springfield trauma centers.

With immediate needs met, the hospitals worked with the amateurs to provide locations for the operators to set up mobile radios as base stations so that communications could continue. One was located in an incident command at St. John's and the other in the ambulance bay of Cox South. As this was occurring, KD0BWT grabbed a handie-talkie and headed for Ozarks Community hospital where he established mobile command. A short time later, Pat Conway WA6JGM and Clifton Smith KC0SQU responded by taking a mobile unit to Ozarks and setting up a more permanent station at that location.

The amazing band opening that had allowed the initial communications began to fade and KA0SPM deployed to the National Weather Service in Springfield where he relayed messages via the 145.21 repeater. That machine had survived the tornado that ravaged other parts of the Joplin area.

According to KD0AEL, before the night was over, there was a tremendous outpouring of offers from amateurs over the entire area who offered any assistance they could provide to keep communications flowing. During the week that followed, a number of hams continued to call to offer assistance and they were directed to the coordinators of the CERT search and rescue efforts.

For the Amateur Radio Newsline, I'm Don Carlson, KQ6FM, reporting from Reno, Nevada.

--

As a side note, Patti says that the operator that received the first transmission was on his honeymoon but had been acting as net control for the Greene County Skywarn. Talk about total dedication to duty. (KD0AEL)

**

RESTRUCTURING: RADAR COULD COME TO 60 METERS

The 60 meter ham radio allocation could come under threat from low frequency RADAR. The ARRL and Southgate news both report that the United States has submitted a National Telecommunications and Informational Agency developed plan that could see 5.250 to 5.450 MHz being co-allocated to High Frequency Radar systems.

The NTIA proposals would see Radiolocation getting primary allocations that would include at 5.250 to 5.450 MHz as well as 14.350 to 14.990 MHz along with a number of others across the entire High Frequency spectrum. This would not only mean sharing or giving up 5 MHz, but it would also place wideband noise generating signals directly adjacent to the 20 meter band as well.

While there is no international allocation to the Amateur Service in the 5.250 to 5.450 MHz band, the United States and a growing number of other nations world-wide have authorized at least limited amateur operations on a non-interference basis to this spectrum

The full story is on-line at the ARRL website. You can get directly to it by using the shortcut of tinyurl.com/LFRADAR. (Southgate, ARRL, others)

**

RADIO LAW: SOUTH AFRICA'S TELECOMMUNICATIONS REGULATOR CANCELS 34,000 LICENSES FOR NON PAYMENT

When is a ham not a ham? In South Africa it appears to be when he forgets to pay his yearly licensing fee. Amateur Radio Newsline's Bruce Tennant, K6PZW, explains:

--

South African hams who failed to pay their annual license fee, may now find that they are license free. This, after South Africa's telecommunications regulator the Independent Communications Authority of South Africa, better known as ICASA, has cancelled over 34,000 radio licenses that have remained unpaid for the past 365 days. This includes all amateur radio licenses that are in arrears for the past year.

According to the South African Radio League, ICASA's finance department did not consult with the regulatory agency's licensing department before taking this action. Rather, it simply cancelled all licenses unpaid for the past 365 days.

South African hams that had their license cancelled are being advised by the South African Radio League to call the Independent Communications Authority to have it reinstated. Those that have already paid only need to provide proof of payment. Those who have not paid up can do so by following the information and account number on their last valid license document.

For the Amateur Radio Newsline, I'm Bruce Tennant, K6PZW, in Los Angeles.

--

It should also be noted that as a courtesy ICASA normally sends out reminders that regulatory fees are due. However, the ultimate responsibility remains with the licensee to ensure that the license fee

is paid up at all times. (SARL)

**

RADIO LAW: BILL TO AUTHORIZE ENGINEERS ON COMMISSIONERS STAFF INTRODUCED IN HOUSE

Meantime back in the United States, Representative Cliff Stearns from Florida has introduced House Bill 2102 This is a companion measure to Senate Bill 611, presented earlier this year by Senator Olympia Snowe of Maine. Both bills would authorize each FCC commissioner to appoint a fourth staff assistant who is an engineer or computer scientist.

Last March, the Society of Broadcast Engineers national leadership says that it met with Stearns' Washington staff and asked that he consider sponsoring the legislation. In a press statement, the SBE says that with bills now introduced in both Houses of Congress, it will be working to gain co-sponsors for each measure and will continue to push to see this legislation eventually approved by Congress and signed into law.

The president of the Society of Broadcast Engineers is Vinny Lopez. He is encouraging SBE members to write senators and representatives to ask them to support S.611 and H.R.2102. Radio amateurs who want to see more technical expertise returned to the FCC might want to read these two measures and comment on them as well. (RW)

ENFORCEMENT: FCC FINES LOS ANGELES MAN $24,000 FOR UNLICENSED OPERATION

The FCC has come down hard on a Los Angeles area man that the agency alleges to have tried to run a shopping center off of its assigned land mobile channels. We have more in this report:

--

Back in March of 2009 the FCC was asked by The Oaks shopping Center in the Los Angeles suburb of Thousand Oaks to investigate what appeared to be interference on the radio frequencies used by the mall's security officers. By March 5th, agents from the FCC's Long Beach office had T-hunted the source of the interference to an unlicensed and unauthorized repeater transmitter in a secured radio communications facility on Oat Mountain. Oat Mountain is a popular radio site at

about 3000' above surrounding terrain located in the Santa Susana Mountains North-West of Los Angeles. At that time the agent observed pulsating signals on 461.375 MHz and 466.375 MHz emanating from the repeater transmitter and also observed a beam antenna pointed in the direction of the shopping center.

On March 6, 2009, in an effort to locate the point of origin of the transmission from the, the agent again monitored 461.375 MHz and 466.375 MHz in the vicinity of The Oaks and observed pulsating signals that interfered with the normal transmissions on those frequencies.

Later that day, in consultation with personnel from The Oaks and the Ventura County Sheriff's Department, the Los Angeles agent used direction-finding to locate the source of the transmissions. This, while personnel from The Oaks spoke to the as yet unidentified subject on 464.7125 MHz and 462.8375 MHz.

During the time The Oaks personnel engaged in radio communications with the subject, he acknowledged he was intentionally interfering with the shopping centers ability to communicate in order to render its repeater unusable and to force The Oaks off of its licensed channels. Specifically, the subject told The Oaks personnel that they had "plenty of warning."

All this time the FCC had been busy T-hunting the signal and at approximately 7:30 p.m. the Los Angeles agent located the transmitter originating the voice transmissions to a vehicle parked at a National Park Service parking structure across the street from the shopping center. The Ventura County Sheriff's Department then secured the area and identified the subject as Kevin Bondy.

The Los Angeles agent identified himself to Bondy and explained that a refusal to allow an inspection could result in a fine. Then the agent asked Bondy if he could perform an inspection of all radios in his vehicle. Initially Bondy refused to allow an inspection, then a few minutes later, agreed to allow an inspection, then refused again after the Los Angeles agent began. Bondy's refusal was witnessed by Ventura County Sheriff's Department deputies.

About three months later on May 14, 2009, the Los Angeles Office issued a Notice of Apparent Liability for Forfeiture to Bondy in the amount of $24,000. After being granted an extension by the Los Angeles Office, Bondy filed a response on August 21, 2009, arguing that he did not commit the violations, that he did not refuse to allow the inspection, and that he lacks the ability to pay the proposed forfeiture amount.

Now, in its In its June 6th notice, the FCC said that in deciding to affirm the $24,000 fine, the agency notes that it is responsible for making and enforcing regulations to prevent interference and to maintain control over the use of the radio spectrum in a manner that promotes the public interest and convenience. It says that Bondy's actions cut at the heart of the Commission's responsibilities to

protect the nation's airwaves and regulate use of the spectrum. As such, whether he can afford to pay it or not he can afford it, the $24,000 fine remains adding that the ability to pay a forfeiture is just one of the criteria the agency must consider when determining the appropriate forfeiture penalty for violations of the Communications Act and the FCC's own Rules. It then gave Bondy until July 6th to pay the amount in full.

For the Amateur Radio Newsline, I'm Bill Pasternak, WA6ITF, in the newsroom in Los Angeles.

--
Bondy was ordered to pay in full the $25,000 fine within 30 days of the release date of its notice. If he fails to do so, the FCC says it can refer the case to the Department of Justice for collection. (FCC)

**

ENFORCEMENT: ANOTHER UNLICENSED BROADCASTER FEELS THE FCC $20000 NAL STING

The proposed fines to unlicensed broadcasters just keep on coming. This with word that the FCC is pursuing a $20,000 Notice of Apparent Liability for Forfeiture that it has issued against Recardo Millwood for his alleged operation of an unlicensed radio transmitter on 88.9 MHz in The Bronx, New York.

According to its May 12th release, back on five occasions in late 2010, agents from the Enforcement Bureau's New York Office responded to a complaint regarding an apparent unlicensed broadcast station operating in the New York City borough of Bronx. In each instance they determined that the source of the transmissions was a radio station operating with a transmitter located in the building on White Plains Road and an antenna located on the roof of an adjacent building. A person who identified himself as Recardo Millwood stated that he was the owner and operator of the radio station that identified itself as Sela Radio.

During station inspections the agents verbally warned Millwood about the penalties for operation of an unlicensed radio station. These verbal warnings were followed up by written correspondence to Millwood but the FCC says the illegal transmissions continued.

Now it has acted by issuing Millwood the $20,000 Notice of Apparent Liability for Forfeiture. This based on fact it had warned Millwood to cease transmissions on more than one occasion.

Millwood was given the customary 30 days to pay the proposed fine or to file an appeal. (FCC)

**

RADIO LAW: FCC SEEKS PUBLIC COMMENTS ON CALM ACT

The FCC is asking for public comment on the implementation of the Calm Act, which aims to regulate the volume on TV commercials to that of associated programming.

The Calm Act was enacted by Congress last December 15th. It requires that the FCC adopt regulations for television broadcasters, cable operators and other multi-channel programming distributors on or before this December 15th to limit volume excursions between programming and commercials.

The legislation stems from numerous long term viewer complaints about excessively loud television commercials. In its Notice of Proposed Rule Making or NPRM issued May 27th, the FCC notes that commercial audio levels have been a leading source of criticism reported to the regulatory agency since its Consumer Call Center began reporting complaints in 2002. The NPRM addresses regulatory enactment, compliance, viewer complaint procedures, enforcement and other matters concerning adoption of the Calm Act.

Comments to the Notice of Proposed Rule Making will be accepted for 30 days after its publication in the Federal Register and reply comments will be due no later than 45 days after the Federal Register publication. The new regulations will go into effect one year after they are adopted. (FCC, TV Technology)

**

RESCUE RADIO: HAM RADIO AT THE 2011 HURRICANE CONFERENCE

Amateur radio was well represented at the 2011 Hurricane Conference held at the George R. Brown Convention Center in Houston, Texas on Saturday June 4th. Members of the South East Unit headed by Emergency Coordinator, George Fletcher, AD5CQ, provided communications by shadowing key staff throughout the event. They also had a booth in the vendors section manned by Alfred Perez, N5VEV and Mike Urich, KA5CVH.

In addition to the one on one contact at the booth, ARRL literature on how to become a radio amateur along with information on Harris County ARES was available. A portable station was located at the booth for display and was also used as a net control point manned by Scott Reeve, KT5SR.

Contact information was collected from approximately 200 people who indicated that they were interested in learning more about ham radio. As a follow-up, each one will be contacted and directed to the closest area club that provides classes and testing sessions. This information will also be distributed to those clubs for follow-up.

Pictures of the event are on the Harris County ARES web-site. It's in cyberspace at the shortcut link of tinyurl.com/3h5caeh (KA5CVH)

**

HAM RADIO POLITICS: AMSAT NA BOD NOMINATIONS DUE JUNE 15

The deadline for submission of nominations to serve on the AMSAT North America Board of Directors is Wednesday, June 15th. If you wish to serve, or you know someone you think should serve please nominate that person. Details are on line at www.amsat.org. (WA4SCA)

**

NAMES IN THE NEWS: GET WELL WISHES TO SOUTHGATE NEWS RICHARD BRUNTON G4TUT

A shout-out of get well wishes to our friend Richard Brunton, G4TUT, who operates the Southgate Amateur Radio Club news source website in the United Kingdom. For several days last week the Southgate clubs news log was not being updated. On Saturday, June 4th, Richard posted that he had been taken to the hospital on Tuesday, May 31st and was not released until last Saturday afternoon.

Since its inception, what's become known as the Southgate News has become the ham rtadio equivalent of a wire service to the world of amateur radio. As such is a truly valuable resource to all those who report the news of the hobby. Richard is its heart and soul and we wish him all the best in recovering from whatever ailment he had. (ARNewsline(tm), Southgate)

**

NAMES IN THE NEWS: K7BV SAYS HE'S NOW CANCER FREE

And some good news that many have been waiting to hear. Dennis Motschenbacher K7BV, who is the Executive Vice President of Amateur Radio Sales for Vertex-Standard says that he is now cancer free.

One of the most respected people in any aspect of the hobby, in August 2010, Dennis was diagnosed with throat cancer that had spread to lymph nodes on the right side of his neck. Since then, he has been going through very aggressive therapy to rid himself of the disease. And as his day to day health would allow, he chronicled his almost year long experience in an on-line blog simply titled Dennis K7BV Cancer: Uncensored. And in his May 26th entry he announced that he was officially cancer free and that: "life is good."

The only word that can be used to describe Dennis story of his battle to overcome the disease is inspirational. His blog is well worth reading by anyone, but especially by those who have been diagnosed with any life altering illness. If that's you, or if you know someone like that, send them to http://k7bvcancer.blogspot.com.

In the meantime, we know that you join us in saying, K7BV -welcome back. You were truly missed. (K7BV Blog)

PUBLIC RELATIONS: A GREAT LESSON IN HAM RADIO PUBLIC RELATIONS

One of the best ever public relations spots ever done was aired recently on KCTV channel 5 in Kansas City. It featured only a reporter, two hams and an H-T, but is an excellent example of how an interview should take place.

The interviewees were Hamclass.org instructors, Brian Short, KC0BS and Matt May, KC4WCG. The HT was a Yaesu VX-7R, but it was the comments made by Short and May that made this such an outstanding bit of morning television:

--

KC0BS: ""Actually, there are a lot of ways that people can get involved in a response, but all of them require some expertise. You need to bring something to the party, so as to speak. There's are great opportunities through the Red Cross, the Salvation Army and another great example of that is amateur radio."

--

If you are a ham involved in publicizing the hobby, or just want to see how to do an interview correctly, then this is must watch television. Its now up on YouTube.com. You can reach it by taking the shortcut link of tinyurl.com/42ntagq (Various sources. Audio courtesy of YouTube)

**

STRANGE BUT TRUE: BIRDS ATTACK TV STATION PERSONNEL

And heres one from the strange but true file. Looking a bit like the Alfred Hitchcock movie thriller "The Birds," staffers at Atlanta's WXIA television have been dodging an aggressive flock of Brown Thrashers near its studios. The birds appear to have taken up residence atop a driveway light pole and regularly swoop down to attack passers by. Video of these airborne assaults on the WXIA staff can be seen on-line at tinyurl.com/3qmxk4b (Broadcasting)

**

EMERGING TECHNOLOGY: LASER AND FIBER OPTICS SET NET DATA SPEED RECORD

Researchers have set a new record for the rate of data transfer using a single laser. The speed reached is 26 terabits per second.

The trick was to use what is known as a "fast Fourier transform" to unpick more than 300 separate colors of light in a laser beam. Each is then encoded with its own string of information.

The technique is described in the journal Nature Photonics. The report says that at those speeds, the entire Library of Congress collections could be sent down an optical fiber in about 10 seconds. (Science OnLine)

**

ON THE AIR: UK MANOR HOUSE OXBURGH HALL

On the air, news that the United Kingdom's Bittern DX Group will be activating Oxburgh Hall in Norfolk as GB2OH from June 16th to the 19th. Oxburgh Hall is a historic site that was built in 1482 by the Bedingfield family, whose descendants still live in parts of the estate but the property now maintained by the National Trust.

Sir Edmund Bedingfeld was granted a license to construct the manor by Edward IV. Bedingfeld built this medieval, moated home as a glorious status symbol, romantically adorned in the nature of a castle. More information regarding Oxburgh Hall can be found at the Bittern DX website or www.cashota.co.uk (RSGB)

**

DX

In DX, word that South Korean operators HL5FUA and 6K2GCW will be operational as 3D2CJ from Rotuma sometime and not between June 17th and the 24th as first announced. ctivity will be on 80 through 6 meters using CW, SSB and the digital modes. QSL via HL5FUA, direct or by the Bureau.

Another postponed operation is that of K9EL who was expected to be active from French Saint Martin this past week. At the last moment he informed the Ohio Penn DX Newsletter that it been postponed due to medical reasons. Specifically, John told the newsletter that he had developed chest pains and underwent surgery to install three stents in arteries around his heart. He added that he is unable to travel to French Saint Martin at this time, but that he will advise if he is able to re-schedule the trip for later in the month. In the meantime, we wish John a very speedy recovery.

VK4FW and VK4AN are expected to be active from Fiji as 3D2T and 3D2A between October 24th and November 9th. No details of their bands or modes have yet been provided. It was mentioned that they will participate in the CQ World Wide DX SSB Contest on October 29th and 30th. QSL 3D2T via VK4FW and 3D2A via VK4AN.

JI3QBQ will be operational portable AH0 from Saipan in the Northern Mariana Islands from between June 11th and the 14th. Activity will be on the High Frequency bands. QSL via JI3QBQ.

Lastly, keep an ear open for special event station TM6JUN to be active until June 15th. This operation is to commemorate "D-Day" which was June 6, 1944 on the beachhead at Normandy, France. Operations are on 160 through 6 meters using CW, SSB, RTTY and PSK. QSL via F5SAZ, either direct or via the bureau.

(Above from various DX News Sources)

**

THAT FINAL ITEM: TECHNOLOGY AND THE ARTS - FUTURE DANCE

And finally this week, something a bit different in the meaning of the word "communications." Its out of the performing arts meets modern technology file and involves a performer and a choreographer of Dance Theater living in New York. Her name is Ashley A. Friend and she recently teamed up with another choreographer named Michael Freeman to produce a rather amazing video and live performance titled Future Dance. What makes Future Dance different is through the use of modern digital technology Ashley appears to be completely disassembling and reassembling herself as she performs:

--

Ashley Friend: "I was doing some modern ballet movements and then the video was sort of spliced into sections to make it (the sections) go slower or faster all the way from the feet to the tip of the finger so that the feet would move and the rest of it would be very disjointed. The rest of the body would stay (in position) and then the knees would move and then the hand would move and it would start moving in more and more of a circular pattern."

--

No, Ashley does not really go to pieces. Rather it's all the proverbial smoke and mirrors in the form of some amazing and very modern digital techniques in the hands of a video production artist known as Peyton:

Future Dance was performed on Saturday, April 30th at the Gaga Arts Center in Garnerville, New York. You can it on-line at tinyurl.com/futuredance. More of Ashley's work can by seen on YouTube by searching for Ashley A. Friend. Her own website is www.dancecore.org.

Also, you can hear our complete interview with Ashley on this weeks RAIN Report. Its on-line right now at www.therainreport.com.

As we said at the beginning of this story, combining the performing arts with modern digital technology is yet another way for mankind to communicate. (ARNewsline(tm))

**

NEWSCAST CLOSE

With thanks to Alan Labs, AMSAT, the ARRL, the CGC Communicator, CQ Magazine, the FCC, the Ohio Penn DX Bulletin, Radio Netherlands, Rain, the RSGB, the Southgate News and Australia's W-I-A News, that's all from the Amateur Radio Newsline(tm). Our e-mail address is newsline@arnewsline.org. More information is available at Amateur Radio Newsline's(tm) only official website located at www.arnewsline.org. You can also write to us or support us at Amateur Radio Newsline(tm), 28197 Robin Avenue, Santa Clarita California, 91350

And a reminder that the nominating period for the year 2011 Amateur Radio Newsline Young Ham of the Year Award is now open. Created by Newsline back in 1986, this award is offered to recognize one young United States or Canadian radio amateur age 18 or younger for his or her contributions to society through Amateur Radio.

As in years past, the 2011 recipient will receive an expense paid trip to the Huntsville Hamfest in Huntsville Alabama courtesy of Vertex-Standard Corporation which produces Yaesu brand amateur radio gear. Vertex-Standard will also present this years winner with a special ham radio related gift. CQ Magazine will again treat the recipient to a week at Spacecamp-Huntsville. We at Amateur Radio Newsline will present the winner with a plaque honoring his or her achievements.

All nominations and materials required by the official rules must be received by ARNewsline before June 30, 2011. A downloadable nominating form is at our website at www.arnewsline.org. A nominating form can also be obtained by sending a request along with a self addressed stamped envelope to the Young Ham of the Year Award in care of Amateur Radio Newsline, Inc. 28197 Robin Avenue, Santa Clarita California 91350.

Again, the cutoff date for these years Young Ham of the Year Award nominations is June 30th. We ask you to do your part by nominating a young ham who has done something special related to ham radio. The nomination form is at www.arnewsline.org.

For now, with Bill Pasternak, WA6ITF, at the editors desk, I'm Don Wilbanks, AE5DW, saying 73 and we thank you for listening.

1246. WHAT IS ISLAM? ??????????

Newsgroup: rec.radio.amateur.policy
Date: 2011-06-14 03:15:44 UTC
From: cv <cv33cv33cv33@gmail.com>
Message-ID: <65e60fa9-6347-4de5-bccb-6715e9ea31d5@s9g2000yqm.googlegroups.com>
Source record: 245667

WHAT IS ISLAM?

Can we find an explanation of the great universe? Is there any convincing interpretation of the secret of existence? We realize that no family can function properly without a responsible head, that no city can prosperously exist without sound administration, and that no state can survive without a leader of some kind. We also realize that nothing comes into being on its own. Moreover, we observe that the universe exists and functions in the most orderly manner, and that it has survived for hundreds of thousand of years. Can we then say that all this is accidental and haphazard? Can we attribute the existence of man and the whole world to mere chance.
Man represents only a very small portion of the great universe. And if he can make plans and appreciate the merits of planning, then his own existence and the survival of the universe must also be a planned policy. This means that there is an extraordinary power to bring things into being and keep them moving in order.
In the world then must be a great force in action to keep everything in order. In the beautiful nature there must be a Great creator who creates the most charming pieces of art produces every thing for a special purpose in life. The deeply enlightened people recognize this creator and call him Allah "God". He is not a man because no man can create or make another man. He is not an animal, nor he is a plant. He is neither an Idol nor is He a statue of any kind because non of these things can make itself or create anything else. He is different from all these things because he is the maker and keeper of them all. The maker of anything must be different from and greater than things which he makes.
There are various ways to know God "ALLAH'' and there are many things to tell about him. The great wonders and impressive marvels of the world are like open books in which we can read about God. Besides, God Himself comes to our aid through the many Messengers and revelations He has sent down to man. These Messengers and revelations tell us everything we need to know about God.
The complete acceptance of the teachings and guidance of God 'Allah' as revealed to His Messengers Muhammad is the religion of Islam. Islam enjoins faith in the oneness and sovereignty of Allah, which makes man aware of meaningfulness of the Universe and of his place in it. This belief frees him from all fears and superstitions by making him conscious of the presence of the Almighty Allah and of man's obligations towards Him. This faith must be expressed and tested in actions, faith alone is not enough. Belief in one God requires that we look upon all humanity as one family under the universal Omnipotence of God the Creator and Nourisher of all. Islam rejects the idea of

chosen people, making belief in God and good actions the only way to heaven. Thus, a direct relationship in established with God, without any intercessor.
Islam is not a new religion. It is, in essence, the same message and guidance which Allah revealed to all Prophets. Adam, Noah, Abraham, Ismael, David, Moses and Jesus (PBUT). But the message which was revealed to Prophet Mohammed (PBUT) is Islam in its comprehensive, complete and final form.
The Quran is the last revealed word of Allah and the basic source of Islamic teachings and laws. The Quran deals with the basis of creeds, morality, history of humanity, worship, knowledge, wisdom, God-man relationship, and human relationship in all aspects. Comprehensive teaching on which, can be built sound systems of social justice, economics, politics, legislation, jurisprudence, law and international relations, are important contents of the Quran. Hadith, the teachings, sayings and actions of Prophet Mohammed (PBUT), meticulously reported and collected by his devoted companions. Explained and elaborated the Quranic verses.
THE FUNDAMENTAL ARTICLES OF FAITH IN ISLAM
The true faithful Muslim believes in the following Principal articles of faith:-
1. He believes in One God 'Allah', Supreme and Eternal, Infinite and Mighty, Merciful and Compassionate, Creator and Provider.
2. He believes in all Messengers of God without any discrimination among them. Every known nation had a warner or Messenger from God. They were chosen by God to teach mankind and deliver His divine message. The Quran mentions the name of twenty five of them. Among them Mohammad stands as the last Messenger and the crowning glory of the foundation of Prophethood.
3. Muslin believes in all scriptures and revelations of God. They were the guiding light which the Messengers received to show their respected peoples the Right Path of God. In the Quran a special reference is made to the books of Abraham, Moses, David and Jesus. But long before the revelations has been lost or corrupted. The only authentic and complete book of God in existence in the Quran.
4. The true Muslim believes in the Angels of Allah. They are purely spiritual and splendid beings whose nature requires no0061 Z food, drink or sleep. They spend their days and nights in the worship of God.
5. Muslim believes in the last Day of Judgement. This world will come to an end someday, and the dead will rise to stand for their final and fair trial. People with good records will be generously, rewarded and warmly welcomed to the Heaven of Allah, and those with bad records will be punished and cast into Hell.
6. Muslim believes in the timeless knowledge of God and His power to plan and execute His planes and nothing could happen in His Kingdom against His will. His knowledge and power are in action at all times and command over His creation. He is wise and merciful, and whatever He does must have a meaningful purpose. If this is established in our mind and hearts, we should accept with good faith all that He does,

although we may fail to under stand it fully, or think it is bad.
THE FIVE PILLARS OF ISLAM
Faith without actions arid practice is a dead end, as far as Islam is concerned. Faith by nature is very sensitive and can be most effective. When it is not out of practice or out of use, it quickly loses its liveliness and motivation power.
There are five pillars of Islam:
1 - The declaration of faith: To bear witness that there is none worthy of worship except Allah, and that Mohammad (PBUH) is His Messenger to all human beings till the Day of Judgment. The Prophethood of Mohammad obliges the Muslims to follow, His exemplary life as a model.
2 - Prayers: Daily, prayers are offered five times a day as a duty towards Allah. They strengthen and enliven the belief in Allah and inspire man to a higher morality. They purity the heart and prevent temptation towards wrong - doings and evil.
3 - Fasting the month of Ramadan. The Muslims during the month of Ramadan not only abstain from food, drink and sexual intercourse from dawn to sunset but also sincerity and devotion. It develops a sound social conscience, patience, unselfishness and will - Power.
4 - Zakkah: The literal and simple meaning of Zakkah is charity. The technical meaning of this word designates the annual amount in kind or coin which a Muslim with means must distribute among the rightful beneficiaries. But the religious and spiritual significance of Zakkah is much deeper and more lively. So it has humanitarian and sociopolitical values.
5 - Hajj (Pilgrimage to Makkah): It is to be performed once in a lifetime, if one can afford it financially and physically.

==> +: THE 2011 ARRL NATIONAL CONVENTION VENTURES DEEP IN THE HEART OF
TEXAS

The ARRL National Convention -- held in conjunction with Ham-Com in
Plano, Texas June 10-11 -- featured the ARRL EXPO, a large exhibition
area within the main exhibit hall. The ARRL EXPO featured a project
building activity and the ARRL Youth Lounge, while booths highlighting
various ARRL departments and programs such as Education & Technology,
Emergency Communications, Radiosport, ARRL VEC, ARRL Equipment and Club
Liability Insurance Programs, Regulatory and Legislative Programs, ARRL
Development and the ARRL Foundation were on hand. The exhibit area was
anchored on one side by a huge ARRL store where attendees could browse
```

and buy the latest ARRL publications, join or renew their League membership. ARRL EXPO was supported by a team of 73 ARRL volunteers, officials and staff. Read more here <http://www.arrl.org/news/the-arrl-national-convention-ventures-deep-in-the-heart-of-texas>.

==> + 2011 DAYTON HAMVENTION: CHECK OUT THE NEW PRODUCTS THAT DEBUTED AT DAYTON

One of the most exciting things at the Dayton Hamvention each year is the introduction of new products. This year was no exception. From HF transceivers to receivers to test equipment to station equipment, there was a plethora of new products just about everywhere you turned. Read more here <http://www.arrl.org/news/new-products-at-dayton-2011>.

==> + NEW ONLINE INTRODUCTORY EMERGENCY COMMUNICATIONS CLASS NOW AVAILABLE

Registration is now open for the new online Introduction to Emergency Communications course (EC-001). Course information, including a description, pre-requisites and instructions on how to register are available on the ARRL website. Slots are still available for the section which begins Friday, July 29; the registration deadline is Sunday, July 17. ARRL Education Services Manager Debra Johnson, K1DMJ, explained that she is also looking for qualified volunteers to provide support as Mentors for the course, as well as Field Instructors who want to lead classroom sessions to instruct the course material.

The new Introduction to Emergency Communications course includes updated content from the previous Basic Emergency Communications Level 1 course, as well as some content previously included in the former Level 2 course. The EmComm training program has been restructured to offer two courses: This enhanced basic course for EmComm volunteers who want to serve as part of an ARES® response team and the management course -- Public Service and Emergency Communication Management for Radio Amateurs (EC-016) -- for those who are serving in ARES® leadership and management roles. Read more here <http://www.arrl.org/news/new-online-introductory-emergency-communications-course-now-available>.

==> + ARRL FIELD DAY: IT'S NOT TOO LATE TO PREPARE FOR FIELD DAY

Now is the time to start getting information out to the public about your ARRL Field Day <http://www.arrl.org/fieldday> activities. ARRL Field Day -- the largest on-the-air operating event -- is the one of the best opportunities of the year for showing our Amateur Radio capabilities to the public. ARRL Media and Public Information Manager Allen Pitts, W1AGP, notes that the ARRL has made many media materials available for local use. "Our visibility to the public is important in antenna, band preservation and texting issues, so we encourage you to use this opportunity to showcase what Amateur Radio can do," he said. Download an audio PSA that can air on your local radio stations here

<http://www.arrl.org/public-service-announcements>. Get a press release, a government proclamation template and invitation letters that you can use to invite your local officials to your Field Day site here <http://www.arrl.org/files/file/Field-Day/2011/2011_FD_PR_info.pdf>. Find high-definition video files suitable for airing on your local television stations here <http://p1k.arrl.org/pub/pr/>. Get more information on ARRL Field Day, including the 2011 ARRL Field Day logo and operating tips here. More info, the logo and tips are here <http://www.arrl.org/current-contact-issue>. Find a Field Day station near you here <http://www.arrl.org/field-day-locator>. ARRL Field Day is June 25-26.

==> + EMCOMM NEWS: ARRL'S EMERGENCY COMMUNICATIONS ADVISORY COMMITTEE MOVES FORWARD WITH MDEC PLANS

At the 2007 Annual Meeting of the ARRL Board of Directors, the ARRL National Emergency Response Planning Committee -- led by then-ARRL First Vice President Kay Craigie, N3KN -- presented a report to the Board that outlined how the League should respond to emergencies. One of the key concepts proposed by the committee was the Major Disaster Emergency Coordinator (MDEC) appointment. The idea was to have a manager who would coordinate Amateur Radio operations, operators and resources in supporting served agencies during a major disaster relief operation when Section and Regional ARES® assets are overwhelmed, similar to operations performed in the Hurricane Katrina response. The MDEC's line of authority would be derived from the ARRL's Emergency Preparedness Manager -- currently Mike Corey, W5MPC -- and would parallel the affected area's Section Managers. The MDEC position was envisioned to be a continuous appointment, but would only be active when called upon by the Emergency Preparedness Manager.

The ARRL Emergency Communications Advisory Committee (ECAC) -- established at the 2010 Annual Meeting -- is currently drafting appointment protocols and requirements for the MDEC. As presently conceived by the committee, there will be several MDECs geographically arranged by each ARRL Division. The geography, and hence the actual MDEC headcount, is being determined at this time. The committee will report its recommendations and draft appointment guidelines to the ARRL's Programs and Services Committee. Read more here <http://www.arrl.org/news/arrl-s-emergency-communications-advisory-committee-moves-forward-with-mdec-plans>.

==> + ARRL HQ NEWS: LONGTIME HQ STAFFER JON BLOOM, KE3Z, LEAVES ARRL

May 31 marked the last day at ARRL HQ for ARRL Information Technology Manager Jon Bloom, KE3Z. Bloom -- an ARRL Life Member who had been with the League for 27 years -- resigned from the League to pursue other opportunities. Michael Keane, K1MK -- hired in 2009 as a programmer in the IT Department -- has been selected as the new Information Technology Manager. Read more here <http://www.arrl.org/news/longtime-hq-staffer-jon-bloom-ke3z-leaves-arrl>.

==> SUPPORT ARRL: ARRL AND COMBINED FEDERAL CAMPAIGN MARK DECADE OF PARTNERSHIP

For the past 10 years, the US Office of Personnel Management has designated the ARRL to participate in the Combined Federal Campaign (CFC <http://www.opm.gov/cfc/>). In that time, this campaign for federal government civilian employees, US Postal Service workers and members of the military has generated more than $170,000 for ARRL programs since it first became an option for giving by federal employees to the League. The CFC provides an easy way to support ARRL's effort to represent its members and all radio amateurs.

Similar to the United Way, the CFC encourages individuals to pledge by payroll deduction to non-profit organizations of their choice. The ARRL encourages eligible radio amateurs to consider the League when designating campaign recipients. Payroll deduction through the CFC is an easy way for participants to support ARRL over and above their annual membership. Such contributions support programs that are not funded by member dues, enriching ARRL's ability to serve its members and all of Amateur Radio. Those wishing to select the ARRL to receive all or part of their payroll deductions should designate organization 10099 when completing their CFC donor forms. Donations to ARRL can be designated for Diamond Club contributions, the ARRL Spectrum Defense Fund or the ARRL Education & Technology Program. Donors may also make unrestricted contributions to the League.

One important note: Since the CFC does not provide the ARRL with the names of individual donors, the ARRL Development Office would appreciate a copy of the donor form to ensure that each contribution is applied according to the donor's wishes and the contribution or pledge can be properly acknowledged.

==> SOLAR UPDATE

Tad "The damp of the river fog rises after the Sun goes down <http://poetry.eserver.org/paul-revere.html>" Cook, K7RA, reports: The average daily sunspot numbers for the past week declined by more than half, nearly 52 points to 35.1, when compared to the previous week. The average daily solar flux declined nearly 12 points to 90.1. NOAA and the USAF predict rising solar flux for the near term, with solar flux at 105 on June 16-20 to 110 on June 21-22, and then dipping below 100 after June 28. Predicted solar flux for ARRL Field Day weekend is 105 on June 24-26. The predicted planetary A index for June 16-25 is 5, 7, 8, 5, 8, 8, 5, 12, 15 and 10, followed by 5 on each day through the end of June. It seems that a recurring coronal hole may disturb our Earth's geomagnetic field, with the maximum effect on June 24 -- the day before Field Day -- but geomagnetic conditions should be very quiet by Sunday, June 26. Our inbox is exploding this week with all the e-mail concerning the meeting of the Solar Physics Division of the American Astronomical Society at New Mexico State University in Las Cruces, and the report from the meeting about predictions for a major drop in solar activity, which you can read here <http://www.boulder.swri.edu/%7Edeforest/SPD-sunspot-release/>. But

support for this position isn't unanimous, and in tomorrow's bulletin we'll look at a report by astrophysicist Douglas Biesecker that is skeptical of this prediction. Look for more information on the ARRL website on Friday, June 17. For more information concerning radio propagation, visit the ARRL Technical Information Service Propagation page <http://www.arrl.org/propagation-of-rf-signals>. This week's "Tad Cookism" is brought to you by Henry Wadsworth Longfellow's Paul Revere's Ride <http://poetry.eserver.org/paul-revere.html>, in celebration of Battle of Bunker Hill <http://en.wikipedia.org/wiki/Battle_of_Bunker_Hill> (June 17, 1775).

==> + LOGBOOK OF THE WORLD NOW ON FACEBOOK!

Last week, the ARRL added a Logbook of The World page <http://www.facebook.com/LogbookOfTheWorld> to social networking site Facebook. With almost 300 fans, the page is growing every day. The LoTW page on Facebook offers the latest LoTW news, as well as comments from users. Have you checked out the ARRL Facebook page <http://www.facebook.com/ARRL.org> lately? With almost 18,000 fans, it's the most popular Amateur Radio page on Facebook!

==> NEW QUICKSTATS POLL NOW AVAILABLE ON ARRL WEBSITE

Four new poll questions have just been published on the QuickStats page <http://www.arrl.org/quickstats> on the ARRL website. Let your voice be heard!

Questions in this month's QuickStats poll:

- Do you own a D-STAR or APCO-25 transceiver?
- When it comes to QSL cards, do you buy from a printer or make your own?
- Have you ever built a kit that included Surface Mount Devices (SMDs)?
- When was the last time you used Amateur Radio to assist a non-emergency public service event (such as a footrace or parade)?

Visit the QuickStats page <http://www.arrl.org/quickstats> and be sure to bookmark it in your browser. Results from this QuickStats poll will be published in the September 2011 issue of QST on the QuickStats page, located in the rear advertising section of the magazine. Along with monthly poll results, QST QuickStats offers colorful charts and graphs that highlight interesting Amateur Radio statistics.

==> THIS WEEK ON THE RADIO

This week:

- June 17 -- NCCC Sprint Ladder
- June 18 -- Feld Hell Sprint; AGCW VHF/UHF Contest
- June 18-19 -- West Virginia QSO Party; Stew Perry Topband Challenge; All Asian DX Contest (CW); SMIRK Contest
- June 19 -- WAB 50 MHz Phone Contest
- June 20 -- Run for the Bacon QRP Contest

- June 22 -- SKCC Sprint; NAQCC Straight Key/Bug Sprint
- June 22-23 -- CWops Mini-CWT Test

Next week:

- June 24 -- NCCC Sprint Ladder
- June 25 -- VK/Trans-Tasman 160 Meter Contest (Phone)
- June 25-26 -- ARRL Field Day <http://www.arrl.org/fieldday>;
Ukrainian DX DIGI Contest; His Majesty King of Spain Contest (SSB);
Marconi Memorial HF Contest; ARCI Milliwatt Field Day

All dates, unless otherwise stated, are UTC. See the ARRL Contest
Branch page <http://www.arrl.org/contests>, the ARRL Contest Update
<http://www.arrl.org/The-ARRL-Contest-Update> and the WA7BNM Contest
Calendar <http://www.hornucopia.com/contestcal/index.html> for more
information. Looking for a Special Event station? Be sure to check out
the ARRL Special Event Stations Web page
<http://www.arrl.org/special-event-stations>.

==> UPCOMING ARRL SECTION, STATE AND DIVISION CONVENTIONS AND EVENTS

- July 2 -- ARRL Eastern Pennsylvania Section Convention
<http://www.arrl.org/hamfests/eastern-pennsylvania-section-convention-firecra
cker-hamfest-1>,
Marysville, Pennsylvania
- July 15-17 -- ARRL Montana State Convention

Amateur Radio Newsline(tm) Report 1766 - June 17 2011

Amateur Radio Newsline report number 1766 with a release date of
Friday, June 17, 2011 to follow in 5-4-3-2-1.

The following is a Q-S-T. Scientists say that we may be headed to a
prolonged low in solar activity, hams in Norway provide flood relief
communications, the first ever national E-A-S test to be held in
November, a New Orleans C-B operator faces a $15,000 fine and the FCC
gets a Harvard scholar. Find out the details are on Amateur Radio
Newsline(tm) report number 1766 coming your way right now.

PROPAGATION: SCIENTISTS SAY SOLAR CYCLE HEADED INTO LIMBO

For years, astronomers and space scientists have been predicting the
Sun would move into solar maximum by around 2012. During this period
there would be many intense flares and lots of sunspot activity. Now
they are thinking that the opposite may be happening and Amateur Radio
Newsline's Michael Grebert, KJ4ZZV, has the details:

--

According to three studies released in the United States on Tuesday,
June 14th, experts believe the familiar sunspot cycle may be shutting
down and heading toward a pattern of inactivity unseen since the 17th
century.

According to experts from the National Solar Observatory and Air Force
Research Laboratory, the signs of this include a missing jet stream,
quickly fading spots, and slower activity near the poles.

Frank Hill is the Associate Director of the National Solar Observatory
's Solar Synoptic Network. At a meeting of the American Astronomical
Society's Solar Physics Division in Las Cruces, New Mexico Hill said
that the fact that three completely different views of the Sun point in
the same direction is a powerful indicator that the sunspot cycle may
be going into hibernation.

As every ham knows, solar activity tends to rise and fall in 11 year
cycles. The solar maximum and solar minimum each mark about half the
interval of the magnetic pole reversal on the Sun, which happens every
22 years.

According to Hill, the current cycle, number 24, may be the last normal one for some time but the next one, cycle 25, may not happen for some time. He adds that this is important because the solar cycle causes space weather which affects modern technology and may contribute to climate change.

For the Amateur Radio Newsline, I'm Michael Grebert, KJ4ZZV, reporting from Music City, Nashville, Tennessee.

--

Experts are now probing whether this period of inactivity could be a second Maunder Minimum. This was a 70-year period from 1645 to 1715 when hardly any sunspots were observed. For ham radio such a prolonged solar minimum would mean very little in the way of High Frequency DX for a very long time. The complete article titled Scientists Predict Rare Hibernation of Sunspots can be found using the shortcut of tinyurl.com/slowsun (Space.com, Yahoo News, others)

RESCUE RADIO: NORWEGIAN HAMS PROVIDE FLOOD COMMUNICATIONS

Norway's national amateur radio society, the NRRL, reports that radio amateurs have been providing communications assistance following recent flooding in that nation.

The NRRL says that as a result of the flooding and landslides in Oppland and Hedmark, the telecoms company Telenor has had substantial problems with its mobile phone network. Because of the outages the Main Rescue Coordination Centre for Southern Norway has requested assistance from NRRL.

Communications were set up between southern Norway and Lillehammer. Repeaters around Oslo have also been used. More about the situation in Google translated English is on the web at tinyurl.com/NorwayNRRL. (Southgate)

RESCUE RADIO: GAREC 2011 REGISTRATION CLOSES JUNE 19th

The organizers of the International Amateur Radio Union Region 1 General Conference have announced that registrations for the 2011 Global Amateur Radio Emergency Conference in Sun City, South Africa must close on June 19th. This, if accommodations are to be guaranteed.

Planners say that payment for accommodations and conference fees must arrive to them no later than June 30th. They ask that those registering to attend to please ensure that your callsign, association and name are in the payment documents sent by your bank.

More information about the event and registration documents are available at tinyurl.com/garec2011. Information from earlier conferences is available at www (dot) iaru (dot) org/emergency. (GAREC)

RESCUE RADIO: FIRST EVER NATIONWIDE TEST OF THE EMERGENCY ALERT SYSTEM WILL OCCUR ON NOVEMBER 9, 2011 AT 2 PM EST

Back in the United States, the FCC has set November 9th at 2 PM Eastern Standard Time that the first nationwide test of the Emergency Activation or EAS System. The purpose of the test is to assess the reliability and effectiveness of the EAS as a mechanism to alert the public of emergencies.

Although EAS Participants currently take part in state-level monthly tests and local-level weekly tests, there has never been a nationwide test of the system. The Commission, along with the Federal Emergency Management Agency, will use the results of this test to assess what works within the EAS and what does not. Then working together with EAS stakeholders the two agencies say that they will make improvements to the system as appropriate. (FCC)

RADIO HEALTH FOLLOW-UP: CTIA SAYS WHO CELLPHONE CANCER STUDY FLAWED

The Cellular Telecommunications and Internet Association, better known as the CTIA has ripped into a recent United Nations' report that claims cellphones can cause cancer.

As reported here on Amateur Radio Newsline two weeks ago, a United Nations agency known as the World Health Organization issued a report stating that radiation from cellular telephones can possibly cause cancer. It said that based on the U.N.'s International Agency for Research on Cancer working group, and in reviewing peer-reviewed studies, that it found some evidence of an increase in Glioma and acoustic Neuroma brain cancers among mobile phone users. As such, the agency now lists mobile phone as a carcinogenic hazard.

Now the CTIA has issued a broad based rebuttal that begins by quoting previous studies by the Federal Communications Commission that concluded there is no scientific evidence that proves that wireless phone usage can lead to any form of cancer. The cellular lobby group also quoted the Food and Drug Administration as stating that the weight of scientific evidence has not linked cellular phones with any health problems.

In its rebuttal barrage, the Cellular Telecommunications and Internet Association also pointed out that the World Health Organization made no effort to conduct its own scientific study of cellular telephone use. Instead, it only reviewed previous studies made by other investigators over the years in reaching its conclusion.

Before its announcement on Tuesday, May 31st the World Health Organization had assured consumers that no adverse health effects from cellular telephones had been established. Now the WHO and the CTIA are on opposite sides of a public relations battle over the still unknown

effects of cellular telephone radiation effects on the human body. A battle that is bound to intensify in coming years. (Published news reports)

ENFORCEMENT: NEW ORLEANS CB'ER ISSUSED $15,000 NOTICE OF APPARENT LIABILITY FOR OVER POWER OPERATION

The FCC has issued a $15,000 Notice of Apparent Liability to Monetary Forfeiture against John Hays of New Orleans. This for operating an over power Class D Citizens Radio transmitter that the regulatory agency says constitutes operating a radio transmitter without the requisite Commission authorization. We have more in this report:

--

The case dates way back to November 29th 2007. In response to a complaint of interference, the Enforcement Bureau's New Orleans Office warned Mr. Hays in writing of the penalties associated with operating his CB radio with excessive power.

On December 3, 2007, Hays responded to the New Orleans Office by telephone. At that time he is said to have admitted to overpower operation, and was again warned orally to cease any operation of his CB station that violated the Rules.

Fast forward to June 3, 2010. In response to another complaint of interference, agents from the New Orleans Office traced the source of the interference to a signal on CB channel 20 emanating from Mr. Hays's residence. The same day, the agents inspected the CB station and observed a linear amplifier attached to Mr. Hays' CB transmitter. The agents, using a wattmeter, measured the output power of the CB station with the in-line linear amplifier at 750 watts. The agents then orally warned Mr. Hays that the use of linear amplifiers or any device that results in power levels greater than the authorized limit of 4 watts is prohibited and voids the authority to operate the CB station. Mr. Hays admitted to the agents that he operated his CB station overpower, and, at the conclusion of the inspection, Mr. Hays voluntarily destroyed his linear amplifier.

You would think that it would have ended there, but it didn't. This past February 10th, in response to another complaint of interference, agents from the New Orleans Office used direction-finding techniques to

again identify a signal on CB channel 20 as once again coming from Hays' residence. The same day, the agents inspected Hays CB station and observed a linear amplifier attached to Mr. Hays's CB transmitter. This time the agents measured the output power of the CB station with the in-line linear amplifier at 75 watts. And once again, Hays admitted to the agents that he was operating his CB overpower.

Now, the FCC has taken a strong punitive measure to see to it that Hays does not again violate its rules governing Part 95 Class D Citizens Radio operation. This by issuing him the a $15,000 Notice of Apparent Liability to Monetary Forfeiture for apparently and willfully violating section 301 of the Communications Act and sections 95.410 and 95.411 of the FCC's Citizens Radio Service rules. Specifically his use of an amplifier that raised the output of his transmitter to way above the 4 watts as permitted under the Part 95 Citizens Radio Service rules.

In Scottsdale, Arizona, I'm Norm Seeley, KI7UP, reporting for the Amateur Radio Newsline.

--

Hays was given the customary 30 days to pay the forfeiture or to file an appeal. (FCC)

**

ENFORCEMENT UPDATE: FLORIDA UNLICENSED BROADCASTER FINED $20000

An update on an unlicensed radio case that we first reported here on Newsline. This with word from the FCC that a $20,000 Notice of Apparent Liability issued to Marckenson Bazile for operating an unlicensed station in Miami has progressed to a forfeiture order.

The FCC originally issued the Forfeiture Order against Brazile for operating an unlicensed station on 103.9 MHz from his home. In affirming the fine, the regulatory agency said that Bazile had not responded to its correspondence on the matter. Therefore, based on the evidence it had before it, that it had affirmed the $20,000 fine and issued a forfeiture order.

Bazile was given 30 days to pay or the FCC can turn the case over to the Justice Department for collection. (FCC)

**

RADIO LAW: FCC REESTABLISHES TECHNICAL ADVISORY COUNCIL BUT HAM RADIO NOT INCLUDED

The FCC has reestablished its Technology Advisory Council for a two-year period. The council, made up of various tech experts, will help give the commission expertise it needs to identify areas of innovation and develop policies to keep America competitive.

The initial assignment for the group is to focus on the broadband rollout. Specifically how broadband communications can help deliver and contain costs for healthcare, energy and environmental conservation. Other assignments may include the evolution of broadband networks and devices and their implications, spectrum management and how to promote innovation and investment.

The council chairman is Tom Wheeler, managing director, Core Capital Partners and a former Chief Executive Officer of the Cellular Telecommunications and Internet Association. Representatives from several organizations like Google, MIT, Intel, Microsoft, Harris Broadcast are on the council. Also serving are representatives of trade associations such as the Consumer Electronics Association and the National Association of Broadcasters.

To our knowledge no individual or group directly representing the interests of amateur radio has been invited to serve on the panel. This, even though the recommendations it makes could eventually impact on the spectrum utilized by radio amateurs.

The group's next meeting is slated for June 29th. (RW)

**

EMERGING TECHNOLOGY: GPS VS LIGHTSQUARED - CHAPTER 2

The war of words between LightSquared Corportation over its proposed high power national 4 G network and those who use the Global Positioning System has escalated. This as the lobbying group known as the Coalition to Save Our GPS says that recent tests in New Mexico prove conclusively the operation of LightSquared system proved detrimental to G-P-S.

James Kirkland is Vice President of Trimble Navigation and a founding member of the coalition. He says that test data discussed several days ago makes clear that there is substantial interference to GPS if LightSquared turns on high-powered terrestrial facilities in the spectrum next door to GPS.

During a meeting sponsored by the federal government's GPS Advisory Board, Kirkland, along with government representatives and LightSquared representatives discussed the results of two separate tests conducted to measure interference to GPS receivers used in aviation and other government applications. Kirkland said the testing data confirms what the industry told the FCC and also confirms that there is no viable technical fix.

Kirkland contended that in at least one test LightSquared didn't deliver test equipment that matches its proposed operations, thus causing optimistic results. However, even those optimistic results showed interference.

Kirkland is quoted as saying that the FCC should stop trying to find a solution to an unfixable problem. Instead it should focus its efforts

on finding spectrum that LightSquared can operate in where its broadband system won't interfere with GPS.

LightSquared plans a satellite- and terrestrial-based 4G network to provide terrestrial- and satellite-based voice and data service on a wholesale basis to retailers, cable operators, and other companies that want to offer service under their own brand.

The Coalition to Save GPS is made up of companies in the aviation, agriculture, transportation, construction, engineering, and surveying industries as well as suppliers of GPS-based equipment and services. Hams who use GPS devices in both T-hunting and emergency communications also have a vested interest in the outcome of the final FCC decision on the LightSquared nationwide broadband system. (Published reports)

NAMES IN THE NEWS: HARVARD PROFESSOR JOINS FCC

The FCC now has a new distinguished scholar as a part of its staff. Harvard University law professor Jonathan Zittrain will be based in the FCC's Office of Strategic Planning and Policy Analysis and will work on issues related to modern communications networks. He succeeds Duke University law professor Stuart Benjamin, who was the commission's first Distinguished Scholar.

Professor Zittrain's research interests include issues related to digital property and content, cryptography, electronic privacy and the roles of intermediaries in the Internet's architecture. He's also a computer science professor at Harvard and a board member of the Internet Society; he is also on the board of advisors for Scientific American, a member of the Council on Foreign Relations and a forum fellow of the World Economic Forum. Previously, Zittrain was professor of internet governance and regulation at Oxford University. The professor will continue to teach at Harvard while working at the FCC. (FCC, RW)

NAMES IN THE NEWS: ZL3DWS NAMED NEW ZEALAND AMATEUR OF THE YEAR

And a hearty congratulations to David Searle ZL3DWS who has been named to receive New Zealand's Amateur of the Year Award. This in acknowledgement of the tremendous results he achieved in his Buildathon projects.

David recently moved from Christchurch to Bondi, Australia. Speaking from Australia's 2nd favorite beach, David said that he was greatly surprised, yet proud, to learn that he had become N-Z-A-R-T Amateur of the Year. He adds that his pride is in the fact that the award acknowledges the success achieved by so many Canterbury radio amateurs and beyond, with the Zed-L-3 Radio Buildathon project. (NZART)

HAM RADIO PUBLIC RELATIONS: PROMOTING ARRL FIELD DAY 2011

The ARRL has released a new press kit along with a set of two new Public Service Announcements to publicize Field Day, 2011. The press kit contains just about everything a club needs to publicize Field Day and its own operations. But it's the Public Service Announcements that will likely get the most attention if you are willing to download them, burn them to C-D's and drop off copies at your local radio stations.

What do they sound like? Heres one of them. Take a listen:

--

Actual PSA (less music track) - Please download our newscast MP3 audio file to hear it.

--

Yes that's Don Carlson, KQ6FM, whose voice you regularly here on Amateur Radio Newsline. But this week Don is in another role as spokesman for the upcoming ARRL Field Day event. To get a copy of the new Field Day promotional spots that Don has created please take your web browser to tinyurl.com/fielddaypsa and download the audio file marked Field Day 2011. The complete ARRL Field Day press kit itself is at tinyurl.com/fielddaypress. (ARRL, audio supplied by KQ6FM)

HAM RADIO IN SPACE: CORNELL UNIVERSITY SEEKS HAM RADIO ASSISTANCE IN SATURN MISSION PREPARATIONS

Ham radio has been invited to take part in the preparations for the upcoming exploration of the planet Saturn by remote satellites. This if a group of tiny Cornell University-developed satellites travel to the ringed planet sometime within the next decade.

The exploration will be done using tiny micro-sized chip satellites called Sprites. As they flutter down through Saturn's atmosphere, they will collect data about chemistry, radiation and particle impacts while transmitting as beacons with 10 milliwatts of RF power.

Tests of the Sprites is ongoing. Three prototypes of these chip satellites were mounted on the International Space Station after the space shuttle Endeavour delivered them on its final flight.

During testing of these micro sized birds, the help of radio amateurs is required. If you would like to serve as one of those trying detecting this signal from one of the Sprites, please follow up with Zac Manchester by e-mail to zrm3 (at) cornell (dot) edu. More information is on-line at tinyurl.com/3fs5ks7 and www.spacecraftresearch.com/blog (ANS)

WORLDBEAT INTRUDER WATCH: ONE NEW AND ONE GONE ON 15 METERS

The May issue of the IARU Monitoring System newsletter reports that the Australian Over-The Horizon Radar has been heard in the 15 meter amateur band. On a more positive note the same issue of the newsletter reports that the The Russian Yakhta vocoder system has disappeared from its self ascribed home on 21 dot 0015 MHz. The complete newsletter can be read on-line in PDF format tinyurl.com/may2011iarums. (IARU)

**

DX

In DX, word that the 2011 Macquarie Island VK0KEV operation has been approved for DXCC credit. If you've had this operation rejected in a recent application please send a note to dxcc (at) arrl (dot) org. You can verify the update to your record either by checking your Logbook of the World account, or, you'll see a change in the live daily listing on the DXCC web site.

On the air, keep an ear open for EF8M operating from the Canary Islands during the RSGB Islands on the Air Contest on July 30th and the 31st as a Multi-Operator, All-Band, High-Power entry. Operators mentioned are RD3A, EA8CAC and UA5C. QSL via UA3DX.

W7GJ plans to be active from Samoa on a 6 meter E-M-E DXpedition during the final week of August. His callsign will be 5W0GJ and he says that his license and airline tickets are now in hand. QSL direct to W7GJ.

Lastly, PY2FN will be operational as PY0FO from Fernando de Noronha between July 2nd to the 9th. Activity will be on 160 through 6 meters on CW only. Logs will be uploaded to Logbook of the World. QSL via his home callsign, direct or by the bureau.

(Above from various DX news sources)

WITH NEWSLINE: WILL THERE BE A 2011 YHOTY WINNER?

And finally this week, a word about the 2011 Young Ham of the Year Award. Here's our producer, Bill Pasternak, WA6ITF:

--

While we find it rather sad to report, its beginning to look as if there may not be an Amateur Radio Newsline Young Ham of the Year Award made this year. The reason is that with only two weeks until the closing date of nominations, only one has been received and there is no way to know if the judging committee will consider it as being valid.

Unlike other award programs, the Amateur Radio Newsline Young Ham of the Year Award does not carry over past years nominations. As soon as a winner is announced all other nomination forms are discarded. Every year is a new year and requires a nominator to submit a new nominating form and associated documentation.

As I record this, only 7 forms have been downloaded from our website and only one of these has been returned. By contrast, in years past, by this time we have had hundreds of downloads and dozens of completed nominating packages returned for the judging committee to peruse.

What we cannot understand is why, with there supposedly now thousands of hams age 18 or younger, only one person has seen fit to take the time to nominate someone for this years award. And just because there is only one nomination does not mean that person will be selected. This is because a candidate must meet the criteria as set forth by the committee in regard to overall service to ham radio, the community or the nation.

Yes, we know it takes time and effort to put together a good nominating package, but in the end those are energies well spent. This is because each award winner is a kind of guarantee that the next generation of hams will help the hobby to prosper and to grow.

The bottom line is that the nominating period closes at midnight on June 30th. A valid nomination consists of a completed nomination form that you can download from our webaite at www dot arnewsline dot org along with substantiating documentation for any and all claims made on the nominating form. Incomplete nominating packages or those postmarked after midnight on June 30th will not be considered for the 2011 award program.

Whether or not there is an Amateur Radio Young Ham of the Year Award for 2011 is entirely in your hands. We and our corporate underwriters provide the presentation ceremony and provide the winner his or her gifts that include a week at Spacecamp along with transportation to and from the city of Huntsville, Alabama. Giving the Young Ham of the Year Awards Committee the necessary nominations and back-up documentation is

up to you.

All nominating packages must be postmarked no later than midnight local time on June 30th 2011 and should be sent to the Young Ham of the Year Award, in care of the Amateur Radio Newsline, 28197 Robin Avenue, Saugus, California 91350.

If you really care about the future of our hobby and making sure there will be a next generation of young hams to carry on, now is the time to prove it by taking the time to nominate a worthy youngster for this years Amateur Radio Newsline Young Ham of The Year Award.

I'm Bill Pasternak, WA6ITF.

--

As we watch the mailbox, the next two weeks will definitely determine whether or not there will be a Young Ham of the Year Young Ham of the Year Award presented this year.

**

NEWSCAST CLOSE

With thanks to Alan Labs, AMSAT, the ARRL, the CGC Communicator, CQ Magazine, the FCC, the Ohio Penn DX Bulletin, Radio Netherlands, Rain, the RSGB, the Southgate News and Australia's W-I-A News, that's all from the Amateur Radio Newsline(tm). I just read that Janet Jackson is to get a ham radio license, K4TIT.

I think Mr David F Elger might have something to say about that :o)

Watts are important here. If you are talking 100 milliwatts or less, then you can transmit pretty near anywhere and at pretty near any frequency. These are the levels of garage door openers and cordless phones. They are only good for 100 yards or less. But most lawmakers can't tell a watt from a volt or an amp. They are technical minus people, or they would get a real job and actually contribute to the society instead of parasiting off of it.

Delaware didn't outlaw CB radio. It decided that CB radios fell under
the hands-free cellphone law while driving.

1319. Oregon radio law

Newsgroup: rec.radio.amateur.policy
Date: 2011-06-19 21:17:15 UTC
From: radioguy <radioguy222@yahoo.com>
Message-ID: <33560b33-928f-4b6d-9401-5df419a5d284@f2g2000yqh.googlegroups.com>

Oregon outlaws using cellphone or any other electronic device while
driving unlessit is hands
free.
The law also says you are exempted if you hold an amateur radio
license or any other vald FCC license and are using a ham
radio.
So according to Oregon law, if you hold a FCC GMRS radio license and
are using a GMRS radio, you are in violation of the law since you are
not using a ham
radio.
and iff you hold a FCC-issued GMRS license and are using a ham radio
even though you are not FCC-licensed to do so, you are completely in
compliance with the law and completely legal according to Oregonn
law.
I thought that is a violation of federal law to transmit over a ham
radio when you are not FCC-licensed to do
so.
and what do all us federally legal cbers do. the federally legal c
bers do not have a license to show to the cops or courts lthough they
are federally licensed to
transmit.
and why is this state law and other state laws overruling federal law
if federal law trumps and overrules local and state laws like most
posters in this newsgoup said they do. The FCC rules say we
may transmit from anywhere the FCC has authority over
radio.
so either the FCC fraudently lied or else the FCC told the truth and
does not have authority over radio transmissions in Oregon and
California and Maryland.

If the law is taken literally, then yes, any state that bans "hand held
devices", would include CB radios.
But I believe most cops would not enforce that aspect of the law.

But would that law include hand held units that are not attached to the
vehicle? Some cops may see those as they see cell phones.

That's an argument that would have to be settled in a court of law.
True, the FCC authorizes the use of CB radio. But states, certainly can
restrict their use in a vehicle. That does not deny the use of them by any
means. You just can't yack while driving.

BTW lawmakers, take a good close look at some expensive ham radio equipment
for mobile use. What's that? You don't see that dial pad on the radio?
Guess what dude? That hammy can make phone calls with his radio just the
same as any cell phone.

Obviously you haven't studied for an ham radio license in the US.

Part 97.115b allows a third party to use a ham radio as long as a licensed control operator supervises. An legal scenario under FCC rules would be where the driver is using the radio and the passenger is a licensed amateur.

You'd be pretty hard pressed to find an actual working auto patch anymore.
There are none in Baltimore as the misfits ruined it for everybody.

Well that's boston for ya. It's screwed up in every respect.
In cincinnati, auto patch still thrives well because of the people that run
it.
although it is probably not used as much since cell phones are in wide use.

And when a ham radio operator (who has no better ability to drive than
anyone else) goes over the cliff because he/she was distracted by operating
his ham gear while driving, at least he wilol know, in those few seconds
before he dies, that he was well within the law.

It usually isn't the misfits who ruin that stuff. Its the authorities
inability to tell the difference between misfits and normal people. "they
are quick to throw everybody into the same "misfit bag".

Garage door openers probably operate at less than 1 milliwatt and
cordless phones at a few milliwatts.
I can receive my 20 mw 434 Mhz walkie talkie several kilometres
away.

Copi8ed from the internet:

Technical properties
Some DECT properties:[citation needed]

a.. Audio codec: G.726, G.711, G.722 (wideband), G.729.1 (wideband) and MPEG-4 ER LD AAC (wideband and super-wideband)
b.. Net bit rate: 32 kbit/s
c.. Frequency: 1880 MHz-1900 MHz in Europe, 1900 MHz-1920 MHz in China,?1893 MHz-1906 MHz in Japan, 1910 MHz-1930 MHz in Latin America and 1920 MHz-1930 MHz in the US and Canada, US DECT and DECT 6 products may NOT be used in the UK as they cause and suffer interference to the UK 3G cellular networks with unlicensed use of such products being prohibited by UK agencies. As DECT and DECT 6.0 do not operate in the 2.4 GHz ISM band, they are not subject to the interference arising in this band from its use by 802.11b and 802.11g WiFi, and 2.4 GHz cordless phones.
d.. Carriers: 10 (1,728 kHz spacing) in Europe, 5 (1,728 kHz spacing) in the US
e.. Time slots: 2 x 12 (up and down stream)
f.. Channel allocation: dynamic
g.. Average transmission power: 10 mW (250 mW peak) in Europe, 4 mW (100 mW peak) in the US
I was talking about the maximum power allowed by law for such devices, and not the minimum that some cleaver manufacturers have been able to achieve. A lot depends on the frequency and the available antenna swystem.

1351. DOES ALLAH CREATE US IN VAIN? ???????????

Newsgroup: rec.radio.amateur.policy
Date: 2011-06-22 03:24:19 UTC
From: cv <cv33cv33cv33@gmail.com>
Message-ID: <80d1cbde-00c0-4c35-98ca-e52bd6655d7f@w4g2000yqm.googlegroups.com>
Source record: 245722

DOES ALLAH CREATE US IN VAIN?

The brain is aware of the existence of Allah Almighty by the use of the signs in the universe. The human brain recognizes that the Creator of the universe is Knowledgeable and Wise. Thus, it is quite impossible that He creates us in vain and without a special target. Otherwise, this fact would not be in tandem with His wisdom, Glory be to Him.

{{ "Did you think that We had created you in play (without any purpose), and that you would not be brought back to Us?" . So Exalted be Allâh, the True King, Lâ ilâha illa Huwa(none has the right to be worshipped but He), the Lord of the Supreme Throne!!}}, (Holy Qur'an 23: 115
Though, we cannot know what does the Creator want from us, How to worship Him as He really wants us to do? How to thank Him? This is why He has sent to us messengers to tell us about Himself (Allah Almighty) and the reason He has created the universe. Why he has created us? What is the life-style He has depicted for us to follow? And what He has preserved to us whether it is a reward or a punishment?

{{ Messengers as bearers of good news as well as of warning in order that mankind should have no plea against Allâh after the Messengers. And Allâh is Ever All¬Powerful, All¬Wise. }}, (Holy Qur'an 4: 165)

The messengers, whom Allah has picked out from the best of His creatures, were under the custody and the protection of Allah. They have brought miracles from Allah Almighty to give evidence of their truthful message. Allah has sent down to them the procedure of life which must be performed by the humankind. As it is, he who has obeyed Allah and his messengers will be perfectly rewarded by Allah Almighty; and he has disobeyed Allah will be punished for sure.
{{ And whoso obeys Allâh and the Messenger (Muhammad), then they will be in the company of those on whom Allâh has bestowed His Grace, of the Prophets, the Siddiqûn(those followers of the Prophets who were first and foremost to believe in them.), the martyrs, and the righteous. And how excellent these companions are!. }}, (Holy Qur'an 4: 69).Furthermore, Allah Almighty has confirmed in the Holy Qur'an:
{{ And whosoever disobeys Allâh and His Messenger (Muhammad), and transgresses His limits, He will cast him into the Fire, to abide therein; and he shall have a disgraceful torment. }}, (Holy Qur'an 4:14)

Allah Almighty has explained to us that the creation is certainly for specific wisdom:{{ And We created not the heaven and the earth and all that is between them without purpose! That is the consideration of

those who disbelieve! Then woe to those who disbelieve (in Islâmic Monotheism) from the Fire! }}.(Holy Qur'an 38:27)

Allah Almighty has made it clear to us to know the reason behind the creation of the humankind:{{ And I (Allâh) created not the jinns and humans except they should worship Me (Alone).}} (Holy Qur'an 51: 56).
It goes without saying that worshiping Allah is not only praying, genuflecting, and fasting, but it contains also all the deeds and the behavior which Allah loves us to do. Taking care of the orphan is considered as worshipping. Visiting a sick person is part of worshipping. Taking away anything that might hurt the others in the road is a way of worshipping. Greeting the others is also worshipping….etc.

Sheikh Ibn Taymiyyah has confirmed:
Worshipping is a name that is connected to everything Allah Almighty loves and agrees on whether it is related to sayings, interior and exterior deeds. Prayer, giving alms, fasting, doing the pilgrimage, saying the truth, loyalty, filial devotion, good contact with one's relatives, fulfillment of the pact, Ordering to work out kindness and avoiding badness, striving against the unbelievers and hypocrites, the philanthropy to the neighbors, orphans, indigent, vagabond, slaves, animals, invocation of Allah, reading…are all kinds of worshipping Allah Almighty.

The love of Allah and His messenger, the fear of Allah, deputation to His Almighty, keeping loyalty to His religion, being patient to his orders, being thankful to His beneficence, the contentment towards His fate, the reliance on him, Beseeching His mercy and apprehending his excruciation, and the like are all kinds of worshipping Allah Almighty.

Amateur Radio Newsline(tm) Report 1767 - June 24 2011

Please note that this is an extended Newsline report running 30 minutes, 37 seconds and contains three breaks.

Amateur Radio Newsline report number 1767 with a release date of Friday, June 24 2011 to follow in 5-4-3-2-1.

The following is a Q-S-T. Ham radio aids residents and firefighters as the giant Willow fire ravages parts of Arizona and New Mexico; a new ham radio emergency group emerges on Facebook, New York State enacts anti pirate radio law, ham radio does have a presence on the FCC's Technology Advisory Council after all and the ARRL holds a Riley good national convention in Plano, Texas. Find out what we mean on Amateur Radio Newsline(tm) report number 1767 coming your way right now.

(Billboard Cart Here)

**

RESCUE RADIO: HAM RADIO ASSISTANCE IN THE GIANT WILLOW WILDFIRE

The Willow fire, roaring through eastern Arizona since May 29th, burned across the state line into New Mexico last week. Norm Seeley, KI7UP, is in Scottsdale, Arizona, with what we know about ham radios contribution to the rescue and relief efforts:

--

According to a June 19th news release from Charlie Christmann, K5CEC, who is an ARRL Public Information Officer in New Mexico, evacuation orders for the town of Luna were put into effect as the fire threatened homes there. He notes that amateur radio operators are near the fire lines are providing updates to the State Emergency Operations Center via the MegaLink repeater system. MegaLink is a wide coverage intertied network of 21 repeaters owned and maintained by Paul Choc, WA5IHL.

Christmann says that the New Mexico command center is in the town of Reserve. That's about 20 miles southeast of Luna. He notes that Larry Bliemeyer, KE5VGM, the Communications Leader from Dona Ana County, Michael Scales K5SCA, his counterpart from Sandoval County and Jeff Crum, KB5SFV, who is a New Mexico Department of Homeland Security Emergency Manager are providing updates from the fire. Don Scott, N5UJT, another Department of Homeland Security Emergency Manager, is in the Santa Fe State Emergency Operations Center helping to coordinating

state resources.

Other hams are monitoring the fire information in case additional assistance is needed. These include David Thomas, KF5HSY in Sandoval County; Gary Surad, K5BIQ, in Bernalillo County, and Brad Sacca, KC5SKE, in Dona Ana County. They are backed up by numerous other radio amateurs across New Mexico who are reportedly available should additional evacuations be ordered or more communications resources be needed.

Meantime, from Tucson, Arizona, Keith Woody, WA1B, reports via QRZ.com that the fire in his area has been burning for the better part of two weeks. According to his posting there are hams monitoring the Eastern Arizona Amateur Radio Society or EAARS system nearly 24 hours a day. Messages have been passed in and out of the affected area and will likely continue for the next few weeks.

According to Woody, reports of the fire jumping roads and power outages as well as health and welfare messages have and are being passed. He notes that at the time of his posting that there were at least 3 active hams within three miles of the active fire line.

WA1B says that the command center has message forms and all contact information for radio amateurs who are available but that hams are being treated just like other folks when it comes to evacuation notices.

For the Amateur Radio Newsline, I'm Norm Seeley, KI7UP, in Scottsdale, Arizona.

--

With 20 to 30 mph sustained winds, gusts of 40 to 50 mph, and relative humidity in the single digits, the half-million acre fire easily jumps its containment lines. And even though some percentage of it has been contained, nobody can say for certain how big it will grow before it finally is brought under control. More on this story in future Amateur Radio Newsline reports. (K5CEC, WA1B via QRZ.com, published news reports)

RESCUE RADIO: NEW EMERGENCY SERVICES DX GROUP ON FACEBOOK

A new amateur radio group has been formed for hams who are also members of one of the various emergency services. Based in the United Kingdom, the group will initially be coordinated via the Facebook social networking site with membership open to retired or serving members of any of the emergency services. The group is free to join. Simply search for Emergency Services Amateur Radio DX Group on Facebook and sign up, or contact GM0GMN directly at his callbook address. (Southgate)

RADIO LAW FOLLOW-UP: AMATEUR RADIO REPRESENTED ON REESTABLISHED FCC TECHNICAL ADVISORY COUNCIL

A follow-up to last week's story about the re-establishment of the FCC's Technology Advisory Council for a two-year period. At that time we said we were not aware of any individual or group directly representing the interests of amateur radio that has been invited to serve on the panel. This, even though the recommendations it makes could eventually impact on the spectrum utilized by radio amateurs.

Well thanks to a note from ARRL Executive Vice President Dave Sumner, K1ZZ, we are happy to report that not only does the ARRL have a representative serving on the council, but that Greg Lapin, N9GL, is there now representing the League as he has for many years.

For those who may have missed last weeks report, the FCC's Technology Advisory Council is made up of various technical experts that help give the commission knowledge it needs to identify areas of innovation and develop policies to keep America competitive.

A complete list of those serving on the council can be found at tinyurl.com/3kl4qbc. Our thanks to K1ZZ for the list and for the information update. (K1ZZ)

**

RADIO LAW: NEW YORK STATE PASSES ANTI PIRATE RADIO LAW

The New York State legislature has passed a bill adding potential jail time to the possible penalties if someone is convicted of operating an illegal radio station. This as the legislation makes it a Class A misdemeanor to operate an unlicensed radio station in the AM and FM band anywhere in that state.

According to the text, the measure creates the crime of unauthorized radio transmission on either the AM or FM broadcast band. It also prohibits knowingly making a radio transmission on radio frequencies assigned and licensed by the Federal Communications Commission for use by AM and FM radio stations.

The measure is similar to laws in Florida and New Jersey, giving local authorities some say over what previously had been a federally preempted area of jurisdiction. While pirate radio stations have over the years been established just about anywhere, Florida, New Jersey and New York are among the states where the problem tends to be more acute.

If signed into law by Governor Andrew M. Cuomo, the new measure would take effect in 180 days. Personal two-way radio use would not be impacted by this new, New York State, anti pirate radio law. (Adapted from RW)

HAM RADIO NEW SPACE: ISTANBUL UNIVERSITY STUDENTS ANNOUNCE PLANS FOR NEW HAMSAT

Students at Istanbul Technical University in Turkey are working on a CubeSat ham radio satellite that will host a linear transponder for SSB and CW amateur radio communications.

Dubbed TURKSAT-3USAT the bird will carry a 50 kHz bandwidth 2 meter to 70 centimeter linear transponder, a beacon and telemetry downlink. Planners hope to launch this new bird into a Sun Synchronous orbit of around 680 kilometers sometime in early 2012.

This will be the Istanbul Technical University's first ever communication satellite. More on the project is in cyberspace at tinyurl.com/6hyxh7h. We will have more ham radio space related news later on in this weeks Amateur Radio Newsline report. (Southgate)

RESCUE RADIO: METEOROLOGIST JAMES SPANN W04W CALLS FOR OVERHAUL OF NWS TORNADO WARNING SYSTEM

Veteran meteorologist James Spann, WO4W, is calling for an overhaul of the National Weather Service tornado warning system and a new commitment to broadcasters weather coverage across local regions. Bill Pasternak, WA6ITF, is in the Newsroom with more:

--

In a recent post on Birmingham, Alabama's ABC 33/40 weather blog, James Spann, WO4W, writes that tornado sirens, which have an 80 to 90 percent false alarm ratio, are outdated and overused. He says that getting these kinds of warnings over and over and over again creates an ocean of people that won't be paying attention when a real tornado emergency is in progress. He calls this a cry wolf syndrome that is very dangerous.

Spann also says local broadcast stations must commit to bringing audiences information valuable to their safety. He says that when there is a genuine tornado emergency, TV stations must have the guts to cut into regular programming and go with wall to wall weather coverage. He says that he was appalled to see a TV station in a top ten market opting to air the season finale with `Dancing With The Stars' when a tornado warning was up for the two major counties in the metro area this past spring.

James Spann has been reporting the weather for the Birmingham ABC affiliate, which is in the heart of "Tornado Alley," since 1996. He is

among the first television weather anchors to earn a Certified Broadcast Meteorologist status from the American Meteorological Society and is also one of the creators of Weatherbrains.com website which bills itself as the official netcast for people who love the weather.

For the Amateur Radio Newsline, I'm Bill Pasternak, WA6ITF, in the Newsroom in Los Angeles. Don.

--

James Spann is also the owner of the WO4W repeater atop Shades Mountain, Alabama, that serves the ham radio community in the greater Birmingham area. The complete article is on-line at http://tinyurl.com/5tt7hkm. One of James Spann's postings on this subject is at http://www.jamesspann.com/bmachine/post/wxtalk/3991/Scrap-Tornado-Sirens. Also see http://blog.al.com/spotnews/2011/06/james_spann_blasts_number_of_f.html for an in-depth look at this situation. (Adapted from TV Spy)

RESCUE RADIO: TOWER REPAIR MOVES WICHITA COUNTY TX. SKYWARN FREQUENCY

Wichita County, Texas, SKYWARN spotters are being asked to use a new frequency for a temporary period. Severe weather spotters using ham radio in and around Wichita Falls have normally usually used a repeater on 146.94 MHz however they are being asked to change to 147.140 until further notice.

Wichita County SKYWARN spokesperson Charlie Byers, KC5PHQ, told Texoma's Homepage.com news service that the change is expected to last until the tower on which the relay system can be repaired. Byers added that once the tower is repaired and the frequency assignment will return to normal.

Initially the repair was not expected to take this long. However weather conditions in the area including high winds have caused delays as workers are not able to climb the tower. (Homepage.com)

ENFORCEMENT: ADMITTED UNLICENSED FLORIDA BROADCASTER DINGED $15000 BY FCC

The FCC has slapped Fritzner Lindor of Orange Park, Florida with a $15,000 Notice of Apparent Liability for Monetary Forfeiture. This for what the FCC says was Lindor's apparent, willful and repeated violation of section 301 of the Communications Act of by operating an unlicensed radio transmitter on the frequency 94.7 MHz. Amateur Radio Newsline's Bruce Tennant, K6PZW, has more:

--

In its May 16th release on the case, the FCC says that on June 8th and 9th, 2010, agents from the Enforcement Bureau's Tampa Office used direction-finding techniques to locate the source of radio frequency transmissions on the frequency 94.7 MHz to Lindor's Orange Park, Florida, residence. The agents observed an antenna mounted to a tree in Lindor's yard and traced a coaxial cable from the antenna into his home. On both days the agents determined that the signals being broadcast exceeded the limits for operation under Part 15 of the Commission's rules and therefore required a license.

On June 10, 2010, agents inspected the unauthorized broadcast station in Lindor's residence while it was on the air. During the inspection, Lindor admitted to purchasing the transmitter and operating the station without a license. He also stated that he had been involved in broadcasting for about 19 years and knew that his actions violated the Communications Act.

Based on the evidence before it, the FCC has found that on three dates in 2010 that Fitzner Lindor apparently willfully and repeatedly violated section 301 of the Communications Ac. Also, that Lindor knew that his actions violated the Act, yet he still engaged in the conduct, thereby demonstrating a deliberate disregard for the Commission's requirements. As such, it concluded that Fitzner Lindor is apparently liable for a $15,000 forfeiture.

For the Amateur Radio Newsline, I'm Bruce Tennant. K6PZW, in Los Angeles.

--

As is normal in these cases, Lindor was given the customary 30 days to pay the forfeiture or to file an appeal. (FCC)

**

RADIO LAW: NEW BILL INTRODUCED TO CRIMINALIZE ILLEGAL STREAMING

Streaming copyright material may soon be against the law. Amateur Radio Newsline's Jim Davis, W2JKD, reports:

--

A trio of Senators has introduced a measure that would make illegally streaming TV shows or movies a felony. The bi-partisan bill, designated as S. 978 was introduced by Senators Amy Klobuchar, John Cornyn and Christopher Coons. It came the same day that Sen. Patrick Leahy of Vermont re-introduced a bipartisan measure to give the government more tools to shut down Web sites that traffic in stolen intellectual property, including TV shows and movies.

It is already a felony to download or upload that content, so the bill would just extend that to streaming. This was a recommendation made by White House Intellectual Property Enforcement Coordinator Victoria Espinel. Espinel pointed out that under existing law, it is unclear that streaming copyrighted work can be subject to a felony penalties

because such penalties are predicated on the defendant either illegally reproducing or distributing the copyrighted work.

While, intuitively, streaming would seem to pretty clearly be distribution, there has been some legal question about that designation. This new law looks to clear up that point.

I'm Jim Davis, W2JKD.

--

The Obama administration has made protection, security and privacy of online content a priority given its push for universal broadband as a critical infrastructure component of the country's future. (Multichannel News)

**

RADIO LAW: TEXAS GOVERNOR VETOES TEXTING WHILE DRIVING BAN

Texas Governor Rick Perry has vetoed legislation that would have outlawed sending or reading text messages while driving. Lawmakers approved the texting ban last month, but Perry called it an "overreach" and "government effort to micromanage the behavior of adults."

Former House Speaker Tom Craddick had pushed the texting while driving ban He called it a public-safety measure. But the bill triggered more than a half-hour of debate on the House floor with opponents arguing the bill would amount to criminalizing drivers simply for receiving a text message while driving.

The Texas cities of San Antonio and El Paso already have laws forbidding texting while driving, and at least 30 other states have enacted similar statewide bans. (Texas.com)

NAMES IN THE NEWS: N4HY IN NEW DIRECTOR OF RESEARCH ROLE

Some names in the news. First up is former AMSAT North America Vice President of Engineering Bob McGwier N4HY, who has landed the role of Director of Research for the Hume Center for National Security and Technology. McGwier is well known in amateur radio circles for his numerous contributions to the amateur radio space program. The complete text of N4HY's appointment to this new position is on-line tinyurl.com/mcgwier (AMSAT)

**

NAMES IN THE NEWS: FCC CHAIRMAN SAYS ITS TIME TO WIPE THE FAIRNESS DOCTRINE OFF THE BOOKS

And according to a report in Broadcasting & Cable magazine, FCC Chairman Julius Genachowski has told Congress he supports striking the so-called Fairness Doctrine and a couple of similar laws from the Code of Federal Regulations.

The issue came up after Commissioner Robert McDowell pointed that, although the FCC ruled in 1987 that the doctrine was unconstitutional and unenforceable, it remained in the Code of Federal Regulations. This essentially means that it was still there if a future commission decided to enforce it. McDowell suggested that it was time to take it off the books, and other legislators agree.

For those to young to remember, the Fairness Doctrine required broadcast stations to air controversial issues of public importance and seek out opposing viewpoints. Also still on the books are parallel laws to the Fairness Doctrine providing for free response time for personal attacks and providing equal time for other candidates if a station endorsed someone in an editorial. The laws were repealed by the FCC in 2000. Now, FCC Chairman Genachowski wants to see all of it off the books. (RW)

WORLDBEAT: FRANCE BANS NEWSCASTS FROM PROMOTING FACEBOOK AND TWITTER

The French are at it again. In a move that will hinder news organizations ability to reach their audiences via social media, France has banned the use of the words Twitter and Facebook from radio and TV newscasts. This, unless they are directly a part of a news story.

News reports out of Europe say that broadcasting news anchors and other on-air talent are now forbidden to refer to popular social networking sites and the micro-blogging phenomenon, unless it is pivotal and relevant to a news item. As such, French radio and television stations will no longer be able to ask their audiences to follow or friend them on these services during newscasts.

Ryan Murphy, is the Digital Media Editor for the Radio and Television News Directors Association. He is quoted as saying that this controversial move is the result of a 1992 French government decree. One that states commercial enterprises should not be promoted on news programs. (excerpted from London Daily Mail)

**

WORLDBEAT: BIG CHANGES TO CB IN NEW ZEALAND

Some changes to the rules governing Citizens Band radio down-under. This with word from Zed-L-1-A-T-J that since June 2nd, New Zealand C-B operators can now use the Australian and United States style 27 MHz 40 Channel CB's as well as the New Zealand 26 MHz 40 Channel units.

Also, the New Zealand 476 to 477 MHz UHF Personal Radio Service that's known elsewhere as UHF CB has also just been updated. While existing 40 Channel 5 kHz deviation FM units are still ok to use, all future models will be 80 Channel units designed for a maximum of 2.5 kHz deviation. These new Personal Radio Service radios will have a total of 80 micro band audio deviation channels instead of the previous 40 narrowband FM ones. (ZL1TAJ)

**

WORLDBEAT: DANMARKS RADIO TO SHIFT PROGRAMMING TO LONGWAVE

Danish public-service broadcaster Danmarks Radio is shifting some of its programming from medium wave to longwave by months end. On June 16, a new 50 kW transmitter on 243 kHz was activated at the site in Denmark's western province. It will simulcast programming on the longwave channel until June 27th when it will end its medium-wave

broadcasts from the site on 1062 kHz. The existing medium-wave broadcasts use a 250 kW transmitter. Previously, Danmarks Radio used a 300 kW longwave transmitter at another site until it went QRT in February of 2007. (Danmarks Radio)

**

WORLDBEAT: FIVE PETITIONS TO STOP BUDGET CUTS TO RADIO NETHERLANDS

No fewer than five petitions against the upcoming budget cuts for Radio Netherlands Worldwide are currently making the rounds. This as announced by Iede de Vries of the Action Committee to avert the proposed financing cuts to the famed international broadcaster.

Employees of Radio Netherlands Worldwide Dutch service launched a petition several weeks ago against the management's plan to drastically reduce the station's Dutch activities in order to save 10 million euros a year. Last week a multilingual website was launched to get support from listeners and web users in other languages.

Now its become known that three more petitions have been launched. Mr. De Vries said that one is an initiative of former ambassadors of the Netherlands, while another has been launched by Dutch companies operating internationally. Both groups emphasize that Radio Netherlands Worldwide is important for the image of the Netherlands abroad.

Meantime, the Dutch Association of Journalists has also launched a petition among international news organizations. This one stresses in particular the role that Radio Netherlands Worldwide plays in promoting press freedom in the world.

The action committee is collecting the responses to the various petitions, and will hand these to the Lower House just before a vote on the cuts that was scheduled for June 27th. (Media Network)

**

HAM RADIO IN SPACE: FALCONSAT 3 CREATES OVER 200 NEW HAMS

Turning to ham radio space related news, word that the US Air Force Academy FalconSat-3 satellite, launched in 2007, has resulted in over 200 academy students becoming licensed radio amateurs.

FalconSat-3 was put into orbit on March 9, 2007 by the U.S. Air Force Academy in Colorado. It carries a 145 to 435 MHz digital store and forward transponder supporting data rates of 9k6, 38k4, or 76k8 running the pacsat file system so anyone with WiSP can copy telemetry.

Project OSCAR UK contacted Colorado Satellite to get the latest word on the satellite. They received an update below from Jim White who explained that the government band radios on Falcon-Sat-3 require a stable gravity gradient attitude to work properly. They have struggled with the attitude control since launch and it is not yet stable. Instead, the satellite is operating using its amateur band

radios and as a result a large contingent of cadets and faculty from the Air Force Academy have obtained Amateur licenses.

White says that FalconSat-3 is presently on during most day and evening passes over the Air Force Academy with a very strong downlink on UHF.

He adds that when FalconSat-5 was launched about 6 months ago and there was some thought that FalconSat-3would move to fully amateur service. However FalconSat-3 has proven to be such a useful learning tool that the decision was made to operate it along with FalconSat-5. Unlike its predecessor, FalconSat 5 carries no Amateur equipment. (Southgate)

**

DX

In DX, word that three S-V hams have announced plans for a VHF and UHF DXpedition to Crete. Using the call SY9VHF, the goal of the team from Greece is to operate from 50 through 1296 MHz plus a station on 10.368GHz. Modes will be SSB and CW. Operators so far are SV1BJY, SV8GKE and SV2HWR. Others may be added before the team takes to the air. Possible dates are June 29th to July 5th but that's not yet cast in concrete More information will follow shortly.

F4FUC will be active as J28UC from Djibouti starting in July and will continue through 2013. Operation will be on 40 through 10 meters using 100 watts into a vertical and a dipole. QSL via his home callsign.

SY2011BVM is a special event station in Greece that will be on the air through July 4th. This activity is to celebrate the Special Olympics Games in Athens. QSL via Bureau, eQSL or direct with a self addressed stamped envelope to SV7BVM.

ZR6DG and ZS6HB will be active as C92DG from the Timbavati Game Reserve in Tofo between July 14th and the 28th. Their operation will be on the High Frequency bands only. QSL via ZR6DG and look for photos of the operation to be posted on QRZ.com.

Lastly, six operators will be active from Guinea as 3XY1D between October 18th and November 1st. Operations will be on 160 through 6 meters using CW, SSB and the digital modes. One station will be exclusively dedicated to RTTY, PSK31 and SSTV. QSL via DL7DF, direct or via the bureau.

(Above from various DX News Sources)

THAT FINAL ITEM: IT WAS A RILEY GOOD TIME IN PLANO

And finally this week, one could honestly say that the recent ARRL National Convention in Plano, Texas, could be billed as having been a Riley good show. Yes, we know that's kind of a play on words but we are saying because the special guest of honor was none other than retired FCC Special Counsel Riley Hollingsworth, K4ZDH. And speaking to a standing room only audience, Riley let the crowd in one some of the more fun methodology he used during his tenure as the regulatory agency's ham radio rules enforcer to quickly solve some problems before they became major headaches:

--

K4ZDH: "This is one where I learned that a wife or a girlfriend can be the most effective enforcement tool that we have and that's why I often sent tapes out to the derelicts as we called them. There was a 50 percent chance that the wife would get the mail and the tapes. And she would say ".gee, what in this package." (And he would reply) ".Nothing, it just came from the FCC." (She) "Well, what are these tapes for?" And invariably, she is going to listen to them and you can close that case out within a few weeks." (Audience laughter)

--

Riley then went on to tell of one case where his theory proved out better than expected:

--

K4ZDH: ".This happened the first year of enforcement and the first year I used to get so aggravated about what the bands sound like that it would often sour our weekend.

"So one Friday I decided to call and try to resolve something before it ruined my weekend. I just had a gut feeling that we could get it resolved over the telephone. So I called down; the wife answered and I asked for so and so the amateur operator. She said he's not there but asked what this was about. So against my better judgment I told her what was going on about the interference, and some of the language and so forth and of the complaints.

"And there was a pause that Ill never forget. And then she said: "Well he gets home around 6. And I can guarantee you that after 6:15 tonight that you will never have this problem again." (Audience laughter)

"We never heard from or about that guy (again). (More laughter)"

--

On a more serious note, K4ZDH took the time to praise two former young hams in the audience who have gone on to positions of leadership within

the ham radio community:

--

K4ZDH: "I finally have accepted that I get emotional about this topic and that's just the way it is so bear with me.

"11 year ago when I had the privilege of speaking to you at the Nutter Center in Dayton, I brought your attention to a 20 year old fellow named Brian.

"I first met Brian the year before in Albuquerque at a hamfest where he was teaching a class in (ham radio) Fox Hunting. You might notice that Fox Hunting is gaining international attention. I could tell at the time that he was a natural born teacher. I ran into him again at other places and he always impressed me.

"And at that dinner I said to take a good look at Brian and let's sincerely hope that the future of amateur radio is in the hands of people like Brian. If so, there's no doubt that Brian will do a better job of looking after our spectrum than we did. And I said to Brian, that when you are up on this stage 15 years from now that I hope that it isn't necessary, even one time, to use the term enforcement.

"And that same year an 11 year old girl named Andrea obtained an Amateur Radio License. And in the years after that I would often see her at ham (radio) events talking to youth groups and later becoming a contributing editor to QST magazine.

"In both these people I could see an enthusiasm for radio. And in the years afterward many times I privately hoped that they could become the future of amateur radio, but given the state of amateur radio at the time, it was a very far fetched wish.

"Well, we see that Brian Mileshosky is a League Director now for the Rocky Mountain Division and working for the Sandia National Labs.

"And we see that Andrea Hartlage is a Vice Director for the South-Eastern Division and that she is studying aerospace engineering at Georgia Tech. And if I embarrassed you its your own fault for being beautiful and smart. I can't control that" (Applause)

--

Riley spoke and took questions from the audience for the better part of an hour. And what we saw and heard in Plano, Texas was really a new Riiley Hollingsworth. He was no longer just the man from the FCC reporting on the state of Part 97 rules enforcement. Rather he was there as one of us, to share his personal feelings about his love of amateur radio. The crowd truly treasured every word. And to be honest, so did we. (ARNewsline(tm))

**

NEWSCAST CLOSE

With thanks to Alan Labs, AMSAT, the ARRL, the CGC Communicator, CQ Magazine, the FCC, the Ohio Penn DX Bulletin, Radio Netherlands, Rain, the RSGB, the Southgate News and Australia's WIA News, that's all from the Amateur Radio Newsline(tm). Our e-mail address is Newsline (at) arnewsline (dot) org. More information is available at Amateur Radio Newsline's(tm) only official website located at www.arnewsline.org. You can also write to us or support us at Amateur Radio Newsline(tm), 28197 Robin Avenue, Santa Clarita California, 91350

And a reminder that the nominating period for the year 2011 Amateur Radio Newsline Young Ham of the Year Award closes at midnight on June 30th. As this newscast goes to air that's less than a week away.

As in years past, the 2011 recipient will receive an expense paid trip to the Huntsville Hamfest in Huntsville Alabama courtesy of Vertex-Standard Corporation which produces Yaesu brand amateur radio gear. Vertex-Standard will also present this years winner with a special ham radio related gift. CQ Magazine will again treat the recipient to a week at Spacecamp-Huntsville. We at Amateur Radio Newsline will present the winner with a plaque honoring his or her achievements.

All nominations and materials required by the official rules must be received by ARNewsline before June 30, 2011. A downloadable nominating form is at our website at www.arnewsline.org. A nominating form can also be obtained by sending a request along with a self addressed stamped envelope to the Young Ham of the Year Award in care of Amateur Radio Newsline, Inc. 28197 Robin Avenue, Santa Clarita California 91350.

Again, the cutoff date for these years Young Ham of the Year Award nominations to be postmarked is midnight your local time on June 30th. We ask you to do your part by nominating a young ham who has done something special related to ham radio. Again, the nominating form is at www.arnewsline.org

For now, with Bill Pasternak, WA6ITF, at the editors desk, I'm Don Wilbanks in warm and rainey Southern Mississippi, saying 73 and we thank you for listening.

==> + PUBLIC SERVICE: NORTH DAKOTA HAMS BRACE FOR FLOODING RIVER

As the Mouse River -- or Souris River -- rises, residents in Minot,
North Dakota, are under orders to immediately evacuate their homes. The
river -- which originates south of Regina, Saskatchewan, flows through
North Dakota and then heads north where it terminates in Manitoba --
has already started to flow into the streets of Minot. "We have
activated the North Dakota ARES® and RACES groups for support as of
today, June 22 at 12 noon (CDT)," said North Dakota Section Manager
Lynn Nelson, W0ND. "The mandatory evacuation is immediate and some
11,000 homeowners are told to leave now! The Mouse River is overflowing
the dikes and officials are planning on blowing the sirens shortly."
Read more here
<http://www.arrl.org/news/north-dakota-hams-brace-for-flooding-river>.

==> PUBLIC SERVICE: AMATEUR RADIO OPERATORS PROVIDE SUPPORT FOR
ARIZONA/NEW MEXICO WILDFIRES

The Wallow Fire, which began in Eastern Arizona on May 29, burned
across the state line into New Mexico on June 11. On Sunday, high winds
and low humidity helped the half-million acre fire to easily jump its
containment lines. According to Charlie Christmann, K5CEC, New Mexico
Amateur Radio operators are near the fire lines, providing updates to
the State Emergency Operations Center via the MegaLink repeater system.

<http://www.arrl.org/news/amateur-radio-operators-provide-support-for-arizona
-new-mexico-wildfires>.

==> + PUBLIC SERVICE: NEBRASKA HAMS NEEDED TO PROVIDE ACCESS TO 911
SERVICES

When 23,000 people in Lincoln, Nebraska lost their digital phone
service on the morning of June 22, local Amateur Radio operators were
called in to help provide local residents with a connection to the 911
dispatchers. According to ARRL Nebraska Section Manager Art Zygielbaum,
K0AIZ, those trying to call 911 via the digital phone system to report
emergencies were met with a recording that said "Due to network
difficulties, your call cannot go through."

"Lancaster County [Nebraska] Emergency Manager Doug Ahlberg
activated ARES® because Time Warner Cable lost a significant portion of
its digital phone service," Zygielbaum explained. "More than 30 ARES®
members were deployed along major roads throughout Lincoln and at major
intersections to help people who might need emergency services. The
outage lasted close to 12 hours." According to the Lincoln Journal Star
<http://journalstar.com/news/local/article_60e55f58-1f04-564b-acca-83fa8f4c56
63.html>,
the digital phone service was working early Wednesday evening on a
"rolling restoration" of 911 service. Time Warner said earlier its
10-digit calling issues were fixed.

This is the second time in 16 months
<http://www.arrl.org/news/telephone-outage-in-nebraska-no-april-fool-s-joke>

that radio amateurs have been asked to provide support due to 911 service disruptions in Nebraska. In April 2010, almost 40,000 people -- including Lincoln's government, business and emergency centers -- found out that they had no landline telephone service, as well as spotty cell phone coverage, thanks to an equipment malfunction at a Lincoln switching facility owned by Windstream Communications. According to news reports, residents of 12 counties were unable to contact 911 and dispatch centers used local radio amateurs to help provide communications support.

==> + PUBLIC SERVICE: ARRL, NATIONAL WEATHER SERVICE UPDATE MEMORANDUM OF UNDERSTANDING

The National Weather Service (NWS) has updated its Memorandum of Understanding (MoU) with the ARRL. The updated MoU serves "as a framework within which volunteers of the ARRL may coordinate their services, facilities and equipment with the NWS in support of nationwide, state and local early weather warning and emergency communications function." In May, ARRL President Kay Craigie, N3KN, signed on behalf of the ARRL, and in June, NWS Office of Climate, Water and Weather Services' Director Dave Caldwell signed on behalf of the NWS. The ARRL and the NWS have had a formal working arrangement since 1986. Read more here <http://www.arrl.org/news/arrl-national-weather-service-update-em-memorandum-of-understanding-em>.

==> ARRL FIELD DAY: W1AW ANNOUNCES 2011 FIELD DAY BULLETIN SCHEDULE

Stations active during ARRL Field Day -- June 25-26 -- are eligible to receive 100 bonus points for copying the special Field Day bulletin transmitted by W1AW (or K6KPH on the West Coast) according to the schedule below. You must include an accurate copy of the message in your Field Day submission. The Field Day bulletin must be copied via Amateur Radio; it will not be included in Internet bulletins sent out from Headquarters and will not be posted to Internet BBS sites. Read more here <http://www.arrl.org/news/w1aw-announces-2011-field-day-bulletin-schedule>.

==> ARRL FIELD DAY: GET ACTIVE ON SOCIAL MEDIA FOR ARRL FIELD DAY

The ARRL is encouraging hams to use social media sites, such as Facebook and Twitter, to promote their Field Day activities. ARRL Field Day begins at 1800 UTC on Saturday, June 25 and ARRL Media and Public Relations Manager Allen Pitts, W1AGP, would like hams to use Twitter to send a tweet announcing their Field Day activities two hours before the event begins: "We would like everyone to get on Twitter at 1600 UTC and send 'Meet me at Field Day at [your location] #ARRL #hamradio.' You can also re-tweet the messages of others. As Field Day progresses, continue to tweet, post status updates on Facebook and add pictures of your Field Day activities." You can follow the ARRL's Field Day activities on Facebook and Twitter. W1AW Station Manager Joe Carcia, NJ1Q, will be posting updates from W1AW on the ARRL's Facebook page

<http://www.facebook.com/ARRL.org> and on the W1AW Twitter account <http://twitter.com/w1aw>. You can also follow along on the ARRL's youth Twitter account <http://twitter.com/ARRL_Youth> and its Public Relations Twitter account <http://twitter.com/ARRL_PR>.

==> ARRL FIELD DAY: INTERNATIONAL SPACE STATION COULD BE ACTIVE FOR ARRL FIELD DAY

According to NASA ISS Ham Radio Project Engineer Kenneth Ransom, N5VHO, the crew on board the International Space Station (ISS) could very well be on the air for ARRL Field Day, June 25-26. "The ISS will be supporting ARRL Field Day as long as mission events permit," Ransom told the ARRL. "The crew will activate one of the automatic modes (crossband or packet digipeater) to allow ground stations to use the ISS as a relay." Ransom said that the crew may also be available to support direct contacts: "The crew could operate either or both call signs -- RS0ISS and NA1SS -- and would send '2 Alpha DX.' Listen for them on the downlinks of 145.80 and/or 437.55 MHz." Read more here <http://www.arrl.org/news/field-day-from-space-international-space-station-could-be-active-for-arrl-field-day>.

==> + AMATEUR RADIO IN SPACE: NASA ASTRONAUTS AND ASTRONAUT CANDIDATES EARN AMATEUR RADIO LICENSES

Every few years, NASA selects women and men to join its astronaut training program. Out of the hundreds who apply, only a select few are chosen to become Astronaut Candidates. Their training runs for at least two years, and when it is over, the Astronaut Candidates become full-fledged astronauts and are assigned to upcoming missions. Part of the training is an optional Amateur Radio licensing class. Once licensed and in space, these astronauts can use Amateur Radio to communicate with people here on Earth.

According to ARRL ARISS Program Manager Rosalie White, K1STO, the latest cycle of classes is almost over. "During the week of June 6-12, Nick Lance, KC5KBO, presented a series of Amateur Radio license class lessons to seven NASA Astronaut Candidates who elected to take part in future ARISS educational activities," she said. "Following the classes, Nick conducted a license exam session on June 13 for those Astronaut Candidates who felt they were ready. On June 17, the FCC issued Technician class call signs to three Astronauts: Takuya Onishi, KF5LKS, Gregory Wiseman, KF5LKT, and Jeremy Hansen, KF5LKU. More Astronaut Candidates have expressed a desire to take the exam in the near future."

White said that on June 9, Astronaut Michael Hopkins, who studied on his own, passed his Technician exam as well. The FCC issued his new call sign, KF5LJG, on June 14. His future NASA assignment is Expedition 37 in 2013 on the International Space Station. Additionally, Astronaut Kjell Lindgren, KO5MOS, upgraded from the Technician to General.

"The ARISS Team is thrilled to see such great interest on the part of the Astronauts and Astronaut Candidates who are looking forward to supporting Amateur Radio educational activities through the ARISS platform, White said. Kudos to the ARISS Houston contingent who continues to help increase the number of astronauts who are Amateur Radio operators!"

==> ARRL HOSTS RFI WORKSHOP FOR UTILITY COMPANIES

On June 16-17, the ARRL hosted an RFI workshop for utility company employees. Led by Mike Martin, K3RFI, owner of RFI Services, the workshop was geared for those technicians, linemen and engineers who are responsible for solving RFI and TVI problems. Four participants from around the country made their way to Newington to take part in classroom and field instruction to learn how to best locate and solve these interference problems. Read more here <http://www.arrl.org/news/arrl-hosts-rfi-workshop-for-utility-companies>.

==> + AT THE WORKBENCH: HOMEBREW CHALLENGE REMINDER

The ARRL has sponsored two Homebrew Challenges in the past, designed to test our members' design and construction skills by making useful amateur gear at low cost -- and sharing their results with our members. Our first ARRL Homebrew Challenge, announced in QST for August 2006, required the construction of a 40 meter, 5 W voice and CW transceiver built for less than $50 of new parts. The Second Homebrew Challenge, announced in February 2009, resulted in a number of creative designs of low cost 50 W linear amplifiers to follow the transceiver -- two for about $30, as well as a multiband amplifier with many features for somewhat more.

For 2011, the ARRL has issued a challenge <http://www.arrl.org/homebrew-challenge> to build a transceiver in celebration of the (slow) return of sunspots. This challenge will be in two parts and hams can enter either or both options:

- Option 1: A single band 25 W SSB and CW transceiver for 10 or 6 meters, with a prize of $200.
- Option 2: A 25 W SSB and CW transceiver that can be switched between 10 and 6 meters, using one or two switches, with a prize of $300.

Instead of challenging entrants to make the transceiver at the lowest cost, the ARRL will instead challenge builders to provide the highest quality, best performance and most features within the cost target of $150 for Option 1 and $200 for Option 2. In addition to the cash prize, the winners of these challenges will have articles describing their designs in QST and will receive the usual page rate for the published articles. Additional entrants who meet the minimum requirements -- and have interesting design features -- may also be considered for QST or ARRL Web articles.

Entries for either option must be received at ARRL Headquarters no later than November 1, 2011. To be considered, each entrant must submit a working transceiver that is suitable for testing in the ARRL Lab and

for on-the-air judging by the ARRL staff judges. Documentation required includes a priced parts list indicating the source and purchase price of each part, an article draft including a design description, construction hints, alignment instruction, block diagrams and schematic diagrams. Photographs may be provided, but final magazine photos will be taken by ARRL staff.

For more information, including specific requirements and evaluation criteria, please visit the ARRL Homebrew Challenge web page <http://www.arrl.org/homebrew-challenge>.

==> QEX -- THE JULY/AUGUST 2011 ISSUE

The July/August issue of QEX is coming soon, and it is full of theoretical and practical technical articles that you won't want to miss. QEX is the ARRL's "Forum for Communications Experimenters." Published bimonthly, it features technical articles, columns and other items of interest to radio amateurs and communications professionals. The mission of QEX is threefold: To provide a medium for the exchange of ideas and information among Amateur Radio experimenters; to document advanced technical work in the Amateur Radio field, and to support efforts to advance the state of the Amateur Radio art. Read more here <http://www.arrl.org/news/em-qex-em-the-july-august-2011-issue>.

==> ARRL SURVEY UNDERWAY

The ARRL has asked an independent research company specializing in survey research to conduct a survey of Amateur Radio operators. Readex Research <http://www.readexresearch.com/> -- headquartered in Stillwater, Minnesota -- has conducted similar studies for ARRL in the past, including QST readership studies and large national surveys. This most recent survey is being conducted by mail and e-mail, and includes representative populations of Amateur Radio operators from among US and international ARRL members, as well as non-member FCC licensees. While not every member will receive a survey, participation from those individuals who are selected is critical for the success of this project. Responses will be kept confidential and only used in tabulation with others; no data about survey participants -- including contact information -- will be shared with anyone. Please contact ARRL <http://www.arrl.org/contact-arrl> if you have any questions about the survey.

==> SUPPORT ARRL: ARRL AND COMBINED FEDERAL CAMPAIGN MARK DECADE OF PARTNERSHIP

For the past 10 years, the US Office of Personnel Management has designated the ARRL to participate in the 2010 Combined Federal Campaign (CFC <http://www.opm.gov/cfc/>). In that time, this campaign for federal government civilian employees, US Postal Service workers and members of the military has generated more than $170,000 for ARRL programs since it first became an option for giving by federal employees to the League. The CFC provides an easy way to support ARRL's

effort to represent its members and all radio amateurs.

Similar to the United Way, the CFC encourages individuals to pledge by payroll deduction to non-profit organizations of their choice. The ARRL encourages eligible radio amateurs to consider the League when designating campaign recipients. Payroll deduction through the CFC is an easy way for participants to support ARRL over and above their annual membership. Such contributions support programs that are not funded by member dues, enriching ARRL's ability to serve its members and all of Amateur Radio. Those wishing to select the ARRL to receive all or part of their payroll deductions should designate organization 10099 when completing their CFC donor forms. Donations to ARRL can be designated for Diamond Club contributions, the ARRL Spectrum Defense Fund or the ARRL Education & Technology Program. Donors may also make unrestricted contributions to the League.

One important note: Since the CFC does not provide the ARRL with the names of individual donors, the ARRL Development Office would appreciate a copy of the donor form to ensure that each contribution is applied according to the donor's wishes and the contribution or pledge can be properly acknowledged.

==> SOLAR UPDATE

Tad "You make the Sun shine brighter than Doris Day <http://www.youtube.com/watch?v=pIgZ7gMze7A>" Cook, K7RA, reports: Over the past week -- June 16-22 -- the average daily sunspot number rose nearly 20 points to 55, while the average daily solar flux readings increased by nearly 9 points to 98.6. All geomagnetic indices declined slightly. For the past month, we've been looking nervously toward ARRL Field Day <http://www.arrl.org/fieldday> because a forecast from NOAA and USAF showed possibly unsettled geomagnetic conditions on Friday, June 24, and continuing through Field Day weekend. The forecast has evolved from troubling to frightening and back again. Early in June, the predicted planetary A index for June 24-26 was 18, 18 and 15. Then on June 7, it changed to 15, 15 and 10 -- a little better. Then a week later, things looked even more promising on June 14 at 15, 10 and 5. But on June 17, it was revised upward to 30, 15 and 5; a planetary A index of 30 indicates a geomagnetic storm. The next day on June 18, the forecast shifted to 25, 18 and 8, and on June 19 it changed again to 25, 18 and 10. June 20 saw a slight change to 25, 18 and 8 again, then on June 21, it shifted to 15, 40 and 25. An A index of 40 on the first day of Field Day sounds ominous. Then June 22 it changed again to 30, 10 and 10. Basically we would love to see the A index as low as possible, 5 or less would be wonderful. The latest news is that the solar wind from a coronal mass ejection (CME) occurring on the solstice is moving slower than originally thought, which means a weaker effect here on Earth. A planetary K index of 5 is expected when the storm arrives, now predicted at 0700 UTC on June 24, which is 35 hours before the start of Field Day, 1800 UTC on June 25. At 0640 UTC on June 23, the Australian IPS Radio and Space Services released a bulletin stating

that increased geomagnetic activity is expected on Jun4 23-24, due to the CME, but that the effect on June 23 is expected to be mild, with a small chance of isolated storm periods. Geophysical Institute Prague predicts active conditions June 24, unsettled to active on June 25, quiet to unsettled June 26-27 and quiet on June 28-30. The last forecast before Field Day <http://www.swpc.noaa.gov/ftpmenu/forecasts/45DF.html> should be on Friday, June 24, released after 2100 UTC. The most recent forecast from USAF and NOAA has solar flux at 95 on June 23-25, 90 on June 26-30, 95 on July 1-2 and 93 on July 3. The predicted planetary A index for June 23-26 is 18, 30, 20, and 10, on June 27-28 is 8 and 5 on Jun 29 through July 1. Look for more information on the ARRL website on Friday, June 24. For more information concerning radio propagation, visit the ARRL Technical Information Service Propagation page <http://www.arrl.org/propagation-of-rf-signals>. This week's "Tad Cookism" is brought to you by Wham!'s Wake Me Up Before You Go-Go <http://en.wikipedia.org/wiki/Wake_Me_Up_Before_You_Go-Go>.

==> + HAM RADIO IN HOLLYWOOD: HOLLYWOOD TAKES LIBERTIES WITH AMATEUR RADIO IN NEW COMEDY

In Mr Popper's Penguins <http://www.popperspenguins.com/main.html> -- one of the newest films out this summer -- young Tommy Popper communicates with his father using what many reviews are calling ham radio. But while the Poppers are using a radio tuned to 21.2460 (15 meters SSB), this frequency was not available to US hams as a phone frequency in the 1976-78 time period, as shown in the movie. Neither do the Poppers use call signs. Instead, they use handles: Young Tommy is "Tippy Toe" and Mr Popper is "Bald Eagle." Mr Popper -- who, in one transmission, is in Marrakesh -- calls his son in New York City. There is no interference or static on the frequency; it seems they are the only ones on the band. While it is exciting to see Amateur Radio on the big screen, movies such as Frequency <http://www.imdb.com/title/tt0186151/> and Contact <http://www.imdb.com/title/tt0118884/>, and television shows such as Jericho <http://www.imdb.com/title/tt0805663/> and The Simpsons <http://www.imdb.com/title/tt0096697/> have presented Amateur Radio more accurately.

==> INTERNATIONAL NEWS: ARRL TO ATTEND HAM RADIO 2011 -- EUROPE'S LARGEST AMATEUR RADIO CONVENTION

Each year, ARRL sends a contingent of representatives to attend the largest Amateur Radio convention in Europe. Held in Friedrichshafen on the northern side of Lake Constance in Southern Germany, Ham Radio 2011 <http://www.hamradio-friedrichshafen.de/ham-en/index.php> will take place June 24-26. This is the 36th international Amateur Radio exhibition and the 62nd Lake Constance Convention of Radio Amateurs, sponsored by the Deutscher Amateur Radio Club (DARC <http://www.darc.de/>), which gave rise to the fair. The convention program includes 40 lectures, international and national meetings and

large stage presentations. A Ham Rally and youth tent camp will be centerpieces of activity for young radio amateurs attending the event.

ARRL Chief Technology Officer Brennan Price, N4QX, International Affairs Vice President Jay Bellows, K0QB, and Membership and Volunteer Programs Manager Dave Patton, NN1N, will represent the ARRL at Ham Radio 2011. Along with greeting international ARRL members and networking with other IARU Member-Societies, volunteers at the ARRL booth will receive applications and endorsements for ARRL awards, including the popular DXCC program. The ARRL -- as International Secretariat for the International Amateur Radio Union (IARU) -- will also host a meeting area for IARU officials and friends at the convention. IARU President Tim Ellam, VE6SH, IARU Secretary Rod Stafford, W6ROD and IARU President Emeritus Larry Price, W4RA, will represent that organization.

Last year's event drew 17,000 visitors, with 187 exhibitors from 32 nations. Photos from Ham Radio 2010 are posted on the ARRL Facebook page <http://www.facebook.com/media/set/?set=a.403183867407.181090.20069212407&l=b1f15840cd>.

==> + ARRL TO CLOSE IN OBSERVANCE OF FOURTH OF JULY

ARRL Headquarters will be closed in observance of Independence Day on Monday, July 4. There will be no W1AW bulletin or code practice transmissions <http://www.arrl.org/w1aw-operating-schedule> that day. League Headquarters will reopen Tuesday, July 5 at 8 AM Eastern Daylight Time. We wish everyone a safe and festive holiday weekend.

==> THERE'S STILL TIME TO ENTER THE 2011 ARRL PHOTO CONTEST!

Have you ever wanted to see a photo of yours in QST, the annual ARRL Amateur Radio Calendar or another ARRL publication? Well, here's your chance! If you're among the winners, not only will your photographic skill be propagated far and wide, but we're offering $100 as the First Prize. The winning photo and three runners-up will be published in QST. All submitted photos will also be considered for the 2012 ARRL Calendar.

- Deadline: Photos must be received at ARRL HQ by June 30, 2011.
- Subject: Must be directly related to Amateur Radio, and be in good taste. Extra points will be awarded for photos showing folks having fun with Amateur Radio. Photos will be judged on overall quality and composition.
- Requirements: Digital images or color prints accepted. A digital image printed on photo paper, however, doesn't work as well as a high-resolution file attachment. Digital images should be high resolution. A digital image up to 8 MB in size can be e-mailed to upfront@arrl.org, subject line "2011 Photo Contest." An image may also be burned to a CD and mailed to ARRL Photo Contest, 225 Main St, Newington, CT 06111. All entries must include caption information

describing where the photo was taken, along with a description of the subject of the photo, as well as the names and call signs of any persons shown. If you entered last year's contest, please do not resend the same photo for this year's contest. One entry per person.
- Miscellaneous: The decisions of the judges -- composed of QST editorial and production staff -- are final.

==> THIS WEEK ON THE RADIO

This week:

- June 24 -- NCCC Sprint Ladder
- June 25 -- VK/Trans-Tasman 160 Meter Contest (Phone)
- June 25-26 -- ARRL Field Day <http://www.arrl.org/fieldday>; Ukrainian DX DIGI Contest; His Majesty King of Spain Contest (SSB); Marconi Memorial HF Contest; ARCI Milliwatt Field Day

Next week:

- July 1 -- RAC Canada Day Contest
- July 2-3 -- Venezuelan Independence Day Contest; DL-DX RTTY Contest; PODXS 070 Club 40 Meter Firecracker Sprint (local time)
- July 3 -- DARC 10 Meter Digital Contest
- July 4-5 -- Michigan QRP July 4th CW Sprint
- July 4-10 -- 10-10 International Spirit of 76 QSO Party
- July 5 -- ARS Spartan Sprint

All dates, unless otherwise stated, are UTC. See the ARRL Contest Branch page <http://www.arrl.org/contests>, the ARRL Contest Update <http://www.arrl.org/The-ARRL-Contest-Update> and the WA7BNM Contest Calendar <http://www.hornucopia.com/contestcal/index.html> for more information. Looking for a Special Event station? Be sure to check out the ARRL Special Event Stations Web page <http://www.arrl.org/special-event-stations>.

==> UPCOMING ARRL SECTION, STATE AND DIVISION CONVENTIONS AND EVENTS

- July 2 -- ARRL Eastern Pennsylvania Section Convention <http://www.arrl.org/hamfests/eastern-pennsylvania-section-convention-firecracker-hamfest-1>,
Marysville, Pennsylvania
- July 15-17 -- ARRL Montana State Convention <http://www.arrl.org/hamfests/montana-state-convention-glacier-waterton-international-hamfest>,
Essex, Montana
- July 29-30 -- ARRL Oklahoma State Convention <http://www.arrl.org/hamfests/oklahoma-state-convention-ham-holiday-2011>,
Oklahoma City, Oklahoma
- August 5 -- ARRL Midwest Division Convention <http://www.arrl.org/hamfests/midwest-division-convention>, Cedar Rapids, Iowa
- August 5-6 -- ARRL Texas State Convention <http://www.arrl.org/hamfests/texas-state-convention-austin-summerfest-1>,

Austin, Texas
- August 5-7 -- ARRL Rocky Mountain Division Convention
<http://www.arrl.org/hamfests/rocky-mountain-division-convention-1>,
Taos, New Mexico
- August 20 -- ARRL West Virginia State Convention
<http://www.arrl.org/hamfests/west-virginia-state-convention-1>,
Weston, West Virginia
- August 20-21 -- ARRL Alabama State Convention
<http://www.arrl.org/hamfests/alabama-state-convention-huntsville-hamfest>,
Huntsville, Alabama
- August 21 -- ARRL Kansas State Convention
<http://www.arrl.org/hamfests/kansas-state-convention-1>, Salina,
Kansas
- August 28 -- ARRL Western Pennsylvania Section Convention
<http://www.arrl.org/hamfests/western-pennsylvania-section-convention-1>,
West Kensington, Pennsylvania
- September 9 -- ARRL Southwestern Division Convention
<http://www.arrl.org/hamfests/southwestern-division-convention-hamcon-2011>,
Torrance, California
- September 11 -- ARRL Great Lakes Division Convention
<http://www.arrl.org/hamfests/great-lakes-division-convention-findlay-hamfest
>,
Findlay, Ohio
- September 17 -- ARRL Roanoke Division Convention
<http://www.arrl.org/hamfests/roanoke-division-convention-virginia-beach-hamf
est>,
Virginia Beach, Virginia
- September 24 -- ARRL Washington State Convention
<http://www.arrl.org/hamfests/washington-state-convention-35th-annual-spokane
-hamfest>,
Spokane Valley, Washington

To find a convention or hamfest near you, click here
<http://www.arrl.org/hamfests>.

The ARRL made a written Ex Parte presentation to the FCC concerning ET
Docket No. 04-37 ("AMENDMENT OF PART 15 REGARDING NEW REQUIREMENTS AND
MEASUREMENT GUIDELINES FOR ACCESS BROADBAND OVER POWER LINE SYSTEMS")
and ET Docket No. 03-104 ("CARRIER CURRENT SYSTEMS INCLUDING BROADBAND
OVER POWER LINE SYSTEMS") on June 9, 2011. The entire text of the
ARRL's presentation, including an attached exhibit, may be found in the
FCC's Electronic Comment Filing System (ECFS) at:

http://fjallfoss.fcc.gov/ecfs/document/view?id=7021688070

Ed Hare's (W1RFI) technical report, "Analysis of the National
Telecommunications and Information Administration Report: Potential
Interference from Broadband over Power Line (BPL) Systems to Federal
Government Radiocommunications Systems at 1.7 - 80 MHz -- Phase 2
Study," is particularly interesting and informative, and is included as
Exhibit A linked above.

The previous Ex Parte presentation to the FCC from the ARRL concerning
ET Docket No: 04-37, dated November 30, 2010, including attached
exhibits, may be found in the ECFS at:

http://fjallfoss.fcc.gov/ecfs/comment/view?id=6016062528

1399. Where are the Muslims happy?

Newsgroup: rec.radio.amateur.policy
Date: 2011-06-25 03:35:59 UTC
From: Anon <anon@anon>
Message-ID: <4q0ajq.g5i.17.1@news.alt.net>
Source record: 245770

The conclusion: The Arabs are not happy!!!
* They are not happy in Gaza.
* They are not happy in the West Bank.
* They are not happy in Jerusalem.
* They are not happy in Israel.
* They are not happy in Egypt.
* They are not happy in Libya.
* They are not happy in Algeria.
* They are not happy in Tunis.
* They are not happy in Morocco.
* They are not happy in Yemen.
* They are not happy in Iraq.
* They are not happy in Bahrain.
* They are not happy in Qatar.
* They are not happy in Saudi Arabia.
* They are not happy in Afghanistan.
* They are not happy in Syria.
* They are not happy in Lebanon.
* They are not happy in Sudan.
* They are not happy in Jordan.
* They are not happy in Iran.

Where are the Arabs happy?
* They are happy in England.
* They are happy in France.
* They are happy in Italy.
* They are happy in Germany.
* They are happy in Sweden.
* They are happy in Canada.
* They are happy in Holland.
* They are happy in Belgium.
* They are happy in Norway.
* They are happy in the U.S..
* They are happy in Romania.
* They are happy in Hungary.
They are happy in any other country in the world that is not under a Muslim rule.
And whom do they blame?
* Not Islam.
* Not their leadership.
* Not themselves.
But the same countries in which they are happy to live. This is so true ..... Democracy is really good for them :
In a democracy they can live comfortably, enjoy the high quality of life

which they did not build and work for, they don't have to be productive and earn a living, they can be wild, pray in the street and exploit social services, bite the hand that feeds them.
And by the time the free world wakes up, it will be too late ....

1400. DOES ALLAH CREATE US IN VAIN? ???????????

They shared the same blowup doll.
All was going well until Mark demanded that the blowup doll be circumsized.

Leave it to Mark to want to eat "lean" meat.

Roger prefered the "full hood" and that is where the discord began.

Now these two cork suckers will have to make a decision.

Anybody opem for a vote on this?

1. Should Roger share his Man Doll with Mark?

2. Should Roger let Mark have his way and cut the foreskin from his his
rubber doll?

> Is gav cut?
No, Gav is not.
She is not what one would call "normal."
She and Mark live is some sort of fantasy world were rocks have "spirits"
and role playing games have become reality to them.
Mark has been unduly influenced by his alleged "witch" wife and goes along
with her every whim. This is proof that Mark has no mind of his own and is
so weak-willed that he lacks the ability to make his own decisions..
If one were to read Gav's blog it is glaringly obvious that Gav, like Mark,
has several mental problems.

I wonder if Gav is still living in a seperate home?
Mark once admitted that she refuses to live with Mark and his invalid
father.

Mark? Hint. Clean up your house and change your Dad's diapers.

Odd. I thought that Roger and Mark were in a dead heat for this claim to
fame.

Pretty soon everything will be illegal.
There were over 44,000 new Laws and Regulations instituted, in 2009.
Most were restrictions on Citizens. Note I didn't say voted in.
Most Citizens would have not voted for most of them.
How many more were passed last year?
The only rights you will have are the privileges you can afford from Big
Business.

How about that girl that they headlined on, "60 Minutes" that can drive without any arms....She uses her feet for everything... I guess she would be legal using her cell phone while driving. Right? Cause she does everything, "hands free".

==> + TEXAS HAMS INJURED AT FIELD DAY SITE

On the morning of June 26, two Texas radio amateurs -- Danny Caldwell,
AD5IP, of Kamay, and Mike Byrne, AE5CO, of Iowa Park -- received
electric shocks as they took down an inverted V antenna. According to
Wichita County Emergency Coordinator Larry Ballard, KE5KNV, the two
were taking part in Field Day as part of the Wichita Amateur Radio
Society (WARS <http://www.n5wf.org/>).

"The Wichita Amateur Radio Society decided to terminate the
participation in the exercise at 10 AM on Sunday, due to extreme heat
and gusty wind conditions," Ballard told the ARRL. "Danny and Mike were
injured while lowering the center pole of the inverted V dipole antenna
```

to the ground. They were knocked to the ground when a guy wire, or the antenna lead-in, was hit with very high wind gust that blew it into a high [power] line wire." According to reports from witnesses, winds were gusting up to 40 miles per hour.

Ballard said 911 was called immediately and a rescue van arrived in a matter of minutes. The Fire Rescue Team determined that the two men were stable and they were transported to United Regional Hospital in Wichita Falls. Caldwell received CPR at the scene and was air lifted to Parkland Hospital in Dallas. Byrne was transported to Parkland later by ambulance.

"This was the second year that the Wichita Amateur Radio Society had set up at Oscar Park in the City of Iowa Park for Field Day event," Ballard explained. "The antennas were located in the same location as the prior year, using the same safety practice of locating the antennas a safe distance from power lines and structures. The inverted V dipole antenna had yellow caution tape, marking guy wires and antenna end locations."

Ballard said that Byrne was released from the hospital on Monday, June 27 and was resting at home. Caldwell, who suffered more serious injuries, was released a day later.

==> + ARRL FIELD DAY: THERE'S STILL MORE TO DO FOR FIELD DAY!

The radios, antennas and the food might be put away after ARRL Field Day 2011, but there is still plenty of work to do to close the books on this annual operating extravaganza. According to ARRL Field Day Manager Dan Henderson, N1ND, the fun may be over, but many details need to be completed. "Thousands of Field Day entries will be received at ARRL headquarters over the next 30 days," he explained. "The focus now is doing what is necessary to make sure the individual and group Field Day summaries and submissions are handled accurately and efficiently." Read more here <http://www.arrl.org/news/there-s-still-more-to-do-for-arrl-field-day>.

==> + ON THE AIR: THE IARU HF WORLD CHAMPIONSHIP -- COMING TO A RADIO NEAR YOU

Radiosport fans are gearing up for the summer's biggest HF competition: the IARU HF World Championship. This 24 hour long contest is the highlight of the summer HF contesting season, affording plenty of opportunities to work DX from all around the globe on CW and SSB, as well as make QSOs with many IARU officials and Member-Society club stations. "The IARU HF World Championship is one of Radiosport's unique events," explained ARRL Contest Branch Manager Sean Kutzko, KX9X. "It's the only major contest that uses International Telecommunication Union (ITU) zones as part of the exchange, and the only contest that gives special multiplier status for IARU Member-Society stations and IARU officials." The IARU HF World Championship runs from 1200 UTC Saturday, July 9 through 1200 UTC Sunday, July 10. Read more here

<http://www.arrl.org/news/the-iaru-hf-world-championship-coming-to-a-radio-near-you>.

==> + AMATEUR RADIO IN SPACE: ISS SURVIVES NEAR MISS OF SPACE JUNK

Just after 8 AM (EDT) on Tuesday, June 29, the six residents of the International Space Station (ISS) climbed into two Soyuz space capsules as an unidentified object hurtled past them at a speed of 29,000 miles per hour, missing the space station by only 1100 feet. This was only the second time in the 10 year history of people living on the space station that the crew needed to take such precautions. If the station had been hit, the crew could have quickly undocked from the ISS and returned to Earth via the space capsules. Currently, there are four hams on board the ISS: Ron Garan, KF5GPO (NASA), Mike Fossum, KF5AQG (NASA), Sergei Volkov, RU3DIS (RKA <http://www.roscosmos.ru/main.php?lang=en>), and Satoshi Furukawa, KE5DAW (JAXA <http://www.jaxa.jp/index_e.html>). The other two cosmonauts -- Andrey Borisenko and Alexander Samokutyaev -- are not licensed. Read more here <http://www.arrl.org/news/iss-survives-near-miss-of-space-junk>.

==> + SATERN GETS NEW DIRECTOR

After serving as Director of the Salvation Army Team Emergency Radio Network (SATERN) for more than 23 years, Major Patrick E. McPherson, WW9E, is stepping down. Major Rick Shirran VE3NUZ, of Toronto, Ontario, has been appointed as the new Director. McPherson -- an ARRL member -- founded SATERN in June 1988. Shirran, who received his Amateur Radio license in 1975, served 12 years as a member of the Royal Canadian Navy as a Radio Operator and Communications Technician. He is a Commissioned Officer/Pastor in The Salvation Army Canada and Bermuda Territory. Prior to his appointment, Shirran served as the Emergency Disaster Services Director and SATERN Director for The Salvation Army in Canada and Bermuda Territory. Read more here <http://www.arrl.org/news/satern-gets-new-director>.

==> SUPPORT ARRL: MEET THE ARRL SECOND CENTURY CAMPAIGN COMMITTEE

At the end of April, David W. Brandenburg, K5RQ, of Osprey, Florida, agreed to chair the ARRL Second Century Campaign. This multi-million dollar campaign will focus on building the ARRL Endowment to further secure resources to fund the League's commitment to the future. One important focus of the campaign includes the development of a robust national program geared at young people, enabling them to experience and develop skills in scientific and technological discovery through Amateur Radio. Read more here <http://www.arrl.org/news/meet-the-arrl-second-century-campaign-committee>.

==> AT THE WORKBENCH: HOMEBREW CHALLENGE REMINDER

The ARRL has sponsored two Homebrew Challenges in the past, designed to test our members' design and construction skills by making useful amateur gear at low cost -- and sharing their results with our members.

Our first ARRL Homebrew Challenge, announced in QST for August 2006, required the construction of a 40 meter, 5 W voice and CW transceiver built for less than $50 of new parts. The Second Homebrew Challenge, announced in February 2009, resulted in a number of creative designs of low cost 50 W linear amplifiers to follow the transceiver -- two for about $30, as well as a multiband amplifier with many features for somewhat more.

For 2011, the ARRL has issued a challenge <http://www.arrl.org/homebrew-challenge> to build a transceiver in celebration of the (slow) return of sunspots. This challenge will be in two parts and hams can enter either or both options:

- Option 1: A single band 25 W SSB and CW transceiver for 10 or 6 meters, with a prize of $200.
- Option 2: A 25 W SSB and CW transceiver that can be switched between 10 and 6 meters, using one or two switches, with a prize of $300.

Instead of challenging entrants to make the transceiver at the lowest cost, the ARRL will instead challenge builders to provide the highest quality, best performance and most features within the cost target of $150 for Option 1 and $200 for Option 2. In addition to the cash prize, the winners of these challenges will have articles describing their designs in QST and will receive the usual page rate for the published articles. Additional entrants who meet the minimum requirements -- and have interesting design features -- may also be considered for QST or ARRL Web articles.

Entries for either option must be received at ARRL Headquarters no later than November 1, 2011. To be considered, each entrant must submit a working transceiver that is suitable for testing in the ARRL Lab and for on-the-air judging by the ARRL staff judges. Documentation required includes a priced parts list indicating the source and purchase price of each part, an article draft including a design description, construction hints, alignment instruction, block diagrams and schematic diagrams. Photographs may be provided, but final magazine photos will be taken by ARRL staff.

For more information, including specific requirements and evaluation criteria, please visit the ARRL Homebrew Challenge web page <http://www.arrl.org/homebrew-challenge>.

==> + SPACE WEATHER PREDICTION CENTER TO CONTINUE BROADCASTS ON WWV AND WWVH

In April 2011, the Space Weather Prediction Center (SWPC <http://www.swpc.noaa.gov/index.html>) informed the public that as of September 6, 2011, it would no longer broadcast its geophysical alert message <http://www.swpc.noaa.gov/Data/index.html#reports> on WWV <http://www.nist.gov/pml/div688/grp40/wwv.cfm> and WWVH <http://tf.nist.gov/stations/wwvh.htm>. The ARRL has now learned that the SWPC has changed its mind and will keep broadcasting these messages

that inform listeners of the solar flux, the mid-latitude A and K indices and space weather storms, both current and predicted. Due to listener feedback, the SWPC is considering updating the broadcast; in addition to providing the current daily solar flux at 2800 MHz, the SWPC is evaluating adding more frequent observations at 2695 MHz. According to the SWPC website <http://www.swpc.noaa.gov/wwv/>, other improvements to the message content will also be evaluated.

==> ARRL SURVEY UNDERWAY

The ARRL has asked an independent research company specializing in survey research to conduct a survey of Amateur Radio operators. Readex Research <http://www.readexresearch.com/> -- headquartered in Stillwater, Minnesota -- has conducted similar studies for ARRL in the past, including QST readership studies and large national surveys. This most recent survey is being conducted by mail and e-mail, and includes representative populations of Amateur Radio operators from among US and international ARRL members, as well as non-member FCC licensees. While not every member will receive a survey, participation from those individuals who are selected is critical for the success of this project. Responses will be kept confidential and only used in tabulation with others; no data about survey participants -- including contact information -- will be shared with anyone. Please contact ARRL <http://www.arrl.org/contact-arrl> if you have any questions about the survey.

==> SOLAR UPDATE

Tad "Until the Sun comes up over Santa Monica Boulevard <http://www.youtube.com/watch?v=I6zIEfSxqkg>" Cook, K7RA, reports: The predicted Field Day geomagnetic storm never appeared, although conditions were unsettled leading up to last weekend. The planetary A index was 7 on Saturday and Sunday, while the mid-latitude A index numbers were 5 and 6. The average daily sunspot numbers for the week were down 13 points compared to the previous week, and average daily solar flux was off by more than 7 points. The predicted solar flux for the near term is quite a bit lower than recent numbers; the forecast shows solar flux at 87 for June 30-July 4, then 85 on July 5-7, 88 on July 8-9, 92 and 96 on July 10-11, and 100 on July 12-15. The expected planetary A index is 5, 8, 10, 12 and 8 on June 30-July 4, 5 on July 5-7, 7 on July 8-9, and 5 again on July 10-18. Look for more information on the ARRL website on Friday, July 1. For more information concerning radio propagation, visit the ARRL Technical Information Service Propagation page <http://www.arrl.org/propagation-of-rf-signals>. This week's "Tad Cookism" is brought to you by Sheryl Crow's All I Wanna Do (Is Have Some Fun) <http://en.wikipedia.org/wiki/All_I_Wanna_Do_%28Sheryl_Crow_song%29>.

==> + AMATEUR RADIO AMOUR: DO WE GET BONUS POINTS FOR THIS?

When you think about ARRL Field Day, a few things come to mind:
food, radios, food, antennas, food and friends. And food. But one
couple took things a little bit further when they got married at their
Field Day site. Kevin Shissler, K1FQ, and Debra Hubbard, N1FQ, both of
Cherryfield, Maine, love Field Day so much that they decided it was the
perfect place to share their love for each other -- and for Amateur
Radio. Wearing their 2011 ARRL Field Day shirts, they tied the knot on
June 25 in Deblois, Maine at the shared Field Day site of the Ellsworth
Amateur Wireless Association (EAWA <http://eawa.org/>) and Narraguagus
Bay Amateur Radio Club. In April 2010, Hubbard donated 60 percent of
her liver to co-worker Jan Watson, and now Watson had her chance to
return the favor -- she officiated the wedding.

==> + ARRL TO CLOSE IN OBSERVANCE OF FOURTH OF JULY

ARRL Headquarters will be closed in observance of Independence Day
on Monday, July 4. There will be no W1AW bulletin or code practice
transmissions <http://www.arrl.org/w1aw-operating-schedule> that day.
League Headquarters will reopen Tuesday, July 5 at 8 AM Eastern
Daylight Time. We wish everyone a safe and festive holiday weekend.

==> THIS WEEK ON THE RADIO

This week:

- July 1 -- RAC Canada Day Contest
- July 2-3 -- Venezuelan Independence Day Contest; DL-DX RTTY Contest;
PODXS 070 Club 40 Meter Firecracker Sprint (local time)
- July 3 -- DARC 10 Meter Digital Contest
- July 4-5 -- Michigan QRP July 4th CW Sprint
- July 4-10 -- 10-10 International Spirit of 76 QSO Party
- July 5 -- ARS Spartan Sprint

Next week:

- July 8 -- QRP Fox Hunt
- July 9 -- FISTS Summer Sprint
- July 9-10 -- IARU HF World Championship
<http://www.arrl.org/iaru-hf-championship>
- July 10 -- SKCC Weekend Sprint; ARCI Summer Homebrew Sprint
- July 13-14 -- CWops Mini-CWT Test

All dates, unless otherwise stated, are UTC. See the ARRL Contest
Branch page <http://www.arrl.org/contests>, the ARRL Contest Update
<http://www.arrl.org/The-ARRL-Contest-Update> and the WA7BNM Contest
Calendar <http://www.hornucopia.com/contestcal/index.html> for more
information. Looking for a Special Event station? Be sure to check out
the ARRL Special Event Stations Web page
<http://www.arrl.org/special-event-stations>.

==> UPCOMING ARRL SECTION, STATE AND DIVISION CONVENTIONS AND EVENTS

- July 2 -- ARRL Eastern Pennsylvania Section Convention

URL: http://www.panix.com/~rram/usenet/rram/index.html

Changes followed by "|".

After a 30-day public discussion and feedback period to gauge reader
opinions in March of 2009:

http://groups.google.com/group/rec.radio.amateur.moderated/browse_thread/thread/d7d337db35
f23326

the rec.radio.amateur.moderated Moderation Team has decided to consider
amending its charter, and permit limited simultaneous crossposting to
rec.radio.amateur.moderated and one other unmoderated
amateur-radio-related discussion newsgroup. We are currently trying
this on a temporary basis (90 days, through early July 2009), and adopt
it permanently if successful.

Approved rec.radio.amateur.* newsgroups are those that are currently
listed in the latest version of the "List of Big Eight Newsgroups" which
is crossposted monthly to news.announce.newgroups, news.groups, and
news.lists.misc.

Approved alt.radio.amateur.* and alt.ham-radio.* newsgroups are those
that have been created consistent with the suggestions in "So You Want
to Create an Alt Newsgroup" at:

http://www.faqs.org/faqs/alt-creation-guide/

Approved regional hierarchy newsgroups are those that contain either
"radio.amateur" or "ham-radio" in their names, including
uk.radio.amateur and aus.radio.amateur.misc.

We will make every reasonable effort to keep our list of approved
newsgroups up-to-date. In case we have overlooked any, and a submission
is rejected in error as a result, the rejected submitter can E-mail us
at our administrative contact address (in the signature at the bottom of
this article, and the default Reply-To for the rejection message)
requesting that it be added, and that the article be approved. We may
still choose to reject articles crossposted to any alt.* newsgroup with
an inappropriate name, including obscene language, embedded
name-calling, or encouragement of unlawful conduct.

Amateur Radio Newsline(tm) Report 1768 - July 2 2011

Amateur Radio Newsline report number 1768 with a release date of Friday, July 2, 2011 to follow in 5-4-3-2-1.

The following is a QST. A New York State representative introduces anti distracted driving legislation in Congress. Will it affect amateur radio? Also, Alberta Canada get a strange exemption from a new distracted driving law set to go into effect this fall, two people are held in connection with the death of a Wisconsin ham, the U-S Supreme Court to review the so-called safe harbor for children broadcasting rule and in the future the time on your clock may vary. Find out what we mean on Amateur Radio Newsline(tm) report number 1768 coming your way right now.

RADIO LAW: ANTI DISTRACTED DRIVING MEASURE INTRODUCED IN US HOUSE OF REPRESENTATIVES

Federal legislation to ban use of handheld phones and other mobile devices while driving has been introduced in the United States House of Representatives. Amateur Radio Newsline's Bruce Tennant, K6PZW, reports:

--

According to published news reports, Representative Carolyn McCarthy of New York said the legislation titled the "Safe Drivers Act of 2011" would direct the Department of Transportation to set a national standard to prohibit drivers from using hand-held mobile devices, except in certain emergency situations. The legislation, as now proposed, states a handheld device would at this time not include voice-operated, vehicle-integrated, or hands-free devices that allow an individual to operate that device without the use of either hand -except to activate or deactivate a feature or function.

In addition to developing a national handheld ban, the legislation would also require the Department of Transportation to conduct a study on all aspects of distracted driving. In particular, the study would look at cognitive distraction which involves whether drivers can still be dangerously distracted while using mobile phones even when they are operated with hands-free devices or voice commands.

Within two years of the proposed law's passage, the Department of Transportation would be required to report on its findings and possibly tighten its restrictions even further on the use of all mobile device used in vehicles. States that did not comply with the Federal government's standard within two years would be penalized by having 25% of their federal highway funding withheld.

It's unknown whether or not the use of handheld push-to-talk microphones used by two-way radio users such as police, fire, delivery services, CB operators and hams would be exempted from McCarthy's proposed national ban.

For the Amateur Radio Newsline, I;m Bruce Tennant, K6PZW, in Los Angeles

RADIO LAW: ALBERTA CANADA HAMS GET TEMPORARY EXEMPTION FROM DISTRACTED DRIVER LAW

Hams in Alberta Canada have received a kind of strange dispensation from a new distracted driver law set to take effect on September 1st. The new statute will restricts drivers from using hand-held cell phones, texting or doing emailing using electronic devices like laptop computers. It also bans drivers from using video games, cameras, video entertainment displays and programming portable audio players, entering information on GPS units, reading printed materials in the vehicle writing, printing or sketching, and performing any form of personal grooming.

However, Alberta hams and other operators of two-way radio gear have been granted a temporary reprieve. This, in the form of an exemption that says any an individual who holds a Canadian radio operator certificate issued under the Radiocommunication Act may drive or operate a vehicle on a highway while holding, viewing or manipulating a 2-way radio communication device.

So whats the catch? It comes in Section 5 of the new law. It says that for the purposes of ensuring that this Regulation is reviewed for ongoing relevancy and necessity, with the option that it may be re-passed in its present or an amended form following a review, this Regulation expires on June 1, 2016.

The bottom line: It appears as if Alberta Province ham radio operators and other licensed two-way radio users don't create problems for 5 years, the exemption may be extended for many years to come. (VE6TEQ, VA6GCT via QRZ.com)

**

RADIO LAW: TWO HELD IN CONNECTION TO MURDER OF WISCONSIN HAM

Two people are being held in connection with the murder of John Aegerter, WA9GAR, of Brookfield, Wisconsin. Amateur Radio Newsline's Bill Pasternak, WA6ITF, is in the newsroom with more:

--

Authorities in Brookfield, Wisconsin have ordered Tommy V. Douyette, held on $750,000 bail on suspicion of first-degree intentional homicide and Lynn M. Hajny held on $500,000 bail on suspicion of first-degree intentional homicide, party to a crime. This in the death of 63 year old John Aegerter, WA9GAR.

Aegerter's body was discovered by Brookfield police after officers were asked by one of his employees to go to his home check on him because he had not shown up for work. His body was found face down in the garage. His ankles were tied with a black electrical cord, and a white electrical cord was around his neck. A sleeping bag had been placed partially over the body. According to court records Aegerter may have been strangled or had his neck broken during the attack at his home in a dispute over money.

Authorities said that they could not comment on what led them to arrest Douyette and Hajny. However, court records indicate that Hajny's cousin called police and told them Hajny had telephoned her and told her she had killed someone. Sometime after that call, Hajny and Douyette showed up at the woman's home and said they had been at Aegerter's home. Hajny then told her cousin Aegerter was in the garage "dead with his feet tied," and that she had taken his house and car keys, $75 in cash from his wallet and his credit card. Hajny's husband, Albert, at one time was employed by Aegerter, and Hajny had asked him about money he owed her husband, court records state.

Friends of John Aegerter say that he was an intelligent businessman who collected antique radio transmitters and other communications equipment. Jack Hughes, identified in news articles as a fellow ham radio operator is quoted as saying that Aegerter was proud to have built up his own companies. That at age 63 was a workaholic who still climbed his towers to maintain them rather than hiring others to do it.

Another friend identified as Keefe John said WA9GAR developed one of the first mobile data communications systems used in police squad cars.

At airtime, formal charges against Doyoutte and Hajny were pending.

For the Amateur Radio Newsline, I'm Bill Pasterenak, WA6ITF, in the newsroom in Loa Angeles.

--

Authorities say that an autopsy was being conducted on Aegerter remains to determine the exact cause of death. Aegerter, who lived alone, owned a communications business and several radio towers used by cellular telephone, pager and two-way radio companies. More on this story is on

line at http://www.jsonline.com/news/waukesha/124418999. html (KM6X, K9KHJ, jsonline.com)

ENFORCEMENT: FCC ISSUES NOTICE OF UNLICENSED OPERATION TO CALIFORNIA CORPORATION

A major shopping center in California has come under FCC scrutiny for allegedly operating a repeater without proper licensing. Don Wilbanks, AE5DW, has the details:

--

The FCC's Los Angeles Office has issued a Notice of Unlicensed Operation to the Irvine Company which operates the Irvine Spectrum Center in California. This, after the commission received information that an unlicensed repeater was operating on a frequency pair 462.5875 and 467.5875 MHz in the Irvine area.

Back on April 27th an agent from the FCC's Los Angeles office confirmed by direction finding that radio the signals were emanating from the Irvine Spectrum Center. An inspection determined that portable radios used by the maintenance staff were simultaneously retransmitted on 462.5875 MHz by a Motorola Radius repeater. The Commission's records show that no license had been issued for operation of a radio station at this location on 462.5875 MHz.

It should be noted that the frequencies 462.5875 MHz and 467.5875 MHz are only available for use under the Family Radio Service. The repeater at the Irvine Spectrum Center could not legally operate on FRS frequencies because it does not meet the FCC's technical regulations for F-R-S operation and therefore was not certified for use under the Family Radio Service rules.

The regulatory agency's notice warned the Irvine Company to immediately cease operation of the illegal repeater station. It also gave the Irvine Company 10 days from the June 3rd date of the Notice of Unlicensed Operation to respond and provide any evidence that it has any form of authority to operate on those frequencies as granted by the FCC.

Im Don Wilbanks, AE5DW, reporting for the Amateur Radio Newsline.

--

At airtime, any response made by the Irvine Center to the FCC has not been made public by either entity. (FCC)

**

RADIO LAW: US SUPREME COURT WILL REVIEW FCC AUTHORITY IN SAFE HARBOR PROGRAMMING CASES

The Supreme Court says that it will review the First Amendment fight over what broadcasters can put on the airwaves when young children may be watching television. Amateur Radio Newsline's Norm Seeley, KI7UP, has the details:

--

A June 27th release says that the justices will re-examine appeals court rulings that threw out the Federal Communications Commission's rules against the isolated use of expletives as well as fines against broadcasters who showed a woman's nude buttocks on a 2003 episode of ABC's "NYPD Blue."

In a landmark 1978 decision, the court upheld the FCC's authority to regulate both radio and television content, at least during the hours when children are likely to be watching or listening. That period includes the primetime hours before 10 p.m.

For many years, the FCC did not take action against broadcasters for one-time uses of curse words. The policy stemmed from the 1978 decision that upheld the FCC's reprimand of New York radio station WBAI for airing a George Carlin monologue containing a 12-minute string of expletives in the middle of the afternoon. This is when the FCC created the so-called safe harbor hours prohibiting the airing this type of material when youngsters were likely to be listening to the radio or watching television programming.

The "NYPD Blue" episode led to fines only for stations in the Central and Mountain time zones, where the show aired at 9 p.m.. This was inside the safe harbor child-friendly hours than the show's 10 p.m. time slot in the East and 3 hour delay in the Pacific time zone.

Another part of the case that involves fleeting expletives involving the awards shows has been to the high court before. Three years ago, the justices narrowly upheld the policy, but in a ruling that pointedly avoided dealing with First Amendment issues. Instead, the court directed the appeals court to undertake a constitutional review.

The Obama administration objected that the appeals court findings in these cases had in essence stripped the FCC of its ability to police the airwaves on matters dealing with adult language that was not suitable for children's ears and not video that parents would likely find objectionable for youngsters to see. On the other side, the television networks claim that the FCC's long-time safe harbor for children who might see such programming policy is outdated. This is because it applies only to broadcast television, leaving unregulated

the same content if transmitted on cable TV or over the Internet.

For the amateur Radio Newsline, I'm Norm Seeley, KI7UP, watching this case from Scottsdale, Arizona.

--

No date was given for arguments before the court to begin nor is it known how long it might take for the justices to render their opinion. (Published news reports)

NAMES IN THE NEWS: VE3NUZ NAMED NEW DIRECTOR OF SATERN

Some names in the news. First up is Major Rick Shirran, VE3NUZ, of Toronto, Canada, who has been appointed as the new Director of the Salvation Army Team Emergency Radio Network.

Major Shirran obtained his amateur radio license in 1975. He served 12 years as a member of the Royal Canadian Navy as a Radio Operator and Communications Technician. He is a Commissioned Officer and Pastor in The Salvation Army Canada and Bermuda Territory. Prior to his appointment, Shirran served as the Emergency Disaster Services Director and SATERN Director for The Salvation Army in Canada and Bermuda Territory.

Shirran replaces Major Patrick McPherson, WW9E, who founded the Salvation Army Team Emergency Radio Network back in 1988. (SATERN, ARRL, Southgate, Others)

**

NAMES IN THE NEWS: VE3FFK APPOINTED AS RAC ADVISOR TO NATIONAL FIELD SECRETARIAT

Mike Kelly VE3FFK has joined Radio Amateurs of Canada as an advisor to the RAC National Field Organization Secretariat. With a wealth of emergency preparedness knowledge and experience, Radio Amateurs of Canada says that Kelly is regarded as a much needed presence in the Ottawa area in dealing with both the Federal and Provincial governments on matters relating to Wireless Radio Interoperability.

According to the RAC press release, Kelly has had a long standing relationship with the Canadian Emergency Management College and is the "go to" guy to be registered for their training programs. He is also a regular volunteer at Radio Amateurs of Canada headquarters in Ottawa. (RAC)

**

NAMES IN THE NEWS: KM0A AWARDED ARRL FRED FISH MEMORIAL AWARD NUMBER 4

A word of congratulations to Mark Ammann, K-M-Zero-A of Florissant, Missouri who has been awarded the ARRL Fred Fish Memorial Award #4.

According to an announcement from Contest Branch Manager Sean Kutzko, KX9X, Ammann submitted the final batch of QSLs to ARRL about a week or so ago and the cards were approved by both Kutzko and ARRL Awards Branch Manager Bill Moore, NC1L. More information on the Fred Fish Memorial Award is on-line at www.arrl.org/FFMA (VHF Reflector, KX9X)

**

NAMES IN THE NEWS: W5KUB TO NETCAST 2011 HUNTSVILLE HAMFEST

And Tom Medlin, W5KUB, says that he will once again be netcasting live from the 2011 Huntsville Hamfest in Alabama on August 20th nand 21st.

This is a large hamfest that pulls many people from not only the South-Eastern states but also from across the entire United States. As is usual, Tom says that he will have prizes for his viewers. He adds that as this is an all indoor hamfest at the famed Von Braun Center, it should have perfect connectivity to enable him to stream the event with what he terms as great quality video.

Toms netcast from the Huntsville Hamfest complete with ongoing chat-room will be carried live at w5kub dot com. If you cannot be there in person, this is definitely the next best way to take part. (W5KUB)

**

HAM HAPPENINGS: ARNEWSLINE LOOKING FOR SPEAKERS FOR HAM RADIO TOWN MEETING IN TORRANCE CALIFORNIA ON SEPTEMBER 10

Amateur Radio Newsline will be hosting a 90 minute Ham Radio Town Forum on Saturday, September 10th at the 2011 Southwestern Division Convention. This will be a reprise of the highly successful "How to Make a Ham Radio Video in the 21st Century" conference held at the Dayton Hamvention several weeks ago.

We are currently looking for speakers from within the Southwestern Division or others who may be visiting the area and who work in the T-V or film industries to speak at this session. If you are interested in being a part of this session please contact us by e-mail to Newsline (at) arnewsline (dot) org.

This years Southwestern Division Convention runs from Friday, September 9th to the Sunday the 11th. The venue is the Marriott Torrance South Bay, 3635 Fashion Way, Torrance, California. More about it is on-line at www.hamconinc.org. We hope to see many of you there. (ARNewsline(tm))

EMERGING TECHNOLOGY: ALE HFN REACHES 4 YEARS OF CONTINUOUS OPERATION

The Global Automatic Link Establishment High Frequency Network has set a new time on the air record. This, by operating continuously on all international amateur radio shortwave bands 24 hours a day, 365 days a year for 4 years.

While crested to foster High Frequency interoperability between all types of organizations, agencies, individual ham operators and nets with a primary focus in international emergency communications, the service also has ample capacity for radio operators everywhere to use for ordinary calling and QSO's, including some DX'ing. And with about 2000 registered operators, the High Frequency Network covers a vast area of the planet.

All radio stations in this worldwide system scan the ham bands every 10 seconds, rapidly maintaining contact through short digital bursts of signals using a system known as Automatic Link Establishment or A-L-E. More information is on line at hflink.net (KQ6XA)

**

TECHNOLOGY TRYOUT: POWER COMPANIES TO EXPERIMENT WITH NOT HOLDING POWERLINES TO 60 HZ

If you are a United States radio amateur that depends on a powerline synchronized clock for logging and other station operations, you might want to look toward buying a stand alone unit that does not rely on the power at your outlet being precisely 60 hertz. This is because of an upcoming yearlong experiment with the nations electric grid could unsynchronize clocks that use synchronous motors to display the time.

Since 1930, electric clocks have kept time based on the rate of the frequency of the A-C electrical current that powers them. If the frequency changes from its usual 60 hertz rate, clocks run a little fast or slow. Power companies have long taken steps to keep the frequency as close to 60 hertz as is possible but the group that oversees the U.S. power grid, the Federal Energy Regulatory Commission, is proposing an experiment that would allow more frequency variation than it does now without corrections being made.

The North American Electric Reliability Corporation runs the nation's interlocking web of transmission lines and power plants. At a June 14th company presentation it spelled out the potential effects of the change. It said that synchronous motor driven clocks or any timing device that uses the 60 Hertz powerline as a time base to lock to can be off by ba signifigant amount. On the East Coast clocks could run as

much as 20 minutes fast over the year. Clocks West Coast are only likely to be off by 8 minutes during the 12 month long test.

The test is tentatively set to start in mid July. More on this upcoming experiment with the time of day can be found on line at tinyurl.com/3h6lfcn and tinyurl.com/3uzut3g along with other on-line news websites. (Various)

HAM RADIO IN SPACE: JULY 15 DEADLINE TO SCHEDULE ARISS CONTACTS

In ham radio space related news, word that NASA is seeking formal and informal education institutions and organizations in the United States, individually or working together, to host an Amateur Radio on the International Space Station, or ARISS, contact. This, between the dates of January 15 and July 15, 2012.

To maximize these radio contact opportunities, NASA is looking for organizations that will draw large numbers of participants and integrate the contact into a well-developed education plan.

During the first six months of 2012, crew members aboard the International Space Station will participate in prescheduled amateur radio contacts in addition to random operation. These scheduled radio contacts are approximately 10 minutes in length and allow students and educators to interact with the astronauts through a question-and-answer session.

An ARISS contact is a voice-only communication opportunity via amateur radio between astronauts and cosmonauts aboard the space station and classrooms and communities. ARISS contacts afford education audiences the opportunity to learn firsthand from astronauts what it is like to live and work in space. Due to the nature of human spaceflight, organizations must demonstrate the flexibility to accommodate changes in contact dates and times.

Interested parties should contact Teaching From Space to obtain information related to expectations, content, format, audience, proposal guidelines and forms by sending an e-mail to JSC-TFS-ARISS@mail.nasa.gov or by calling 281-244-2320. The deadline to submit a proposal is July 15th. More information is on-line at tinyurl.com/6fc2lzn (NASA, ARISS)

**

SPACE SCIENCE: A YEAR OF THE MOON IN 2 &#65533; MINUTES

And a new on-line time lapse video of the Moon produced by the Goddard Space Flight Center's Scientific Visualization Studio compresses one month into 12 seconds and one year into 2.5 minutes. Constructed using data data from the Lunar Reconnaissance Orbiter spacecraft, the video shows how the Moon wobbles in its orbit, the way that it changes in libration and axis tilt and the is numerous phases. You will find the

video at YouTube by taking the shortcut of tinyurl.com/3ffmhbe (NASA, AMSAT)
**

DX

In DX, PY2FN will be active as PY0FO from Fernando de Noronha through July 9th. Operations will be on 160 through 6 meters on CW only. Logs will be uploaded to Logbook of the World QSL via his home callsign, direct or by the Bureau.

F8IJV will be active as 6V7Q from the Le Calao resort in Senegal between October 22nd and November 11th. Operations will be on 160 through 6 meters, operating mainly on SSB, possibly some Digital and CW. Log will be uploaded to Logbook of thew World. QSL via his home callsign, direct or via the bureau.

Lastly, VA2WDQ, will be on the air portable FP from Miquelon Islland between July 7th and the 11th. Activity will be on 160 through 6 meters using mostly CW with some SSB. His main goal is to participate in the IARU HF Championship on July 9th and 10th. All logs will be uploaded to Logbook of the World and to eQSL once he returns home.

Above from various DX news sources

THAT FINAL ITEM: 13 COLONIES EVENT CELEBRATES AMERICA'S BIRTHDAY

And finally this week, from now through July 5th, you'll have a special opportunity to look for and work a group of amateur radio stations operating from the 13 original American colonies. You'll be able to score some nice QSL cards and a great certificate for your effort, too. We get more from Philadelphia, the birthplace of American liberty, from Amateur Radio Newsline's Mark Abramowicz, NT3V, with all the details:

--

Yes, the Fourth of July holiday weekend is a long and busy time.

But if you have a couple of spare minutes, maybe a few hours, there is an operating event worth your time.

It's the annual 13th Colonies special event.

Ken Villone, KU2US, is the event manager...

"We added more operators and more modes," Villone says. "We're doing CW, we doing side-band, we're doing PSK-31.

"In fact, we have one club that's just specifically is going to be operating on PSK-31. "And, this year is the first year that we will have all of the satellites representing the 13 colonies states. So a clean sweep of the colony states on the birds is a possibility. But it's going to be really hard to do this."

To emphasize the theme of "Independence," Villone says stations will be on the air during the event from Philadelphia.

"It's the whole patriotic theme of the event, the time that it's going to take place during the Fourth of July week," Villone says. "And, also, the Holmesburg Amateur Radio Club fit right in beautifully with the theme because of the Independence Hall."

Bob Josuweit WA3PZO is helping to coordinate the Holmesburg club's operations... "We'll have several stations on the air in a Field day-type operation, actually operating from people's homes," Josuweit says. "But, we'll be rotating bands and modes during the course of the holiday so that we can all enjoy part of the holiday with our families but still to keep the call sign on the air and work as many people as possible."

Josuweit says this is the first year Philadelphia will be directly represented in the event...

"After all, that's where the Declaration of Independence was signed and created," Josuweit says. "And, we'll be using our club call sign of WM3PEN, we affectionately know for William Penn, the founder of Philadelphia."

Event coordinator, Ken Villone says, you don't have to be a contester to work the event. He compared operations to the ARRL's Sweepstakes event. But, in this case, he cautions, it may require some patience...

"The person who wants to contact us, basically will probably have to work through pile-ups because it's very hard to find where we are just by going through the frequencies and hunting," Villone says. "So you have to really be on top of everything and all of our operators basically, they pick their own time and their own frequency to operate.

"There's no set of rules for that. So, it's basically like the same way that you would operate on the ARRL event."

Villone says check the DX Clusters and links for callouts. And, if you work a Colony station, he'd love to see you post it there so others can get in on the fun.

For the Amateur Radio Newsline, I'm Mark Abramowicz, NT3V, in Philadelphia.

**

For more information about the 13 Colonies, event, check out the website www.13colonies.info (NT3V)

NEWSCAST CLOSE

With thanks to Alan Labs, AMSAT, the ARRL, the CGC Communicator, CQ Magazine, the FCC, the Ohio Penn DX Bulletin, Radio Netherlands, Rain, the RSGB, the Southgate News and Australia's WIA News, that's all from

the Amateur Radio Newsline(tm). Our e-mail address is newsline@arnewsline.org. More information is available at Amateur Radio Newsline's(tm) only official website located at www.arnewsline.org. You can also write to us or support us at Amateur Radio Newsline(tm), 28197 Robin Avenue, Santa Clarita California, 91350

Before we go, we have to announce that the nominating period for the year 2011 Amateur Radio Newsline Young Ham of the Year Award is now closed. The cutoff date for paper nominations to be postmarked was midnight, September 30th your local time. Electronically filed nominations had to be time-stamped the same.

It will likely be about three weeks before we have the name of this year's Young Ham of the Year Award recipient. As soon as the judging committee completes its work, we will announce whomever it is that they have chosen on a future Newsline report.

Meantime, our thanks to those of you who took the time to nominate a young radio amateur this year. As we all know, today's young hams will be tomorrows leaders and the people who will carry on the traditions of our hobby.

For now, with Bill Pasternak, WA6ITF, at the editors desk, I'm Jim Damron, N8TMW, saying 73 and we thank you for listening.

The ARRL made a written Ex Parte presentation to the FCC concerning ET
Docket No. 04-37 ("AMENDMENT OF PART 15 REGARDING NEW REQUIREMENTS AND
MEASUREMENT GUIDELINES FOR ACCESS BROADBAND OVER POWER LINE SYSTEMS")
titled, "Response to Utilities Telecom Council's Ex Parte Statement
Dated May 4, 2011." The entire text of the ARRL's presentation,
including an attached exhibit, may be found in the FCC's Electronic
Comment Filing System (ECFS) at:

http://fjallfoss.fcc.gov/ecfs/document/view?id=7021689543

The entire text of the Utilities Telecom Council's Ex Parte presentation
may be found at:

http://fjallfoss.fcc.gov/ecfs/document/view?id=7021346417

The presentations concern themselves with proposed mandatory notching of
BPL systems of at least 35 dB in amateur radio bands.

Previous Ex Parte presentations to the FCC from the ARRL concerning ET
Docket No: 04-37, dated November 30, 2010 and June 9, 2011, including
attached exhibits, may be found in the ECFS at:

http://fjallfoss.fcc.gov/ecfs/comment/view?id=6016062528

and:

http://fjallfoss.fcc.gov/ecfs/document/view?id=7021688070

IARU HF World Championship 2011

To IARU Region 2 Member Societies:

The coming weekend, July 9th and 10th, the 2011 version of the IARU
HF World Championship will take place.

The objective of this SSB and CW contest is to contact as many other
amateurs, especially IARU member society HQ stations, around the world
using the 160, 80, 40, 20, 15 and 10 meter bands. It is open to all
radio amateurs around the world.

We invite IARU member societies to actively participate with their
HQ stations.

The rules for this year's contest can found here:
http://www.arrl.org/iaru-hf-championship

73

Ramon Santoyo V. XE1KK
Secretary - IARU Region 2

1562. Seeking New FAQ/Intro Maintainers for rec.radio.amateur.*

Newsgroup: rec.radio.amateur.policy
Date: 2011-07-07 06:05:01 UTC
From: rram@panix.com
Message-ID: <radio/ham-radio/recruitment-1-1310018700@panix.com>
Source record: 245883
Cross-posted to: rec.radio.amateur.antenna,rec.radio.amateur.dx,rec.radio.amateur.equipment,rec.radio.amateur.homebrew,rec.radio.amateur.misc,rec.radio.amateur.policy,rec.radio.info

```
Posted-By: auto-faq 3.3.2 beta (PGPMoose V2.0, Perl 5.005)
Archive-name: radio/ham-radio/recruitment
Revision: 1.2 2009/11/25 14:41:01
Posting-Frequency: posted monthly
URL: http://www.faqs.org/faqs/radio/personal-intro/

Changes followed by "|".

The rec.radio.info newsgroup, first established in 1993, has been
recently revived by an active moderation team. We are currently seeking
suitable information, FAQ, and bulletin articles from the entire
rec.radio.* newsgroup hierarchy for simultaneous cross-posting to our
newsgroup.

We are seeking a replacement maintainer for the following information
bulletin formerly posted to rec.radio.amateur.* (and currently archived
at http://www.faqs.org/faqs/radio/personal-intro/ ):

radio/personal-intro
Subject: Guide to the rec.radio Newsgroups
Maintainer: jeffreyh@Hawaii.Edu (Jeffrey Herman)
Last Posted: 9 Nov 2001 06:18:17 GMT
Posting-Frequency: 15th of each month

One significant omission, requiring immediate updates, for this article |
is that it does not mention newer amateur radio newsgroups created since |
it was written, including: |

rec.radio.amateur.antenna |
rec.radio.amateur.boatanchors |
rec.radio.amateur.dx |
rec.radio.amateur.equipment |
rec.radio.amateur.homebrew |
rec.radio.amateur.moderated |
rec.radio.amateur.space |

We are willing to provide any technical support necessary to get this
article updated and automatically posted again at a regular interval.
This would include establishing contact with the original maintainer for
any necessary permissions. We would prefer to seek a new, dedicated
maintainer at this time, rather than start auto-posting the original
article ourselves.

For more information about our newsgroup, see:
```

http://www.panix.com/~rram/usenet/rri/index.html

Please direct any comments, questions, or criticisms to
rec-radio-info-request@panix.com.

==> + 2011 SECOND MEETING OF THE ARRL BOARD OF DIRECTORS SET FOR JULY
15-16, AGENDA ANNOUNCED

ARRL policy is made by its Board of Directors. The 15 voting members
of the Board are the Directors who are elected by the ARRL members in
their respective divisions. The Board meets in January and July,
usually in the Hartford area. ARRL members also elect Vice Directors
who may attend the meetings. ARRL Directors and Vice Directors are
volunteers who work hard to represent the ARRL in their divisions, to
represent the members who elect them on policy issues and to conduct
the committee work that is so important to good decision-making. This
month's Board Meeting activities will begin on Thursday, July 14 with
meetings of two standing committees, the Administration & Finance (A&F)

Committee and the Programs & Services Committee. Each is made up of five Directors and a Vice Director, with the treasurer serving as an additional member of the A&F Committee. Read more here <http://www.arrl.org/news/2011-second-meeting-of-the-arrl-board-of-directors-set-for-july-15-16-agenda-announced>.

==> FCC NEWS: FCC ISSUES CITATION TO CANADIAN COMPANY FOR MARKETING UNAUTHORIZED DEVICES IN US

On July 6, the FCC issued a Citation to New Generation Hobbies of Woodbridge, Ontario, Canada, for marketing unauthorized radio frequency devices in the United States that operate on restricted frequencies. This is in violation of Section 302(b) of the Communications Act and Sections 2.803 and 15.205(a) of the FCC's rules. In the Citation, the FCC advised New Generation Hobbies to "take immediate steps to come into compliance and to avoid any recurrence of this misconduct. As explained [in the Citation] and as provided in the Communications Act, future violations of the Rules in this regard may subject [the] company to substantial monetary penalties, seizure of equipment and criminal sanctions."

The FCC acted in response to a complaint alleging that New Generation was marketing certain video transmitters that operate on restricted frequencies in the 2.4 GHz band. In September 2009, the FCC sent a Letter of Inquiry to New Generation. At that time, the FCC Spectrum Enforcement Division observed that New Generation was marketing two 2.4 GHz transmitters on its website: the LawMate 500 mW 2.4 GHz transmitter and the LawMate 1 W 2.4 GHz transmitter. The Amateur Radio Service is allocated portions of the 2.4 GHz band on a primary basis. Read more here <http://www.arrl.org/news/fcc-issues-em-citation-em-to-canadian-company-for-marketing-unauthorized-devices-in-us>.

==> + HAM RADIO IN HOLLYWOOD: ANOTHER HOLLYWOOD BLOCKBUSTER FEATURES AMATEUR RADIO

The summer of 2011 is replete with big movies, ranging from action-adventure flicks to comedies to coming-of-age dramas. And already this summer, Amateur Radio has played a part in not one, but two movies. In Mr Popper's Penguins, ham radio was featured, albeit incorrectly, on the big screen. And now Super 8 -- a film set just outside Dayton, Ohio in 1979 -- uses Amateur Radio in a crucial scene. Super 8 revolves around a group of six middle-schoolers who witnesses a mysterious train crash in the fictional town of Lillian. Soon after the crash, the Air Force arrives and strange things start happening in the small town. The kids, a group of young film makers (hence the title of the movie) begin to investigate the creepy phenomena. Read more here <http://www.arrl.org/news/another-hollywood-blockbuster-features-amateur-radio>.

==> ARRL HOSTS WEBINAR ON AMATEUR RADIO RESPONSE TO HURRICANES

The ARRL will host a webinar from 8-9:30 PM (EDT) on July 7 to present information about the 2011 hurricane season and the Amateur Radio response. This webinar was organized by ARRL Directors N3LLR, K5MC, W4OZK and K5RAV. The program will offer presentations from representatives from the National Hurricane Center and WX4NHC, the VoIP Hurricane Net, the Hurricane Watch Net and the ARRL. Webinar registration is open to all, but will be of particular interest to those amateurs in hurricane-prone areas. If you are interested in emergency communications and hurricane preparedness and response, you are invited to attend this online presentation. Read more here <http://www.arrl.org/news/register-for-upcoming-webinar-on-amateur-radio-response-to-2011-hurricane-season>.

==> + CHECK OUT THE AUGUST ISSUE OF QST

The August issue of QST is jam-packed with all sorts of things that today's Amateur Radio operator needs. From product reviews to experiments to contesting, this issue of QST has something for just about everyone.

When you support your vertical antenna from the top, you open up a lot of possibilities. That's what Bob Glorioso, W1IS, found when he decided to support his monopole antenna from the top and do away with ground radials. Find out how he did it in his article "A Suspended Quarter Wave 40 Meter Wire Vertical Monopole." William E. Johnson, W0MS, takes a new twist on a classic QRP transmitter in his article "A Modified MouseFET Low Power Transmitter." You, too, can build this updated version of a classic HF CW low power transmitter.

Boy Scouting and adventure go hand-in-hand, so it's no wonder that Boy Scout Troop 6 of Monument, Colorado had a blast GeoFoxing in the Rocky Mountains. GeoFoxing combines Amateur Radio Direction Finding -- also called foxhunting -- with geocaching. Assistant Scoutmaster Stu Turner, W0STU, found a terrific way to involve youth in Amateur Radio. Find out how you can do the same in his article "GeoFox Radiosport Rally." Join QST Editor Steve Ford, WB8IMY, as he takes readers along to the 2011 Dayton Hamvention® and the 2011 ARRL National Convention in Plano, Texas. Ford also checks out some of the newest Amateur Radio products that debuted at Hamvention.

QST Technical Editor Joel Hallas, W1ZR, takes a look at the Ten-Tec Model 599AT Eagle HF and 6 meter transceiver in this month's Product Review. He says that this rig "brings together a very good receiver in a compact footprint HF and 6 meter transceiver with minimal menus and controls." Hallas also checks out the Ten-Tec 777 DX PRO headset. He says this headset is "the perfect choice for an operator looking for a comfortable high-quality boom mic headset that can provide fine sounding audio without the need for external equalization."

Nate Moreschi, N4YDU, delivers the results of the 2011 ARRL International DX CW Contest. Calling it "an intense competition," Moreschi said that there were several records broken in the contest, as well as many tight races. For instance, in the W/VE Multioperator/Multi

Transmitter category, the first place team won by only 28 QSOs and 8 multipliers. "Over a 48 hour period, that's just more than half a contact per hour and less than two tenths of a multiplier per hour - pretty close," Moreschi explained.

Of course, there are the usual columns you know and expect in the August QST: Happenings, Hints & Kinks, The Doctor Is IN, How's DX, Vintage Radio and more. Look for your August issue in your mailbox. QST is the official journal of ARRL, the national association for Amateur Radio. QST is just one of the many benefits of ARRL membership. To join or renew your ARRL membership, please see the ARRL web page <https://www.arrl.org/join>.

==> ARRL IN ACTION: WHAT HAVE WE BEEN UP TO LATELY?

This feature is a concise monthly update of some of the things that the ARRL is doing on behalf of its members. This installment -- which covers the month of June -- looks at ARRL Field Day, reviews the ARRL's formal working agreements with served agencies, getting ready for WRC-12, preparing online courses, hosting workshops for utility company employees, seeking input from members regarding VHF/UHF contest participations, reports from the Official Observer Desk and more. Read more here <http://www.arrl.org/news/arrl-in-action-what-have-we-been-up-to-lately-35>.

==> + SPACE WEATHER PREDICTION CENTER TO CONTINUE BROADCASTS ON WWV AND WWVH

In April 2011, the Space Weather Prediction Center (SWPC <http://www.swpc.noaa.gov/index.html>) informed the public that as of September 6, 2011, it would no longer broadcast its geophysical alert message <http://www.swpc.noaa.gov/Data/index.html#reports> on WWV <http://www.nist.gov/pml/div688/grp40/wwv.cfm> and WWVH <http://tf.nist.gov/stations/wwvh.htm>. The ARRL has now learned that the SWPC will keep broadcasting these messages that inform listeners of the solar flux, the mid-latitude A and K indices and space weather storms, both current and predicted. Due to listener feedback, the SWPC is considering updating the broadcast; in addition to providing the current daily solar flux at 2800 MHz, the SWPC is considering adding more frequent observations at 2695 MHz. According to the SWPC website <http://www.swpc.noaa.gov/wwv/>. other improvements to the message content will also be evaluated.

==> SOLAR UPDATE

Tad "The Sun is shining down <http://www.youtube.com/watch?v=PCVgxAplRoA>" Cook, K7RA, reports: The average daily sunspot numbers for the past week dropped less than a point -- from 42 to 41.6 -- compared to the previous week, while the average daily solar flux was down more than 5 points to 86.2. The predicted solar flux for the near term is lower than of late, with values for July 7-13 at 84, 82, 84, 86, 88, 90, 92, and then 90 on July

14-17, then 88 on July 18-21. The predicted planetary A index for July 7-12 is 8, 10, 5, 5, 7 and 7, followed by 6 on July 13-18. This is followed by a rise in geomagnetic activity on July 19-24, with planetary A index at 7, 8, 12, 15, 10 and 7. The latest smoothed sunspot number prediction <http://www.swpc.noaa.gov/weekly/pdf/prf1870.pdf> on page 13 shows the numbers for December 2010 through December 2011 slightly lower. Last month's prediction showed smoothed sunspot numbers for that period at 30, 34, 38, 41, 45, 49, 54, 59, 63, 66, 68, 71 and 74. The latest has the values for those same months changed to 29, 32, 36, 39, 43, 47, 52, 57, 61, 64, 66, 69 and 72. The reason that in July we see last December's number change is because the smoothed sunspot number represents an average of data over one year. The data for approximately six months after December 2010 wasn't completely known until the end of June, and each successive month after that contains one more month of predicted data, instead of data that is actually measured. Look for more information on the ARRL website on Friday, July 8. For more information concerning radio propagation, visit the ARRL Technical Information Service Propagation page <http://www.arrl.org/propagation-of-rf-signals>. This week's "Tad Cookism" is brought to you by Bowling for Soup's Greatest Day <http://en.wikipedia.org/wiki/Bowling_for_Soup>.

==> + ARRL RECOGNIZES: KAZIMIERZ "KAI" SIWIAK, KE4PT, WINS JUNE QST COVER PLAQUE AWARD

The winner of the QST Cover Plaque Award for June is Kazimierz "Kai" Siwiak, KE4PT, for his article "Is There an Optimum Height for an HF Antenna?" Congratulations Kai! The QST Cover Plaque award -- given to the author or authors of the best article in each issue -- is determined by a vote of ARRL members on the QST Cover Plaque Poll Web page <http://www.arrl.org/cover-plaque-poll>. Cast a ballot for your favorite article in the July issue today.

==> THIS WEEK ON THE RADIO

This week:

- July 8 -- QRP Fox Hunt
- July 9 -- FISTS Summer Sprint
- July 9-10 -- IARU HF World Championship <http://www.arrl.org/iaru-hf-championship>
- July 10 -- SKCC Weekend Sprint; ARCI Summer Homebrew Sprint
- July 13-14 -- CWops Mini-CWT Test

Next week:

- July 16 -- Feld Hell Sprint
- July 16-17 -- DMC RTTY Contest; CWops Mini-CWT Test; CQ Worldwide VHF Contest; North American QSO Party (RTTY)
- July 17 -- CQC Great Colorado Gold Rush
- July 18 -- Run for the Bacon QRP Contest

- July 21 -- NAQCC Straight Key/Bug Sprint

All dates, unless otherwise stated, are UTC. See the ARRL Contest Branch page <http://www.arrl.org/contests>, the ARRL Contest Update <http://www.arrl.org/The-ARRL-Contest-Update> and the WA7BNM Contest Calendar <http://www.hornucopia.com/contestcal/index.html> for more information. Looking for a Special Event station? Be sure to check out the ARRL Special Event Stations Web page <http://www.arrl.org/special-event-stations>.

==> UPCOMING ARRL SECTION, STATE AND DIVISION CONVENTIONS AND EVENTS

- July 15-17 -- ARRL Montana State Convention <http://www.arrl.org/hamfests/montana-state-convention-glacier-waterton-international-hamfest>, Essex, Montana
- July 29-30 -- ARRL Oklahoma State Convention <http://www.arrl.org/hamfests/oklahoma-state-convention-ham-holiday-2011>, Oklahoma City, Oklahoma
- August 5-6 -- ARRL Texas State Convention <http://www.arrl.org/hamfests/texas-state-convention-austin-summerfest-1>, Austin, Texas
- August 5-7 -- ARRL Rocky Mountain Division Convention <http://www.arrl.org/hamfests/rocky-mountain-division-convention-1>, Taos, New Mexico; ARRL Midwest Division Convention <http://www.arrl.org/hamfests/midwest-division-convention>, Cedar Rapids, Iowa
- August 20 -- ARRL West Virginia State Convention <http://www.arrl.org/hamfests/west-virginia-state-convention-1>, Weston, West Virginia
- August 20-21 -- ARRL Alabama State Convention <http://www.arrl.org/hamfests/alabama-state-convention-huntsville-hamfest>, Huntsville, Alabama
- August 21 -- ARRL Kansas State Convention <http://www.arrl.org/hamfests/kansas-state-convention-1>, Salina, Kansas
- August 28 -- ARRL Western Pennsylvania Section Convention <http://www.arrl.org/hamfests/western-pennsylvania-section-convention-1>, New Kensington, Pennsylvania
- September 9-11 -- ARRL Southwestern Division Convention <http://www.arrl.org/hamfests/southwestern-division-convention-hamcon-2011>, Torrance, California
- September 11 -- ARRL Great Lakes Division Convention <http://www.arrl.org/hamfests/great-lakes-division-convention-findlay-hamfest>, Findlay, Ohio
- September 17 -- ARRL Roanoke Division Convention <http://www.arrl.org/hamfests/roanoke-division-convention-virginia-beach-hamfest>, Virginia Beach, Virginia
- September 24 -- ARRL Washington State Convention

<http://www.arrl.org/hamfests/washington-state-convention-35th-annual-spokane
-hamfest>,
Spokane Valley, Washington

To find a convention or hamfest near you, click here
<http://www.arrl.org/hamfests>.

Amateur Radio Newsline(tm) Report 1769 - July 9 2011

CLOSED CIRCUIT ADVISORY

The following is a closed circuit advisory and is not necessarily for air. I'm Amasteur Radio Newsline Producer Bill Pasternak here to bring you up to date on two important items.

First a big shout out of thanks to all of you who have so far give from your heart through your donations made to the Newsline Support Fund. If you don't take into account the annual expenses that we incur each year in presenting the Amateur Radio Newsline Young Ham of the Year Award, we are pretty much OK through about late October. So unless there is some major calamity, of ongoing funding drops to a drizzle, you likely won't hear us making any further general funding requests till years end. And as I've said so many times before, we much prefer to devote this time to reporting the news instead of asking for contributions so that we can continue to bring you the news.

And some more good news. A few weeks ago we announced that we might have to cancel this years Young Ham of the Year Award because there looked to be no viable nominations. Well, once again some of you responded and as a result we now have a small plethora of good nominations for the judging committee to sift through and on Saturday, August 20th, a young ham from somewhere in the United States or Canada will be honored with the Young Ham of the Year Award at a presentation that will be made at the Huntsville Hamfest in Huntsville, Alabama.

The only question right now is weather or not Newsline will be able to send a representative from our Los Angeles headquarters due to the high cost of air fare this year. As noted, thanks to your generosity we have almost enough funds to keep us to near the end of the year. What we do not have, and what we must raise is about $750 to cover staff airfare and hosting the mini banquet for the recipient and his or her family. So once again we are turning to you to help fill that financial void.

As you know, your tax-deductible donations can be made on-line using Pay-Pal. Just go to our website at www.arnewsline.org and click on the button that says "Make A Donation." Or you can send it by regular mail to the address you will hear at the end of this weeks newscast. Whichever way you choose, the all-volunteer staff here at the Amateur Radio Newsline say thank you for believing in us and for supporting the work that we do.

That ends the closed circuit advisory. I'm Bill Pasternak, WA6ITF. Now here is Jim Davis, W2JKD, with this weeks report.

**

Amateur Radio Newsline report number 1769 with a release date of Friday, July 9 2011 to follow in 5-4-3-2-1.

The following is a Q-S-T. Ham radio will help celebrate the birth of a new nation, Malta gives its hams a temporary 500 Kilohertz allocation, Portugal OK's 60 meter operation, and that old light bulb in Northern California celebrates its 110th birthday. Find out the details are on Amateur Radio Newsline(tm) report number 1769 coming your way right now.

(Billboard Cart Here)

**

BREAKING DX NEWS: NEW NATION OF SOUTH SUDAN EXPECTED ON THE AIR SHORTLY

Ham radio will be a part of the birth of a new nation. The Intrepid-DX Group and the DX Friends plan to activate the Southern Sudan as a new country almost immediately after it gains its independence from The Sudan on or after July 9th. We have the latest from Amateur Radio Newslines Norm Seeley, KI7UP.

--

According to a press release from the DXpedition planners, South Sudan Vice President Dr. Riek Machar Teny has announced that admission of his newly created country as a member state of the United Nations will take place on July 14th. The release goes on to say that the DXpedition plans to be in the nation's capital of Juba and to be ready to start operations right after the South Sudan is granted admission to the UN.

If all goes as expected, the UN Security Council is expected to bring the matter before the General Assembly on Thursday, July 14th. Once through the formal approval process the Southern Sudan is then expected to be the 193rd member nation of the U.N.. And once this happens, the International Telecommunication Union will issue an international telephone dialing code as well as an ITU callsign prefix block within 48 hours.

At airtime members of the two groups report that they are in consultation with representatives of the new Southern Sudan Government, the International Telecommunications Union and the International Amateur Radio Union working on making final arrangements. Once on the air there will be eighteen hams operating 24 hours a day, 7 days a week with seven stations on the air at any given time.

Waiting for this new country to come on the air, I'm Norm Seeley, KI7UP, reporting from the other side of the world in Scottsdale, Arizona.

--

More on this operation will be posted on-line at www.dxfriends.com/SouthernSudan2011. We will have more DX news for ou later on in this weeks Amateur Radio Newsline report. (Various DX news sources)

**

RESTRUCTURING: MALTESE HAMS GET TEMPORARY 501 To 504 KHZ BAND

Malta is the latest country to allocate amateur radio operations at 600 meters. This with word that the latest version of the Maltese National Frequency Plan contains an entry for 501-504 kHz.

However, there are several caveats. Maltese amateur stations using this frequency band shall not exceed a maximum effective radiated power of 10 Watts. They also must not cause harmful interference to any other services operating in the same or adjacent frequency bands.

All transmissions in this band are to be limited to experimental or research work only. The allocation of this spectrum to the amateur service in Malta is valid only through this coming December 31st. (IARU Region 1)

**

RESTRUCTURING: PORTUGUESE HAMS GET ADDITIONAL 60 METER FREQUENCY

Portuguese radio amateurs have been allocated an additional frequency at 5 MHz in the 60 meter band. This as the Portuguese telecommunications agency Anacom assigns 5288.5 kHz in addition to the already authorized frequencies of 5371.5 kHz and 5403.5 kHz. All three frequencies are on a secondary non interference basis. Special 60 meter propagation study permits are being issued to Portuguese hams for up to a year. (IARU Region 1)

**

RADIOSPORTS: IARU HF WORLD CHAMPIONSHIP 2011 - JULY 9 AND 10

And if you are hearing this newscast before the July 9th and 10th weekend and are wonder what all the activity on the High Frequency bands is all about, then welcome to the 2011 version of the IARU HF World Championship.

The objective of this SSB and CW contest is to contact as many other amateurs, especially I-A-R-U member society headquarters stations, around the world as possible. This, using the 160, 80, 40, 20, 15 and 10 meter bands.

This contest is open to all radio amateurs around the world. Complete rules are on-line at arrl dot org stroke iaru-hf-championship. (IARU)

RESCUE RADIO: SEPTEMBER IS NATIONAL PREPAREDNESS MONTH

September 2011 has been designated as National Preparedness Month. This is an annual event sponsored by the Ready Campaign in partnership with Citizen Corps and known as the NPM Coalition. NPM Coalition membership is open to all individuals as well as all public and private sector organizations for free. Numerous ham radio organizations are already members of this group. The objective of National Preparedness Month is to encourage Americans to take simple steps to prepare for emergencies in their homes, businesses, and communities. By joining, both individuals and organizations agree to promote emergency preparedness during September. More information is on the web at tinyurl.com/arn-prepare (NPM Coalition release)

ENFORCEMENT: RADIO SUPPLIER CITED BY FCC FOR PROGRAMMING UNAUTHORIZED FREQUENCIES

The FCC has issued an official Citation to Flatcode Communications, Inc. of the Bronx, New York. This for programming into a transmitter frequencies for which the operator was not authorized in violation of section 90.427(b) of the Commission's Rules.

On March 15, 2011, agents from the Enforcement Bureau's Philadelphia Office conducted an investigation and found that Flatcode had programmed radio transmitting equipment for the Sheraton Four Points Hotel in Allentown, Pennsylvania with the General Mobile Radio Service frequency 462.550 MHz for which the Sheraton was not authorized. A representative for Flatcode later admitted to the FCC agent during a telephone conversation that Flatcode programmed the Sheraton's two way portable radios.

Now, in its June 28th release of the Citation, the FCC has said that Flatcode should take immediate steps to come into compliance and to avoid any recurrence of this misconduct. It said that future violations of the Rules in this regard could subject Flatcode to substantial monetary penalties, seizure of equipment, and criminal sanctions. Its added that monetary forfeitures of up to $16,000 for each violation or each day of a continuing violation and up to $112,500 for any single act could be imposed. (FCC)

**

RADIO LAW: LIGHTSQUARED VS GPS - ROUND 3

Its round three between LightSquared and the United States users of the Global Positioning system. This as the broadband provider says it will make concessions to the Global Positioning System user community to mitigate any possibility of interference. Amateur Radio Newsline's Jim Damron, N8TMW, has more:

--

As previously reported, LightSquared, is the Virginia-based company that hopes to build a nationwide wireless broadband network in spectrum directly adjacent to that used by the Global Positioning Sysytem. And now LightSquared is proposing to modify its network planning so as not to interfere with G-P-S systems.

The company says that it plans to move some of its operations to a different slice of spectrum and to transmit signals at lower power levels. His, to hopefully ensure that its network will not interfere with the Global Positioning System that relies on nearby wireless spectrum.

LightSquared outlined its intentions amid mounting concern that its new network would cripple G-P-S systems used for everything from aviation to public safety to military operations. The announcement follows the recent release of government test results showing that trial transmissions from LightSquared's wireless system interfered with G-P-S receivers used by the Coast Guard and NASA. Also that they caused Federal Aviation Administration G-P-S receivers and similar receivers used by state police, fire and ambulance crews to lose reception.

In January the Federal Communications Commission gave LightSquared approval to build a nationwide wireless network that would compete with super-fast systems being rolled out by AT&T and Verizon. The FCC sees the LightSquared network as part of a broad government push to bring high-speed Internet connections to all Americans. But it also now says that it will not permit LightSquared to begin rollout of its service until all potential interference problems with G-P-S have been solved.

I'm Jim Damron, N8TMW, reporting

--

More information on the future of the proposed LightSquared rollout should be forthcoming shortly. (RW)

**

RADIO LAW: FCC ISSUES FREEZE ON TV STATION REQUESTS TO MOVE CHANNEL ASSIGNMENTS

The FCC has issued a freeze on TV station requests to switch digital channel assignments. The move comes as the commission starts to contemplate how to reallocate 120 MHz of spectrum from the broadcast band to wireless broadband, and move the remaining broadcasters to make room for that wireless service.

The regulatory agency originally froze channel changes back in 2004 as it set up the first Digital TV table of channel allotments. It then lifted that freeze in 2008. Now it faces another channel-shifting operation to free up spectrum for broadband use. Because it now needs evaluate its reallocation and repacking proposals and their impact on the Post-Transition Table of DTV Allotments, the fCC says that it is appropriate to freeze the acceptance of additional rulemaking petitions to change channels at this time.

The FCC last year began the spectrum reclamation process with a rulemaking proposal on channel sharing. It also touched on reclassifying the broadcast band for shared use by wireless providers, and helping improve VHF Digital TV reception.

In a turn-about from the analog world, it is the UHF, not VHF band, that is prime Digital TV spectrum. This is particularly true in urban areas where UHF's ability to penetrate walls makes it less vulnerable to signal fade when used with indoor antennas. (B&C)

RADIO ON THE RADIO: HAM NATION AUDIENCE KEEPS GROWING

The audience for the Bob Heil, K9EID, hosted Internet TV show Ham Nation is growing. THius, as the show heads toward its third month on Twit TV. Amateur Radio Newsline's Don Wilbanks, AE5DW, has the latest on this broadband phenomenon:

--

Now about 2 months in, "Ham Nation", a netcast on amateur radio, is going strong. I

n case you haven't heard, Bob Heil, K9EID and Gordon West, WB6NOA host the weekly hour long show on ham radio via the TWiT network. TWiT, which stands for This Week in Tech, is an offshoot of the now defunct ZDTV, later known as TechTV and it's lead host, Leo Laporte.

Laporte, also known as the `chief twit", approached Heil about ham radio and the possibility of doing a show after discovering his microphones, which are popular not only with professional musicians, broadcasters and amateur radio operators, but also netcasters and podcasters.

Leo, who is studying for his Amateur Radio license, is no stranger to the hobby. Wayne Burdick of Elecraft and Laporte were roommates way back in their school days, so this bug has been in the back of his head for some time. In fact, the new state of the art TV studios that Laporte is building will prominently feature a ham radio station.

So far Ham Nation has had some pretty impressive guests. Joe Walsh, WB6ACU of Eagles fame wrote and performs the Ham Nation theme song. Larry Junstrom, K4EB, the bass player for the southern rock band 38 Special was a recent guest as well as the super Field Day crew of W3AO, who this year broke a 30 year record for Field Day contacts.

There's something for everyone, ham and non ham in Ham Nation, and from the people I saw in the chat room during the most recent show, amateur radio is getting exposed to a new and exciting audience. One who perhaps before seeing Ham Nation thought of us only as weird guys squirreled away in our basements with old, antiquated gear. As we all know, such is hardly the case, and now a whole new segment of the public is getting to know just how much fun and cutting edge Amateur Radio really is.

You can see Ham Nation every Tuesday at 9pm Eastern, 6pm Pacific. If you miss the live show audio and video archives are available for online viewing or downloading. Point your browser to twit.tv/hn. You'll like what you see.

>From south Mississippi, Don Wilbanks, AE5DW for the Amateur Radio Newsline.

--

Ham Nation isn't the only high tech show you might find enjoyable on the Twit network. To see for yourself just take your web browser to www dot twit dot tv. (AE5DW, ARNewsline(tm))

FORECASTING: SPACE WEATHER PREDICTION TO CONTINUE ON WWV AND WWVH

The Space Weather Prediction Center has changed its mind and will continue offering its service as a part of broadcasts offered by time standard stations WWV and WWVH.

You may recall that back in April the Center announced that it would cease providing the broadcast add-on service effective as of September 6th. That announcement was reportedly greeted with heavy negative feedback from the users of the service who came to rely on these broadcasts for alerts dealing with solar storms mid-latitude A and K indices and the like.

Now, in a news release on its website, the Space Weather Prediction Center says that it is no longer planning to discontinue the broadcast of its synoptic Geo-Alert products on WWV and WWVH and will continue to provide this service for the foreseeable future. It adds that additional updates to the content are underway as a result of the listener feedback process. The full announcement is on-line at swpc.noaa.gov/wwv. (NOAA)

HAM HAPPENINGS: HAM RADIO FREDRICHSHAFEN ATTRACTS 16,300

The 2011 Ham Radio convention in Friedrichshafen, Germany took place the weekend of June 24th to the 26th as many hams on this side the Atlantic were enjoying Field Day. This annual event has become known as Europe's answer to the Dayton Hamvention in the U-S-A and Japan's famed Ham Fair.

Taking place at a venue on picturesque Lake Constance, this year's Ham Radio attracted 184 exhibitors and 16,300 visitors. Attendees came from all over the world. In addition to the German amateur radio community, other countries represented included Italy, Malaysia, Japan, Qatar the United Kingdom and the United States.

During the event 124 young people were given a demonstration of amateur radio. Some even tried soldering and playing with the Morse code. A video captures the flavor of Europe's largest amateur radio event, narrated in German, is on-line at tinyurl.com/arn-europe-ham (Southgate)

CHANGING OF THE GUARD: NZART INFOLINE EDITOR ZL2NN - SK

Some sad news to report. World that New Zealand Amateur Radio Transmitters Infoline editor Jamie Pye, Zed-Ll2lNlN, became a Silent Key on Saturday July 2nd following a short illness. His funeral was scheduled to be held on Wednesday, July 6th. In lieu of flowers the family have asked for donations to the New Zealand Spinal Trust, Private bag 4708, Christchurch, New Zealand Charities Commission #CC43195 (NZART)

**

ON THE AIR: 2E1EUB TO TAKE TO THE BIRDS FROM RARE GRIDS

U-K satellite enthusiast Paul Robinson, 2E1EUB, will be activating some rare Grid Squares on several amateur radio satellites over the next few weeks. In a post on the AMSAT bulletin board he says that he will drive some 600 miles to the Outer Hebrides where he was to catch a ferry to the island of South Uist, and then moving to Harris and then Lewis Islands.

Robinson says that he will put as much time as possible operating A-O7 mode A and B plus FO29 and several other ham radio birds. This will be a 14 day operation that he hopes will also include several other stops. QSL go to 2M1EUB at his QRZ.com address. (Southgate)

**

EMERGING TECHNOLOGY: STUDYING THE KONDO EFFECT

Science Daily reports that a Princeton University researcher and his international team of collaborators have used lasers to peek into the complex relationship between a single electron and its environment. Amateur Radio Newsline's Michael Grebert, KJ4ZZV is here with the rest of the story:

--

The research is being lead by Hakan Tureci who is an assistant professor of Electrical Engineering at Princeton Uniuversity in New Jersey and brings fresh insight to the study of the Kondo problem. This is a phenomenon first observed in the 1930s, when researchers were surprised to find that resistance to electricity flowing through certain metals increases at very low temperatures. Normally, resistance through metals decreases as temperature is lowered, but that was not the case with these metals.

The phenomenon was explained 30 years later by Japanese scientist, Jun Kondo, as resulting from the presence of cobalt or other magnetic impurities in the metals. Scientists have further realized that the Kondo effect results from a relationship between electrons known as "entanglement" in which the quantum state of one electron is tied to those of neighboring electrons, even if the particles are later separated by considerable distances. In the case of Kondo effect, a trapped electron is entangled in a complex manner with a cloud of surrounding electrons.

Researchers have been intrigued by the Kondo effect in part because understanding how a trapped electron becomes entangled with its environment could help overcome barriers to quantum computing, which could lead to far more powerful computers than currently exist.

For the Amateur Radio Newsline, I'm Michael Grebert, KJ4ZZV, reporting from Music City, Nashville, Tennessee.

WORLDBEAT: SARL AND ICASA AGREE ON TESTING COMPROMISE

The South African Radio League and telecommunications regulator the Independent Communications Authority of South Africa have revisited the Amateur Radio Examination Moderation Process.

Right now, at each examination an SARL appointed moderator verifies the examination results, checks that all the marks are correctly computed and verifies that all questions are correctly marked. In a multiple choice examination the answer is either right or wrong. The examiner has no discretion.

There are however at times marginal cases where the candidate scores a very high mark in one section but just misses to score the required minimum of 50% in the other section. It is in cases like this that the moderator will now review the answer papers and makes a recommendation to the Independent Communications Authority of South Africa.

According to the SARL, in the last examination session there were a few marginal cases which were reviewed and recommendations were made to the telecommunications regulator. This in turn resulted in a few candidates now having passed the exam. (SARL)

ON THE AIR: CELEBRATING THE CENTRAL NEBRASKA BBQ STEAK FRY

On the air. the Central Nebraska Amateur Radio Club will be operating a special event station A-G-Zero-L from 1800 to 2400 UTC daily from July 28 to the 30th. This operation is being held to commemorate the club-sponsored annual hamfest and BBQ Steak Fry held at Victoria Springs State Recreation Area near the city of Anselmo. Frequencies to listen out on are 7.250, 14.055, 14.250 and 21.335 MHz. A special QSL card is available by sending a SASE to AGOL, 8900 Riverdale Road, Plattsmouth, Nebraska, 68048. (KOAIZ)

**

ON THE AIR: CELEBRATING THE FIRST FIRE DEPARTMENT IN BRAZIL

Also, be on the lookout for special event station PT155FD to be active between now and July 30th. This operation is to commemorate the 155th anniversary of the first official Fire Department in Brazil. Stations will be using this special call on 40, 20, 15 and 10 meters on SSB only. The QSL Manager for ths operation is PS7AB. Cards can go to him either direct or via the bureau. Electronic QSL's go to ps7ab (at) yahoo (dot) com.

**

DX

In DX, A group of operators from Italy are planning to activate Grand Popo, Benin, between August 5th and the 14th. Callsign will be TY1KS. Activity will be on all H-F bands and 6 meters, using 3 three Elecraft K3 transceivers and two Elecraft KPA500 amplifiers. Due to the high demand for this country, the focus will be on the lower bands and the Digital modes, but also SSB and the higher band will be well worked especially during the TEP openings. QSL via IZ8IYX or Logbook of the World.

F6ICX, will once again be on the air as 5R8IC from Saint Marie Island between November 15th and December 17th. Activity will be holiday style operating CW, RTTY, and PSK63. There will be no online log during his activity. QSL via his home callsign as found on QRZ.com.

ZR6DG and ZS6HB will be active as C92DG from the Timbavati Game Reserve in Tofo between 14th and 28th July. Their operation will be on the High Frequency bands only. QSL via ZR6DG.

W1NEK has announced he will be operating portable from Iraq through mid-August. His activity will be voice only his afternoons and evenings. QSL as directed on the air.

Lastly, DL7DF will be on holiday in Kenya between November 20th and December 3rd and plans to be active as 5Z4HW. Listen out for him on 160 through 10 meters using CW, SBB, RTTY, PSK31 and SSTV. QSL via his home callsign, direct or via the DARC Bureau.

(Above from various DX news sources)

**

THAT FINAL ITEM: THAT 110 YEAR OLD BULB STILL HAS US IN ITS SPELL

And finally this week, a follow-up to a story that we first aired some ten years ago. Its about a light bulb. A very old light bulb that keeps a Northern California fire station out of the dark. Here's Amateur Radio Newsline's Bruce Tennant, K6PZW, with the details:

--

A light bulb hanging in the Livermore Pleasanton California Fire Department has been burning steadily for exactly 110 years.

Lynn Owens, who's in charge of the "light bulb centennial committee", says that how it stays lit remains something of a mystery. He says that it's a 60-watt bulb but it only gives off only about four watts of light. Even so, but nobody knows why it keeps burning.

According to the lamp's website, the bulb is actually a somewhat different style bulb from what other manufacturers of the day produced. It was invented by Adolphe A. Chaillet and made by the Shelby Electric Company. It was donated by Dennis Bernal to the Livermore Volunteer Fire Department and this past June 18th was its 110th year of continuous illumination. This is a fact documented extensively by Guinness World Records.

One possible answer may be the way in which it was constructed. In a 2010 interview with the Daily Mail, bulb protector Steve Bunn ascribed the light's success to good old fashioned engineering. In the Shelby bulb, a coiled filament burned brighter and lasted longer than the Edison bulb -- this as evidenced by the longevity of the Livermore Pleasanton centennial bulb which celebrated its 110th year of nonstop duty back on June 18th.

For the Amateur Radio Newsline, I'm Bruce Tennant, K6PZW, a few hundred miles south of the Livermore Pleasanton fire station reporting from Los Angeles.

--

According to Owens, scientists from around the world have come to look at the bulb but why its lasted this long is still a mystery. You can visit it vicariously on the world-wide-web at www.centennialbulb.org.

**

NEWSCAST CLOSE

With thanks to Alan Labs, AMSAT, the ARRL, the CGC Communicator, CQ Magazine, the FCC, the Ohio Penn DX Bulletin, Radio Netherlands, Rain, the RSGB, the Southgate News and Australia's W-I-A News, that's all from the Amateur Radio Newsline(tm). 1622. THE MERITS OF ISLAM !!!!!!!!!!

Newsgroup: rec.radio.amateur.policy

THE MERITS OF ISLAM

There are many religions so why do Muslims think that Islam is true? Is there any factual basis?

This is a reasonable enough question for one who has not entered Islam, but one who believes in and practices this religion already knows the blessings which are his because of this religion. There are many reasons for this, which include the following:
(1) The Muslims worship Allah, Who has no partner, and Who has the most beautiful names and the highest attributes. Thus the Muslim’s focus and aim is concentrated, focused on His Lord and Creator; he puts his trust in Him and asks Him for help, patience and support; he believes that Allah is able to do all things, and has no need of a wife or son. Allah created the heavens and earth; He is the One Who gives life and death; He is the Creator and Sustainer from Whom the slave seeks provision. He is the All-Hearing Who responds to the supplication of His slave, and from Whom the slave hopes for a response. He is the All-Merciful and All-Forgiving, to Whom the slave turns in repentance when he has committed a sin or fallen short in his worship of Allah. He is the Omniscient and All-Seeing, who knows all intentions and what is hidden in people’s hearts. The slave feels ashamed to commit a sin by doing wrong to himself or to others, because his Lord is watching over him and sees all that he does. He knows that Allah is All-Wise, the Seer of the Unseen, so he trusts that what Allah decrees for him is good; he knows that Allah will never be unjust to him, and that everything that Allah decrees for him is good, even if he does not understand the wisdom behind it.

(2) The effects of Islamic worship on the soul of the Muslim include the following:

Prayer keeps the slave in contact with his Lord; if he enters it in a spirit of humiliation and concentration, he will feel tranquil and secure, because he is seeking a "powerful support," which is Allah, may He be glorified and exalted. For this reason, the Prophet of Islam, Muhammad peace be upon him used to say: "Let us find relaxation and joy in prayer." If something distressed him, he would hasten to pray. Everyone who finds himself faced with disaster and trials prayer finds strength, patience and consolation for him because he is reciting the words of his Lord, which cannot be compared to the effect of the words of a created being. If the words of some psychologists can offer a little comfort, what do you think of the words of the One Who created the psychologist?

Now let us look at Zakaat, which is one of the pillars of Islam. Zakaat purifies the soul from stinginess and miserliness, and accustoms people to being generous and helping the poor and needy. It will bring a great reward on the Day of Resurrection, just like other forms of worship. It is not burdensome, like man-made taxes; it is only 25 in every thousand, which the sincere Muslim pays willingly and does not try to evade or wait until someone chases him for it.

Fasting involves refraining from food and sex. It is a form of worship, and a way in which one can feel the hunger of those who are deprived. It is also a reminder of the blessings of the Creator, and it brings rewards beyond measure.

Hajj is the Pilgrimage to the sacred House of Allah, which was built by Ibrahim peace be upon him. By performing Hajj one is obeying the command of Allah and the call to come and meet Muslims from all over the world.

(3) Islam commands all kinds of good and forbids all kinds of evil. It encourages good manners and proper treatment of others. It enjoins good characteristics such as truthfulness, patience, deliberation, kindness, humility, modesty, keeping promises, dignity, mercy, justice, courage, patience, friendliness, contentment, chastity, good treatment, tolerance, trustworthiness, gratitude for favours, and self-control in times of anger. Islam commands the Muslim to fulfil his duty towards his parents and to uphold family ties, to help the needy, to treat neighbours well, to protect and safeguard the wealth of the orphan, to be gentle with the young and show respect to the old, to be kind to servants and animals, to remove harmful things from the road, to speak kind words, to forgive at the time when one has the opportunity to take revenge, to be sincere towards one’s fellow-Muslims, to meet the needs of the Muslims, to give the debtor time to repay his debt, to prefer others over oneself, to console others, to greet people with a smiling face, to visit the sick, to support the one who is oppressed, to give gifts to friends, to honour his guest, to treat his wife kindly and spend on her and her children, to spread the greeting of peace (salaam) and to seek permission before entering another person’s house, lest one see something private that the other person does not want one to see.

Some non-Muslims may do these things out of politeness or good manners, but they are not seeking reward from Allah or salvation of the Day of Judgement.

If we look at what Islam has prohibited, we will find that it is in the interests of both the individual and society as a whole. All these prohibitions serve to safeguard the relationship between the slave and his Lord, and the relationship of the individual with himself and with his fellow-man. The following examples demonstrate this:

Islam forbids the association of anything in worship with Allah and the worship of anything other than Allah, because this spells doom and misery. Islam also forbids visiting or believing soothsayers and

fortune-tellers; magic or witchcraft that may cause a rift between two people or bring them together; belief in the influence of the stars on events and people’s lives; cursing time, because Allah is directing its affairs; and superstition, because this is pessimism.

Islam forbids canceling out good deeds by showing off, boasting or reminding others of one’s favours; bowing or prostrating to anything other than Allah; sitting with hypocrites or immoral people for the purposes of enjoying their company or keeping them company; and invoking the curse or wrath of Allah on one another or damning one another to Hell.

Islam forbids urinating into stagnant water; defecating on the side of the road or in places where people seek shade or where they draw water; from facing the Qiblah (direction of prayer) or turning one’s back towards it when passing water or stools; holding one’s penis in one’s right hand when passing water; giving the greeting of salaam (peace) to one who is answering the call of nature; and putting one’s hand into any vessel before washing it, when one has just woken up.

Islam forbids the offering of any nafl (supererogatory) prayers when the sun is rising, when it is at its zenith, and when it is setting, because it rises and sets between the horns of Shaytaan (Satan); praying when there is food prepared that a person desires; praying when one urgently needs to pass water, stools or wind, because that will distract a person from concentrating properly on his prayer.

Islam forbids the Muslim to raise his voice in prayer, lest it disturb other believers; to continue offering supererogatory prayers at night when one feels drowsy -such a person should sleep then get up; to stay up all night in prayer, especially one night after another; and to stop praying when there is doubt as to the validity of one’s wudoo’ - unless one hears a sound or smells an odour.

Islam forbids buying, selling and making "lost and found" announcements in the mosque - because it is the place of worship and remembrance of Allah, where worldly affairs have no place.

Islam forbids haste in walking when the iqaamah (call immediately preceding congregational prayer) is given, and prescribes walking in a calm and dignified manner. It is also forbidden to boast about the cost of building a mosque; to decorate a mosque with red or yellow paint or adornments which will distract the worshippers; to fast day after day without a break; and for a woman to observe a supererogatory fast when her husband is present without his permission.

Islam forbids building over graves, making them high, sitting on them, walking between them wearing shoes, putting lights over them or writing on them. It is forbidden to disinter the dead or to take graves as places of worship. Islam forbids wailing, tearing one’s clothes or leaving one’s hair unkempt when a person dies. Eulogizing the dead in the manner of the times of Ignorance (Jaahiliyyah) is also

forbidden, although there is nothing wrong with informing others that a person has died.

Islam forbids the consumption of riba (interest); all kinds of selling which involve ignorance (of the product), misleading and cheating; selling blood, wine, pork, idols and everything that Allah has forbidden - their price, whether bought or sold - is haraam; which is offering a price for something one has no intention of buying, as happens in many auctions; concealing a product’s faults at the time of selling; selling something which one does not own or before it comes into one’s possession; undercutting, outbidding or out bargaining another; selling produce before it is clear that it is in good condition and free of blemish; cheating in weights and measures; and hoarding. A partner who has shares in a plot of land or a date palm tree is forbidden to sell his share without consulting his partners. It is forbidden to consume the wealth of orphans unjustly; to bet or gamble; to take anything by force; to accept or offer bribes; to steal people’s wealth or to consume it unjustly; to take something for the purpose of destroying it; to undermine the value of people’s possessions; to keep lost property which one has found, or to keep quiet about it and not announce it, for it belongs to the one who recognises it; to cheat in any way; to ask for a loan with no intention of repaying it; to take anything of the wealth of a fellow-Muslim, unless it is given freely, because what is taken because of another person’s shyness is haram; and to accept a gift because of intercession.

Celibacy and castration are forbidden, as is marrying two sisters, or a woman and her aunt (paternal or maternal), whether he marries the aunt after marrying her niece or vice versa, for fear of breaking the ties of kinship. It is forbidden to make deals in marriage, such as saying "Let me marry your daughter and I will give you my daughter or sister in marriage." Such reciprocal deals are a form of oppression and injustice, and haram. Islam forbids mut’ah (temporary marriage), which is a marriage contract for a period of time agreed by the two parties, at the end of which the marriage expires. Islam forbids intercourse with a menstruating woman, until she has purified herself (by taking a bath after her period ends), and also forbids anal intercourse. A man is forbidden to propose marriage to a woman when another man has already proposed to her, unless the other man withdraws his proposal or gives him permission. It is forbidden to marry a previously-married woman without consulting her, or a virgin without seeking her permission. It is forbidden to wish (a newly married couple) "Bi’l-rafaa’ wa’l-baneen (a joyful life and many sons)," because this is the greeting of the people of Jaahiliyyah, who hated daughters. The divorced woman is forbidden to conceal what Allah has created in her womb (if she is pregnant). A husband and wife are forbidden to speak (to others) about the intimacies of married life. It is forbidden to turn a woman against her husband or to take divorce lightly. It is forbidden for a woman to ask for another’s divorce, such as asking a man to divorce a woman so that she can marry him. A

wife is forbidden to spend her husband's money without his permission, or to keep away from his bed without good reason, because the angels will curse her if she does that. A man is forbidden to marry his father's wife, or to have intercourse with a woman who is pregnant from another man. It is forbidden for a man to practise 'azl (coitus interrupts) with his free wife without her permission. It is forbidden for a man to return home from a journey late at night and startle his family, unless he has previously notified them when he will arrive home. A man is forbidden to take anything of his wife's mahr (dowry) without her consent, or to keep annoying his wife so that she will give up her wealth.

Islam forbids women to make a wanton display of themselves (tabarruj). Women are forbidden to admit anyone into their husband's home without his permission; his general permission is acceptable so long as they stay within the limits of sharee'ah. It is forbidden to separate a mother and child (in case of divorce); to let one's womenfolk behave foolishly (in an immoral fashion) and not say anything; to let one's gaze wander everywhere; and to follow an accidental glance with an intentional glance.

Islam forbids the eating of dead meat, regardless of whether it died by drowning, strangulation, shock or falling from a high place; eating blood, pork and anything slaughtered in a name other than that of Allah or for idols; eating the flesh or drinking the milk of beasts that feed on filth and waste matter; eating the flesh of every carnivorous beast that has fangs and every bird that has talons; eating the meat of domesticated donkeys; killing animals by keeping them and throwing stones at them until they die, or detaining them without food until they die; slaughtering with teeth or nails; slaughtering one animal (for food) in front of another; or sharpening the knife in front of the animal to be slaughtered.

In the area of clothing and adornment, men are forbidden the extravagance of wearing gold. Muslim are forbidden to be naked or to expose their thighs; to leave their clothes long (below the ankles) and trail them on the ground for the purpose of showing off; and to wear clothes that will attract attention.

It is forbidden to bear false witness; to make false accusations against a chaste believing woman; to accuse someone who is innocent; to utter lies; to slander and backbite; to call people by offensive nicknames; to spread gossip and malicious slander; to make fun of the Muslims; to boast about one's status; to shed doubts on a person's lineage; to utter slander, insults and obscenities; to speak in an indecent or rude manner; or to utter evil in public, except by one who has been wronged.

Islam forbids telling lies; one of the worst kinds of lie is to lie about dreams, like fabricating dreams and visions in order to prove one's virtue, or make some material gains, or to frighten an enemy.

Muslims are forbidden to praise themselves, or to talk in a secret way: two may not converse secretly to the exclusion of a third, because this is offensive. It is forbidden to curse a believer or someone who does not deserve to be cursed.

Islam forbids speaking ill of the dead; praying for death; wishing for death because of some suffering that one is passing through; praying against one’s self, one’s children, one’s servants or one’s wealth.

Muslims are told not to eat the food that is directly in front of others or to eat from the centre of the dish or platter; rather they should eat from what is directly in front of them or thereabouts, because the barakah (blessing) comes in the middle of the food. It is forbidden to drink from a broken edge of a vessel, because this could cause harm; or to drink from the mouth of a vessel; or to breathe into it. It is forbidden to eat while lying on one’s stomach; to sit at a table where wine is being drunk; to leave a fire burning in one’s house when one sleeps; to sleep with Ghamr in one’s hand, like an offensive smell or the remainder of food (grease); to sleep on one’s stomach; or to talk about or try to interpret bad dreams, because these are tricks of the Shaytaan.

It is forbidden to kill another person except in cases where it is right to do so; to kill one’s children for fear of poverty; to commit suicide; to commit fornication, adultery or sodomy (homosexuality); to drink wine, or even to prepare it, carry it from one place to another, or sell it. Muslims are forbidden to please people by angering Allah; to offend their parents or even to say "Uff" (the slightest word of contempt) to them; to claim that a child belongs to anyone but his real father; to torture by means of fire; to burn anyone, alive or dead, with fire; to mutilate the bodies of the slain; to help anyone commit falsehood; or to co-operate in wrongdoing and sin.

It is forbidden to obey any person by disobeying Allah; to swear falsely; to swear a disastrous oath; to eavesdrop on people without their permission; to invade people’s privacy or look at their private parts; to claim something that does not belong to one or that one did not do, for the purpose of showing off; to look into someone’s else’s house without permission; to be extravagant; to swear an oath to do something wrong; to spy on others or be suspicious about righteous men and women; to envy, hate or shun one another; to persist in falsehood; to be arrogant or feel superior; to be filled with self-admiration; to be pleased with one’s arrogance. Islam forbids taking back one’s charity, even if one pays to get it back; employing someone to do a job without paying him his wages; being unfair in giving gifts to one’s children; bequeathing everything in one’s will and leaving one’s heirs poor - in such a case the will should not be executed; writing a will that concerns more than one third of one’s legacy; being a bad neighbour; or changing a will to the detriment of one or some of one’s heirs. A Muslim is forbidden to forsake or shun his brother for more than three days, except for a reason sanctioned by sharee’ah; to hold small stones between two fingers and throw them because this could

cause injury to eyes or teeth; to include his heirs in a will, because Allah has already given heirs their rights of inheritance; to disturb his neighbour; to point a weapon at his Muslim brother; to hand someone an unsheathed sword, lest it harm him; to come (walk) between two people except with their permission; to return a gift, unless there is some shar'i objection to it; to be extravagant; to give money to foolish people; to wish to be like someone to whom Allaah has given more of something; to cancel out his charity by giving offensive reminders of his giving; to wilfully conceal testimony; or to oppress orphans or scold one who asks for help or money. It is forbidden to treat with evil medicines, because Allah would not create a cure for this Ummah which includes something that He has forbidden. It is forbidden to kill women and children in warfare; to boast to one another; or to break promises.

Islam forbids betraying a trust; asking for charity that one does not need; alarming a Muslim brother or taking away his possessions, whether jokingly or seriously; changing one's mind after giving a gift, except in the case of a gift from a father to his child; practising medicine without experience; or killing ants, bees and hoopoe birds. A man is forbidden to look at the 'awrah (private parts) of another man, and a woman is forbidden to look at the 'awrah of another woman. It is forbidden to sit between two people without their permission; or to greet only those whom one knows, because the greeting is to be given to those whom you know and those whom you do not know. A Muslim is forbidden to let an oath come between him and good deeds; he should do what is good and make expiation for the oath. It is forbidden to judge between two disputing parties when one is angry, or to judge in favour of one party without hearing what the other has to say. It is forbidden for a man to walk through the market-place carrying something - like a sharp weapon - that could harm the Muslims, unless it is properly covered. A Muslim is forbidden to make another person get up, so that he can take his place.

There are more commands and prohibitions which came for the benefit and happiness of individuals and mankind as a whole. Have you ever seen any other religion that can compare to this religion?

Read this response again, then ask yourself: is it not a great pity that I am not one of them? Allah says in the Qur'an (interpretation of the meaning):

"And whoever seeks a religion other than Islam, it will never be accepted of him, and in the Hereafter he will be one of the losers." [Aal 'Imraan 3:85]

Finally, I hope that everyone who reads this will be guided to the correct way and to follow the truth. May Allah protect you and us from all evil.

What does your URL have to do with comp.os.os2.advocacy,
alt.astrology.metapsych,news.admin.net-abuse.usenet,
alt.fraud, radioguy? The relevance appears limited to
only the last newsgroup to which you posted.

==> 2011 SECOND MEETING OF THE ARRL BOARD OF DIRECTORS TO TAKE PLACE THIS WEEKEND

The ARRL Board of Directors will hold its 2011 Second Meeting this weekend in Windsor, Connecticut, with Directors, Vice Directors and ARRL Board Officers in attendance. Per the Articles of Association the ARRL Board of Directors meets twice a year, in January and July. Find a copy of the meeting's agenda here <http://www.arrl.org/files/media/News/2011_Second_Meeting_Draft_Agenda.pdf>.

==> +ON THE AIR: THE REPUBLIC OF SOUTH SUDAN NOW A DXCC ENTITY

At 10 AM (EDT) on Thursday, July 14, the UN General Assembly met to vote on whether or not to admit the Republic of South Sudan as its

193rd member state. The Republic of South Sudan was admitted by a vote of acclimation and is now a member of the United Nations <http://www.un.org/apps/news/story.asp?NewsID=39034&Cr=South+Sudan&Cr1=>. Immediately following the General Assembly meeting, the flag of the Republic of South Sudan flew for the first time in front of the UN, ceremoniously marking its membership in the UN. The membership of the Republic of South Sudan in the United Nations invokes DXCC status under Section II, 1(a) of the DXCC rules <http://www.arrl.org/rules>. As such, the new country is declared a DXCC entity and QSOs for this new entity will be accepted immediately, with a start date of July 14, 2011.

According to DXCC Manager Bill Moore, NC1L, the Honor Roll numbers move from 340 to 341 for the Top of the Honor Roll, and for Honor Roll it becomes 332. "The deadline for the Honor Roll and annual listings is December 31, so you must submit the new entity to DXCC by then in order to retain your Honor Roll status," Moore explained. "For Logbook of The World (LoTW <https://p1k.arrl.org/lotwuser/default>), you may submit all your QSOs with the Republic of South Sudan stations anytime. There is no need to hold them out of your log or do anything differently from what you already have been doing. You do not need to assign country names or identifiers. After we issue certificates to the Republic of South Sudan license holders, LoTW will make matches and assign the correct entities automatically." Click here <http://www.arrl.org/news/us-recognizes-world-s-newest-country-the-republic-of-south-sudan>
for more on how the Republic of South Sudan became the newest DXCC entity.

==> + FCC NEWS: RECONROBOTICS PAYS $17,500 TO END FCC INVESTIGATION OF RULES VIOLATIONS

On Wednesday, July 13, the FCC announced that its Enforcement Bureau and ReconRobotics have entered into a Consent Decree. This resolves an FCC investigation in response to a complaint filed by the ARRL. In 2010, the ARRL alleged that ReconRobotics had violated Section 302a(b) of the Communications Act of 1934 as amended and Section 2.803 of the Commission's rules regarding the manufacturing, marketing, distributing and selling of radio frequency transmitters. In the complaint the ARRL alleged that ReconRobotics had unlawfully marketed the Recon Scout -- a remote-controlled, maneuverable surveillance robot operating in the 430-448 MHz band -- to public safety agencies and certain security personnel prior to the grant of a necessary waiver. The FCC granted a waiver to ReconRobotics in 2010 allowing public safety licensees to operate the device in a portion of the 70 cm band. To date, no license applications have been granted by the Commission for the device and the ARRL has petitioned to deny all applications filed. Read more here <http://www.arrl.org/news/reconrobotics-pays-17-500-to-end-fcc-investigation-of-rules-violations>.

==> + PUBLIC SERVICE: HURRICANE WATCH NET SEEKS NEW MEMBERS

The various organizations that assist the National Hurricane Center (NHC) in Miami are gearing up for what forecasters are predicting to be a very active storm season. One organization that assists the NHC is the Hurricane Watch Net (HWN). One of the functions of HWN is to provide on-the-ground, real-time weather data to the forecasters at the NHC. The HWN gets this weather data from Amateur Radio operators who volunteer their time to monitor data from their calibrated home weather stations and report that data to the HWN. To better assist the NHC, HWN Manager Kirk Harding, K6KAR, told the ARRL that the HWN is looking for new members. Read more here <http://www.arrl.org/news/hurricane-watch-net-seeks-new-members-1>.

==> + AMATEUR RADIO IN THE CLASSROOM: ARRL EXECUTIVE COMMITTEE APPROVES EQUIPMENT GRANTS FOR SIX SCHOOLS

In June, the ARRL Executive Committee reviewed grant applications for the ARRL's Education & Technology Program (ETP), awarding equipment valued at nearly $5000 to six schools. More than 575 schools across the country have received support from the ETP in the form of grants for equipment, curriculum and resources, as well as teacher in-service training through the Teachers Institute on Wireless Technology. Applications for equipment and resource grants are accepted twice each year; application deadlines are May 1 and November 1.

A central goal of the ETP is to develop a foundation of wireless technology literacy among America's teachers and students. It employs Amateur Radio to explore radio science and electronics and provide hands-on activities that engage students' minds and imaginations, opening doorways into math, science and technology curriculum topics, as well as other core curriculum areas such as geography and language arts. Read more here <http://www.arrl.org/news/arrl-executive-committee-approves-grants-for-six-schools>.

==> + OFCOM TESTS 70 CM BAND IN ADVANCE OF 2012 SUMMER OLYMPIC GAMES IN LONDON

In April, Ofcom -- the British equivalent to the FCC -- approached the Radio Society of Great Britain (RSGB) to help determine which sections of the 70 cm band could be used by the London Olympic Committee for a limited period before, during and after the 2012 Summer Olympic Games and the 2012 Summer Paralympic Games. Both events will be held in London.

"As a secondary user of the band, we as radio amateurs have no specific rights to any of those frequencies," the RSGB stated on its website. "Rather than just imposing changes, Ofcom has approached the Society in the spirit of cooperation to work together to solve the problem. The RSGB intends to work constructively on this matter to reach agreement with Ofcom on the segments that can be released on a temporary basis. Ofcom has given clear and unambiguous assurance that the segments used will be returned once the London 2012 Games are over." Read more here <http://www.arrl.org/news/ofcom-tests-70-cm-band-in-advance-of-2012-summer-ol

ympic-games-in-london>.

==> + NEW SECTION MANAGER APPOINTED IN WEST TEXAS

Bill Roberts, W5NPR, of Alpine, has been appointed as the Interim West Texas Section Manager as of July 8, 2011. ARRL Membership and Volunteer Programs Manager Dave Patton, NN1N, made the appointment in consultation with ARRL West Gulf Division Director David Woolweaver, K5RAV. Roberts has served as the ARRL West Texas Section Traffic Manager since 2009. He is a past president of the Big Bend Amateur Radio Club and is also active as a back-up net control station for the Big Bend Emergency/West Texas ARES® Net and a net control station for the National Traffic System's Daytime Region Net 5.

John Dyer, AE5B, completed his latest term of office as the West Texas Section Manager on June 30. Dyer has served as the top Field Organization official in West Texas since July 2007; he previously served as Section Manager from October 2002-June 2005. Dyer decided not to run for the new term of office that began July 1, 2011. Roberts will serve as Interim West Texas Section Manager until a Section Manager is declared elected. Read more here <http://www.arrl.org/news/new-section-manager-appointed-in-west-texas>.

==> SOLAR UPDATE

Tad "I'm gonna soak up the Sun <http://www.youtube.com/watch?v=KIYiGA_rIls>" Cook, K7RA, reports: The average daily sunspot numbers this week were up 57 percent over the previous seven days, rising from 41.6 to 65.6, while the average daily solar flux rose just 3 points to 89.1. There seem to be plenty of sunspots of late, but none have been large, so the sunspot number and solar flux are not as high as in some previous months. A new sunspot appeared on July 7, then three more the next day on July 8, then a new one each day on July 9, 10 and 11 and two more on July 13. A coronal mass ejection on July 9 gave us some geomagnetic activity a couple of days later. Current forecast has an active day on July 14, with planetary A index at 17, then on July 15-24 at 8, 5, 5, 8, 10, 15, 12, 8, 8 and 5. Solar flux is predicted at 95 on July 14-15, 92 on July 16-17, 90 on July 18-20, then 92, 94, 90, 89 and 87 on July 21-25. Look for more information on the ARRL website on Friday, July 15. For more information concerning radio propagation, visit the ARRL Technical Information Service Propagation page <http://www.arrl.org/propagation-of-rf-signals>. This week's "Tad Cookism" is brought to you by Sheryl Crow's Soak Up the Sun <http://en.wikipedia.org/wiki/Soak_Up_the_Sun>.

==> NEW QUICKSTATS POLL NOW AVAILABLE ON ARRL WEBSITE

Four new poll questions have just been published on the QuickStats page <http://www.arrl.org/quickstats> on the ARRL website. Let your voice be heard!

Questions in this month's QuickStats poll:

- Is it becoming more difficult to find parts for your homebrew projects?
- Have your neighbors ever complained about your outdoor antennas?
- What is your favorite source for used Amateur Radio equipment?
- Are you active on 6 meter FM?

Visit the QuickStats page <http://www.arrl.org/quickstats> and be sure to bookmark it in your browser. Results from this QuickStats poll will be published in the October 2011 issue of QST on the QuickStats page, located in the rear advertising section of the magazine. Along with monthly poll results, QST QuickStats offers colorful charts and graphs that highlight interesting Amateur Radio statistics.

==> THIS WEEK ON THE RADIO

This week:

- July 16 -- Feld Hell Sprint
- July 16-17 -- DMC RTTY Contest; CWops Mini-CWT Test; CQ Worldwide VHF Contest; North American QSO Party (RTTY)
- July 17 -- CQC Great Colorado Gold Rush
- July 18 -- Run for the Bacon QRP Contest
- July 21 -- NAQCC Straight Key/Bug Sprint

Next week:

- July 22 -- NCCC Sprint Ladder
- July 24 -- WAB 144 MHz QRO Phone
- July 27 -- SKCC Sprint
- July 27-28 -- CWops Mini-CWT Test

All dates, unless otherwise stated, are UTC. See the ARRL Contest Branch page <http://www.arrl.org/contests>, the ARRL Contest Update <http://www.arrl.org/The-ARRL-Contest-Update> and the WA7BNM Contest Calendar <http://www.hornucopia.com/contestcal/index.html> for more information. Looking for a Special Event station? Be sure to check out the ARRL Special Event Stations Web page <http://www.arrl.org/special-event-stations>.

==> UPCOMING ARRL SECTION, STATE AND DIVISION CONVENTIONS AND EVENTS

- July 15-17 -- ARRL Montana State Convention <http://www.arrl.org/hamfests/montana-state-convention-glacier-waterton-international-hamfest>,
Essex, Montana
- July 29-30 -- ARRL Oklahoma State Convention <http://www.arrl.org/hamfests/oklahoma-state-convention-ham-holiday-2011>,
Oklahoma City, Oklahoma
- August 5-6 -- ARRL Texas State Convention <http://www.arrl.org/hamfests/texas-state-convention-austin-summerfest-1>,
Austin, Texas
- August 5-7 -- ARRL Rocky Mountain Division Convention

<http://www.arrl.org/hamfests/rocky-mountain-division-convention-1>,
Taos, New Mexico; ARRL Midwest Division Convention
<http://www.arrl.org/hamfests/midwest-division-convention>, Cedar
Rapids, Iowa
- August 20 -- ARRL West Virginia State Convention
<http://www.arrl.org/hamfests/west-virginia-state-convention-1>,
Weston, West Virginia
- August 20-21 -- ARRL Alabama State Convention
<http://www.arrl.org/hamfests/alabama-state-convention-huntsville-hamfest>,
Huntsville, Alabama
- August 21 -- ARRL Kansas State Convention
<http://www.arrl.org/hamfests/kansas-state-convention-1>, Salina,
Kansas
- August 28 -- ARRL Western Pennsylvania Section Convention
<http://www.arrl.org/hamfests/western-pennsylvania-section-convention-1>,
New Kensington, Pennsylvania
- September 9-11 -- ARRL Southwestern Division Convention
<http://www.arrl.org/hamfests/southwestern-division-convention-hamcon-2011>,
Torrance, California
- September 11 -- ARRL Great Lakes Division Convention
<http://www.arrl.org/hamfests/great-lakes-division-convention-findlay-hamfest
>,
Findlay, Ohio
- September 17 -- ARRL Roanoke Division Convention
<http://www.arrl.org/hamfests/roanoke-division-convention-virginia-beach-hamf
est>,
Virginia Beach, Virginia
- September 24 -- ARRL Washington State Convention
<http://www.arrl.org/hamfests/washington-state-convention-35th-annual-spokane
-hamfest>,
Spokane Valley, Washington

To find a convention or hamfest near you, click here

1715. Marrying a Muslim

Newsgroup: rec.radio.amateur.policy
Date: 2011-07-15 03:00:33 UTC
From: Anon <anon@anon>
Message-ID: <4rl01k.pej.19.1@news.alt.net>
Source record: 246036

My daughter just walked into the living room and said, "Dad, cancel my allowance immediately, rent my room out, throw all my clothes out of the window, take my TV, and stereo, and iPhone, and iPod, and my laptop. Please take all of my jewelry to the Salvation Army or Cash Converters. Then sell my new car, take my front door key away from me and throw me out of the house. Then disown me and never talk to me again. And don't forget to write me out of your will and leave my share to my brother".

Well, she didn't put it quite like that... she actually said...

"Dad this is my new boyfriend, Mohamed."

1716. Amateur Radio Newsline(tm) Report 1770 - July 15 2011

Amateur Radio Newsline(tm) Report 1770 - July 15 2011

Amateur Radio Newsline report number 1770 with a release date of
Friday, July 15 2011 to follow in 5-4-3-2-1.

The following is a Q-S-T. The deployment of ARISSat One is delayed,
the FCC initiates a big project to bring the Internet to students and
schools; the Hurricane Watch Net is looking to expand its storm spotter
database, and love triumphs at Field Day. Find out the details are on
Amateur Radio Newsline(tm) report number 1770 coming your way right
now.

(Billboard Cart Here)

**

HAM RADIO IN SPACE: ANOTHER ARISSAT-1 DELAY

The orbiting of ARISSat One has been delayed for a few weeks. Bill
Pasternak, WA6ITF, is in the newsroom with the latest details:

--

According to ARISSat One Project Manager Gould Smith, WA4SXM , the
former Suit-Sat will not make an appearance in space until sometime in
August.

In a news release, Smith said he and ARISS Hardware Engineer Lou
McFadin, W5DID participated in a teleconference call this week with
NASA to review the Roscosmos spacewalk procedures for the release of
ARISSat One during E-V-A 29. For those who never heard the term before,
E-V-A is an acronym for Extra Vehicular Activity and is NASA-ese for
describing a spacewalk

Smith now says the discussion centered on preparation procedures
including the battery being charged and assembled into the satellite.
Also discussed were the procedures to remove the protective quilts from
the solar cells and turning on the safety switches prior to deployment.

During a later teleconference Sergey Samburov, RV3DR announced that the
ARISSat One battery will be charged in late July and a test of the
system will be conducted from the ISS from 1915 UTC July 30th to about
1200 or 1400 UTC July 31st. The standard ARISSat One 2 meter downlink
band plan should be transmitted as well as the FM signal also
downlinked on 437.55 MHz.

The ARRISSat One team believes that it is looking at an August 3rd date for actual deployment, but notes that this is all subject to change.

More information as it becomes available. For the Amateur Radio Newsline, I'm Bill Pasternak, WA6ITF, in the newsroom in Los Angeles.

--

More on ARISSat One in future Amateur Radio Newsline reports. (ANS)

**

RADIO EDUCATION: FCC ANNOUNCES LEARNING ON THE GO

The FCC has officially launched an innovative program for 20 schools and libraries in 14 states aimed at giving participating Kindergarten through 12th grade students off-premises connections to the Internet. This, to increase access to digital textbooks, cutting-edge interactive learning tools, and other innovative wireless technologies. Amateur Radio Newsline's Norm Seeley, KI7UP, has the details:

--

The new FCC wireless pilot project is called "Learning On-The-Go," and will provide up to $9 million for the 20 schools and libraries selected for the 2011-2012 funding year. It builds on the FCC's major modernization of the E-rate program last fall, and follows recommendations of the National Broadband Plan. Previously, the E-rate program supported on-campus connectivity only.

According to a 2010 E-rate survey, approximately 50 percent of the schools and libraries that responded indicated that they plan to implement or expand the use of digital textbooks and other wireless devices for digital learning. The 20 selected projects include initiatives to improve off-campus access to e-textbooks for students; connectivity for netbooks for students living in remote, isolated areas and access to flexible, online education programs for home-bound students unable to attend classes.

To initiate the funding process, the FCC has issued an order listing the 20 selected project applicants, outlining participant reporting requirements and more detailed information about the program.

Last September, the FCC initiated the pilot program in its Schools and Libraries Sixth Report and Order and, in November, it issued a public notice setting a December application deadline. The Commission received 94 applications and, in March, issued a public notice announcing the initial selected project participants.

Qualified pilot programs will be funded in the 2011through 2012 school year, assuming compliance with all other program requirements.

This pilot program is one of a series of initiatives in the FCC Education Agenda to modernize the E-rate program to help bring fast, affordable Internet access to schools and libraries across the country.

In addition to this program's goal to support off-campus wireless Internet connectivity for mobile learning devices for schools and libraries across the country, the Schools and Libraries Sixth Report and Order is also helping to bring super-fast fiber connections to schools and libraries all across the country via unused fiber optic lines already in place.

The FCC has also opened the door to what it calls "School Spots" where schools have the option to provide Internet access to the local community after students go home. This the regulatory agency says can bring the benefits of super-fast broadband to people who otherwise lack access to the Internet.

Under the "Learning On-The-Go" pilot program, mobile learning devices enable teachers and parents to tailor school curriculum and interactive learning to students' skill sets. Digital textbooks never go out of date and students will have greater opportunities to access the latest educational curriculum available.

For the Amateur Radio Newsline, I'm Norm Seeley, KI7UP, in Scottsdale, Arizona.

--

The FCC's adds that its E-rate program will continue to support schools and libraries across America working toward the goal of helping ensure that the nations students receive the best education and the high-tech skills to compete in the 21st Century economy. A copy of the FCC Order is available on the FCC website at tinyurl.com/fcc-learning (FCC)

**

RESCUE RADIO: HURRICANE WATCH NET LOOKING FOR ADDITIONAL REPORTING STATIONS

The Hurricane Watch Net is currently looking for amateur radio operators who are located in hurricane prone areas to become part of a database of "Official Reporting Stations."

One of the functions of Hurricane Watch Net is to provide on the ground, real-time weather data to the forecasters at the National Hurricane Center in Miami, Florida. The Hurricane Watch Net gets this information from amateur radio reporting stations who volunteer their time to monitor data from their home weather stations and report that data to the net that operates on 14.325 MHz.

One important benefit of registering in the database is that the Hurricane Watch Net will notify you of upcoming activations should you be located in the affected area of a storm. If you are interested in joining the Hurricane Watch Net's team as one of its Official Reporting Stations, take your web browser to www dot hwn dot org. Then click on the words "Join Our Team" and complete and submit the short web form that you will see on your screen. Also keep in mind that this is one

ham radio activity where the information you provide as a net member could help save lives. (HWN)

**

RESTREUCTURING: EUROPEAN CB'ERS GET SSB OPERATION

A decision by the European Union has paved the way for the use of Single Sideband on 27 MHz CB across the British Isles and Europe. The revised regulation will permit European CB operators the use of SSB equipment running 12 watts Peak Envelope Power output in the frequency band 26.960 to 27.410 MHz. The European Union decision to permit SSB on 11 meters came into force on June 24th and carries a preferred implementation by national telecommunications administrations of October 1st. (Southgate)

**

RADIO RULES: LIGHTSQUARED MAY BE ATTEMPTING TO BYPASS FCC REGULATION

The GPS versus broadband saga continues. According to the July 7th issue of the aviation industry newsletter ainonline.com, LightSquared appears to be attempting do an end-run around the FCC to try to get its proposed high speed broadband service into operation.

Possibly recognizing that the July 1st final report on GPS testing showed that interference from its proposed broadband system was worse than predicted, the newsletter says that LightSquared lawyers are now bypassing the FCC and submitting technical papers directly to the United Nation's International Telecommunications Union in Geneva.

As we all know, the I-T-U is the world body that allocates frequency bands internationally within the radio spectrum to different user groups such as aviation, surface and weather. It also regulates and monitors their use. As such, ITU rules are regarded as much stricter than the typical recommendations made by any government telecommunications agency.

Meanwhile, both LightSquared and the GPS community are accelerating their public-relations campaigns. LightSquared is announcing initial customers and statements of support from Internet and voice-over-Internet providers for its 4G broadband system. This, while the GPS industry warns of ominous test results regarding interference from LightSquared's signals that could become a matter of life and death for first responders, such as ambulances, police and fire department vehicles.

In Congress, the House of Representatives included in a financial appropriations bill a prohibition on further FCC expense on LightSquared's proposal, even including staff salaries, until the company presents a complete GPS protection plan.

And in a late breaking development, a federal report documenting GPS interference by the proposed LightSquared satellite-terrestrial

broadband network has been released. In its findings, the National Telecommunications and Information says that it supports a recommendation that additional tests be performed and also recommends that the FCC continue to withhold authorization for LightSquared to commence commercial operations until all the available test data can be analyzed and all valid concerns have been resolved. More is on-line at tinyurl.com/arn-lightsquared-3. (ainonline.com, RW)

(5 sec pause here)

**

RESCUE RADIO: FCC REMINDS VPD'S OF OBLIGATION TO AIR EMCOMM INFORMATION TO THE DISABLED

The FCC says that in light of the recent flooding in the south, the tornadoes in various parts of the country, and the already active storm season, that it is issuing a Public Notice on information distribution. This, to remind video programming distributors of their obligation to make emergency information accessible to persons with hearing and vision disabilities in accordance with section 79.2 of the Commission's rules. Amateur Radio Newsline's Jim Davis, W2JKD, has the details:

--

Under section 79.2, emergency information encompasses what the regulatory agency calls critical details regarding the emergency and how to respond to it. It also must provide information for consumers about how to contact their video programming distributor or the Commission regarding compliance with the rule. Those affected include broadcasters, cable operators, satellite television services, and "any other distributor of video programming for residential reception that delivers such programming directly to the home.

The FCC adds that the need to comply with section 79.2 and make the critical details of urgent information accessible is not always limited to the immediate geographic areas affected by the emergency. This is because in some cases information such as the relocation of individuals outside that immediate geographic area also falls within the rule's mandate. Accordingly, compliance with section 79.2 could include providing information to non-impacted areas sheltering individuals displaced by a large-scale disaster. This might include incidents such as the recent tornado devastation to Joplin, Missouri or in 2005 when Hurricane Katrina struck the Gulf Coast.

Im Jim Davis, W2JKD.

--

The FCC says that all video programming distributors that air emergency information are required to make this information accessible who are visually or aurally handicapped. There are no exemptions to section 79.2. A local broadcast licensee is responsible for complying with section 79.2 regardless of the technology used to deliver its signal to consumers. (FCC)

RESCUE RADIO: TORNADO VIDEO NOW ON LINE

A anthology of broadcast television and radio coverage of recent tornadoes and their aftermath that was shown at the recent National Association of Broadcasters Education Foundation's Celebration to Service to America Awards is now available for anyone to view on-line. The six-plus minute clip shows the twisters along with a series of TV meteorologists warning people to take cover.

One clip from a live news chopper shows the tornado funnel from the level of the cloud ceiling. Another shot shows a twister hitting what appears to be a Mack truck and shredding it into sheets of metal that blow away like tissue paper.

The second half shows aftermath stories including relief efforts. The video is in cyberspace at tinyurl.com/arn-tornado-video (TVB)

RESCUE RADIO: HUNTINGTON BEACH CA. ROLLS OUT NEW EMCOMM UNIT

Huntington Beach, California has introduced its new emergency communications trailer to the public. According to Wayne Yoshida, KH6WZ, on Field Day weekend the new response unit made its first public appearance.

Yoshida says that the new unit was purchased by the City of Huntington Beach using homeland security grant funds. In addition to amateur radio, the trailer is also equipped with two-way radio gear for the city's police and fire departments making it a universal mobile command station tool. (KH6WZ)

ENFORCEMENT: NEW FINES INSTITUTED FOR ILLEGAL USE OF LASERS

Federal aviation officials say they will start imposing fines against people who point lasers at planes and helicopters, which can temporarily blind pilots. Agency officials released a new legal interpretation they said will allow them to fine people who point the lasers as much as $11,000 per incident.

According to the FAA, pilots have reported over 1,100 such incidents in the U.S. so far this year. These incidents have also increased rapidly around the world over the past six years. This as online sales of

newer and more powerful handheld lasers have soared.

The lasers are being marketed as an astronomical tool to point out stars at night but a government spokesman says that people are also pointing them at truck drivers, bus drivers and even individual motorists. The spokesman calls that this is a ridiculous kind of behavior and it needs to be stopped and stopped quickly.

So far this year, the Phoenix and Dallas-Fort Worth regions have each recorded more than 45 such dangerous laser events. Meantime, the Los Angeles, Philadelphia and Houston areas each have recorded more than illegal 30 laser pointings. (FAA and other published news reports)

ENFORCEMENT: BIG FINE FOR TOWER LIGHT FAILURE REDUCED

A fine against Big Fish Broadcasting for antenna lighting violations has progressed to a forfeiture order.

Big Fish owns a tower in Greenwood, S outh Carolina and used to own one in Chappells, South Carolina. It sold the latter one to Radio Training Network Inc. in April 2010.

The commission says the red obstruction lights were out for both towers and that the company didn't notify the FAA of the outages. In a recent decision, the agency said both towers required painting and a lit, flashing red beacon up top, along with steady burning red side obstruction lights.

Responding to a complaint about tower outages, the FCC's Atlanta office had contacted the FAA, which said no outage report had been filed for the towers. As a result, no Notice to Airmen or NOTAM had been issued for the unlit structures.

According to the Commission's summary of the case, in July 2009, the agency notified told Big Fish's owner the towers were his responsibility. He responded that he would check into it and notified the FAA about the outages that month. That October and again in November, the FCC confirmed the towers were still unlit after sunset and there was no power to the site. The agency said the local power company confirmed electricity to both towers was shut off in 2009.

In July 2010, the commission issued a $20,000 fine to Big Fish. In response, the broadcaster argued that it did not receive the notice until 30 days after its release and, by then, had already taken steps to fix the violations. Big Fish also said the company couldn't pay the full amount and asked for a reduction based on past good compliance with FCC rules.

The FCC expects violations to be corrected so it did not knock off any penalty because of that; however it did cut the fine to $7,000 based on documentation proving the company couldn't pay the full amount. Big Fish was given the customary 30 days to pay or to file an appeal. (RW)

**

ENFORCEMENT: $10,000 FINE AFFIRMED FOR UNLICENSED OPERATION

The FCC has affirmed a $10,000 Forfeiture Order issued to Antonio Robinson for willful and repeated violation of section 301 of the Communications Act. The alleged violations involved Robinson's alleged operation of an unlicensed radio station on 105.5 MHz from his commercial suite in Miami, Florida.

Back on May 5th, the Enforcement Bureau's Miami Office issued a Notice of Apparent Liability for Forfeiture in the amount of $10,000 to Robinson. Since that time Robinson has not filed a response to the Notice. Based on the information before us, the FCC has affirmed the forfeiture order and has given Robinson the customary 30 days to pay or to file an appeal. (FCC)

NAMES IN THE NEWS: VK4XJJ WALKING ACROSS AUSTRALIA OPERATING HF

Jeff Johnson VK4XJJ is walking across Australia to raise Money for a charity known as the Newborn Emergency Transport Service. At last reports, he is now roughly half way across the country and he is looking for contacts from stations in the west on 14.090 MHz Upper Sideband at 06:30 UTC. Jeff will also be found on 7.045 Lower Sideband at 07:30 UTC, Jeff then moves back to 14.090 at approximately 07:40 UTC. More is on the web at www dot jeffswalk2 dot com. (WIA News)

RADIO GEER: ANYONE NEED AN RCA FM BROADCAST TRANSMITTER

Anybody got a good home for an RCA FM broadcast transmitter? According to Radio World on-line, the box in question is a model BTF-40E FM transmitter that currently resides on Cougar Mountain near Seattle, Washington.

The BTF-40E is described as actually being a pair of model BTF-40E's using a combiner to produce about 33,000 watts total power out. And before you ask, no, we do not know if it can be converted for use on the two meter band. Besides which, the power put out by the driver stage would likely exceed the maximum that's legal on the ham radio bands. But, on the other hand, it could make a nice living room conversation piece for any ham whose X-Y-L would let it in the front door.

Bryan Jones of equipment dealer RF Specialties Group says one of his clients is about to dispose of it to make room for a new unit. He welcomes questions about it by e-mail to bryan (at) rfswa (dot) com. (RW)

**

EMERGING TECHNOLOGY: UK COMPANY BEGINS MANUFACTURING WHITE SPACE RADIO GEAR

A UK startup company called Neul has begun manufacturing a white space radio. This, despite the fact that there isn't a single country where such a unitwould be legal to use. At least not yet. Amateur Radio Newsline's Bruce Tennant, K6PZW, reports:

--

Neul which was launched last year in the United Kingdom city of Cambridge has been talking about protocols and standards for use in the so-called white space where television broadcast frequencies are not being used locally. Now the company which is staffed by some of the UK's top radio developers has real product to sell.

The Neul unit offers connection speeds of up to 16Mb per second for organizations with proper experimental licenses that want to see what white space communications can offer them. And at least in the U-K such licenses are not hard to obtain. Neul says that British

telecommunications regulator Ofcom processed its application within a couple of weeks.

Now it's reported that within a couple of years such a license shouldn't be necessary in the U-K as Ofcom is poised to allow unlicensed exploitation of the nations white spaces. Unlicensed use will be technology neutral, just as 2.4GHz is now, so any networking system will have to contend with garage door openers, baby monitors and the like.

Ofcom says that white space units will be required to check with an online database to see what frequencies are available. It believes that this should prevent the more-trivial applications from bothering more important ones. None the less both regulators and equipment suppliers expect to see a wide variety of applications filling the bandwidth once it opens up in the next few years.

For the Amateur Radio Newsline, I'm Bruce Tennant, K6PZW, in Los Angeles.

--

While predictions for embedded, and networked, devices vary by tens of billions, but most observers agree that they'll be something in the region of 50 billion such devices looking for a network connection in the next few decades. (MN)

WORLDBEAT: DUTCH PARLIAMENT APPROVES RADIO NETHERLANDS WORLDWIDE CUTS

Some sad news for Shortwave listeners. The possible end to an era in shortwave broadcasting is here. This after the Dutch parliament votes against two motions which might have blunted the effect of the budget cuts facing Radio Netherlands Worldwide.

One of the proposals called for a separate debate devoted to the future of Radio Netherlands Worldwide. The other criticized the decision-making as hasty and called for a postponement.

Effectively, this vote means that the cabinet's plans to move Radio Netherlands Worldwide operations from control under the Education, Media and Culture Ministry to the Foreign Ministry. Also, to cut the budget from 46.3 million euros to 14 million.

According to the newsletter of the Asia-Pacific Broadcasting Union, the Dutch government wants Radio Netherlands Worldwide to focus on bringing independent information to people in countries without press freedom and to scrap its other functions of providing information for Dutch people living abroad and presenting a realistic image of the Netherlands to other countries. The newsletter said it's unclear how much of the rest of Radio Netherlands Worldwide's existing content can be continued.

Meantime, Radio Netherlands Worldwide station management will now have to draw up an employment cutback plan, which is expected to be completed sometime in October. (Media Network, RNW News, APU)

**

WORLDBEAT: VK REPEATER BLOWN OFF HILLTOP BY SEVERE WINDS

Australia's recent stormy weather has claimed another victim. The VK7RNE, north-eastern repeater located on Tower Hill, unexpectedly went off the air recently.

The cause was immediately apparent to the ground crew on its arrival at the scene. The shed that housed the repeater was found lying on its side, along with all its contents, some way down the mountain. It had literally been knocked off its foundation by the wind.

The radio equipment has been recovered but currently there are no plans at present to reinstate the repeater. This sad event thus brings about the close of a chapter in the repeater history of VK7.

The VK7RNE has long provided a useful service to that part of the state and was a tribute to Paul Godden, VK7KPG, and his small group that first installed and then maintained the facility over the years. Some members of the group are now silent keys. In recent years the annual Australian license fee has been underwritten by the North West Tasmanian Amateur Television Group. (WIA News)

ON THE AIR" BATTLE OF BRITAIN STATION BECOMES PERMANENT SPECIAL EVENT

On the air, keep an ear open for U-K special event station GB4BOB to be active from September 1st to the 20th to commemorate the World War Two Battle of Britain. After running this station as a one-off for the battles 70th anniversary, the Pontefract and District Amateur Radio Society has now decided to keep it as an annual event to remember those who fought in it. QSL's go direct to G0BPK or via the RSGB bureau. More is on the Pontefract and District Amateur Radio Society website at www.pdars.com (Southgate)

**

ON THE AIR: CELEBRATING THE FLIGHT OF LIBERTY BELL 7

Back on this side of thre Atlantic, the 50th Anniversary of the Flight of the Liberty Bell 7 spacecraft by astronaut Virgil I. "Gus" Grissom will be celebrated by the Hoosier Hills Ham Club. This, by activating special event station W9GUS on Saturday, July 23.

The station will be located in Spring Mill State Park at the Grissom Memorial near Mitchell Indiana. Operation will be 10 am to 4 pm Central U-S Daylight Savings Time with stations on 40, 20 and possibly 6 meters.

For those of you a bit to young to remember, Gus Grissom was one of the original NASA Project Mercury astronauts and a United States Air Force pilot. He was the second American to fly in space and the first astronaut to fly in space twice. Grissom along with fellow astronauts Ed White and Roger Chaffee died during a pre-launch test for the Apollo 1 mission at Cape Canaveral on January 27, 1967 when a spontaneous fire broke out in their command module.

More information about this commemorative operation of the Hoosier Hills Ham Club special event station W9GUS is on-line at www.w9qyq.org (WA9JHH)

**

DX

In DX, a group of German operators will be on the air from Ascension Island as Zed-D-8-D from July 24th through August 9th. These are the same dates as previously announced, but their location on the island has changed due to damage to their original planned site. Listen out for Zed-D-8-D operating from a guesthouse in Georgetown which the group says is not the most ideal location. This could handicap their operatrions on 160 and 80 meters. Updates are on-line at www.zd8d.de.

RW6AML will be on Waya Island, Fiji until July 17th. He will be active as 3D2ML on both CW and SSB. QSLs go to his home callsign.

IK5ASN will be active as 9A8ASN from the island of Cres through the 30th of July. He will be on 40 and 20 meters using only SSB, CW, RTTY and PSK31. QSL via IK5SAN, direct or preferably via the bureau.

DL8KX and DD8ZJ will be active as 9H3KX from Gozo Island between October 8th and the 14th. Their operation will be on the High Frequency bands using CW and SSB. QSL via DL8KX either direct or via by the bureau.

KF8UN, will be in Peru between July 22nd and August 16th. He plans to be active stroke OA4 and says that he plans to work 20 meters, devoting August 8th specifically to amateur radio. At other time he will be operating casually at all other times hes on the air. He also plans to be on mobile as time permits. QSL via his home callsign.

Lastly, SM1TDE, will be active stroke O-H-Zero from the Aland Islands group between July 21st and the 24th. Look for him around 2 kHz from the band edges on CW on 80 through 10 meters. This operations will be holiday style meaning he will be on the air only as time permits QSL via the bureau, and Logbook of the World.

Above from various DX news sources.

THAT FINAL ITEM: LOVE AND MARRIAGE AT FIELD DAY

And finally this week, the story of a romance that ended at a Field Day Wedding. From down-under, heres VK2BUI:

--

When you think about ARRL Field Day, a few things come to mind: food, radios, food, antennas, food and friends. And food. But one couple took things a little bit further when they got married at their Field Day site.

Kevin Shissler, K1FQ, and Debra Hubbard, N1FQ, love Field Day so much that they decided it was the perfect place to share their love for each other and for amateur radio.

Wearing their 2011 ARRL Field Day shirts, they tied the knot at the Field Day, swapping the 20 meter band for a band of gold.

And as an aside, In April 2010, N1FQ donated 60 percent of her liver to a co-worker Jan Watson. Now Jan -- a happy Jan
-- had her chance to return the favor. She officiated the wedding.

Amateur radio amour. Do we get bonus points for this?

Reporting the weird and wonderful, I'm John, VK2BUI.

--

Our best wishes to the newlywed couple for a long and happy life filled with the very best of DX. (ARRL, WIA)

Maybe the Heils were inviting you to a "three way" when they visited you.
Too bad you were afraid to answer your door to find out.

1769. now, Canada has outlawed simply having 2 way radios visible in your vehicles

Newsgroup: rec.radio.amateur.policy
Date: 2011-07-17 06:04:50 UTC
From: radioguy <radioguy222@yahoo.com>
Message-ID: <61fc4230-edc8-4b57-a8c9-3ea8e60faefd@l18g2000yql.googlegroups.com>

In a further effort to further crackdown on perfectly legal 2 way radio operators, Vancouver, Montreal, and other Canadian cities have passed laws outlawing leaving valuable itemms like your ham radio or cb radio in plain sight in your vehicle. If you are in a restaurant or store and a cop or mountie looks inside your vehicles windows and sees your valuable ham radio or valuable cb radio in the usual place, under the dash, or amywhere at all where it is visi,ble instead of hidden where no one can see it, you will get ticketed and fined and prison time. Since you broke the law by leaving a valuable item or items in plain sight inside your
vehicle.
The Crazy Canuck Canadians were not satisfied with only outlawing the use of hand-held microphones Now they also outlawed simplay having the radios visible in the ONLY NORMAL spot for a 2 way radio and outlawed having them visiIbe anywhere in the
vehicle.
and then as usual, Kooky California will follow , and then other American cities and states will follow, also outlawing having any 2 way radios visible in your
vehicle .
The reason the authorities gave for why they passed this law allowing them to fine ordinary citizens for doing so is to prevent theft of valuable items in vehicles by theieves and
criminals.
however, we all know the real reason for this ridiculous law is so they can ticket and fine more people to get more money for theirselves. So the Canadian cops and Canadan Royal Mounties and Canadian governments are the real
thieves.

> Delaware didn't outlaw CB radio. It decided that CB radios fell under
> the hands-free cellphone law while driving.

read it again, although they did not outlaw ham radio , they,
Delaware, outlawed even having a cb radio in vehicles at all unless
it is in a commercial vehicle If a cb radio is in a private non-
commercial passenger vehicle, it is illegal accordin to the new
Delaware law, and you are violating the law, according to the new
Delaware
law
and they wold have outlawed ham radios in them also if they could have
However, they could not since the Fcc rules say they can
not.
The Delaware law, as written and passed, outlaws even having a cb
radio in a non-commercial vehicle even if it is mounted connected to
the vehicle as usual. The law in that state says a cb radio is only
legal in s vehicle if it is mounted in a commercial vehicle . non-
commercial passenger vehicles are NOT exempt. Delaware has also made
driving more dangerous with this law. I have driven through cities
where the cities were broadcasting one-way traddic reports and road
conditions on cb channel 19 which made my drive and other drivers
drives safer as we kknew wgich roads they were doing constrution work
on and to take and not take among other things. Now, if I have to
travel to Delaware, my only choices are to leave a radio in my car and
get fined or to spend time taking the radio out and travel through the
other heavy-traddic cities without being able to hear the traffic
safety reports those cities provide on cb channel 19 which makes the

drive MORE dangerous and causes MORE accidents ,since regular am and fm broadcast stations no longer provide any such services since media consolidation, Dumb Delaware has made the roads more dangerous and increased the likelyhood of traffic accidents,

I got the trolling info dseigned for trolls to post from the troll article on the troll website run by the troll agency known as the U.S. State Department here is the direct quote from the trolling agency known as the U.S. State Department at http://travel.state.gov/travel/cis_pa_tw/cis/cis_1082.html CRIME: Although Canada generally has a lower crime rate than the U.S., violent crimes do occur throughout the country, especially in urban areas. Visitors to large cities should be aware world that parked cars are regularly targeted for opportunistic smash-and-grab thefts, and they are cautioned to avoid leaving any possessions unattended in a vehicle, even in the trunk. Due to the high incidence of such crimes, motorists in Montreal, Vancouver and some other jurisdictions can be fined for leaving their car doors unlocked or for leaving valuables in view. Auto theft in Montreal and Vancouver, including theft of motor homes and recreational vehicles, may even occur in patrolled and apparently secure parking lots and decks. SUVs appear to be particular targets of organized theft. While Canadian gun control laws are much stricter than those of the U.S., such laws have not prevented gun-related violence in certain areas trolls everywhere would like to thank the U.S. State Department for making Americans safer throughout the world.

SUVs appear to be particular targets of organized theft. While Canadian gun control laws are much stricter than those of the U.S., such laws have not prevented gun-related violence in certain areas trolls everywhere would like to thank the U.S. State Department for making American trolls safer throughout the world.

To some posters, anyone who disagrees with them are "trolls". Especially if
they can't out-argue them with simple logic. They are quick to scream,
"troll", and "gun nut" and or anything other than formulating a reasonable

logical argument for their own point of view.

1796. THE MERITS OF ISLAM

WHAT DOES ISLAM SAY ABOUT WAR

Islam permits fighting in self-defense, in defense of one's faith, or on the part of those whose basic rights have been violated. It lays down strict rules of combat that include prohibitions against harming civilians and against destroying crops, trees, and livestock. As Muslims see it, injustice would be triumphant in the world if good people were not prepared to fight for a righteous cause.

God says in the Qur'an: "Permission (to defend) has been granted to those who are being fought against; that they have been oppressed. Verily, God has the power to help them. Those who were unjustly expelled from their homes for no other reason than their saying: 'God is our Lord.' If God were not to repel some human beings through others, monasteries, churches, synagogues, and mosques, wherein the name of God is mentioned, would have certainly been destroyed. God will definably help those who will help Him. Verily, God is Immensely Strong, Mighty." (Qur'an 22:39-40)

War is the last resort, and is subject to the rigorous conditions laid down by the sacred law. The often misunderstood and overused term jihad literally means "struggle" and not "holy war" (a term not found anywhere in the Qur'an). Jihad, as Islamic concept, can be on a personal level - inner struggle against evil within oneself; struggle for decency and goodness on the social level; and struggle on the battlefield, if and when necessary.

According to the Qur'an, God has created all of humankind equal, and has given each the right to pursue their own destiny. The life, honor and property of all people in a Muslim society are considered sacred, whether the person is Muslim or not. Racism, sexism and prejudice of any sort are unacceptable in Islam. The Qur'an speaks of human equality in the following terms:

"O humankind! We created you from a male and female, and made you into nations and tribes, so that you may come to know one another. Truly, the most honored of you in God's sight is the greatest of you in piety. God is All-Knowing, All-Aware." (Qur'an 49:13)

The right to life is the most basic of human rights; the Qur'an equates the unjust killing of a single person to killing all of humankind: "And whoever kills a soulâ€¦, should be as though he has killed all of humankind." (Qur'an 5:32)

Dealing equitably and protecting the rights of every individual is the cornerstone of a Muslim society. God further states in the Qur'an: "O

you who believe! Stand up firmly for God, as witnesses to fair dealing, and let not hatred of a people invite you to act inequitably; act justly, that is nearer to piety, and be conscious of (your duty to) God, surely God is aware of all that you do." (Qur'an 5:8).

The family is the foundation of Islamic society. The peace and security offered by a stable family unit is greatly valued and seen as essential for the spiritual growth of its members. It is quite common in the Muslim community to find large, extended families living together; providing comfort, security and support to one another.

Parents are greatly respected in the Islamic tradition. Mothers, in particular are greatly honored. God says in the Qur'an: "And we have enjoined upon man to be good to his parents. With difficulty upon difficultly did his mother bear him, and wean him for two years. Show gratitude to Me and to your parents; to Me is your final goal!" (Qur'an 31:14)

Marrying and establishing a family is very strongly encouraged. "And among His signs is that He created for you mates from among yourselves; that you may find peace with them. And He put between you love and compassion. Surely in this are signs for people who reflect." (Qur'an 30:21)

A Muslim marriage is both a sacred act and a legal agreement, in which either the groom or the bride is free to include legitimate conditions. Marriage customs vary widely from country to country.

Prophet Muhammad is reported to have said: "When a servant of God marries, he completes half his faith." Marriage is the institution upon which families are based.

According to the Qur'an, men and women are equal before God; both created for the sole purpose of worshipping god through faith and good deeds.

"O humankind! Be conscious of your Lord Who created you from a single soul, and out of it created its mate, and out of the two spread countless men and women. Be conscious of your Lord through Whom you demand your mutual rights and honor the wombs; God always watches over you." (Qur'an 4:1)

Islam recognizes women as individuals with specific rights. Among these are: the right to life, the right to learn; the right to earn, own and dispose property; the right to choose a husband; the right, as a wife, to her pre-marriage standard of living; the right to be treated equally; and the right to inherit. Women, like men, are rewarded by God for a righteously led life.

Muslim women dress in a way that is modest and dignified. The purpose of clothing is not only to protect oneself from physical elements, but also to protect oneself from immorality and pride. Some traditions of dress, and more generally, the treatment of women in some Muslim

countries and societies, are often a reflection of culture. This is very often inconsistent and even contrary to Islam teachings. Prophet Muhammad said: "The most perfect in faith among you believers is he who is best in manner and kindest to his wife."

Muslims, by faith, are expected to respect and care of the elderly. It is quite common to find children, parents, grandparents and sometimes great grandparents all living together in one large home.

In Islam, serving one's parents is a duty second only to worshipping God. It is considered despicable to express any irritation when, through no fault of their own, the old become difficult to handle.

God says in the Qur'an: "Your Lord has decreed that you worship none but Him, and be kind to your parents. If either or both of them reach old age with you, do not even say 'uff' to them or scold them, but speak to them in terms of honor and kindness. Lower to them the wing of humility, and say, 'My Lord! Have mercy on them, for they did care for me when I was young.'" (Qur'an 17:23-4)

When a Muslim dies, he or she is washed, usually be a family member, wrapped in a clean white cloth, and buried with a prayer, preferably the same day.

Muslims believe that the present life is only a trial for the Hereafter. God says in the Qur'an: "Every soul shall taste death. And you will be given your dues on the Day of Judgment. Only the one who is removed from the brink of Hellfire and admitted into Paradise has ultimately won; and life of this world is nothing but a material illusion." (Qur'an 3:185)

Amateur Radio Newsline(tm) Report 1771 - July 22 2011

Please note that this is an extended Amateur Radio Newsline report and contains three breaks. Thank you.

Amateur Radio Newsline report number 1771 with a release date of Friday, July 22 2011 to follow in 5-4-3-2-1.

The following is a Q-S-T. Another conviction in the highjacking of a yacht that lead to the death of three United States hams; a South Dakota radio amateur looses his life in a tower dismantling accident; South Sudan becomes a sovereign nation recognized by the U-N as well as amateur radio; ham radio bids farewell to the space shuttle and Media Network re-releases the Hitch Hikers Guide to DXing. What is that you ask? Find out on an extended Amateur Radio Newsline(tm) report number 1771 coming your way right now.

(Billboard Cart Here)

**

RADIO JUSTICE: YEMENI MAN PLEADS GUILTY IN HIGHJACKING THAT RESULTED IN THE DEATH OF THREE HAMS

A Yemeni man pleaded guilty to acts of piracy on Thursday, July 14th in connection to his role in the hijacking of a yacht off the coast of east Africa that resulted in the deaths of four Americans including three ham radio operators. Amateur Radio Newsline's Norm Seeley, KI7UP, has the details.

--

As previously reported here on Newsline, Scott Adam, K9ESO, and his wife Jean, KF6RVB, along with Bob Riggle, KE7IIV, and Phyllis Macay were on board the yacht Quest off the coast of Oman when pirates boarded their vessel on Friday, February 18th. Officials were in the process of negotiating for their release when gunfire was heard around 1 a.m. Eastern Time on Tuesday, February 22. United States forces responded and then boarded the Quest. It was then that they discovered that all four hostages had been shot by the high seas bandits. Despite immediate steps to provide life-saving care, all four hostages ultimately succumb to their wounds.

Now, one of the alleged pirates identified as 23 year old Mounir Ali has accepted a plea bargain by U.S. District Judge Mark Davis, where he plead guilty to taking part in the armed hijacking. Ali claimed that

he and four other men from Yemen were crew members aboard another vessel that was pirated by Somalis earlier in February. But prosecutors say that Ali willingly elected to join the pirates in return for a share of the ransom money. However they also say that he did not personally shoot nor did he instruct anyone to shoot any of the four Americans.

For the Amateur Radio Newsline, I'm Norm Seeley, KI7UP, in Scottsdale, Arizona.

--

Ali is the 11th person convicted in relation to the highjacking and murders of the four Americans on-board the Quest. Sentencing is scheduled for October 21st. (Published news reports)

**

RADIO SAFETY: RADIO AMATEUR KILLED IN TOWER COLLAPSE ACCIDENT

A Hot Springs, South Dakota ham radio operator was killed and another seriously injured Saturday, July 16th. This after a communications tower they were helping dismantle was blown over by a gust of wind.

According to Fall River County emergency manager Frank Maynard, Tim Anderson, K0OR, died of his injuries at Rapid City Regional Hospital shortly after arriving by Life Flight helicopter. The second man, Tom Embree, NC0K, also of Hot Springs, was also flown to Rapid City Regional Hospital where surgery was performed Sunday. He remains in serious condition.

The men were helping their amateur radio club remove a 110 foot high tower on the top of a near-by peak known as Gull Hill. The tower was no longer in use, and the owner had offered it to the radio club, which was going to move it to a new location.

News reports say that several other radio club members were on the ground at the time of the accident. They had taken down all but the final 30 foot section of the tower and were just beginning to release some guy wires when a gust of wind blew the tower over with the two men still on it and then collapsed on them.

Both Anderson and Embree are members of the Hot Springs Amateur Radio Club. Hot Springs is located about 60 miles south of Rapid City. At the time of his death, Anderson was the club's president. (KELO, other published news reports)

**

WORLDBEAT: SOUTH SUDAN BECOMES SOVEREIGN ENTITY - ADDED TO DXCC AND CQ DX AWARDS

The Republic of South Sudan is now the world's newest country and as expected, it became the 193rd member of the United Nations on July

14th. It also became a new DXCC entity on the same date and was also added to CQ DX Awards Countries List as entity number 342.

Meantime, the latest news regarding the planned South Sudan operation by the combined DX Friends and Intrepid DX Groups is that the two groups were to meet in Cairo on July 21st. On July 22nd, they planned to fly to Juba which is the capital of the South Sudan. As we go to air on the 23rd, they were to meet with the Ministry of Communications to amend licenses to whatever new I-T-U prefix is assigned to the South Sudan. If all goes as the DX'er hope they expect to take to the airwaves sometime between July 23rd or as late as the 25th. The operation will continue until August 10th.

For the latest details on this upcoming South Sudan operation keep an eye on www.dxfriends.com/SouthernSudan2011. We will have more DX news later on in this weeks Amateur Radio Newsline report. (DX Friends)

**

RADIO LAW: HAMS IN FLANDERS (BELGIUM) NOW COVERED BY RADIATION LIMIT LAWS

The administration of the Flanders (Belgium) area in Northern Europe has now included ham radio operators in its restrictive public safety radio frequency Specific Absorption Rate or SAR Ministerial Decree. A law enacted only this past January 26th. Frank Haas, KB4T, is here with the details on the position the this puts hams in the region into:

--

The law was originally directed at telecommunications system operators to protect the public from what some consider dangerous RF levels.

It now appears that radio amateurs in the Flanders region must also observe the same standards and obligations and pay the same annual fee as their commercial counterparts. In addition they will be subject to the same government oversight and can face the same fines or imprisonment for infractions and violations of the new Flanders Specific Absorption Rate standard.

Radio amateurs in Flanders will soon have to apply for a certificate of conformity for their station and presumably re-apply whenever the station configuration changes. This costs about 75 Euros or $105 U.S. dollars.

In an application, a ham must supply a complete station location plan; an installation plan of antennas and an installation plan of the entire station site. Also required will be an overall safety analysis plan; a station elevation plan and an overall cross-section layout diagram.

In simpler terms Flanders hams will have to file what amounts to a complete engineering and electromagnetic impact study anytime even a minor station change takes place.

Still unknown is what impact the law will have on mobile, portable and hand-held operations by Flanders area hams.

For the Amateur Radio Newsline, I'm Frank Haas, KB4T, in Holly Hill, Florida.

--

More on this rather radical law, most in the Flemish language, is now on line at thesw various web locations: Antenna File in Google English -http://tinyurl.com/BelgiumAntennaFile; SAR-Vlaanderen Facebook page (in Flemish) http://nl-nl.facebook.com/pages/; SAR-Vlaanderen/165726696825269; Joke Schauvliege Minister of Environment, Nature and Culture at http://tinyurl.com/JokeSchauvliege and the Royal Union of Belgian Radio Amateurs (UBA) http://tinyurl.com/BelgiumUBA) (Southgate, UBA, others)

**

RADIO LAW: RECONROBOTICS ENTERS CONSENT DECREE WITH FCC TO END INVESTIGATION BROUGHT ON BY ARRL COMPLAINT

ReconRobotics has entered a Consent Decree agreement with the FCC where it will make whats termed as a voluntary contribution of $17,000 to the United States Treasury. This, to end an FCC investigation in response to a complaint filed by the ARRL.

Back in 2010 the ARRL had alleged that ReconRobotics had violated Section 302a(b) of the Communications Act and Section 2.803 of the Commission's rules regarding the manufacturing, marketing, distributing and selling of radio frequency transmitters in the United States. In the complaint the ARRL alleged that ReconRobotics had unlawfully marketed a remote-controlled, maneuverable surveillance robot called the Recon Scout which operates in the 430 to 448 MHz band to public safety agencies and certain security personnel prior to the grant of a necessary waiver.

The FCC granted a waiver to ReconRobotics in 2010 to allow public safety licensees to operate the device in a portion of the 70 centimeter band that's shared with ham radio operations. To date, no license applications have been granted by the Commission for the device and the ARRL has petitioned to deny all applications that have been or might be filed. (ARRL)

COMMEMORATIVE EVENTS: REMEMBERING THE FIRST DECADE SINCE 911

This coming September 11th will be the 10th anniversary of the al-Queda backed terrorist attacks of September 11th of 2001. These attacks felled the two World Trade Center tower buildings in New York City and damaged the Pentagon when radical Islamic extremists high-jacked four United States flag carrier jetliners and crashed them into the two structures. Over 3000 American citizens were killed as well as a number of foreign nationals who worked in the twin towers buildings.

Over the years there have been several ham radio operations in remembrance of those whose lives were lost in this senseless and wanton carnage. With this being the first decade anniversary of the September 11th, 2001 tragedy, we here at the Amateur Radio Newsline are trying to compile a list of radio clubs and individual hams who are planning any form of amateur radio memorial operation to honor those whose lives were lost that day. If you have plans to commemorate 911, please drop us an e-mail to newsline at arnewsline dot org and let us know all of the details. We in turn will list as many as we can on our website at www.arnewsline.org.

Those whose lives were lost on 911 deserve to be remembered. We will do our part by providing web-space to list ham radio commemorative activities. It's up to you to do the rest. (ARNewsline)

**

ON THE NET: FIRST LIVE REMOTE BROADCAST OF BOB HEIL'S HAM NATION ON JULY 26

If you are hearing this newscast before Tuesday, July 26th, be certain to tune into Bob Heil, K9EID, show Ham Nation for its first live out of studio remote broadcast. Bob along with co-host Gordon West, WB6NOA, plan to originate from the historic radio room on board the famed Queen Mary ocean liner. This is a major Southern California attraction moored in Long Beach Harbor.

Their special guest will be Nate Brightman, K6OSC. Brightman is the person generally credited with first bringing the radio room to life as an operational ham radio station with the call sign W6RO several decades ago.

Ham Nation airs live on Leo LaPorte's Twit internet television network every Tuesday at 9 P.M Eastern time. To tune in simply take your web browser to www dot twit dot tv and click in the tab marked "live." You can also see a replay of the show about 24 hours later by downloading the podcast at www dot twit dot tv. (ARNewsline)

**

RADIO SITE NEWS: CALIFORNIA INSTITUTES $150 FIRE PREVENTION FEE

If you own a repeater, a remote base station or even a home in the state of California, a new law signed by Governor Jerry Brown may affect you. Measure ABX1 29 imposes an annual fee of up to a $150 on

every habitable structure in the State Responsibility Area or SRA to fund fire prevention activities. The governor said that due to population and development growth in these SRA's, taxpayer borne costs for fire protection have risen in recent decades.

California hams may need a local map to determine whether their repeaters, remote transmitter sites or even their homes are located in an State Responsibility. One fire official notes that, "As written, revenue from the fee would go to CalFire and an equivalent amount of General Funds would be removed from CalFire's budget for no net gain. A copy of ABX1 29 is on line at tinyurl.com/150FireFee. (CGC Communicator)

**

HAM HAPPENINGS: ILLW THE WEEKEND OF AUGUST 20 - 21

With only a few weeks to go to the International Lighthouse and Lightship Weekend, a total of 290 entries have been received but many more expected before the event.

So far this year 13 Lightships are entered mainly from Belgium, England, Germany and the USA. There's also one each in the Netherlands, Sweden and Wales. For those not aware, lightships are a rarer breed of the long-gone era of magnified flashes a light used by ships as they navigated along the coast and around the world.

Since 1998 the 48 hour, third weekend in August event has attracted more than 440 entrants, from some 50 nations. This year the dates are August 20th and the 21st. More information is on the World Wide Web at illw.net. (VK3PC)

**

THE SOCIAL SCENE: ARRL MIDWEST CONVENTION IN CEDAR RAPIDS IA. AUG 5 - 7

And the ARRL Midwest Division Convention and Summerfest 2011 will take place August 5th through the 7th in Cedar Rapids, Iowa. Events on August 5th and 6th will be held at Clarion Hotel & Convention Center with events for Sunday the 7th to be held at the near-by Teamsters Hall. A convention brochure containing a speakers list, forum line-up, registration form and more is available ob-line at tinyurl.com/cedar-rapids-summerfest. (Press release)

**

THE SOCIAL SCENE: RAC AGM AND HAMFEST 2011 IN NEWFOUNDLAND

Radio Amateurs of Canada will hold the eighteenth Annual General Meeting on July 30th in St. John's Newfoundland. The venue is the Battery Hotel and Conference Center at Signal Hill which is also playing host to the concurrent Hamfest 2011 events hosted by the Society of Newfoundland Radio Amateurs. Please visit www.sonra.ca for more details. (RAC)

**

THE SOCIAL SCENE: YO0YOA & YO0TSL CELEBRATE YOUTH AND TESLA

Romania's Zamolxes Foundation Radio Club will be operating the special call sign YO0YOA through years end. This, to promote the first youth ham radio organization in Europe known as Youngsters on the Air.

Youngsters on the Air is operated under a grant from Youth in Action and is financed by the European Commission to interest youngsters in amateur radio. Operation of YO0YOA will be on all HF and VHF bands.

Also on the air will be station YO0TSL. This station is to commemorate 155th birthday of famed inventor and researcher Nikola Tesla. (YO9GJX)

**

NAMES IN THE NEWS: WB4APR AND THE APRS GOLDEN PACKET TEST

Some names in the news. First up is Bob Bruninga, WB4APR, who invites you to join in the terrestrial annual APRS Golden Packet attempt on Sunday July 24th. This, from Noon to 16:00 hours your local time.

During this test Bob needs hams with Kenwood D700 transceivers to drive or hike to the top of some of the highest mountains in the USA. Then set up as a portable APRS digipeater to see if hams can link a Golden Packet across thousands of miles.

At airtime it is known that there will be an attempt along the Appalachian Trail from Alabama to Maine and another along the Pacific Crest trail from San Diego. California to Seattle, Washington. More information can be found on line at tinyurl.com/APRS-East for eastern states operations and tinyurl.com/APRS-West for operations out West. (WB4APR via VHF Reflector)

**

NAMES IN THE NEWS: W5NPR APPOINTED WEST INTERIM TEXAS SM

Bill Roberts, W5NPR, of Alpine, has been appointed as the Interim West Texas Section Manager as of July 8, 2011. Roberts has served as the ARRL West Texas Section Traffic Manager since 2009. He is a past president of the Big Bend Amateur Radio Club and is also active as a back-up net control station for the Big Bend Emergency West Texas ARES Net and a net control station for the National Traffic System's Daytime Region Net 5

ARRL Membership and Volunteer Programs Manager Dave Patton, NN1N, made the appointment in consultation with ARRL West Gulf Division Director David Woolweaver, K5RAV. Roberts will serve as Interim West Texas Section Manager until a Section Manager is declared elected. (ARRL)

EMERGING TECHNOLOGY: RESEARCHERS DEVELOP ENERGY RECYCLING SENSORS

Researchers at Georgia Tech are tapping RF transmissions from a television station located half a kilometer from their lab to power a wireless temperature sensor. Amateur Radio Newsline's Bruce Tennant, K6PZW, is in the science center with more:

--

A Georgia Tech Research News article said scavenging experiments using TV bands has already yielded power amounting to hundreds of microwatts. It also says that multi-band systems are expected to generate one milliwatt or more. That says researchers is enough to operate many small electronic devices, including a variety of sensors and microprocessors.

The report goes on to note that devices requiring 50 milliwatts or more should be able to be powered by adding super-capacitors across the output of the power system for storage and using cycled operation. The Georgia Tech team is also looking at alternative power for the sensors. The current line of thinking is most likely solar power for daytime operations with the scavenged RF power used at night.

The self-powered wireless sensors are created using ink-jet printers and a special ink containing nanoparticles of silver and/or other material. The researchers have been able to literally print out a combination of sensors, antennas and energy-scavenging capabilities on paper or flexible polymers. The resulting sensors can be used for chemical, biological, heat and stress testing for defense and industry.

For the Amateur Radio Newsline, I'm Bruce Tennant, K6PZW, in Los Angeles.

--

So far these energy scavenging devices are able to recycle energy using RF sources ranging from 100 MHz to 15 GHz or higher. More about this breakthrough is on-line at tinyurl.com/recycled-power. (Georgia Tech Research News)

**

WORLDBEAT: SAARDT TO UNDERWRITE THE COST OF 5 SOUTH AFRICAN STUDENT HAM RADIO EXAMS

The South African Amateur Radio Development Trust has announced that it is underwriting the cost for a number of students under the age of 25

to take that nations Class A Radio Amateur Exam this October. Through the generous sponsorship of the Tony Reumerman, ZS6AOG and his family, the Trust is able to offer five such financial assistance plans this year. Each includes payment of the examination fee, a one year South African Radio League student membership subscription and tuition fee of 640 South African Rand. The total package is worth about 1000 Rand which is the equivalent of $143 United States dollars at the current international monetary exchange rate. (SARL News)

**

RADIO IN SPACE: FIRST EVER ORBITING OF AN ASTEROID ACHIEVED BY RADIO

For the first time in history, a spacecraft from Earth is in orbit around an asteroid and it is radio that has made it happen.

On Monday, July 18th NASA confirmed that its Dawn spacecraft was captured into orbit around the massive asteroid Vesta after a multi-million-mile journey. The entry into orbit occurred while the spacecraft's antenna was pointed away from Earth, so mission controllers had to wait for Dawn to re-establish radio contact to confirm its success.

The capture was estimated to have occurred at 1 a.m on Friday, July 15th when Dawn was 9,900 miles from Vesta and 117 million miles from Earth. According to researchers at the Let Propulsion Laboratory in Pasadena, California, this put the intercept inside of the main asteroid belt between Mars and Jupiter.

NASA said that after the orbital capture, Dawn sent an initial close-up image taken of the asteroid for navigation purposes. The spacecraft is now being prepared to begin a study of a surface that may date to the earliest era of the solar system, of which Vesta is believed to be a part of. Before the Dawn mission, images of Vesta were obtained by ground- and space-based telescopes but did not show much surface detail. (NASA, Science OnLine)

**

HAM RADIO IN SPACE: CELEBRATING THE FINAL US SPACE SHUTTLE FLIGHT

N4S was the callsign of the special events station that was on the air to celebrate the final flight of the United States Space Shuttle program. Operating from a location not far from the Cape Canaveral launch facility, N4S was on the air from launch through landing of the space ship Atlantis on the STS-135 and final mission of the space shuttle program. Take a listen:

--

Audio of contact. Hear it by downloading the MP3 file of this weeks newscast at www.arnewsline.org.

--

That was recorded here at the Newsline studio on a dipole antenna on a day with pretty poor propagation. N4S used CW, SSB and PSK on 40, 20 and 15 meters along with D-Star using the KJ4OXT repeater.

Those who made contact with N4S are eligible to receive a special commemorative certificate in exchange for their QSL. Send QSL's along with an 8.5 x 11 inch self addressed stamped envelope to the North Brevard Amateur Radio Club, P O Box 1033, Mims, Florida, 32754 (AA4MI)

**

HAM RADIO IN SPACE: ISS AND ATLANTIS CAUGHT IN DAYLIGHT VIDEO

And speaking about the final shuttle mission, an amateur astronomer named Scott Ferguson has successfully captured video of the space shuttle Atlantis docked to the International Space Station in broad daylight.

Ferguson used a video camera attached to an 8 inch telescope to capture the event. His video was taken about an hour and a quarter after sunrise. Atlantis is the glowing white object at the top of the ISS. You can also clearly see the solar panels on the space station itself, and get a hint of other structures too.

You can watch this rather exciting and historic video and read more about how it was accomplished by taking your web browser to tinyurl.com/iss-in-daylight. (Discover On-Line via KB4KCH)

HAM RADIO IN SPACE: A LOOK BACK AT THE SHUTTLE AMATEUR RADIO EXPERIMENT

Amateur radio has been an active participant on Space Shuttle flights since STS-9 Now that the shuttle program is at an end, Newsline Producer Bill Pasternak, WA6ITF, takes a quick look back at how the shuttle took manned ham radio into space:

--

Audio of W5LFL first CQ approaching the US Pacific coast. Hear it by downloading the MP3 file of this weeks newscast at www.arnewsline.org.

--

That's what it sounded like on my Icom IC-2AT in the courtyard of the old Metromedia Square building in Hollywood, California that winter evening in 1983 as Astronaut and Mission Specialist Owen Garriott, W5LFL, streaked across the nighttime sky at close to 135 nautical miles above me in the space ship Columbia.

Dr. Garriott was fulfilling a dream that he'd had since before his first trip to orbit aboard Spacelab several years earlier. That was to take a ham radio station with him into space. Now, thanks to some assistance from the late NBC Newsman Roy Neal, K6DUE, the blessings of then NASA Administrator Jess Moore, and an amazing flying machine called the Space Shuttle, it had come to pass.

His first CQ from orbit brought thousands of responses, but the one that he heard best and who became the first United States ham to contact W5LFL was Lance Collister, then WA1JXN, now W7GJ, of Frenchtown Montana. The QSO between the two hams lasted only a few seconds during which ham radio history was made:

--

First QSO betweek W5LFL/space mobile and WA1JXN in Montana. Hear it by downloading the MP3 file of this weeks newscast at www.arnewsline.org.

--

To get on the air from Columbia Dr. Garriott used a commercial handie talkie that had been modified and programmed for operation on several ham radio frequencies. To get signals out of and back into the orbiting spaceship W5LFL used a specially-designed cavity antenna engineered to fit a specific shuttle window and was held in place with Velcro binders. The antenna, designed by members of the Johnson Space Center Amateur Radio Club was roughly 24 inches in diameter and looked somewhat like a large aluminum cake pan with a piece of coaxial cable running from it to connect it to the hand-held transceiver.

Knowing the number of QSO's would be fast and furious a small cassette recorder was attached to the system to log anyone he heard and anyone he talked to.

--

Random QSO space to ground audio. Hear it by downloading the MP3 file of this weeks newscast at www.arnewsline.org.

--
In addition to the random QSO's , Garriott also had some interesting pre-arranged contacts. Among others W5LFL was able to speak with the amateur radio club in his hometown of Enid, Oklahoma and with the Johnson Space Center Amateur Radio Club in Houston Texas whose members had helped develop his flight ham station hardware. He also held QSO's with the late Senator Barry M. Goldwater Goldwater and with Jordan's late King Hussein, JY1.
--

Contact between W5LFL and JY1: Hear it by downloading the MP3 file of this weeks newscast at www.arnewsline.org.
--
Dr. Garriott's ham radio adventure on STS-9 ushered in a host of outstanding outreach activities that in following years that put ham radio onto almost every shuttle mission. It also lead to the creation of the Shuttle Amateur Radio Experiment or SAREX program. This was the ground breaking alliance between the ARRL, AMSAT and NASA that over the years enabled astronauts on-orbit to make contact with thousands of school kids as well as to their own families back on Earth. And not only using FM voice. Soon both slow scan Amateur television and packet messaging were a part of SAREX as well. Eventually SAREX went from the Shuttle Amateur Radio Experiment to be renamed the Space Amateur Radio Experiment and then to ARISS - Amateur Radio on the International Space Station. Today, Earth to space station contacts are almost routine. More modern equipment and external antennas in the International Space Station make signals both ways a lot stronger than they were back in 1983 when Dr. Owen Garriott, W5LFL, called that first CQ from the space ship Columbia and ushered in the era of manned ham radio in space. Looking back over the years of ham radio operations from the United States Space Shuttle, I'm Bill Pasternak, WA6ITF, in the Newsroom in the City of Angels.

--

In all there were five videos made chronicling ham radio on board the United States space shuttles. They live on as a lasting reminder of manned amateur radios first steps into space. (ARNewsline(tm))

**

DX

In DX, NQ6K will be active as stroke VY0 from Devon Island in the Canadian high Arctic through August 5th. The crew will be primarily using 20, 15v and 10 meters running PSK31 and RTTY and possibly SSB. Other bands will also be used depending on propagation. Please see devon2011 (dot) nq6k (dot) org for current frequency updates, and contact information.

DD0CW will active from Mongolia as JT1FDB until the first week of August. According to his QRZ.com Web page, he has permission to be active on 160 throgh 6 meters as well as the VHF and UHF bands using all modes, but he prefers CW. QSL via DD0CW.

Some DX slims appear to be on the air. This according to ZL2TZE, informs OPDX that there are pirate stations active claiming to be on Chatham Island using the calls ZL7014 and ZL7PW. ZL2TZE says that there is no current licensed operator with these callsigns listed.

DJ7ZG and DL7AFS will be active as VK9CX from the Cocos Keeling Islands between October 19th and November 9th. No modes or times of operation are yet known. QSL this one via DL7AFS.

Lastly, members of the SV9 DX Team with co-operation of SV5BYR will be active as J45K from Kasos Island during the RSGB Islands on the Air Contest the weekend of July 30th to the 31st. The first team with the equipment will be on the island Tuesday, July 26th. Operations will be on 160 through 2 meters during weekend. QSL via SV9DJO or electronically using Logbook of the World.

(Above from various DX news sources)

**

THAT FINAL ITEM: THE HITCHHIKERS GUIDE TO DXING RADIO PARODY RE-RELEASED

And finally this week, it's been thirty years since former Radio Netherlands Media Network host Jonathan Marks, G8WGN, wrote a parody on international radio broadcasting. One based on his favorite radio series at the time, the Hitch-Hikers Guide to the Galaxy. He called it the Hitchhikers Guide To DX'ing and it was an overwhelming hit when it first aired back in 1980. Heres a quick sample, courtesy of G8WGN:

--

Sample audio from Hitch Hikers Guide to DXing. Hear it by downloading the MP3 file of this weeks newscast at www.arnewsline.org.

--

As Marks writes in his on-line blog, there seemed to be so much to make fun of at the time because of the boring propaganda at the height of the Cold War. According to Marks, several segments of this classic series are now available for download from the Media Network Vintage Vault at jonathanmarks.libsyn.com. The rest says G8WGN, will follow shortly.

Jonathan also invites everyone to browse through other material stored at the Media Network Vintage Vault and he encourages you to share your stories as well. (ARNewsline(tm))

**

NEWSCAST CLOSE

With thanks to Alan Labs, AMSAT, the ARRL, the CGC Communicator, CQ Magazine, the FCC, the Ohio Penn DX Bulletin, Radio Netherlands, Rain, the RSGB, the Southgate News and Australia's WIA News, that's all from the Amateur Radio Newsline(tm). Our e-mail address is Newsline (at) arnewsline (dot) org. More information is available at Amateur Radio Newsline's(tm) only official website located at www.arnewsline.org. You can also write to us or support us at Amateur Radio Newsline(tm), 28197 Robin Avenue, Santa Clarita California, 91350

For now, with Bill Pasternak, WA6ITF, at the editor's desk, I'm David Black, KB4KCH, at the South-East bureau in Birmingham, Alabama, saying 73 and we thank you for listening.

So ture.

1907. Why Does Islam Concern With All Creatures Rights ??????????

Newsgroup: rec.radio.amateur.policy
Date: 2011-07-23 13:39:41 UTC
From: bv <bv6bv6bv6@gmail.com>
Message-ID: <d770d9c6-98ac-4935-af5f-5c146e55dce0@cq10g2000vbb.googlegroups.com>
Source record: 246178

Why Does Islam Concern With All Creatures Rights

Why Does Islam Concern With All Creatures Rights Since the creator is the most merciful , he doesn’t leave his creatures Without a law that guarantees their rights and protects their safety. this law is the true religion revealed by the Almighty. this religion has a great effect on the all aspects of life for those who adhere it. each one is protected & honored by this divine religion. Likewise, people's rights- regardless of their sex, position, religion & age-are respected. these rights are ensured in the Nobel Quran and in the sayings of Allah's Apostle peace and blessings be upon him. As an example not as restriction ,the following verses and prophet sayings will be mentioned: The right of parents: God says"Your Lord has decreed that you worship non but Him, and that (you show) kindness to parents. Should one or both of them attain to old age with you, Say not "Fie'' unto them nor repulse them, but speak unto them a gracious word. And lower unto them the wing of submission through mercy and say: My Lord! Have mercy on them both as they did care for me when I was little. Your Lord is best aware of what is in yourselves. If you are righteous, then Lo! He was ever forgiving unto those who turn unto Him)" the rights of old and young, the prophet says: " He is not of us who does not have mercy on young children, nor honor the elderly" The right of orphans is to treat them kindly and justly ,the prophet says: ''The best Muslim house is that in which is an orphan, who is benefited; and the worst Muslim house is that in which an orphan is ill-treated" and he appreciates the one who esteems the daughters rights ;the prophet says"' Whoever has a daughter, and does not bury her alive or scold her, or prefer his male children to her, may God bring him into Paradise" one of the main rights in islam is to respect man's property and his blood, prophet says' man's property is as sacred as his blood" In this divine LAW, non-believers must be protected ,Allah's Apostle says : "he who hurts a covenanted man hurts me .and he who hurts me hurts God" Furthermore, animals' rights should be respected, otherwise ,we would deserve God's punishment, The prophet says : "A woman was punished (by God) because of a cat. She had not provided (the cat) with food or drink, nor had she set it free so that it might eat the insects of the earth" The arousing question is why does islam concern with all creatures rights? 1- It is an evidence for "islam divine source" God wants us to live the" perfect life" then , he sends a law as a tool for this purpose to protect our rights in this world and to find the complete rest in worshipping Him,that is islam 2- It is an evidence for its noble aim ''building the human civilizations not destruct them'' hundreds of quranic verses and prophet sayings ask us to be kind with other and wipe their

miserable and to be helpful with them , God says "(The righteous are those) who feed the poor, the orphan and the captive for the love of God, saying: 'We feed you for the sake of God Alone; we seek from you neither reward nor thanks'' Some other verses heighten the position of the positive workers who work for all creatures benefits, prophet says: "All creatures are like a family (Ayal) of God: and he loves the most those who are the most beneficent to His family". and in the contrary, God censures those who ruin anything around them, he says: '" Work not confusion in the earth after the fair ordering (thereof). and call on Him in fear and hope. Lo! the mercy of Allah is nigh unto the good'"' ',and we are encouraged by this divine law to build ,to feed , to product, and to farm ,the prophet says :''if a Muslim plants a tree or grows a crop from which a bird or a man or an animal eats ,it will be considered (by God)as a charitable act''' 3- It is an evidence for "its conformity" with the human pure nature, it is impossible to find any command from Islamic commands contradicts with the human pure nature cause both of islam and human pure nature come from the same source ''the Almighty God'' for example the big sins in islam are disapproved by reasonable thinking, the Prophet Muhammad (peace be upon him) said, '' avoid the seven destructive sins : associating partners with God ,magic ,murder, usury, eating the orphans property , escaping from battle, and slandering chaste heedless women" the one who creates us is the best one who knows what is good & what is bad.Similary, Allah doesn't ask man to do that which he cannot.or which contradicts his nature .God says" So set thy purpose (O Muhammad) for religion as a man by nature upright - the nature (framed) of Allah, in which He hath created man. There is no altering (the laws of) Allah's creation. That is the right religion, but most men know not''.

+ ARRL Board of Directors Holds 2011 Second Meeting

The ARRL Board of Directors met July 15-16. Highlights of the meeting
include:
* After hearing a comprehensive progress report, the Board
authorized the staff to continue planning to publish an electronic
edition of _QST_ as a benefit to ARRL members at no additional
charge.
* Committees were created to review the ARRL Band Plans for the
amateur bands between 902-3500 MHz, to plan the program of
activities for the ARRL's Centennial in 2014 and to seek input
from youth and others to improve outreach to young Americans.
* The Board welcomed the opportunity for ARRL involvement in the
Seventh World Radiosport Team Championship, to be held in New
England during the ARRL's Centennial Year.
* The Board accepted a recommendation to change the name of the RTTY
```

DXCC Award to Digital DXCC.

A more detailed report of the meeting will be distributed when the minutes are released. If you would like to receive a copy of the minutes via e-mail, please go to "Edit your Profile" on the ARRL website, click on "Edit Email Subscriptions" and check the box labeled "ARRL Board meeting agendas and minutes." The minutes will also be available for download from the website in the coming days.
+ _Amateur Radio in Space_: NASA's Space Shuttle Program Comes to an End

The space shuttle _Atlantis _lands for the final time at NASA's Kennedy Space Center in Florida. Click here for a larger image. [Photo courtesy of NASA]

As _Atlantis_ once again touched the Earth in Florida on Thursday, July 21, an era came to an end. This era saw dreams realized when men and women could go into space on a craft -- the space shuttle -- that could be used again and again. NASA's space shuttle fleet has set dreams aflight since its first launch on April 12, 1981, starting with _Columbia_ and continuing with _Challenger_, _Discovery_, _Atlantis_ and _Endeavour_. These crafts have carried people into orbit repeatedly, launched, recovered and repaired satellites, conducted cutting-edge research and transported materials to help build the largest structure in space, the International Space Station.

Barely 30 months after _Columbia_ first lifted to the skies, radio amateurs around the world were excited about another first: a ham in space. It was 1983 -- the third year of the space shuttle program -- and Mission Specialist Owen Garriott, W5LFL, was on board _Columbia_ for mission STS-9. NASA had given Garriott permission to attempt radio contact with Amateur Radio operators on Earth during his free time. Read more here.

+ _Public Service_: ARRL Soliciting Stations to Become Emergency Liaison Stations

During the 2008 hurricane season, ARRL Headquarters instituted a Command-Control-Coordination (C3) operation to support operations taking place in the affected ARRL Sections. One requirement was the need for Headquarters to establish radio links into the affected areas. In the summer -- the height of hurricane season -- 75 meters is noisy and doesn't propagate well during the day and hindered W1AW's reach into these areas. As such, the nets on 40, 75 and 80 meters -- while providing excellent coverage of several hundred miles in the impacted areas -- did not allow W1AW to monitor these frequencies, nor did it permit monitoring of developing conditions that would allow Headquarters staff to maintain a higher level of situational awareness and disaster intelligence necessary for support operations.

ARRL West Gulf Division Director David Woolweaver, K5RAV, offered his EchoLink system to ARRL during the 2008 hurricane season. Woolweaver

-- who had good propagation into the impacted areas during the tropical events in the Gulf of Mexico area -- established a connection between his home HF equipment and EchoLink. By connecting in to this, W1AW was able to use a direct EchoLink connection to Woolweaver's home station, enabling W1AW to come up on these HF frequencies. With EchoLink, the ARRL was to maintain contact between the affected areas and with the National Hurricane Center and VoIP Hurricane Net operations.

The need to build out the capability to link HF stations to EchoLink was clear and Woolweaver began to enlist other stations in Texas to develop it. But according to ARRL Emergency Preparedness Manager Mike Corey, W5MPC, it has been an ad hoc effort with known stations with no official standing for emergency communications with the ARRL. Additionally, while a regional capability was developed in a part of Texas, the ARRL needed to have this capability throughout the rest of the country.

The concept of the _Emergency Radio Internet Linking System_ (ERILS) was crafted to meet this need, with ERILS stations operating under the ARRL Emergency Preparedness Program. Stations would be designated Official ERILS Stations after meeting specific criteria that would enable them to blend the capabilities of radio and the Internet, permitting emergency communications and a W1AW presence to occur. Stations would be geographically diverse, providing redundant pathways into multiple areas of the United States. While EchoLink was used successfully in 2008, other current and future software platforms could be used with traditional RF capabilities to meet the mission needs.

"Individual stations are the key component of ERILS," Corey explained. "These stations require a particular designation for planning and response purposes, and as recognition of the station owner's resources and commitment. These stations are designated as an _Emergency Liaison Station_. An ELS is not an Official Emergency Station (OES) that is part of the ARES® program, but is a separate resource available to the Emergency Preparedness Manager, or designees, and the ARRL Leadership." To find out more, including information on your station can be part of the ELS program, click here.
+ One Ham Killed, Another Seriously Injured in Tower Accident

Hot Springs is located in the southwest corner of the state, about an hour's drive south from Rapid City.

As a group of South Dakota hams were dismantling a 110 foot tower outside of Hot Springs on Saturday, July 16, a gust of wind toppled the final section, trapping two local hams underneath. Tim Anderson, K0OR, 54, and Tom Embree, NC0K, were transported to Rapid City Regional Hospital via helicopter, where Anderson died of his injuries. Embree underwent surgery on Sunday and Wednesday; he remains in serious condition. Both are members of the Hot Springs Amateur Radio

Club; Anderson was the club's president. Hot Springs is located about 57 miles south of Rapid City. Read more here.
Ad
+ Newly Licensed Hams Help with Search for Missing California Man

Derrick Rush Rush vanished when he fell off his inner tube in the Kern River about 50 miles northeast of Bakersfield.

After Derrick Rush -- a 28 year old state corrections officer from Arroyo Grande, California - disappeared on July 9, several state agencies and volunteers began searching for him. According to reports, Rush vanished when he fell off his inner tube in the Kern River about 50 miles northeast of Bakersfield. Clayton Cullen, KJ6PYC, and his son CJ Cullen, KJ6PYD, of Paso Robles, joined the search efforts on July 13. Three days later, CJ spotted Rush's lifeless body floating by in the river and used his handheld transceiver to report it. His father was able to secure the body farther down the river. Read more here.
Solar Update

The Sun, as seen on Thursday, July 21, 2011 from NASA's SOHO Extreme Ultraviolet Imaging Telescope. This image was taken at 304 Angstrom; the bright material is at 60,000 to 80,000 Kelvin.

Tad "I want to be the one to walk in the Sun" Cook, K7RA, reports: The average daily sunspot numbers for the week rose nearly 27 points to 92.4, while average daily solar flux increased more than 9 points to 98.2. The latest prediction has solar flux values at 100 for July 21-23, 98 on July 24-28, 90 on July 29-August 2, 95 on August 3-7, 98 on August 8, and then back to 100 on August 9-16. The planetary A index for July 21-23 is predicted at 15, 12 and 8, then 5 on July 24-28, 8 on July 29-31, then 10, 8, 5 and 8 on August 1-4, 12 on August 5-7, and back to 8 on August 8-10. Look for more information -- including more about astrophysicist Douglas Biesecker's analysis and critique of predictions for a grand solar minima -- on the ARRL website on Friday, July 22. For more information concerning radio propagation, visit the ARRL Technical Information Service Propagation page. This week's "Tad Cookism" is brought to you by Cyndi Lauper's _Girls Just Want to Have Fun_.

+ _Social Media_: ARRL Launches Online Forums

To assist League members in communicating with one another and with ARRL staff on topics of common interest, the ARRL has established three forums -- Contesting, Awards and Technology -- on the ARRL website. Visit _www.arrl.org/forums_ to chat with fellow hams about these topics. Additional forums are planned once we have gained some experience with these three. ARRL members, guest users and others can view the threads, but in order to participate in the conversations or ask questions, you must be logged in as an ARRL member. All users should read the forum rules before participating.
+ _Social Media_: Connect with ARRL and Amateur Radio via Social Media

ARRL participates on many of the popular social networking sites to share news, photos, events and videos. Check out these sites for communities of ARRL members who share your interests in Amateur Radio. We'll share everything with you -- and you can share with us, too!__

Find Us on Facebook

* _www.facebook.com/ARRL.org_ -- With almost 20,000 fans, the ARRL's Facebook page is the largest Amateur Radio site in social media.
* _www.facebook.com/LogbookOfTheWorld_ -- A nifty way to follow the latest LoTW news. LoTW is an exciting way for radio amateurs to confirm two-way contacts they have made and use the confirmations as credit toward various ARRL awards.

___Follow Us on Twitter_

* _arrl_ -- Find all of the latest information in the Amateur Radio community with this Amateur Radio newsfeed.
* _ARRL_EMCOMM_ -- Interested in Emergency Communications? Then be sure to follow all the latest EmComm and ARES® happenings.
* _ARRL_PR_ -- Geared toward the ARRL Public Information Coordinators and Pubic Information Officers in the League's Field Organization, this Twitter feed focuses on public relations and media issues involving Amateur Radio.
* _ARRL_DXCC_ -- The Twitter home of the ARRL's DXCC awards program.
* _ARRL_Youth_ -- For the young and young-at-heart, this Twitter feed delves into how youth can have fun with Amateur Radio.

___Watch Us on YouTube_

* _www.youtube.com/ARRLHQ_ -- Catch the latest videos from the ARRL - including monthly Product Reviews and event highlights -- on the League's YouTube channel.

Listen to Us on iTunes
* _www.arrl.org/arrlletter/audio/aan.rss_ -- Listen and download the latest ARRL news, uploaded as a podcast to iTunes. Click here for instructions on how to subscribe to this weekly feature.

This Week on the Radio

Go behind the scenes and meet a member of the ARRL HQ staff! This week we feature ARRL Field Organization Supervisor Steve Ewald, WV1X. Click here and scroll down the page to the "Meet the Staff" video box to meet Steve.

This week:
* July 22 -- NCCC Sprint Ladder
* July 24 -- WAB 144 MHz QRO Phone
* July 27 -- SKCC Sprint
* July 27-28 -- CWops Mini-CWT Test

Next week:
* July 29 -- NCCC Sprint Ladder

* July 30-31 -- RSGB IOTA Contest; US Counties QSO Party
* July 31 -- ARS Flight of the Bumblebees
* August 2 -- ARS Spartan Sprint

All dates, unless otherwise stated, are UTC. See the ARRL Contest Branch page, the ARRL Contest Update and the WA7BNM Contest Calendar for more information. Looking for a Special Event station? Be sure to check out the ARRL Special Event Stations Web page.
Upcoming ARRL Section, State and Division Conventions and Events
* July 29-30 -- ARRL Oklahoma State Convention, Oklahoma City, Oklahoma
* August 5-6 -- ARRL Texas State Convention, Austin, Texas
* August 5-7 -- ARRL Rocky Mountain Division Convention, Taos, New Mexico; ARRL Midwest Division Convention, Cedar Rapids, Iowa
* August 20 -- ARRL West Virginia State Convention, Weston, West Virginia
* August 20-21 -- ARRL Alabama State Convention, Huntsville, Alabama
* August 21 -- ARRL Kansas State Convention, Salina, Kansas
* August 28 -- ARRL Western Pennsylvania Section Convention, New Kensington, Pennsylvania
* September 9-11 -- ARRL Southwestern Division Convention, Torrance, California
* September 11 -- ARRL Great Lakes Division Convention, Findlay, Ohio
* September 17 -- ARRL Roanoke Division Convention, Virginia Beach, Virginia
* September 24 -- ARRL Washington State Convention, Spokane Valley, Washington

02/22/06

I informed my wife of some of Roger's/Not Roger's posts of the last twenty-four hours during our ride home this evening. The one he posted (as me) on alt.west-virginia bothered her enough that she insisted that we pay Wiseman a visit to discuss the material he is posting.

We parked our car in front of his home at 6:25 PM. It wasn't quite dark, but the living room lights were on. My wife rang the bell and there was no response. She rang again and we heard footsteps crossing the room. The light shining through the peephole in the door extinguished as Roger peered out, but the door didn't open. He moved away from the door and the light from the living room shone through the peephole again. My wife rang the bell again and said, "Coward" loud enough for anyone inside to have heard. We stood on the porch for another few moments and returned to the car. Neither Roger nor his imaginary friend appeared.

It seems that the unbalanced UnWiseman isn't the bold, fearless type he portrays in his Usenet filth postings.

Roger is a humbug.

Dave K8MN

1994. Visiting Porky Corky Davies, the Athens AL kiddie diddler

Newsgroup: rec.radio.amateur.policy
Date: 2011-07-26 00:37:35 UTC
From: Lardass Lloyd <lardass.lloyd.davies@gmail.com>
Message-ID: <fb85a234-7fdd-4cd5-819a-241ba144f96a@glegroupsg2000goo.googlegroups.com>
Source record: 246365

I happened to be traveling through Huntsville, Alabama early this morning, I decided to stop in Athens and see just how tough Lloyd Davies was going to act when he saw me in person.

Many of you know that a few years ago, Lloyd got smart with several people in the Deja Newsgroup (now Google) and I issued a challenge to him. I told him I would be attending the Dalton, Ga. Hamfest if he wanted to continue the conversation. He said he would be there and he was going to kick my ass.

Well, Lloyd was a no-show and continued the verbal assault on the newsgroups. He always talks tough behind his keyboard. And, I understand he is now doing the same sort of thing on the NIM Busters Board.

Well, about 8.35 this morning (December 23, 2004) I located his apartment in a nasty looking section of town. I'm a pretty good sized man, but I put my gun in my back waistband after exiting the car. I located his apartment and knocked on the door. The doorbell was missing and bare wires were sticking out of the wall. I heard someone say I'm coming and shortly the door opened with a safety chain lock still engaged. He asked what I wanted and I introduced myself and asked if we could have a conversation. He turned white as a sheet and attempted to slam the door, but I already had a foot wedged in the opening. He started shaking uncontrollably and was shouting leave me alone, leave me alone! I told him he didn't seem so tough now face to face and then noticed a putrid odor of urine and he was pissing his pants and crying like a baby. Please leave me alone Oris he said, I was just having fun and meant no harm, please leave, please. I could see the filthy floor of this apartment and the dirty floors and the stench of a grown man pissing on himself were almost enough to make me want to vomit, and I don't have a queasy stomach. Upon telling him that this time he would escape a ass kicking and not to ever get a smart mouth with me again and a verbal yes from him, I departed. That apartment complex looked like a crackhouse, niggers everywhere, filthy grounds and stairwells. Junk cars everywhere and garbage overflowing the garbage cans.

This Lloyd is nothing more than white trash that delivers pizzas and could afford to take a trip out of town if the ticket cost $5.00.

I'm sending this to a friend who despises Lloyd Davies and he wanted to post it for everyone to see just what kind of chickenshit asshole this Davies really is.

Oris Grim

The word is spelled "regrettable", you blithering idiot! What IS
regrettable is that you're so fucking stupid you can't see that NOBODY
in the ham community give a flying fuck about you or what you think.

KB9RQZ, you're a FOOL !

Mark is a known jammer. Laura knows he sent false distress signals,
but she just can't prove it.

Mark is known by the amateur radio community as a complete idiot.

==> + PUBLIC SERVICE: NEW MEXICO HAMS PROVIDE COMMUNICATIONS SUPPORT
DURING WILDFIRES
```

One month after it began, the Las Conchas Fire -- New Mexico's largest fire on record -- has burned more than 157,000 acres and is 90 percent contained. One day after it started, the fire threatened the Los Alamos National Laboratory, forcing the evacuation of the entire town of Los Alamos. During the evacuation, the Santa Fe ARES® Group placed itself on alert. The fire, which began on June 26, is believed to have been human set. Read more here <http://www.arrl.org/news/new-mexico-hams-provide-communications-support-during-wildfires>.

==> + ARRL BOARD OF DIRECTORS GATHERS IN CONNECTICUT FOR 2011 SECOND MEETING

The ARRL Board of Directors held its Second Meeting of 2011 July 15-16 in Windsor, Connecticut, under the chairmanship of President Kay Craigie, N3KN. At the two-day meeting, the Board considered a number of reports and acted on several recommendations -- including proceeding with plans for a digital version of QST and planning for the League's Centennial Celebration in 2014 -- and Directors' motions. The ARRL Board of Directors meets twice each year -- in January and July -- usually in the Hartford area. Click here <http://www.arrl.org/news/arrl-board-of-directors-gathers-in-connecticut-for-2011-second-meeting> for a detailed look at the 2011 Second Meeting of the ARRL Board of Directors.

==> FCC NEWS: ARRL ASKS FCC TO KEEP 2300 MHZ PROCEEDING OPEN

In June, the FCC released a Public Notice that sought comments on whether or not it should terminate approximately 800 docketed proceedings in the Wireless Telecommunications Bureau, the International Bureau, the Office of Engineering and Technology and the Enforcement Bureau. Some of the proceedings set for possible termination affect the Amateur Radio Service. On July 20, the ARRL filed comments with the FCC on this matter, explaining that it has no objection to the termination of the proceedings in the Public Notice, save for one item. "With respect to the Office of Engineering and Technology dockets slated for termination," the ARRL stated in its comments, "there is one Amateur Radio-related proceeding that, in the ARRL's view, should not be terminated, but retained in open status." Read more here <http://www.arrl.org/news/arrl-asks-fcc-to-keep-2300-mhz-proceeding-open>.

==> + AMATEUR RADIO IN SPACE: ASTRONAUTS ON BOARD ISS GET ARISSAT-1 READY FOR LAUNCH

The ARISSat-1 satellite -- also known as KEDR -- has spent several months aboard the International Space Station waiting for deployment by crew. According to the AMSAT News Service, that day is arriving soon. "As of July 22, we are looking at an August 3, 2011 date for EVA 29 and the ARISSat-1/KEDR deployment, subject to change due to ISS schedules," said ARISSat-1/KEDR Project Manager Gould Smith, WA4SXM. "The preliminary Russian EVA-29 timeline shows the ARISSat/KEDR deployment is the first task of the EVA, so it will occur fairly soon after the EVA begins." The ARISSat-1/KEDR battery was charged for 24 hours on July 24. A test of the satellite inside the ISS is scheduled to run from 1900 UTC on Saturday, July 30 and will be turned off at 1430 UTC on July 31. Read more here <http://www.arrl.org/news/arissat-1-test-and-launch>.

==> + ON THE AIR: THE BANDS HEAT UP FOR THE 2011 ARRL AUGUST UHF CONTEST

VHF/UHF weak-signal operators across North America are making final tests on their stations in preparation for the 2011 ARRL August UHF Contest <http://www.arrl.org/august-uhf>, scheduled for the weekend of August 6-7. Most VHF+ SSB/CW operation takes place on the two lowest-frequency bands of the VHF spectrum: 6 and 2 meters. But a lot of activity takes place above 144 MHz in the UHF portion of the radio spectrum and beyond. This contest will focus on 220 MHz and above and there will be lots of activity -- and hopefully lots of propagation, too! Read more here <http://www.arrl.org/news/the-bands-heat-up-for-the-2011-arrl-august-uhf-contest>.

==> + ON THE AIR: 2011 ARRL JUNE VHF QSO PARTY SETS RECORD FOR LOGS RECEIVED

The 2011 running of the ARRL June VHF QSO Party <http://www.arrl.org/june-vhf-qso-party> saw a record number of logs submitted. This year, 1243 logs were submitted for this contest, breaking the record set in 2010 of 1202 logs. "Six meters has been in excellent shape for the June VHF QSO Party for four of the past five years," explained ARRL Contest Branch Manager Sean Kutzko, KX9X. "It's clear that when the 'Magic Band' is in great shape at the start of the contest, we see more participation with more logs submitted. As a 6 meter fan, I hope this trend continues in the years to come."

With the exception of 2007, the ARRL June VHF QSO Party has seen upwards of 1000 logs submitted each year since 2006; in 2007, 860 logs were received, down from 1052 the year before. Kutzko said one of the contributing factors to the popularity of the contest is that more HF transceivers now include the 6 meter band: "When hams buy new HF rigs that include 6 meters, we see them having a go on the band -- sometimes for the first time, other times it's like revisiting an old friend from their past. These hams are having a blast on the band and it sure is contagious. When you add that to the improved propagation, it's no wonder we're seeing an upswing in the popularity of 6 meters."

==> + ARRL OFFICIAL OBSERVERS TEAM WITH FCC TO SOLVE ROGUE KEYER PROBLEM ON 17 METERS

On July 15, Walt Bilous, K3DQB -- an Official Observer in ARRL's Eastern Pennsylvania Section -- notified ARRL Headquarters of a keyer continuously sending a series of dits on 18.0855 MHz. According to ARRL Field and Regulatory Correspondent Chuck Skolaut, K0BOG, Bilous kept hearing the dits throughout the night.

Skolaut asked Bilous to alert other OOs to monitor the frequency, but the signal was proving hard to locate via direction finding due to changing propagation and fading conditions on the band. "We alerted OOs across the country to monitor and collect additional information for us including bearings and signal strength reports," Skolaut said. "We had a great response from quite a number of Official Observers." But the signal was still proving elusive, so Skolaut contacted the FCC for assistance. Read more here

<http://www.arrl.org/news/arrl-official-observers-team-with-fcc-to-solve-rogu
e-keyer-problem-on-17-meters>.

==> SOLAR UPDATE

Tad "Say my name, Sun shines through the rain
<http://www.youtube.com/watch?v=klMPhl7NJDg>" Cook, K7RA, reports:
Sunspot activity dipped over this past week, but now is on its way back
up. On July 20, five sunspot groups were visible, but on July 21, only
groups 1251, 1254 and 1259 remained. On July 24, new sunspot group 1260
appeared, but the next day group 1251 disappeared. On July 26, groups
1254 and 1259 went away, and new sunspot group 1261 arrived. The next
day, another new group, 1262, appeared. The average daily sunspot
numbers for the week July 21-27 declined nearly 47 points -- a little
more than 50 percent -- to 45.6. The average daily solar flux declined
more than 6 points to 91.8. The latest forecast shows the predicted
solar flux at 100 on July 28-29, rising to 105 on July 30-31, 110 on
August 1-3, and then dropping back to 95 on August 4-7. It also shows
the planetary A index at 5 on July 28-30, 12 on July 31-August 1, and
7, 5, 8 on August 2-4, followed by 12 again on August 5-7. Geophysical
Institute Prague predicts quiet conditions on July 29, quiet to
unsettled July 30, unsettled July 31 and August 1, then quiet to
unsettled August 2 and quiet again on August 3-4. Look for more
information on the ARRL website on Friday, July 29. For more
information concerning radio propagation, visit the ARRL Technical
Information Service Propagation page
<http://www.arrl.org/propagation-of-rf-signals>. This week's "Tad
Cookism" is brought to you by The Bangles' Eternal Flame
<http://en.wikipedia.org/wiki/Eternal_Flame_%28song%29>.

==> + SOCIAL MEDIA: ARRL LAUNCHES ONLINE FORUMS

To assist League members in communicating with one another and with
ARRL staff on topics of common interest, the ARRL has established three
forums -- Contesting, Awards and Technology -- on the ARRL website.
Visit www.arrl.org/forums <http://www.arrl.org/forums> to chat with
fellow hams about these topics. Additional forums are planned once we
have gained some experience with these three. ARRL members, guest users
and others can view the threads, but in order to participate in the
conversations or ask questions, you must be logged in as an ARRL
member. All users should read the forum rules
<http://www.arrl.org/forum/home/rules> before participating.

It was very clearly a four way mano to mano fuck fest and was repeated several times. It was no
joke. Believe what you will. There were several witnesses in rrap. Whatever. We sucked and fucked and did scat play late into teh night. Markie got jealous that me and Lloydie thought teh Toad made a better toilet that Markie. I mean Markie loved eating our shit allright, but his beard made it filthy and the shit tended to stick to his whiskers. Teh Toad could swollow all we could give him and Markie would lick his face clean, ~with all that implies.

Yes, I hated to see my bois go home, but bois will be bois. I miss my chubby cum buckets !

Amateur Radio Newsline(tm) Report 1772 - July 29 2011

Amateur Radio Newsline report number 1772 with a release date of
Friday, July 29 2011 to follow in 5-4-3-2-1.

The following is a QST. ST0R in the South Sudan comes on the air and
illuminates the world of amateur Radio; ARISSat One is made ready for
deployment from the International Space Station, Portugal to give its
hams the full 6 meter band next April, and 11 year old Kaitlin Cole,
KS3P, is named the Amateur Radio Newsline 2011 Young Ham of the Year.
Find out more on Amateur Radio Newsline(tm) report number 1772 coming
your way right now.

ON THE AIR: ST0R TAKES TO THE AIR FROM THE SOUTH SUDAN

Huge pileups are reported for the ST0R DXpedition to the world's newest
independent country of the Republic of the South Sudan. Online DX News
site dxcoffee.com says the group expects to be on the air on all bands
between 160 and 6 meters, operating mostly in CW, with occasional
shifts to SSB and RTTY. Heres a sample of their SSB operation as
recorded in Aosta, Italy at 19.18 UTC on 25th on 14.145 MHz and
uploaded to YouTube by Radio Chris Italy:

--

20 meter audio. Hear it by downloading the MP3 audio file at
www.arnewsline.org.

--

ST0R is also active on the WARC bands. Ryan Jairam, N2RJ, of Wantage,
New Jersey, caught them on 17 meter SSB the evening of Tuesday, July,
26th:

--

17 meter audio. Hear it by downloading the MP3 audio file at
www.arnewsline.org.

--

The newly-established Republic of South Sudan is also the latest
addition to ham radio DX awards lists. It was added to both the ARRL's
DXCC list and the CQ Countries list as of July 14, its admission date

to the United Nations.
